

world's most fascinating  
brainteasers

# RECENT TOYS

## UK

Welcome to the Recent Toys UK 2017 catalogue which marks our official launch in the UK. Recent Toys International was founded in 2001 and has consistently experienced substantial growth in the US and Europe. We are therefore delighted to present these fascinating and unique brainteaser puzzles and hope you will join us on our new adventure.

We have collaborated with world renowned puzzle inventors to create puzzles with completely original concepts. Our wide range of high quality puzzles cater to all ages and skill levels and are a perfect fit for any gift shop, bookshop or toy store, whether large or small. Additionally, our puzzles offer many educational benefits, supporting S.T.E.M., spatial awareness, strategy and fine motor skills.

You will find that all of our puzzles share three things in common. They are simple to explain, built to last and will challenge you to think in new ways.

We wish you every success for 2017.

Stephen J Woodman  
Managing Director  
Recent Toys UK

# Gear Ball

The amazing Gear Ball is a remarkable piece of puzzle art, with interconnecting gear construction and smooth movement. Twisting in opposite directions, everything moves. Solve the puzzle so that each of the six sides is a different solid colour.

Specifications

Ages 7 and up

MOQ: 6 pcs

EN-71 tested

SKU Code: M5031

BAR Code: 8717278850313

# Pyraminx Deluxe

Uwe Meffert's first puzzle invention is nearly 50 years old, even older than the classic cube puzzles. To celebrate the continued appeal of this puzzle, this special edition is produced in wood.

Prof. Uwe Meffert

REAL WOODEN PANELS!

Specifications

# Brainstring Original

Invented by Recent Toys President, Guido Lap, the Brainstring Original enjoys continued success worldwide. The goal is to untangle the knot inside the puzzle and have only one colour on each opposing pair of sides of the cube. 'Knot' as simple as you think!

## Brainstring Advanced

Taking the original Brainstring to a new level, this puzzle has eight sides and four colours. The challenge remains to completely untangle the strings and so each opposing pair of sides has only one colour cone.

# Braindice

The unique dicey brainteaser that goes mad for maths. Roll the dice and then place them randomly in the holders. Solve the puzzle by turning the eight arms until each collection of dots equals the number on the dice, the corresponding side, that is all six sides! Despite the thousands of variables, the beauty of Brain Dice is that there is always a solution.

## Equal7

This mathematical puzzle has multiple challenges increasing in difficulty, with Equal 7 being the pinnacle. Tilt and tip the cube to move the dice around inside the puzzle, so that the dots on each side total the same when the cube is stood on it's built in feet. Start with 12, then 11, 10 and finally the hardest, all sides total-ling 7.

# IcoSoKu

Place the number buttons on the puzzle, then match the dots, so that each number button equals the total dots surrounding it. To create a new challenge, simply swap some of the number buttons around. Wherever the buttons are placed, there is always a solution.

## IcoSoKu Junior

Designed for the younger puzzler, this mathematics puzzle provides many different challenges to solve. The principles are the same as IcoSoKu, place the number buttons and then match the dots, so they equal the number on each button they surround.

# CrossTeaser

Operating the puzzle from both sides, move a peg into the open space, which will change the prominent colour. Now move another peg into the newly open space. The object of the puzzle is to have all eight pegs the same colour, with the open space in the middle. The puzzle can be solved with each pair of colours.

# Planets

When will the planets next be in alignment? Rotate the individual planets so that each side of the puzzle is one solid colour. But watch out, the ability to move a planet is restricted by its craters, so it is not as simple as it might first appear.

world's most fascinating brainteasers

# Mirrorkal Escher

Take the classic sliding puzzle and by adding mirrors, it takes on a whole new level of complexity. There are two challenges to solve, recreating the painting of Mona Lisa and then a mirror reflecting the puzzler, with a small Mona Lisa in the middle.

## Mirrorkal You and Mona Lisa

Rearrange the nine mirrored cubes in the frame, to create the first of five famous images by artist M.C. Escher. Each move or rotation of a cube will change the picture as the mirrors reflect different extracts of the images. Solve each of the five image puzzles shown.

### Specifications
