Setting Up

19YU-000

Before using the functions of the machine, the environmental conditions must be set in advance. To begin with, check the sequences of flow required to complete the setup, and then perform the actual settings.  **Preparations Required Before Use(P. 4)**

Configuring Initial Settings of the Machine (Setup Guide)

- You can easily configure the initial settings required to use the machine, such as date, time, and network settings, by following the on-screen guidance.  **Setting Up Using the Setup Guide(P. 8)**

Preparations Required Before Use

19YU-002

Set up the machine following steps 1 to 5 in order. For more information about a particular step, click on the link to go to the corresponding section. In addition, to use the machine safely, also check [▶Preventing Unauthorized Access\(P. 6\)](#) .

Step 1

▶Setting Up Using the Setup Guide(P. 8)

Step 2

▶Setting Up the Network Environment(P. 12)

- Configure the network settings that are not included in the Setup Guide. If you do not need to use the Setup Guide, configure the network settings from here.

Step 3

▶Installing Drivers(P. 76)

Step 4

▶Configuring Initial Settings for Fax Functions(P. 77)

Step 5

▶Configuring Scan Settings(P. 82)

TIPS

Setting from the Remote UI

- When the network environment settings are complete, you can efficiently set the machine from a computer using Remote UI. ▶ **Starting Remote UI(P. 427)**

Importing data from another machine to save time

- As long as the model is the same, you can save setting data registered on another Canon printer/multifunction machine to a computer (export) and load the setting data to this machine (import). ▶ **Importing/Exporting the Setting Data(P. 441)**

Preventing Unauthorized Access

19YU-003

This section describes the security measures on how to prevent unauthorized access from the external network. This is a must-read for all users and administrators before using this machine, other printers, and multifunction machines connected to the network. In recent years, a printer/multifunction machine connected to the network can offer you a variety of useful functions, such as printing from a computer, operating from a computer using the remote function, and sending scanned documents via the Internet. On the other hand, it is essential to take security measures to reduce the security risk for information leakage, as a printer/multifunction machine has become more exposed to threats, such as unauthorized access and theft, when it is connected to the network. This section explains necessary settings you need to specify to prevent unauthorized access before using a printer/multifunction machine connected to the network.

Security Measures to Prevent Unauthorized Access from the External Network

- ▶ **Assigning a Private IP Address(P. 6)**
- ▶ **Using Firewall to Restrict Transmission(P. 7)**
- ▶ **Specifying the TLS Encrypted Communication (P. 7)**
- ▶ **Setting PIN to Manage Information Stored in the Multifunction Machine(P. 7)**

Assigning a Private IP Address

An IP address is a numerical label assigned to each device participating in a computer network. A "global IP address" is used for the communication connecting to the Internet, and a "private IP address" is used for the communication within a local area network, such as a LAN in the company. If a global IP address is assigned, your printer/multifunction machine is open to the public and can be accessed via the Internet. Thus, the risk of information leakage due to unauthorized access from external network increases. On the other hand, if a private IP address is assigned, your printer/multifunction machine is closed to a local area network and can be accessed by only users on your local area network, such as a LAN in the company.

Global IP Address

Can be accessed from the external network

Private IP Address

Can be accessed from the users within a local area network

Basically, assign a private IP address to your printer/multifunction machine. Make sure to confirm the IP address, assigned to the printer/multifunction machine you are using, is a private IP address or not. A private IP address is found in one of the following ranges.

■ Ranges for Private IP addresses

- From 10.0.0.0 to 10.255.255.255
- From 172.16.0.0 to 172.31.255.255
- From 192.168.0.0 to 192.168.255.255

For information on how to confirm the IP address, see ▶ **Setting IPv4 Address(P. 30)** .

NOTE

- If a global IP address is assigned to a printer/multifunction machine, you can create a network environment to reduce the risk of unauthorized access by installing security software, such as a firewall that prevents

access from the external networks. If you want to assign a global IP address to and use a printer/multifunction machine, contact your network administrator.

Using Firewall to Restrict Transmission

A firewall is a system that prevents unauthorized access from the external networks and protects against attacks/intrusions to a local area network. You can use a firewall on your network environment to block access from the external network that appears to be dangerous, by restricting communication from specified IP address of the external network. The function installed to a Canon printer/multifunction machine enables you to set up the IP address filter. For information on how to set up an IP address filter, see [▶Specifying IP Addresses for Firewall Settings\(P. 379\)](#) .

Specifying the TLS Encrypted Communication

For information on the TLS Encrypted Communication, see [▶Configuring the Network Security Settings\(P. 376\)](#) , and on the procedures to specify, see [▶Configuring the Key and Certificate for TLS\(P. 388\)](#) .

Setting PIN to Manage Information Stored in the Multifunction Machine

If a malicious third party attempts to gain unauthorized access to a printer/multifunction machine, setting PIN to information stored in the machine will reduce the risk of information leakage. Canon printer/multifunction machine enables you to protect various type of information by setting PIN.

■Setting PIN to Each Function

- Setting PIN for Using Remote UI
For more information, see [▶Setting a Remote UI PIN\(P. 370\)](#) .
- Setting PIN for the System Manager Settings
For more information, see [▶Setting the System Manager ID and PIN\(P. 362\)](#) .
- Address Book PIN
For more information on setting a PIN, see [▶Restricting Use of the Address Book\(P. 413\)](#) .

Listed above are some examples of security measures for preventing unauthorized access. For more information on the other security measures, see [▶Managing the Machine\(P. 359\)](#) and take necessary security measures for preventing unauthorized access to suit your environment.

Setting Up Using the Setup Guide

19YU-004

When the machine is turned on (**▶Turning ON the Machine(P. 110)**) for the first time, the Setup Guide starts up to assist you to configure the initial settings of the machine by following the on-screen guidance. In the Setup Guide, the setting screens are displayed in the following order.

Step 1

Setting the Display Language and the Country or Region

Set the language to be displayed on the operation panel screen or in reports, as well as the country or region where the machine will be used.

- 1 Select a language.
- 2 Select <Yes>.
- 3 Select a country or region.

Step 2

Setting the Date and Time

Adjust the machine's date/time.

- 1 Select a time zone.

NOTE:

What is UTC?

- Coordinated Universal Time (UTC) is the primary time standard by which the world regulates clocks and time. The correct UTC time zone setting is required for Internet communications.

- 2 Enter the date and time, and select <Apply>.

Step 3

Setting the Access Security Measures

Set a PIN to access the Remote UI. Because the Remote UI can be used to change the machine settings from a computer, setting of a PIN is recommended.

- 1 Select <Yes>.
 - If you select <No>, PIN is not set, and the Setup Guide proceeds to step 4.
 - You can also set the access security measure of the Remote UI later. **▶Setting a Remote UI PIN(P. 370)**
- 2 Enter the PIN, and then select <Apply>.
- 3 Enter the same PIN, and then select <Apply>.

Step 4

Performing the Color Adjustment

To achieve good copy quality, adjust the gradation.

- 1 Select <Yes>.
 - If you select <No>, color adjustment is not performed, and the Setup Guide proceeds to step 5.
- 2 Check that the size and type of paper displayed on the screen is loaded in the machine, and select <OK>.
- 3 Confirm the procedure, and select <Start>.

⇒ An adjustment image is printed.

- 4 Open the feeder or the platen cover after the screen displayed during printing is closed.
- 5 Place the printed adjustment image on the platen glass.
 - Place the adjustment image with the print side facing down while checking that the black stripe is placed on the back side of the machine.

- 6 Gently close the feeder or the platen cover.
- 7 Select <Start Scanning>.

⇒ The adjustment image is scanned, and the next adjustment image is printed.
- 8 After scanning and printing are finished, open the feeder or the platen cover and remove the adjustment image.
- 9 Repeat steps 5 to 8.
 - To complete the adjustment, print the adjustment image three times, and scan it each time it is printed.

Step 5

Setting the Wireless LAN

Configure the settings to connect to the network using the wireless LAN.

- 1 Select <Yes>.
 - If you select <No>, wireless LAN is not set, and the Setup Guide is complete, the Home screen appears.
- 2 Select <OK>.
- 3 Select the setting method.
 - For more information about the wireless LAN settings, see **▶Connecting to a Wireless LAN(P. 16)** .

⇒ When the Setup Guide is complete, the Home screen appears.

Setting the Date/Time

19YU-005

Set the date and time for the machine. The date and time are used as the reference for the functions specifying the time, therefore, they need to be set accurately.

- ▶ **Setting the Time Zone(P. 10)**
- ▶ **Setting the Current Date and Time(P. 10)**
- ▶ **Setting the Daylight Saving Time(P. 11)**

Setting the Time Zone

If the time zone setting is changed, the values set in <Current Date/Time Settings> are also changed accordingly.

- 1** Select <Menu> in the Home screen. ▶ **Home Screen(P. 116)**
- 2** Select <Preferences> ▶ <Timer/Energy Settings> ▶ <Date/Time Settings> ▶ <Time Zone>.
- 3** Select the time zone.

NOTE

What is UTC?

- Coordinated Universal Time (UTC) is the primary time standard by which the world regulates clocks and time. Time differences exist depending on the country or area the machine is used. The correct UTC time zone setting is required for Internet communications.

Setting the Current Date and Time

- 1** Select <Menu> in the Home screen. ▶ **Home Screen(P. 116)**
- 2** Select <Preferences> ▶ <Timer/Energy Settings> ▶ <Current Date/Time Settings>.
- 3** Enter the date and time.
 - Tap the entry field, and enter the date and time.

4 Select <Apply>.

IMPORTANT

- Set <Time Zone> before setting the current date and time. If the <Time Zone> setting is changed later, the current date and time are also changed accordingly.

NOTE

- The display format of the date and time can be changed, respectively.
 - ▶<Date Format>(P. 457)
 - ▶<Time Format>(P. 457)

Setting the Daylight Saving Time

If daylight saving time is enabled, specify the dates from which and to which daylight saving time is in effect.

1 Select <Menu> in the Home screen. ▶Home Screen(P. 116)

2 Select <Preferences> ▶ <Timer/Energy Settings> ▶ <Date/Time Settings> ▶ <Daylight Saving Time Settings>.

3 Select <Off> or <On> in <Daylight Saving Time>.

- When you select <On>, select <Start Date> and <End Date>, and set the month and day for each item. To set the day, specify "what day of which week."

4 Select <Apply>.

Setting Up the Network Environment

19YU-006

When connecting the machine to a wired or wireless local area network (LAN), you need to set an IP address unique to the selected network. Select "wired" or "wireless" depending on your communication environment and networking devices. For specific IP address settings, contact your Internet service provider or Network Administrator.

IMPORTANT

- If the machine is connected to an unsecured network, your personal information might be leaked to a third party.

NOTE

- The machine cannot connect to both wired and wireless LANs at the same time.
- The machine does not come with a LAN cable or router. Have them ready as necessary.
- For more information about your networking devices, see the instruction manuals for the devices or contact your manufacturer.

■ Before You Start

Follow these steps to connect the machine to a network.

Check your computer settings.

- Make sure that the computer is correctly connected to the network. For more information, see the instruction manuals for the devices you are using, or contact the device manufacturers.
- Make sure that the network settings have been completed on the computer. If the network has not been set up properly, you will not be able to use the machine on the network, even if you perform the rest of the procedure below.

NOTE:

- Depending on the network, you may need to change settings for the communication method or the Ethernet type (➤ **Configuring Ethernet Settings(P. 50)**). For more information, contact your Internet service provider or Network Administrator.
- To check the MAC address of the machine.
 - **Viewing the MAC Address for Wired LAN(P. 36)**
 - **Viewing the MAC Address and Information for Wireless LAN(P. 37)**

- To connect to an IEEE 802.1X network, see [▶Configuring IEEE 802.1X Authentication Settings\(P. 406\)](#) .

2

Select wired or wireless LAN.

- ▶[Selecting Wired LAN or Wireless LAN\(P. 14\)](#)

3

Connect to a wired or wireless LAN.

- Proceed to the section that corresponds to the setting you selected in step 2.
 - ▶[Connecting to a Wired LAN\(P. 15\)](#)
 - ▶[Connecting to a Wireless LAN\(P. 16\)](#)

4

Set the IP address as necessary.

- At the time of purchase, the machine is set to automatically acquire an IP address. Change this setting if you want to use a specific IP address. ▶[Setting IP Addresses\(P. 29\)](#)

LINKS

- ▶[Configuring Settings for Communication with a Computer\(P. 38\)](#)
- ▶[Configuring the Machine for Your Network Environment\(P. 49\)](#)

Selecting Wired LAN or Wireless LAN

19YU-007

After you decide on wired or wireless LAN to connect the machine to the computer, select wired LAN or wireless LAN using the operation panel. Note that if you change the setting from <Wired LAN> to <Wireless LAN> or vice versa, you will need to uninstall the drivers installed on your computer and then reinstall them. For more information, see the manuals for the relevant drivers on the online manual website.

- 1** Select <Menu> in the Home screen.  **Home Screen(P. 116)**
- 2** Select <Preferences>  <Network>.
 - If the login screen appears, enter the correct ID and PIN.  **Logging in to the Machine(P. 126)**
- 3** Select <Select Wired/Wireless LAN>.
- 4** Select <Wired LAN> or <Wireless LAN>.

LINKS

-  **Setting Up the Network Environment(P. 12)**
-  **Connecting to a Wired LAN(P. 15)**
-  **Connecting to a Wireless LAN(P. 16)**

Connecting to a Wired LAN

19YU-008

Connect the machine to a computer via a router. Use a LAN cable to connect the machine to the router.

1 Connect a LAN cable.

- Connect the machine to a router by using a LAN cable.
- Push the connector in until it clicks into place.

2 Wait for several minutes.

⇒ The IP address is set automatically.

NOTE:

- You can set the IP address manually. [Setting IP Addresses\(P. 29\)](#)

LINKS

[Setting Up the Network Environment\(P. 12\)](#)

Connecting to a Wireless LAN

19YU-009

Wireless routers (or access points) connect the machine to a computer via radio waves. If your wireless router is equipped with Wi-Fi Protected Setup (WPS), configuring your network is automatic and easy. If your networking devices do not support automatic configuration, or if you want to specify authentication and encryption settings in detail, you need to manually set up the connection. Make sure that your computer is correctly connected to the network.

▶ **Setting Up Connection Using WPS(P. 16)**

▶ **Manually Setting Up Connection(P. 17)**

IMPORTANT

Risk of information leak

- Use wireless LAN connection at your own discretion and at your own risk. If the machine is connected to an unsecured network, your personal information might be leaked to a third party because radio waves used in wireless communication can go anywhere nearby, even beyond walls.

Wireless LAN security

- The wireless LAN function of this machine supports WEP, WPA-PSK, and WPA2-PSK. For the wireless security compatibility of your wireless router, see the instruction manuals for your networking devices or contact your manufacturer.

NOTE

Required devices for wireless LAN connection

- The machine does not come with a wireless router. Have the router ready as necessary.

Setting Up Connection Using WPS

When using WPS, two modes are available: push button mode and PIN code mode.

■ Push Button Mode

Find the WPS mark shown below on the package of your wireless router. Also make sure that there is a WPS button on your networking device. ▶ **Setting Up Connection Using WPS Push Button Mode(P. 18)**

■ PIN Code Mode

Some WPS routers do not support the push button mode. If WPS PIN code mode is mentioned on the package or in the instruction manuals of your networking device, set up the connection by entering the PIN code. ➤ **Setting Up Connection Using WPS PIN Code Mode(P. 20)**

NOTE

- If the wireless router is set to use WEP authentication, you may not be able to set up connection using WPS.

Manually Setting Up Connection

When manually setting up a wireless connection, you can either select a wireless router or manually enter the required information. Regardless of the method, make sure that you have the required setup information, including the SSID and network key. ➤ **Checking the SSID and Network Key(P. 28)**

■ Selecting a Wireless Router

Select this setup option if you need to manually set up the connection but want to complete the setup as easily as possible. ➤ **Setting Up Connection by Selecting a Wireless Router(P. 22)**

■ Manually Entering the Setup Information

If you want to specify security settings in detail, such as authentication and encryption settings, manually enter the SSID and network key to set up the connection. ➤ **Setting Up Connection by Specifying Detailed Settings(P. 25)**

LINKS

➤ **Setting Up the Network Environment(P. 12)**

➤ **Selecting Wired LAN or Wireless LAN(P. 14)**

Setting Up Connection Using WPS Push Button Mode

19YU-00A

If your wireless router supports WPS push button mode, you can easily set up a connection with a WPS button.

IMPORTANT

- How to operate the wireless router may vary on each device. See the instruction manuals for your networking device for help.

1 Select <Menu> in the Home screen. ➤ **Home Screen(P. 116)**

2 Select <Preferences> ➤ <Network>.

- If the login screen appears, enter the correct ID and PIN. ➤ **Logging in to the Machine(P. 126)**

3 Select <Wireless LAN Settings>.

- If the <Do you want to enable the wireless LAN?> message is displayed, select <Yes>.

4 Read the message that is displayed, and select <OK>.

5 Select <WPS Push Button Mode>.

6 Select <Yes>.

7 Press and hold the WPS button on the wireless router.

- The button must be pressed within 2 minutes after selecting <Yes> in step 6.
- Depending on the networking device, you may need to press and hold the button for 2 seconds or longer. See the instruction manuals for your networking device for help.

NOTE:

If an error message is displayed during setup

- Select <Close> and return to step 5.

8 Wait until message <Connected.> is displayed.

9 Select <Close>.

Wait several minutes until the IP address and other items are set automatically.

IMPORTANT:

Signal strength

- When more than one wireless router is available for connection, the machine connects to the device with the strongest signal. Signal strength is measured using RSSI (Received Signal Strength Indication).

NOTE:

- You can set the IP address manually. [▶Setting IP Addresses\(P. 29\)](#)
- While the machine is connected to the wireless LAN, the Wi-Fi icon is displayed in the Home screen or the Basic Features screen of each function. [▶Basic Screens\(P. 115\)](#)

NOTE

Reducing power consumption

- You can set the machine to enter <Power Save Mode> based on signals emitted from the wireless router. [▶<Power Save Mode> \(P. 462\)](#)

If the IP address of the machine has changed

- In a DHCP environment, the IP address of the machine may be changed automatically. If this happens, the connection is maintained as long as the machine and the computer belong to the same subnet.

LINKS

Setting Up Connection Using WPS PIN Code Mode

19YU-00C

If your wireless router supports WPS PIN code mode, generate a PIN code with the machine and register the code to the networking device.

IMPORTANT

- How to operate the wireless router may vary on each device. See the instruction manuals for your networking device for help.

From a Computer

1 Access your wireless router from a computer and display the screen for entering a WPS PIN code.

- For more information, see the instruction manuals for your networking device.

From the Operation Panel

2 Select <Menu> in the Home screen. ▶ Home Screen(P. 116)

3 Select <Preferences> ▶ <Network>.

- If the login screen appears, enter the correct ID and PIN. ▶ Logging in to the Machine(P. 126)

4 Select <Wireless LAN Settings>.

- If the <Do you want to enable the wireless LAN?> message is displayed, select <Yes>.

5 Read the message that is displayed, and select <OK>.

6 Select <WPS PIN Code Mode>.

7 Select <Yes>.

⇒ The PIN code is generated and shown on the display.

From a Computer

8 Register the generated PIN code to the wireless router.

- Register the PIN code on the setup screen displayed in step 1.

- The PIN code must be registered within 10 minutes after selecting <Yes> in step 7.

NOTE:**If an error message is displayed during setup**

- Select <Close> and return to step 6.

**From the Operation Panel****9 Wait until the message <Connected.> is displayed.****10 Select <Close>.**

Wait several minutes until the IP address and other items are set automatically.

IMPORTANT:**Signal strength**

- When more than one wireless router is available for connection, the machine connects to the device with the strongest signal. Signal strength is measured using RSSI (Received Signal Strength Indication).

NOTE:

- You can set the IP address manually. ▶ **Setting IP Addresses(P. 29)**
- While the machine is connected to the wireless LAN, the Wi-Fi icon is displayed in the Home screen or the Basic Features screen of each function. ▶ **Basic Screens(P. 115)**

NOTE**Reducing power consumption**

- You can set the machine to enter <Power Save Mode> based on signals emitted from the wireless router. ▶ **<Power Save Mode> (P. 462)**

If the IP address of the machine has changed

- In a DHCP environment, the IP address of the machine may be changed automatically. If this happens, the connection is maintained as long as the machine and the computer belong to the same subnet.

LINKS

- ▶ **Connecting to a Wireless LAN(P. 16)**

Setting Up Connection by Selecting a Wireless Router

19YU-00E

You can search the wireless routers (or access points) available for connection and select one from the display of the machine. For the network key, enter a WEP key or PSK. Before selecting a wireless router, check and write down the required setup information, including the SSID and network key ([▶Checking the SSID and Network Key\(P. 28\)](#)).

NOTE

Security settings

- If the wireless connection is set up by selecting a wireless router, the WEP authentication method is set to <Open System> or the WPA/WPA2 encryption method is set to <Auto> (AES-CCMP or TKIP). If you want to select <Shared Key> for WEP authentication or <AES-CCMP> for WPA/WPA2 encryption, you need to set up the connection using <Enter Manually>. [▶Setting Up Connection by Specifying Detailed Settings\(P. 25\)](#)

1 Select <Menu> in the Home screen. [▶Home Screen\(P. 116\)](#)

2 Select <Preferences> ▶ <Network>.

- If the login screen appears, enter the correct ID and PIN. [▶Logging in to the Machine\(P. 126\)](#)

3 Select <Wireless LAN Settings>.

- If the <Do you want to enable the wireless LAN?> message is displayed, select <Yes>.

4 Read the message that is displayed, and select <OK>.

5 Select <SSID Settings>.

6 Select <Select Access Point>.

▢ The machine starts searching for available wireless routers.

NOTE:

- If a message is displayed telling that access point cannot be found, see [▶Countermeasures for Each Message\(P. 653\)](#) .

7 Select a wireless LAN router.

- Select the router whose SSID matches the one that you have written down, and select <Next>.

NOTE:

To view details of security settings

- Select the wireless LAN router, and select <Details>. To return to the original screen, press .

If your wireless router is not found

- Check whether the machine is properly installed and ready to connect to the network. **Settings Problems(P. 638)**

8 Enter the network key that you have written down.

- Enter the network key, and select <Apply>.
- On how to enter text, see **Entering Text(P. 124)** .

9 Select <Yes>.

NOTE:

If an error message is displayed during setup

- Select <Close>, check whether the network key is correct, and return to step 5.

10 Wait until message <Connected.> is displayed.

11 Select <Close>.

Wait several minutes until the IP address and other items are set automatically.

IMPORTANT:

Signal strength

- When more than one wireless router is available for connection, the machine connects to the device with the strongest signal. Signal strength is measured using RSSI (Received Signal Strength Indication).

NOTE:

- You can set the IP address manually. **Setting IP Addresses(P. 29)**
- While the machine is connected to the wireless LAN, the Wi-Fi icon is displayed in the Home screen or the Basic Features screen of each function. **Basic Screens(P. 115)**

NOTE

Reducing power consumption

- You can set the machine to enter <Power Save Mode> based on signals emitted from the wireless router. **<Power Save Mode> (P. 462)**

If the IP address of the machine has changed

- In a DHCP environment, the IP address of the machine may be changed automatically. If this happens, the connection is maintained as long as the machine and the computer belong to the same subnet.

LINKS

▶ **Connecting to a Wireless LAN(P. 16)**

Setting Up Connection by Specifying Detailed Settings

19YU-00F

If you want to specify the security settings in detail or cannot establish the wireless connection using the other procedures, manually enter all the required information for the wireless LAN connection. Before specifying detailed settings, check and write down the required information, including the SSID, network key, and wireless security protocols. [▶Checking the SSID and Network Key\(P. 28\)](#)

1 Select **<Menu>** in the Home screen. [▶Home Screen\(P. 116\)](#)

2 Select **<Preferences>** ▶ **<Network>**.

- If the login screen appears, enter the correct ID and PIN. [▶Logging in to the Machine\(P. 126\)](#)

3 Select **<Wireless LAN Settings>**.

- If the **<Do you want to enable the wireless LAN?>** message is displayed, select **<Yes>**.

4 Read the message that is displayed, and select **<OK>**.

5 Select **<SSID Settings>** ▶ **<Enter Manually>**.

6 Enter the SSID that you have written down.

- Enter the SSID, and select **<Apply>**.
- On how to enter text, see [▶Entering Text\(P. 124\)](#) .

7 Specify the security settings based on the information that you have written down.

- If you do not need to specify the security settings, select **<None>**.

■Using WEP

1 Select **<WEP>**.

2 Select an authentication method.

<Open System>

Sets open system authentication, which is also called "open authentication."

<Shared Key>

Uses the WEP key as a password.

NOTE:

When <Open System> is selected

- When connecting to a wireless LAN, the machine experiences an authentication error if the shared key authentication is set on the wireless router. If this happens, the machine automatically changes the setting to <Shared Key> and retries the connection.

- 3 Select the WEP key you want to edit.
 - Select the WEP key (1 to 4), and select <Edit>.
 - Up to four WEP keys can be registered.
- 4 Enter the network key that you have written down.
 - Enter the network key, and select <Apply>.
- 5 Select the desired WEP key.
 - Select the WEP key you have edited, and select <Register>.

■ Using WPA-PSK or WPA2-PSK

- 1 Select <WPA/WPA2-PSK>.
- 2 Select an encryption method.

<Auto>

Sets the machine to automatically select AES-CCMP or TKIP to match the setting of the wireless router.

<AES-CCMP>

Sets AES-CCMP as the encryption method.

- 3 Enter the network key that you have written down.
 - Enter the network key, and select <Apply>.

8 Select <Yes>.**NOTE:****If an error message is displayed during setup**

- Select <Close>, check whether the specified settings are correct, and return to step 5.

9 Wait until message <Connected.> is displayed.**10** Select <Close>.

➡ Wait several minutes until the IP address and other items are set automatically.

IMPORTANT:**Signal strength**

- When more than one wireless router is available for connection, the machine connects to the device with the strongest signal. Signal strength is measured using RSSI (Received Signal Strength Indication).

NOTE:

- You can set the IP address manually. ▶ **Setting IP Addresses(P. 29)**
- While the machine is connected to the wireless LAN, the Wi-Fi icon is displayed in the Home screen or the Basic Features screen of each function. ▶ **Basic Screens(P. 115)**

NOTE**Reducing power consumption**

- You can set the machine to enter <Power Save Mode> based on signals emitted from the wireless router. ▶ **<Power Save Mode> (P. 462)**

If the IP address of the machine has changed

- In a DHCP environment, the IP address of the machine may be changed automatically. If this happens, the connection is maintained as long as the machine and the computer belong to the same subnet.

LINKS

- ▶ **Connecting to a Wireless LAN(P. 16)**

Checking the SSID and Network Key

19YU-00H

When manually setting up a wireless connection, you need to specify the SSID and network key of your wireless router. The SSID and network key may be indicated on these networking devices. Check your devices and write down the necessary information before setting up the connection. For more information, see the instruction manuals for your networking devices or contact your manufacturer.

SSID	A name given for identifying a specific wireless LAN. Some other terms used for SSID include "access point name" and "network name."
Network Key	A keyword or password used for encrypting data or authenticating a network. Some other terms used for network key include "encryption key," "WEP key," "WPA/WPA2 passphrase," and "preshared key (PSK)."
Wireless Security Protocols (Authentication/Encryption)	<p>When manually setting up a wireless connection by specifying detailed settings, you need to specify security settings. Check the following information:</p> <ul style="list-style-type: none"> • Security types (WEP/WPA-PSK/WPA2-PSK) • Authentication method (Open System/Shared Key) • Encryption method (TKIP/AES-CCMP)

LINKS

- ▶ **Connecting to a Wireless LAN(P. 16)**
- ▶ **Setting Up Connection by Selecting a Wireless Router(P. 22)**
- ▶ **Setting Up Connection by Specifying Detailed Settings(P. 25)**

Setting IP Addresses

19YU-00J

Connecting the machine to a network requires a unique network IP address. Two versions of IP addresses are available: IPv4 and IPv6. Configure these settings depending on the network environment. To use IPv6 addresses, you need to properly configure the IPv4 address settings.

- ▶ **Setting IPv4 Address(P. 30)**
- ▶ **Setting IPv6 Addresses(P. 33)**

Setting IPv4 Address

19YU-00K

The machine's IPv4 address can be either assigned automatically by a dynamic IP addressing protocol, such as DHCP, or entered manually. When connecting the machine to a wired LAN, make sure that the connectors of the LAN cable are firmly inserted into the ports (**▶Connecting to a Wired LAN(P. 15)**). You can test the network connection if necessary.

- ▶Setting IPv4 Address(P. 30)
- ▶Testing the Network Connection(P. 31)

Setting IPv4 Address

- 1** Select <Menu> in the Home screen. ▶Home Screen(P. 116)
- 2** Select <Preferences> ▶ <Network>.
 - If the login screen appears, enter the correct ID and PIN. ▶Logging in to the Machine(P. 126)
- 3** Select <TCP/IP Settings> ▶ <IPv4 Settings> ▶ <IP Address Settings>.
- 4** Configure IP address settings.

<Auto Acquire>

Select to automatically assign an IP address via DHCP protocol. When <On> is displayed, automatic addressing is enabled.

<Manually Acquire>

Select to configure the IP address settings by manually entering an IP address. In order to select this option, the automatic acquirement must be set to <Off>.

<Check Settings>

Select when you want to view the current IP address settings.

■Automatically assigning an IP address

- 1** Select <Auto Acquire>.
- 2** Select <On> in <Auto Acquire>, and select <Select Protocol>.
- 3** Select <DHCP>.

NOTE:**If you do not want to use DHCP/BOOTP/RARP to assign an IP address**

- Select <Off>. If you select <DHCP> when these services are unavailable, the machine will waste time and communications resources searching the network for these services.

- 4 Check that <Auto IP> is set to <On>.
 - If <Off> is selected, change the setting to <On>.

- 5 Select <Apply>.

NOTE:

- IP addresses assigned via DHCP override the address obtained via Auto IP.

■ Manually entering an IP address

- 1 Select <Auto Acquire>, and select <Off> ► <Apply> in <IP Address Settings (Auto Acquire)>.
- 2 Select <Manually Acquire>.
- 3 Enter <IP Address>, <Subnet Mask>, and <Gateway Address>, and select <Apply>.

5 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE**Checking whether the settings are correct**

- Make sure that the Remote UI screen can be displayed with your computer (► **Starting Remote UI(P. 427)**). If a computer is not available, you can check the connection by using the operation panel (► **Testing the Network Connection(P. 31)**).

When you have changed the IP address after installing the printer driver

- When the MFNP port is used, the connection is maintained as long as the machine and the computer belong to the same subnet; therefore, you do not need to add a new port. When the standard TCP/IP port is used, you need to add a new port. ► **Configuring Printer Ports(P. 42)**

*If you do not know which port is used, see ► **Checking the Printer Port(P. 768)** .

Testing the Network Connection

- 1 Select <Menu> in the Home screen. ► **Home Screen(P. 116)**
- 2 Select <Preferences> ► <Network>.
 - If the login screen appears, enter the correct ID and PIN. ► **Logging in to the Machine(P. 126)**
- 3 Select <TCP/IP Settings> ► <IPv4 Settings> ► <PING Command>.

4 Enter the IPv4 address of another device on the network, and select <Apply>.

▢ If a proper connection has been established, <Received response from the host.> is displayed.

LINKS

- ▶ **Setting IPv6 Addresses(P. 33)**
- ▶ **Viewing Network Settings(P. 36)**
- ▶ **Configuring WINS(P. 60)**

Setting IPv6 Addresses

19YU-00L

The IPv6 addresses of the machine can be configured via the Remote UI. Before setting IPv6 addresses, check the IPv4 address settings ([▶Viewing IPv4 Settings\(P. 36\)](#)). You need to set the correct IPv4 settings to use IPv6 addresses. Note that the scan function that uses the scanner driver or MF Scan Utility is not available in an IPv6 environment. The machine can use the following multiple IPv6 addresses:

Type	Description
Link-local address	An address that is only valid within a subnet or link and cannot be used to communicate with devices beyond a router. A link-local address is automatically set when the IPv6 function of the machine is enabled.
Manual address	An address that is entered manually. When using this address, specify the prefix length and default router address.
Stateless address	An address that is generated automatically using the MAC address of the machine and the network prefix that is advertised by the router. Stateless addresses are discarded when the machine is restarted (or turned ON).
Stateful address	An address obtained from a DHCP server using DHCPv6.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

- 1 Start the Remote UI and log in to System Manager Mode. [▶Starting Remote UI\(P. 427\)](#)**
- 2 Click [Settings/Registration] on the Portal page. [▶Remote UI Screen\(P. 428\)](#)**
- 3 Select [Network Settings] ▶ [IPv6 Settings].**
- 4 Click [Edit].**
- 5 Select the [Use IPv6] check box and configure the required settings.**

**[Use IPv6]**

Select the check box to enable IPv6 on the machine. When not using IPv6, clear the check box.

[Use Stateless Address]

Select the check box when using a stateless address. When not using a stateless address, clear the check box.

[Use Manual Address]

When you want to manually enter an IPv6 address, select the check box and enter the IP address, prefix length, and default router address in the corresponding text boxes.

[IP Address]

Enter an IPv6 address. Addresses that start with "ff" (or multicast address) cannot be entered.

[Prefix Length]

Enter a number that indicates how many bits are available for the network address.

[Default Router Address]

Specify the IPv6 address of the default router as necessary. Addresses that start with "ff" (or multicast address) cannot be entered.

[Use DHCPv6]

Select the check box when using a stateful address. When not using DHCPv6, clear the check box.

6 Click [OK].

7 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE

Checking whether the settings are correct

- Make sure that the Remote UI screen can be displayed with your computer by using the IPv6 address of the machine. **Starting Remote UI(P. 427)**

Selecting settings from the operation panel

- IPv6 settings can also be accessed from <Menu> in the Home screen. ▶<IPv6 Settings>(P. 465)

When you have changed the IP address after installing the printer driver

- You need to add a new port. ▶<Configuring Printer Ports>(P. 42)

LINKS

Configuring Settings for Communication with a Computer

19YU-00S

Specify the protocol and port when operating the machine from a computer via the network. Before configuring the machine for printing or faxing from a computer, perform the basic setup procedures. For more information, see the manuals for the relevant drivers on the online manual website.

- ▶ **Configuring Printing Protocols and WSD Functions(P. 39)**
- ▶ **Configuring Printer Ports(P. 42)**
- ▶ **Setting Up Print Server(P. 46)**

NOTE

- Protocols explained here are rules for delivering document data between a computer and the machine, and can be selected according to intended purposes or the network environment.
- Ports are gateways for passing data between network devices. If a communication failure occurs in the network connection, the port settings may be the cause of the problem.

Configuring Printing Protocols and WSD Functions

19YU-00U

Configure the protocols that are used for printing documents from a networked computer.

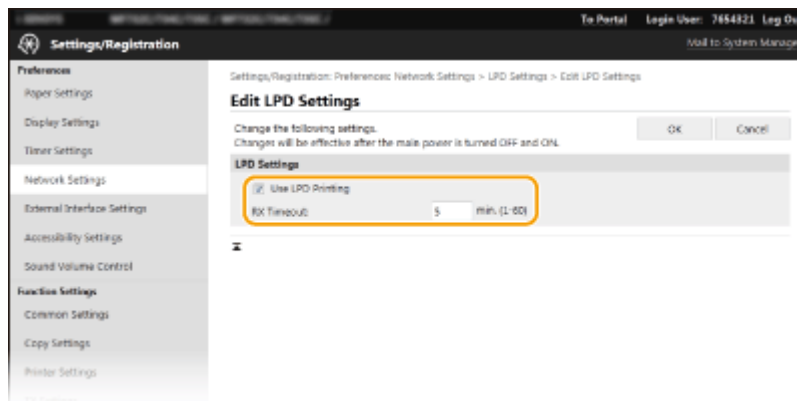

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see **▶Setting Up Menu Options from Remote UI(P. 434)**.

- 1 Start the Remote UI and log in to System Manager Mode. ▶Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ▶Remote UI Screen(P. 428)**
- 3 Click [Network Settings].**
- 4 Configure printing protocols.**

■Configuring LPD or RAW

- 1** Select [LPD Settings] or [RAW Settings] ▶ [Edit].
- 2** Configure the settings as necessary.

[Use LPD Printing]

Select the check box to print via LPD. When not using LPD printing, clear the check box.

[Use RAW Printing]

Select the check box to print via RAW. When not using RAW printing, clear the check box.

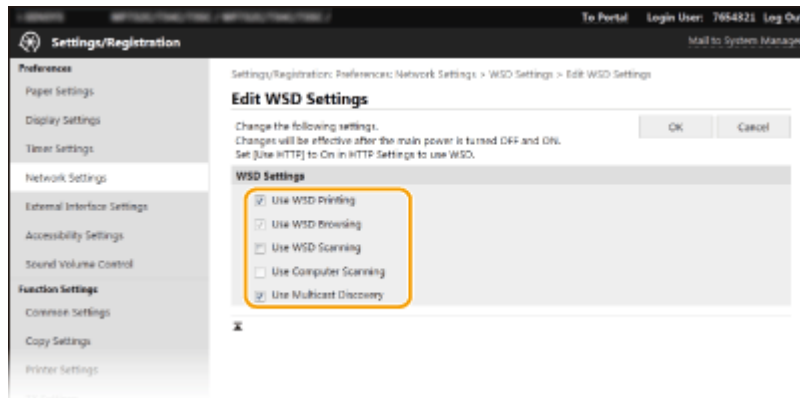

[RX Timeout]

Set a value as the restart wait time for data reception. If data reception does not resume within the set time, printing is canceled.

- 3** Click [OK].

■ Configuring WSD

- 1 Select [WSD Settings] ► [Edit].
- 2 Configure the settings as necessary.

[Use WSD Printing]

Select the check box to print via WSD. When not using WSD printing, clear the check box.

[Use WSD Browsing]

Select the check box to obtain information about the machine from a computer via WSD. This check box is automatically selected when the [Use WSD Printing] check box is selected.

[Use WSD Scanning]

WSD scanning enables you to scan documents to a computer without installing the scanner driver. Select the check box to scan documents via WSD. When not using WSD scanning, clear the check box.

[Use Computer Scanning]

Select the check box to use WSD scanning by operating the machine with the operation panel. This check box can only be selected when the [Use WSD Scanning] check box is selected. To perform scanning, select <Scan> in the Home screen and specify a WSD-connected computer as a scan destination (► **Scanning and Saving to a Computer**(P. 287)).

[Use Multicast Discovery]

Select the check box to set the machine to reply to multicast discovery messages. If the check box is cleared, the machine stays in sleep mode even when multicast discovery messages are flowing on the network.

- 3 Click [OK].

5 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE

Selecting settings from the operation panel

- LPD, RAW, and WSD, settings can also be accessed from <Menu> in the Home screen.
 - <LPD Settings>(P. 467)
 - <RAW Settings>(P. 467)
 - <WSD Settings>(P. 468)

Setting up WSD network devices

- The WSD network devices can be added from the printer folder. Open the printer folder (► **Displaying the Printer Folder**(P. 764)) ► click [Add a device] or [Add a printer] and follow the on-screen instructions. For

more information about how to install the driver for the WSD network, see the manuals for the relevant drivers on the online manual website.

To change the port number

- The same port number used for the machine and a computer must be used for printing protocol.
 - ▶ **Configuring Printer Ports(P. 42)**
 - ▶ **Changing Port Numbers(P. 385)**

LINKS

- ▶ **Configuring Printer Ports(P. 42)**

Configuring Printer Ports

19YU-00W

Printing errors can occur when the IP address of the machine has been changed, or when a printer has been added via the Windows printer folder. These errors are typically caused by incorrect printer port settings. For example, an incorrect port number or port type may have been specified. In such situations, your attempt to print fails because the document data cannot reach the machine. To fix this type of problem, configure the printer port settings on the computer.

IMPORTANT

- To perform the following procedure, log in to your computer with an administrator account.

- 1 Open the printer folder. ▶ **Displaying the Printer Folder(P. 764)**
- 2 Right-click the driver icon for this machine, and click [Printer properties] or [Properties].
- 3 Click the [Ports] tab and configure the required settings.

■ Adding a port

If you have changed the IP address of the machine or you have selected an incorrect port while installing a driver from the Windows printer folder, add a new port. There are two types of port: "MFNP Port" and "Standard TCP/IP Port." Select the port type according to your environment.

MFNP Port (only for IPv4 environment)	<p>This is a port that allows the IP address of the machine to be detected automatically. Even if the IP address of the machine is changed, the connection is maintained, provided that the machine and the computer are in the same subnet. You do not need to add a new port every time the IP address is changed. If you are using the machine in an IPv4 environment, you should normally select this type of port.</p> <p>IMPORTANT:</p> <ul style="list-style-type: none"> You can add an MFNP port only when you installed the driver from the provided DVD/CD-ROM, or when you downloaded and installed the printer driver or the fax driver from the Canon website.
---	--

Standard TCP/IP Port	This is a standard Windows port. When you use this type of port, you need to add a new port every time that the IP address of the machine is changed. Select this type of port when you are using the machine in an IPv6 environment and when you cannot add an MFNP port.
----------------------	--

Adding an MFNP port

- 1 Click [Add Port].
- 2 Select [Canon MFNP Port] in [Available port types] and click [New Port].
- 3 Select [Auto Detect] and select the machine when it is detected, and then click [Next].

NOTE:

If the machine is not detected

- Click [Refresh]. If the problem persists, select [IP address] or [MAC address], enter the IP address or MAC address of the machine ([Viewing Network Settings\(P. 36\)](#)) and then click [Next].

- 4 Click [Add] ► [Finish].
- 5 Click [Close].

Adding a standard TCP/IP port

- 1 Click [Add Port].
- 2 Select [Standard TCP/IP Port] in [Available port types] and click [New Port].
- 3 Click [Next].
- 4 Enter the IP address or the DNS name of the machine, and click [Next].
 - The [Port Name] is entered automatically. If necessary, you can change it.

NOTE:

- When the next screen is displayed, follow the instructions on the screen.

*When you select the [Device Type], select [Canon Network Printing Device with P9100] under [Standard].

5 Click [Finish].

6 Click [Close].

■ Changing the port type or number

If the printing protocol (LPD or RAW) has been changed on the machine side (**▶Configuring Printing Protocols and WSD Functions(P. 39)**) or the port number has been changed (**▶Changing Port Numbers(P. 385)**), the corresponding settings on the computer must also be configured. This operation is not needed for WSD ports.

MFNP port

1 Click [Configure Port].

2 Under [Protocol Type], select [RAW] or [LPR], and change the [Port Number].

3 Click [OK].

Standard TCP/IP port

1 Click [Configure Port].

2 Under [Protocol], select [Raw] or [LPR].

- If you selected [Raw], change the [Port Number].
- If you selected [LPR], enter "lp" in [Queue Name].

3 Click [OK].

4 Click [Close].

LINKS

🔗 **Setting Up Print Server(P. 46)**

Setting Up Print Server

19YU-00X

With a print server, you can reduce the load on the computer that you print from. The print server also enables each computer to install the drivers over the network, which saves you the trouble of installing the drivers on each computer by using the provided DVD/CD-ROM. To set up a computer on the network as a print server, configure the settings for sharing the printer.

IMPORTANT

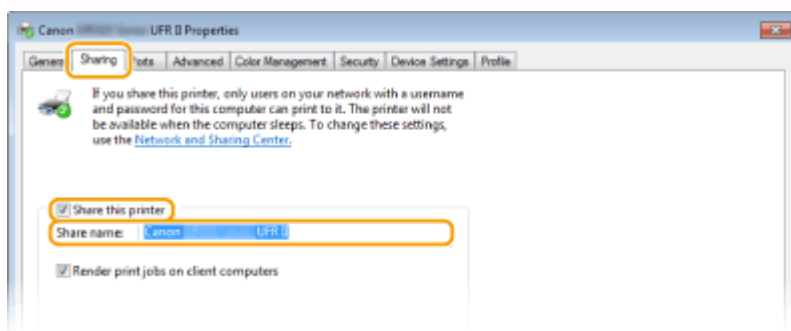

- To perform the following procedure, log in to your computer with an administrator account.
- You may be unable to install drivers over the network depending on the operating system and the bit architecture (32-bit or 64-bit) of the print server and client computers.
- When implementing a print server in a domain environment, consult your Network Administrator.

NOTE

To carry out Department ID Management when using a print server

- "Canon Driver Information Assist Service" must be added during the printer driver installation. For more information, see the manuals for the relevant drivers on the online manual website.

- 1 Open the printer folder. ▶Displaying the Printer Folder(P. 764)**
- 2 Right-click the printer driver icon for this machine and click [Printer properties] or [Properties].**
- 3 Click the [Sharing] tab, select [Share this printer], and enter the share name of the machine.**

NOTE:

- Click the [Change Sharing Options] button if displayed.

- 4 Install additional drivers as necessary.**

- This operation is required if you want to install MF Drivers in other computers running a different bit architecture via the print server.

- 1 Click [Additional Drivers].
- 2 Select the check box for the bit architecture that other computers are running, and click [OK].

- Select additional drivers from the following, according to the operating system of the print server.

Print server	Select the check box for
32-bit operating systems	[x64]
64-bit operating systems	[x86] under [Processor]

NOTE:

- If you do not know whether your Windows operating system is a 32-bit or 64-bit version, see [▶ Checking the Bit Architecture\(P. 766\)](#) .
- 3 Insert the provided DVD/CD-ROM into the drive on the computer, click [Browse] to specify the folder that contains the drivers, and then click [OK].
 - If the print server runs a 32-bit operating system, select [intdrv] ▶ [UFRII] ▶ [uk_eng] ▶ [x64] ▶ [Driver] folders on the provided DVD/CD-ROM.
 - If the print server runs a 64-bit operating system, select [intdrv] ▶ [UFRII] ▶ [uk_eng] ▶ [32bit] ▶ [Driver] folders on the provided DVD/CD-ROM.
 - 4 Follow the on-screen instructions to install additional drivers.

5 Click [OK].

■ Installing the Drivers on a Computer via the Print Server

- 1 Locate the shared printer in the print server. [▶ Displaying Shared Printers in the Print Server\(P. 765\)](#)
- 2 Double-click the shared printer.

3 Follow the on-screen instructions to install the drivers.

Configuring the Machine for Your Network Environment

19YU-00Y

The configuration of a network varies depending on the purpose of the network. The machine has been designed to be compatible with as many network configurations as possible, and it is equipped with a variety of technologies. Consult your Network Administrator and set a configuration to suit your network environment.

- ▶ **Configuring Ethernet Settings(P. 50)**
- ▶ **Changing the Maximum Transmission Unit(P. 52)**
- ▶ **Setting a Wait Time for Connecting to a Network(P. 53)**
- ▶ **Configuring DNS(P. 54)**
- ▶ **Configuring SMB(P. 58)**
- ▶ **Configuring WINS(P. 60)**
- ▶ **Registering LDAP Servers(P. 62)**
- ▶ **Monitoring and Controlling the Machine with SNMP(P. 67)**
- ▶ **Other Network Settings(P. 71)**

Configuring Ethernet Settings

19YU-010

Ethernet is a standard for communicating data in a local area network (LAN). You can set the communication mode and the Ethernet type. In general, the machine can be used without changing the defaults (**>>><Ethernet Driver Settings>(P. 471)**), but you can change these settings to suit your network environment.

1 Select **<Menu>** in the Home screen. **>>>Home Screen(P. 116)**

2 Select **<Preferences>** **>** **<Network>**.

- If the login screen appears, enter the correct ID and PIN. **>>>Logging in to the Machine(P. 126)**

3 Select **<Ethernet Driver Settings>**.

4 Select whether to configure Ethernet settings automatically or manually.

- If auto-detection is enabled, the machine detects and automatically sets the Ethernet communication mode and the type that can be used.

■Configuring Ethernet settings automatically

Select **<On>** in **<Auto Detect>**.

■Configuring Ethernet settings manually

1 Select **<Off>** in **<Auto Detect>**.

2 **<Communication Mode>** **>** select the communication mode.

<Half Duplex>

Alternately sends and receives communication data. Select when the machine is connected to a networking device using half duplex.

<Full Duplex>

Simultaneously sends and receives communication data. Use this setting for most environments.

3 <Ethernet Type> ► select the Ethernet type.

4 Select <Apply>.

5 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

LINKS

► **Changing the Maximum Transmission Unit(P. 52)**

► **Setting a Wait Time for Connecting to a Network(P. 53)**

Changing the Maximum Transmission Unit

19YU-011

In most Ethernet networks, the maximum size of a packet that can be sent is 1500 bytes. A packet refers to a chunk of data into which the original data is divided before being sent. The maximum transmission unit (MTU) may vary on each network. Change the settings of the machine as necessary. For more information, contact your Network Administrator.

1 Select <Menu> in the Home screen.  **Home Screen(P. 116)**

2 Select <Preferences>  <Network>.

- If the login screen appears, enter the correct ID and PIN.  **Logging in to the Machine(P. 126)**

3 Select <TCP/IP Settings>  <MTU Size>.

4 Select the MTU.

5 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

LINKS

 **Configuring Ethernet Settings(P. 50)**

 **Setting a Wait Time for Connecting to a Network(P. 53)**

Setting a Wait Time for Connecting to a Network

19YU-012

When a network is designed to enjoy redundant connectivity with multiple switching hubs or bridges, it must have a mechanism to prevent packets from looping. One effective solution is to define the role of each switch port. However, communication may still be disrupted for several tens of seconds immediately after you change the way that network devices are connected, or if you add a new device. If this type of problem occurs, set a wait time for connecting to the network.

- 1** Select <Menu> in the Home screen.  **Home Screen(P. 116)**
- 2** Select <Preferences>  <Network>.
 - If the login screen appears, enter the correct ID and PIN.  **Logging in to the Machine(P. 126)**
- 3** Select <Wait Time for Conn. at Startup>.
- 4** Enter the waiting time required to start a communication with the network, and select <Apply>.

LINKS

-  **Configuring Ethernet Settings(P. 50)**
-  **Changing the Maximum Transmission Unit(P. 52)**

Configuring DNS

19YU-013

DNS (Domain Name System) provides a service for name resolution that associates a host (or domain) name with an IP address. Configure the DNS, mDNS, or DHCP option settings as necessary. Note that the procedures for configuring DNS are different for IPv4 and IPv6.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

- 1** Start the Remote UI and log in to System Manager Mode. [▶Starting Remote UI\(P. 427\)](#)
- 2** Click [Settings/Registration] on the Portal page. [▶Remote UI Screen\(P. 428\)](#)
- 3** Click [Network Settings].
- 4** Configure DNS settings.

■Configuring IPv4 DNS

- 1** Select [IPv4 Settings] ▶ [Edit].
- 2** Configure IPv4 DNS settings.

a [DHCP Option Settings]

[Acquire Host Name]

Select the check box to enable Option 12 to obtain the host name from the DHCP server.

[DNS Dynamic Update]

Select the check box to enable Option 81 to dynamically update the DNS records through the DHCP server.

[Acquire DNS Server Address]

Select the check box to enable Option 6 to obtain a DNS server address from the DHCP server.

[Acquire Domain Name]

Select the check box to enable Option 15 to obtain a domain name from the DHCP server.

[Acquire WINS Server Address]

Select the check box to enable Option 44 to obtain a WINS server address from the DHCP server.

[Acquire SMTP Server Address]

Select the check box to enable Option 69 to obtain an SMTP server address from the DHCP server.

[Acquire POP Server Address]

Select the check box to enable Option 70 to obtain a POP3 server address from the DHCP server.

b [DNS Settings]

[Primary DNS Server Address]

Enter the IP address of a DNS server.

[Secondary DNS Server Address]

Enter the IP address of a secondary DNS server, if any.

[Host Name]

Enter alphanumeric characters for the host name of the machine that is to be registered to the DNS server.

[Domain Name]

Enter alphanumeric characters for the name of the domain the machine belongs to, such as "example.com."

[DNS Dynamic Update]

Select the check box to dynamically update the DNS records whenever the machine's IP address is changed. When specifying the interval between updates, enter the time in hours in the [DNS Dynamic Update Interval] text box.

c [mDNS Settings]

[Use mDNS]

Adopted by Bonjour, mDNS (multicast DNS) is a protocol for associating a host name with an IP address without using DNS. Select the check box to enable mDNS and enter the mDNS name in the [mDNS Name] text box.

3 Click [OK].

■ Configuring IPv6 DNS

1 Select [IPv6 Settings] ► [Edit].

2 Configure IPv6 DNS settings.

- The [Use IPv6] check box must be selected to configure the settings. ► **Setting IPv6 Addresses(P. 33)**

a [DHCP Option Settings]

[Acquire DNS Server Address]

Select the check box to enable Option 23 to obtain a DNS server address from the DHCP server.

[Acquire Domain Name]

Select the check box to enable Option 24 to obtain a domain name from the DHCP server.

b [DNS Settings]

[Primary DNS Server Address]

Enter the IP address of a DNS server. Addresses that start with "ff" (or multicast address) cannot be entered.

[Secondary DNS Server Address]

Enter the IP address of a secondary DNS server, if any. Addresses that start with "ff" (or multicast address) cannot be entered.

[Use Same Host Name/Domain Name as IPv4]

Select the check box to use the same host and domain names as in IPv4.

[Host Name]

Enter alphanumeric characters for the host name of the machine that is to be registered to the DNS server.

[Domain Name]

Enter alphanumeric characters for the name of the domain the machine belongs to, such as "example.com."

[DNS Dynamic Update]

Select the check box to dynamically update the DNS records whenever the machine's IP address is changed. To specify the type(s) of addresses you want to register to the DNS server, select the check box for [Register Manual Address], [Register Stateful Address], or [Register Stateless Address]. To specify the interval between updates, enter the time in hours in the [DNS Dynamic Update Interval] text box.

G [mDNS Settings]

[Use mDNS]

Adopted by Bonjour, mDNS (multicast DNS) is a protocol for associating a host name with an IP address without using DNS. Select the check box to enable mDNS.

[Use Same mDNS Name as IPv4]

Select the check box to use the same mDNS name as in IPv4. To set a different name, clear the check box and enter the mDNS name in the [mDNS Name] text box.

3 Click [OK].

5 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE

Selecting settings from the operation panel

- DNS settings can also be accessed from <Menu> in the Home screen.  <DNS Settings>(P. 466)

LINKS

Configuring SMB

19YU-014

Server Message Block (SMB) is a protocol for sharing resources, such as files and printers, with more than one device in a network. The machine uses SMB to store scanned documents into a shared folder. Depending on your network, you may have to set the NetBIOS name and workgroup name.

NetBIOS Name

In a Windows network that uses NetBIOS, NetBIOS names are used for identifying network-connected computers as well as for file sharing and other network services. Most computers use the computer name as the NetBIOS name.

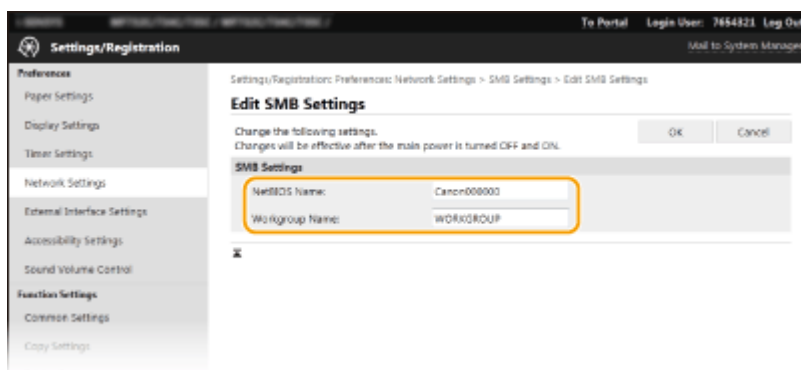

Workgroup Name

Workgroup name is a name for grouping multiple computers so that basic network functions, such as file sharing, become available in a Windows network. Specify the workgroup name to identify the group that the machine belongs to.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#).

- 1 Start the Remote UI and log in to System Manager Mode. ▶Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ▶Remote UI Screen(P. 428)**
- 3 Select [Network Settings] ▶ [SMB Settings].**
- 4 Click [Edit].**
- 5 Specify the required settings.**

[NetBIOS Name]

Enter alphanumeric characters for the NetBIOS name of the machine.

[Workgroup Name]

Enter alphanumeric characters for the name of the workgroup that the machine belongs to.

IMPORTANT:

- NetBIOS names or workgroup names that start with an asterisk (*) cannot be registered to a WINS server.

6 Click [OK].

7 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

LINKS

▶ **Configuring WINS(P. 60)**

Configuring WINS

19YU-015

Windows Internet Name Service (WINS) is a name resolution service that associates a NetBIOS name (a computer or printer name in an SMB network) with an IP address. To enable WINS, the WINS server must be specified.

IMPORTANT

- In order to specify WINS server settings, NetBIOS name and workgroup name are required to be set. [▶ Configuring SMB\(P. 58\)](#)
- The function is not available in an IPv6 network.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

- 1 Start the Remote UI and log in to System Manager Mode. [▶Starting Remote UI\(P. 427\)](#)**
- 2 Click [Settings/Registration] on the Portal page. [▶Remote UI Screen\(P. 428\)](#)**
- 3 Select [Network Settings] ▶ [WINS Settings].**
- 4 Click [Edit].**
- 5 Select the [WINS Resolution] check box, and specify the required settings.**

[WINS Resolution]

Select the check box to use WINS for name resolution. When not using WINS, clear the check box.

[WINS Server Address]

Enter the IP address of the WINS server.

IMPORTANT:

- If the IP address of the WINS server is obtained from a DHCP server, the obtained IP address overrides the IP address entered in the [WINS Server Address] text box.

6 Click [OK].

7 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE

Selecting settings from the operation panel

- WINS settings can also be accessed from <Menu> in the Home screen.  <WINS Settings>(P. 467)

LINKS

 [Setting IPv4 Address\(P. 30\)](#)

Registering LDAP Servers

19YU-016

If an LDAP server is implemented in the network, you can search the server for fax numbers or e-mail addresses, and then specify them as destinations or register them in the Address Book. Note also that if send function authentication (**LDAP Server Authentication(P. 372)**) is enabled, you must register the server used for authentication. You can register a maximum of five LDAP servers each for searching and for authentication to the machine. Register LDAP servers via the Remote UI.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see **Setting Up Menu Options from Remote UI(P. 434)** .

1 Start the Remote UI and log in to System Manager Mode. ▶Starting Remote UI(P. 427)

2 Click [Settings/Registration] on the Portal page. ▶Remote UI Screen(P. 428)

3 Click [LDAP Server Settings].

4 Click [Register New Server] for [LDAP Server (For Search)] or [LDAP Server (For Authentication)].

- LDAP server registration is separated, with registration either for searching or for authentication. To use an LDAP server for searching for fax and e-mail destinations, register if for searching, and to use it for authenticating sending of e-mail or faxes, register it for authenticating.

NOTE:

To edit registered server information

- Click a text link under [Server Name] for the edit screen.

To delete registered server information

- Click [Delete] on the right of the server name you want to delete ▶ click [OK].

5 Register the LDAP server.

■Register the server used for searches

Register the server for searching for fax, e-mail destinations.

The screenshot shows the 'Register New LDAP Server (For Search)' dialog box. The 'LDAP Server (For Search)' section is highlighted with an orange border. The fields are as follows:

- Server Name: [Text Box]
- Server Address: [Text Box]
- Position to Start Search: [Text Box]
- Use TLS: ☒
- Port Number: 589 (Range: 1-65535)
- Search Timeout: 60 sec (Range: 20-200)
- Login Information: Do Not Use (Dropdown)
- Display Authentication Screen When Searching: ☐
- Use Same Authentication Information as When Send Operation Started: ☒
- User Name: [Text Box]
- Set/Change Password: ☐
- Password: [Text Box]
- Domain Name: [Text Box]
- Confirm TLS Certificate for LDAP Server Access: ☒
- Add CN to Verification Items: ☐

[Server Name]

Enter the name to be assigned to the LDAP server.

[Server Address]

Enter the IP address of the LDAP server or enter alphanumeric characters for the host name of the server (example: ldap.example.com).

IMPORTANT:

[Server Address] and DNS

- To prevent errors from occurring when searching for destinations, make sure to check the following:
 - If the host name is entered for [Server Address], make sure that a DNS server is available in the network.
 - If the IP address is entered for [Server Address], check whether the DNS server supports only forward lookup. If the server supports only forward lookup, select [Do Not Use] or [Use] for [Login Information]. If you select [Use (Security Authentication)], make sure that the DNS server supports reverse lookup.

[Position to Start Search]

Specify the node in the directory information tree (DIT) that you want to start search from. Leaving the text box blank sets the machine to start search from an arbitrary node selected automatically.

- When specifying the node, enter "DC=," followed by a host name (a dot-delimited character string in the Active Directory domain name), and separate each of the entries with a comma. If the domain name is "john.example.com," for example, enter "DC=john,DC=example,DC=com."

[Use TLS]

Select the check box to encrypt communication with the LDAP server using TLS.

NOTE:

- This is enabled only when [Use] or [Use (Security Authentication)] is selected in [Login Information].

[Port Number]

Enter the port number used for communicating with the LDAP server.

[Search Timeout]

Specify how long the machine searches.

[Login Information]

Select [Do Not Use], [Use], or [Use (Security Authentication)] depending on the type of authentication implemented by the LDAP server. When [Use] or [Use (Security Authentication)] is selected, the user name and password must be specified.

[Do Not Use]	Select not to authenticate the machine using the login information.
[Use]	Select to authenticate the machine using the login information.
[Use (Security Authentication)]	Select to use data obtained by Kerberos, a network authentication protocol, for the authentication password. If this setting is selected, the clock of the machine needs to be synchronized with that of the LDAP server.

[Display Authentication Screen When Searching]

Select the check box to require the user to enter the user name and password when a search is requested. If the [Use Same Authentication Information as When Send Operation Started] check box is selected, the user name and password used for authentication when sending faxes or scans are also used here. If the check box is cleared, authentication is carried out using the information entered in [User Name] and [Password].

[Use Same Authentication Information as When Send Operation Started]

Set whether the authentication information when the fax or scan function was used is also used when searching. This check box is normally displayed selected; however, it is only valid when the [Display Authentication Screen When Searching] check box is selected.

[User Name]

Enter the user name of the machine that was registered to the LDAP server.

- When [Use] is selected for [Login Information], enter the user name in the form "(domain name)\(user name)" (example: domain1\user1).
- When [Use (Security Authentication)] is selected, enter the user name only (example: user1).

[Set/Change Password]

To specify or change the password, select the check box and enter alphanumeric characters in the [Password] text box.

[Domain Name]

When [Use (Security Authentication)] is selected for [Login Information], enter alphanumeric characters for the directory tree name in Active Directory (example: example.com).

[Confirm TLS Certificate for LDAP Server Access]

Select the check box to verify the certificate when encrypting communication with the LDAP server using TLS. Also, select the [Add CN to Verification Items] check box as necessary.

■ Registering the authentication server

If the use of the fax and scan functions is restricted, register the server used for authentication.

[Server Name]

Enter the name to be assigned to the LDAP server.

[Server Address]

Enter the IP address of the LDAP server or enter alphanumeric characters for the host name of the server (example: ldap.example.com).

IMPORTANT:

[Server Address] and DNS

- To prevent errors from occurring when searching for destinations, make sure to check the following:
 - If the host name is entered for [Server Address], make sure that a DNS server is available in the network.
 - If the IP address is entered for [Server Address], check whether the DNS server supports only forward lookup. If the server supports only forward lookup, select [Use] for [Login Information]. If you select [Use (Security Authentication)], make sure that the DNS server supports reverse lookup.

[Position to Start Search]

Specify the node in the directory information tree (DIT) that you want to start search from. Leaving the text box blank sets the machine to start search from an arbitrary node selected automatically.

- When specifying the node, enter "DC=," followed by a host name (a dot-delimited character string in the Active Directory domain name), and separate each of the entries with a comma. If the domain name is "john.example.com," for example, enter "DC=john,DC=example,DC=com."

[Use TLS]

Select the check box to encrypt communication with the LDAP server using TLS.

NOTE:

- This is enabled only when [Use] is selected in [Login Information].

[Port Number]

Enter the port number used for communicating with the LDAP server.

[Authentication/Attribute Acquisition Timeout]

Specify how long authentication and attribute acquisition can continue.

[User Name Attribute]

Enter the attribute name, to be compared with a user name entered during authentication, of alphanumeric characters (Example: "sAMAccountName").

NOTE:

- Not required if [Use (Security Authentication)] is selected in [Login Information].

[E-Mail Address Attribute]

Enter the attribute name, to be used for obtaining an e-mail address from the authentication server, of alphanumeric characters (Example: "mail").

[Login Information]

Select [Use] or [Use (Security Authentication)] depending on the type of authentication implemented by the LDAP server.

[Use]	Select to authenticate the machine using the System Manager ID.
[Use (Security Authentication)]	Select to use data obtained by Kerberos, a network authentication protocol, for the authentication password. If this setting is selected, the clock of the machine needs to be synchronized with that of the LDAP server.

[Use System Manager ID]

If [Use] is selected in [Login Information], this specifies whether authentication using the system manager ID is used. To use the system manager ID, select the check box and specify the user name and password for used for authentication. If you deselect the check box, login is anonymous (no user name).

[User Name]

Enter the user name of the machine that was registered to the LDAP server in the form "(domain name)\(user name)" (example: domain1\user1).

[Set/Change Password]

To specify or change the password, select the check box and enter alphanumeric characters in the [Password] text box.

[Domain Name]

When [Use (Security Authentication)] is selected for [Login Information], enter alphanumeric characters for the directory tree name in Active Directory (example: example.com).

[Confirm TLS Certificate for LDAP Server Access]

Select the check box to verify the certificate when encrypting communication with the LDAP server using TLS. Also, select the [Add CN to Verification Items] check box as necessary.

6 Click [OK].**LINKS**

Monitoring and Controlling the Machine with SNMP

19YU-017

Simple Network Management Protocol (SNMP) is a protocol for monitoring and controlling communication devices in a network by using Management Information Base (MIB). The machine supports SNMPv1 and security-enhanced SNMPv3. You can check the status of the machine from a computer when you print documents or use the Remote UI. You can enable either SNMPv1 or SNMPv3, or both at the same time. Specify the settings for each version to suit your network environment and the purpose of use.

SNMPv1

SNMPv1 uses information called "community" to define the scope of SNMP communication. Because this information is exposed to the network in plain text, your network will be vulnerable to attacks. If you want to ensure network security, disable SNMPv1 and use SNMPv3.

SNMPv3

With SNMPv3, you can implement network device management that is protected by robust security features. Note that TLS must be enabled for the Remote UI before configuring SNMPv3 ([▶Configuring the Key and Certificate for TLS\(P. 388\)](#)).

NOTE

- The machine does not support the trap notification feature of SNMP.
- To change the port number of SNMP, see [▶Changing Port Numbers\(P. 385\)](#) .
- SNMP management software, when installed on a computer on the network, enables you to configure, monitor, and control the machine remotely from the computer. For more information, see the instruction manuals for your management software.
- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

- 1 Start the Remote UI and log in to System Manager mode. [▶Starting Remote UI\(P. 427\)](#)**
- 2 Click [Settings/Registration] on the Portal page. [▶Remote UI Screen\(P. 428\)](#)**
- 3 Select [Network Settings] ▶ [SNMP Settings].**
- 4 Click [Edit].**

5 Specify SNMPv1 settings.

- If you do not need to change SNMPv1 settings, proceed to the next step.

[Use SNMPv1]

Select the check box to enable SNMPv1. You can specify the rest of SNMPv1 settings only when this check box is selected.

[Use Community Name 1]/[Use Community Name 2]

Select the check box to specify a community name. If you do not need to specify a community name, clear the check box.

[Community Name]

Enter alphanumeric characters for the name of the community.

[MIB Access Permission]

For each community, select [Read/Write] or [Read Only] for the access privileges to MIB objects.

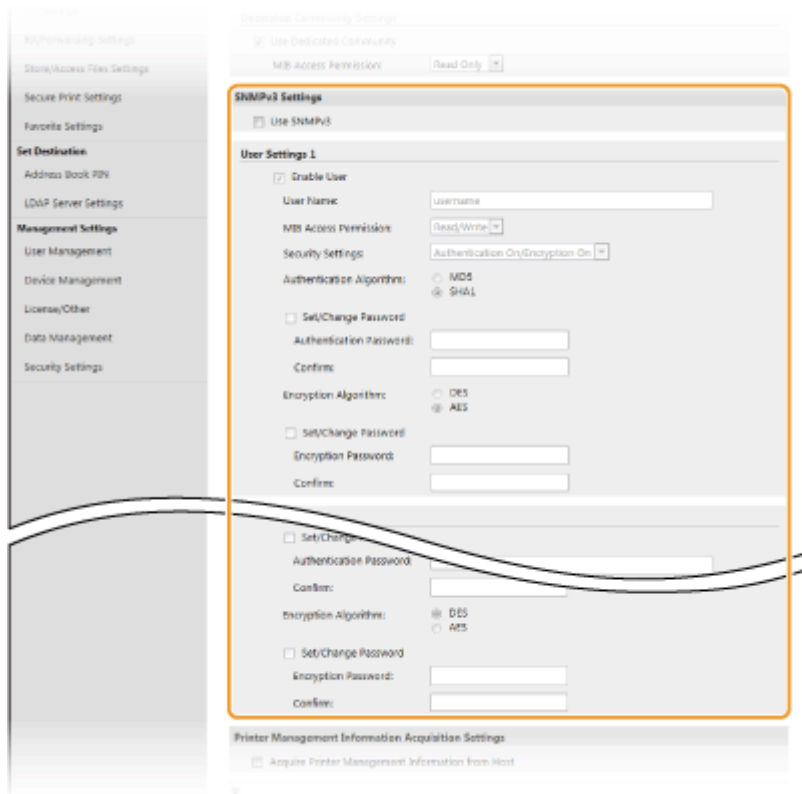

[Read/Write]	Permits both viewing and changing the values of MIB objects.
[Read Only]	Permits only viewing the values of MIB objects.

[Use Dedicated Community]

Dedicated Community is a preset community, intended exclusively for Administrators using Canon software, such as iW Management Console. Select the check box to use Dedicated Community, and specify [MIB Access Permission]. If you do not need to use Dedicated Community, clear the check box.

6 Specify SNMPv3 settings.

- If you do not need to change SNMPv3 settings, proceed to the next step.

**[Use SNMPv3]**

Select the check box to enable SNMPv3. You can specify the rest of SNMPv3 settings only when this check box is selected.

[Enable User]

Select the check box to enable [User Settings 1]/[User Settings 2]/[User Settings 3]. To disable user settings, clear the corresponding check box.

[User Name]

Enter alphanumeric characters for the user name.

[MIB Access Permission]

Select [Read/Write] or [Read Only] for the access privileges to MIB objects.

[Read/Write]	Permits both viewing and changing the values of MIB objects.
[Read Only]	Permits only viewing the values of MIB objects.

[Security Settings]

Select [Authentication On/Encryption On], [Authentication On/Encryption Off], or [Authentication On/Encryption Off] for the desired combination of authentication and encryption settings.

[Authentication Algorithm]

Click the [Authentication On/Encryption On] or [Authentication On/Encryption Off] for [Security Settings] for the algorithm that corresponds to your environment.

[Encryption Algorithm]

Click the [Authentication On/Encryption On] for [Security Settings] for the algorithm that corresponds to your environment.

[Set/Change Password]

To set or change the password, select the check box and enter alphanumeric characters for the password in the [Authentication Password] or [Encryption Password] text box. For confirmation, enter the same password in the [Confirm] text box. Passwords can be set independently for authentication and encryption algorithms.

7 Specify Printer Management Information Acquisition Settings.

- With SNMP, the printer management information, such as printing protocols and printer ports, can be monitored and obtained regularly from a computer on the network.

[Acquire Printer Management Information from Host]

Select the check box to enable monitoring of the printer management information of the machine via SNMP. To disable monitoring of the printer management information, clear the check box.

8 Click [OK].

9 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE

Disabling SNMPv1

- If SNMPv1 is disabled, some of the functions of the machine become unavailable, such as obtaining machine information via the printer driver.

Using the operation panel

- You can enable or disable the SNMP settings from <Menu>. **▶<SNMP Settings>(P. 469)**

Enabling Both SNMPv1 and SNMPv3

- If both versions of SNMP are enabled, it is recommended that MIB access permission in SNMPv1 be set to [Read Only]. MIB access permission can be set independently in SNMPv1 and SNMPv3 (and for each user in SNMPv3). Selecting [Read/Write] (full access permission) in SNMPv1 negates the robust security features that characterize SNMPv3 because most of the machine settings can then be controlled with SNMPv1.

LINKS

- ▶ **Configuring the Key and Certificate for TLS(P. 388)**

Other Network Settings

19YU-018

Configure the following items according to your network environment.

- ▶ **Configuring FTP PASV Mode(P. 71)**
- ▶ **Configuring SNTP(P. 71)**
- ▶ **Monitoring the Machine from the Device Management Systems(P. 72)**

Configuring FTP PASV Mode

PASV is an FTP communication mode used for file transfer. To connect to an FTP server through a firewall, you must use PASV mode. First check that the PASV mode is set on the FTP server.

IMPORTANT

- Whether PASV mode is used for FTP depends on your network environment and the settings on the FTP server to which data is being sent. For more information, contact your Network Administrator.

<Menu> ▶ <Preferences> ▶ <Network> ▶ <TCP/IP Settings> ▶ <Use FTP PASV Mode> ▶ <On>
▶ Restart the machine

Configuring SNTP

Simple Network Time Protocol (SNTP) enables you to adjust the system clock by using the time server on the network. If SNTP is used, the time server is checked at the specified intervals; therefore, the correct time can always be maintained. The time is adjusted based on Coordinated Universal Time (UTC), so specify the time zone setting before configuring SNTP (▶ **Setting the Date/Time(P. 10)**). SNTP settings can be specified via the Remote UI.

NOTE

- The SNTP of the machine supports both NTP (version 3) and SNTP (versions 3 and 4) servers.
- For more information about the basic operations to be performed when setting the machine from the Remote UI, see ▶ **Setting Up Menu Options from Remote UI(P. 434)** .

- 1 Start the Remote UI and log in to System Manager Mode. ▶ Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ▶ Remote UI Screen(P. 428)**
- 3 Select [Network Settings] ▶ [SNTP Settings].**
- 4 Click [Edit].**

5 Select the [Use SNTP] check box and specify the required settings.

[Use SNTP]

Select the check box to use SNTP for synchronization. If you do not want to use SNTP, clear the check box.

[NTP Server Name]

Enter the IP address of the NTP or the SNTP server. If DNS is available on the network, you can enter a host name (or FQDN) of alphanumeric characters instead (example: ntp.example.com).

[Polling Interval]

Specify the interval between one synchronization and the next.

6 Click [OK].

7 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE

Testing communication with the NTP/SNTP server

- You can view communication status with the registered server by clicking [Settings/Registration] ► [Network Settings] ► [Check NTP Server] in [SNTP Settings]. If a proper connection has been established, the result is displayed as shown below. Note that this operation does not adjust the system clock.

Monitoring the Machine from the Device Management Systems

You can facilitate the collection and management of various information about networked devices by implementing device management software, such as iW Management Console*, into the network. Information such as device settings, and error logs is retrieved and distributed via the server computer. If the machine is connected to such a network, iW Management Console searches the network for the machine by using protocols such as Service Location Protocol (SLP) to gather information from the machine, such as power supply status information. SLP settings can be

specified via the Remote UI. This section also describes the procedure to configure settings for communication between the machine and plug-ins for iW Management Console.

*For more information about iW Management Console, contact your local authorized Canon dealer.

NOTE

To use iW Management Console plug-ins

- You need to enable the settings of the dedicated port and the SNMP settings. As for the SNMP settings, set [MIB Access Permission] to [Read/Write] for both SNMPv1 and SNMPv3.

▶<Use Dedicated Port>(P. 470)

▶Monitoring and Controlling the Machine with SNMP(P. 67)

Remote UI Operations

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see ▶Setting Up Menu Options from Remote UI(P. 434) .

■Configuring SLP Communication with Device Management Software

- 1 Start the Remote UI and log in to System Manager Mode. ▶Starting Remote UI(P. 427)
- 2 Click [Settings/Registration] on the Portal page. ▶Remote UI Screen(P. 428)
- 3 Click [Network Settings].
- 4 Specify SLP settings.

■Specifying multicast device discovery

- 1 Select [Multicast Discovery Settings] ▶ [Edit].
- 2 Select the [Respond to Discovery] check box and specify the required settings.

[Respond to Discovery]

Select the check box to set the machine to respond to device management software multicast discovery packets and enable monitoring by device management software.

NOTE:

- To change the port number for multicast discovery, see [▶ Changing Port Numbers\(P. 385\)](#) .

[Scope Name]

To include the machine into a specific scope, enter alphanumeric characters for the scope name.

- 3 Click [OK].

■ Notifying a device management software of the power status of the machine

- 1 Select [Sleep Mode Notification Settings] ▶ [Edit].
- 2 Select the [Notify] check box and specify the required settings.

**[Notify]**

Select the check box to notify a device management software of the power status of the machine. When [Notify] is selected, you can expect the machine to avoid unnecessary communication during sleep mode and reduce the total power consumption.

[Port Number]

Change the port number for this function according to the network environment.

[Number of Routers to Traverse]

Specify how many routers the notification packets can pass.

[Notification Interval]

Specify how often the machine notifies a device management software of its power status.

- 3 Click [OK].

5 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

■ Configuring Settings for Communication between the Machine and Plug-ins

You can specify the settings to enable communication between the machine and iW Management Console plug-ins. Use of plug-ins allows you to manage the machine's settings from iW Management Console.

<Menu> ▶ <Preferences> ▶ <Network> ▶ <Device Settings Management> ▶ <On> ▶ 

Installing Drivers

19YU-019

Install the various drivers and associated software on your computer.

1 Make the necessary preparation before proceeding with the installation.

- Install the optional devices on the main unit in advance. ▶ **Optional Equipment(P. 742)**
- If the machine is supplied with a DVD/CD-ROM, insert the DVD/CD-ROM into the drive on the computer.
- You can download drivers and software you are going to use from the Canon website (<http://www.canon.com/>).

NOTE:

- When new versions of drivers and software become available, they will be uploaded to the Canon website. You can download them as necessary after checking their system requirements.
- Depending on your machine or environmental conditions, some functions may not be available.
- Some of the drivers are not supported depending on the OS. For more information about the supported status of the latest OS, see the Canon website.

2 Proceed with the installation.

- For more information about the installation procedure, see the manuals for the drivers and software you are going to use.

IMPORTANT

- Installation of drivers is impossible if sending and receiving of the IP address are not permitted in [Firewall Settings]. For more information, see ▶ **Specifying IP Addresses for Firewall Settings(P. 379)** .
- If sending and receiving of the IP address of the computer on which drivers are installed become disabled by [Firewall Settings], it is no longer possible to perform printing or send faxes from that printer.

Configuring Initial Settings for Fax Functions

19YU-01A

Follow steps 1 to 4 described below to configure the fax settings. First, determine which receive mode best suits your intended use, and then follow the on-screen instructions to configure the settings. For more information about a particular step, click on the link to go to the corresponding section.

NOTE

- The optional product is required for faxing to use the fax function. [▶System Options\(P. 754\)](#)

Step 1

[▶Deciding Which Fax Receive Mode to Use\(P. 78\)](#)

Step 2

[▶Registering the Fax Number and Unit Name\(P. 79\)](#)

Step 3

[▶Selecting the Receive Mode\(P. 80\)](#)

Step 4

[▶Connecting the Telephone Line\(P. 81\)](#)

Deciding Which Fax Receive Mode to Use

19YU-01C

Before configuring the fax settings, determine which receive mode best suits your intended use.

Intended use	Receive mode	
Use fax only/Never use telephone 	<Auto> This setting is for when you want to use the machine exclusively for receiving faxes, and you do not want to use the telephone.	
Mostly use telephone/Almost never use fax 	<Manual> Connect your telephone to the machine. This setting is for when you mostly want to use the telephone. You can receive incoming faxes manually.	
Use both fax and telephone 	Use answering machine	<Answering Machine> Connect your answering machine. Callers can record a message if they call while you are away from the telephone. The machine automatically receives incoming faxes.
	Use standard telephone	<Fax/Tel (Auto Switch)> Connect your telephone. The machine automatically receives incoming faxes, and the telephone rings for incoming calls.

NOTE

- Depending on the type of telephone connected to it, the machine may not be able to send or receive faxes properly.
- You may be able to manually set a receive mode other than those described above, depending on your country or region. [▶Receiving Faxes\(P. 230\)](#)

» Continue to [▶Registering the Fax Number and Unit Name\(P. 79\)](#)

LINKS

[▶Receiving Faxes\(P. 230\)](#)

Registering the Fax Number and Unit Name

19YU-01E

Register the fax number and unit name of your machine. This information is printed at the top of each page sent from the machine.

- 1** Select <Menu> in the Home screen. Home Screen(P. 116)
 - 2** Select <Function Settings> <Common> <Fax Setup Guide>.
 - 3** Select <Set Up Now>.
 - 4** Select <Next>.
 - 5** Enter the fax number, and select <Apply>.
 - 6** Select <Next>.
 - 7** Enter the unit name (such as a user name or company name), and select <Apply>.
 - On how to enter text, see Entering Text(P. 124) .
 - ➡ When the unit name has been registered, the RX mode setting screen is displayed.
- » Continue to Selecting the Receive Mode(P. 80)

LINKS

Receiving Faxes(P. 230)

Selecting the Receive Mode

19YU-01F

Select the receive mode that suits your intended use beforehand ( **Deciding Which Fax Receive Mode to Use(P. 78)**).

1 Select <Next>.

2 Select the receive mode.

- Select <Yes> or <No> to select the receive mode for the operations you intend to carry out.

NOTE:

- You may be able to manually set a receive mode other than those described below, depending on your country or region.  **Receiving Faxes(P. 230)**

■ To set the receive mode to <Auto>

Select <No>.

■ To set the receive mode to <Answering Machine>

Select <Yes> ► <Yes>.

■ To set the receive mode to <Fax/Tel (Auto Switch)>

Select <Yes> ► <No> ► <Yes>.

■ To set the receive mode to <Manual>

Select <Yes> ► <No> ► <No>.

3 Select <Apply>.

► When the RX mode has been set, the telephone line connection method is displayed.

» Continue to **Connecting the Telephone Line(P. 81)**

LINKS

 **Receiving Faxes(P. 230)**

Connecting the Telephone Line

19YU-01H

Connect the telephone line to the machine.

1 Connect the telephone line to the machine.

- Connect the telephone cable to the telephone line jack on the machine (A) and the telephone line jack on the wall.
- If you are using a telephone or answering machine, connect it to the external telephone jack (B).

NOTE:

- If you are connecting an external telephone with fax functions, set up the telephone to receive faxes manually.

2 Select <End> after the telephone line has been connected.

3 Select <Yes>.

If the machine does not automatically set the type of telephone line

Follow the procedure below to set the type of telephone line. If you are not sure of the type of phone line you are using, contact your local telephone company. <Select Line Type> may not be available depending on the country where you are using the machine.

Preparing to Use the Machine as a Scanner

19YU-01K

To use this machine as a scanner, you must complete preparations in advance, including installation of software to a computer. For more information, see the manuals for the relevant drivers on the online manual website. In Windows, when connecting this machine to a computer via a wireless or wired LAN, you need to register this machine in "MF Network Scanner Selector" using the following procedure. This procedure is not required if the machine and your computer are connected via USB.

IMPORTANT

- The scan function is not available if the machine and your computer are connected in an IPv6 environment. Use IPv4 or a USB connection.

- 1 Click  in the system tray.

- 2 Select the check box for the machine, and click [OK].

Procedure for Setting to Send E-Mail/Send and Receive I-Fax

19YU-01L

Before configuring the machine for scanning to e-mail, check the setup flow shown below.

1

Make sure that the machine and the computer are correctly connected.

▶ **Connecting to a Wireless LAN(P. 16)**

▶ **Connecting to a Wired LAN(P. 15)**

2

Make sure that you have the following information:

- The IP address of the machine. ▶ **Viewing Network Settings(P. 36)**
- An e-mail address to be registered as a destination.
- Information about the e-mail server, including the SMTP server name, port numbers, whether authentication is required, and the user name and password for authentication.

NOTE:

- For more information about the e-mail server settings, contact your Internet service provider or Network Administrator.

3

Set the machine configuration.

- Configuring E-Mail/I-Fax Communication Settings ▶ **Configuring E-Mail/I-Fax Communication Settings(P. 85)**

Configuring E-Mail/I-Fax Communication Settings

19YU-01S

Use the Remote UI to configure the detailed send and receive settings, such as the settings for using the machine to send and receive I-Faxes and the settings for POP authentication and encryption of communication before you send e-mail or I-Faxes. Contact your provider or network administrator for the required settings.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

- 1 Start the Remote UI and log in to System Manager Mode. ▶Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ▶Remote UI Screen(P. 428)**
- 3 Select [TX Settings] ▶ [Network Settings - E-Mail/I-Fax Settings].**
- 4 Click [Edit].**
- 5 Specify the required settings.**

[SMTP Server]

Enter alphanumeric characters as the SMTP server name (or IP address) for sending e-mail and I-Faxes.

[E-Mail Address]

Enter alphanumeric characters for the e-mail address that you want to use for the machine.

[POP Server]

Enter alphanumeric characters as the SMTP server name or IP address for sending e-mail and I-Faxes.

[User Name]

Enter alphanumeric characters as the user name for the specified e-mail account when a POP3 server is used.

[Set/Change Password]

To set or change the password when a POP3 server is used, select the check box and enter alphanumeric characters in [Password].

■ Specify the settings required for I-Fax reception

[POP RX]

Select the check box to receive I-Faxes.

[POP Interval]

This sets the interval (in minutes) used for automatically connecting to the POP3 server. If there are any I-Fax documents on the server, they are automatically received and printed.

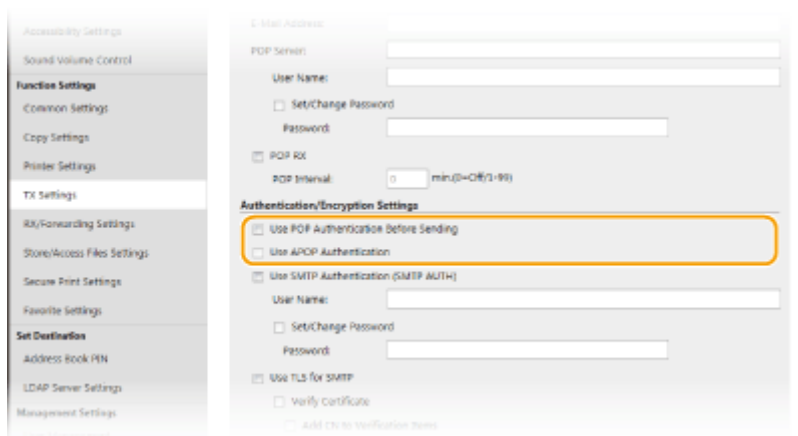

NOTE:

To disable automatic reception

- Set [POP Interval] to [0]. When [0] is set, you receive I-Faxes manually. ➤ **Receiving I-Faxes Manually(P. 258)**

■ Configuring Pop Authentication before Sending

POP before SMTP authentication prevents unauthorized users from using e-mail and I-Faxes by performing user authentication on the POP3 server.

[Use POP Authentication Before Sending]

To use the POP3 server for authentication before you send e-mail or I-Faxes, select the check box.

[Use APOP Authentication]

Select the check box to use APOP to encrypt the password during the authentication process.

■ Configuring SMTP authentication

If you configure SMTP authentication (SMTP AUTH), user identification by user name and password is performed at the time of sending e-mail or I-Fax.

[Use SMTP Authentication (SMTP AUTH)]

To enable authentication on the SMTP server, select the check box and enter alphanumeric characters in the [User Name] text box.

[Set/Change Password]

To specify or change the password, enter alphanumeric characters in the [Password] text box.

■ Configuring encrypted communication

You can configure encryption of communication with an SMTP or POP3 server.

[Use TLS for SMTP]

Select the check box to use TLS for encrypting communication with the SMTP server. Select the check box for [Verify Certificate] or [Add CN to Verification Items] depending on your needs.

[Use TLS for POP]

Select the check box to encrypt communication with the POP3 server using TLS. Select the [Verify Certificate] and [Add CN to Verification Items] check boxes as required.

6 Click [OK].

7 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

IMPORTANT

- Depending on the network you are using, you may need to change the SMTP or POP3 port setting ( **Changing Port Numbers(P. 385)**). For more information, contact your Internet service provider or Network Administrator.

Procedure for Setting a Shared Folder as a Save Location

19YU-01U

Before configuring the machine for scanning to shared folders, check the setup flow shown below.

1

Make sure that the machine and the computer are correctly connected.

▶ **Connecting to a Wireless LAN(P. 16)**

▶ **Connecting to a Wired LAN(P. 15)**

2

Make sure that you have the following information:

- The IP address of the machine. ▶ **Viewing Network Settings(P. 36)**
- The name of the computer where the shared folder is located. ▶ **Checking the Computer Name(P. 767)**
- Path to and the name of the shared folder (If access restrictions are set to the folder, the user name and password information is also needed).

3

Set the machine configuration.

▶ **Setting Up the Network Environment(P. 12)**

▶ **Configuring the Machine for Your Network Environment(P. 49)**

▶ **Configuring SMB(P. 58)**

Procedure for Setting a FTP Server as a Save Location

19YU-01X

Before configuring the machine for scanning to FTP Server, check the setup flow shown below.

1

Make sure that the machine and the computer are correctly connected.

- ▶ **Connecting to a Wireless LAN(P. 16)**
- ▶ **Connecting to a Wired LAN(P. 15)**

2

Make sure that you have the following information:

- The IP address of the machine. ▶ **Viewing Network Settings(P. 36)**
- FTP server name.
- Path to the FTP server and folder name.
- User name, password (only if set).

NOTE:

- If the path, folder name, user name, password, etc. for the FTP server are unknown, contact you Network Administrator.
- To change the FTP port number. ▶ **Changing Port Numbers(P. 385)**

3

Check whether you need to use PASV mode.

- If a firewall is installed between the machine and the FTP server, you must set PASV mode. ▶ **Configuring FTP PASV Mode(P. 71)**

NOTE:

- Also make sure that <Use HTTP> and <Use Remote UI> are set to <On>.
 - ▶ **Disabling HTTP Communication(P. 422)**
 - ▶ **Disabling Remote UI(P. 423)**

4

Register the FTP server address.

Basic Operations

19YU-01Y

This chapter describes basic operations, such as how to use the operation panel or how to load the paper, that are frequently performed to use the functions of the machine.

■ Parts and Their Functions

This section describes the exterior and interior parts of the machine and their functions, as well as how to use the keys on the operation panel and how to view the display. ▶ **Parts and Their Functions(P. 96)**

■ Turning ON the Machine

This section describes how to turn the machine ON and OFF. ▶ **Turning ON the Machine(P. 110)**

■ Using the Operation Panel

This section describes how to use the display for tasks such as selecting items and adjusting settings. Also, it describes how to enter characters and numbers. ▶ **Using the Operation Panel(P. 114)**

■ Logging in to the Machine

This section describes how to log in when a login screen is displayed. ▶ **Logging in to the Machine(P. 126)**

■ Placing Originals

This section describes how to place originals on the platen glass and in the feeder. ▶ **Placing Originals(P. 128)**

■ Loading Paper

This section describes how to load the paper into the paper drawer and multi-purpose tray. ▶ **Loading Paper(P. 133)**

■ Customizing the Display

This section describes how to rearrange buttons or create shortcut buttons in order to make it easier to use the screen shown in the display. ▶ **Customizing the Display(P. 167)**

■ Changing the Default Settings for Functions

This section describes how to change the setting that is displayed initially when a function is selected. ▶ **Changing the Default Settings for Functions(P. 173)**

■ Setting Sounds

This section describes how to adjust the volume of various machine sounds, such as those produced when fax sending is complete or when an error occurs. ▶ **Setting Sounds(P. 175)**

■ Entering Sleep Mode

This section describes how to set the sleep mode. ▶ **Entering Sleep Mode(P. 177)**

■ Registering Destinations

This section describes how to register destinations for sending faxes or scanned documents. ▶ **Registering Destinations(P. 180)**

Parts and Their Functions

19YU-020

This section describes the parts of the machine (exterior, front and back side, and interior) and how they function. In addition to describing the parts of the machine used for such basic operations as placing originals, loading paper, and replacing the toner cartridges, this section also describes the keys on the operation panel and display. Read this section for tips on how to use the machine properly.

- ▶ **Front Side(P. 97)**
- ▶ **Back Side(P. 101)**
- ▶ **Interior(P. 102)**
- ▶ **Feeder(P. 103)**
- ▶ **Multi-Purpose Tray(P. 105)**
- ▶ **Paper Drawer(P. 106)**
- ▶ **Operation Panel(P. 108)**

Front Side

1 Operation panel

The operation panel consists of keys such as Home key, Stop key, a display, and status indicators. You can perform all the operations and specify settings from the operation panel.

▶ **Operation Panel(P. 108)**

▶ **Basic Screens(P. 115)**

2 Feeder / Platen cover

Automatically feeds originals into the machine for scanning. When two or more sheets are loaded in the feeder, originals can be scanned continuously. ▶ **Feeder(P. 103)**

The platen cover secures the originals placed on the platen glass.

NOTE:

- The feeder is optional for imageRUNNER C3025.

3 USB port (Front-right side of the machine)

You can connect devices such as a USB memory device to the machine. ▶ **Connecting a USB Memory Device(P. 99)**

NOTE:

- Memory media that does not meet the USB specification is not supported. Some types of memory media may not be able to save data correctly.
- The USB port (front-right side of the machine) supports USB 2.0.

4 Right cover of the main unit

Open this cover when clearing a paper jam inside the machine. ▶ **Paper Jams in a Paper Source(P. 689)**

5 Power switch

Press the power switch when turning ON or OFF the machine.

▶ **Turning ON the Machine(P. 110)**

▶ **Turning OFF the Machine(P. 111)**

6 Multi-purpose tray

Load paper into the multi-purpose tray when you want to use a type of paper different from that which is loaded in the paper drawer.

▶ **Multi-Purpose Tray(P. 105)**

▶ **Loading Paper in the Multi-Purpose Tray(P. 138)**

7 Upper-right cover of the paper drawer

Open this cover when clearing a paper jam inside the machine. ▶ **Paper Jams in a Paper Source(P. 689)**

8 Lower-right cover of the paper drawer

Open this cover when clearing a paper jam inside the machine. ▶ **Paper Jams in a Paper Source(P. 689)**

9 Glass cleaning sheet storage box

Use this box to store sheets for cleaning the platen glass.

10 Output tray

Paper is output here when printing finishes.

11 Front cover of the main unit

Open this cover when replacing the toner cartridge, the drum unit, or cleaning the dust-proof glass.

▶ **Replacing the Toner Cartridge(P. 596)**

▶ **Replacing the Drum Unit(P. 607)**

▶ **Cleaning the Dust-Proof Glass(P. 594)**

12 Paper drawer 1

Load the type of paper that you frequently use. ▶ **Paper Drawer(P. 106)**

13 Paper drawer 2

Load the type of paper that you frequently use. You can load paper that cannot be loaded in the paper drawer 1, such as A3 size paper. ▶ **Paper Drawer(P. 106)**

14 Waste toner container cover

Open this cover when replacing the waste toner container. ▶ **Replacing the Waste Toner Container(P. 600)**

15 Toner Code

This code indicates the type of genuine toner that can be used with the machine. Use toner with a code that includes the same letters as the code on the front cover of the machine.

NOTE

- For more information about the configuration of optional equipment installed on the machine, see ▶ **Options(P. 740)** .

Connecting a USB Memory Device

You can connect a USB memory device to the USB ports located on the right side of the machine, and directly print data from the USB memory device. Originals scanned using the machine can also be saved directly to the USB memory device.

**■ Disconnecting the USB memory device**

- 1** Select <Status Monitor>.
- 2** Select <Rmv. Mem. Media>.
Wait until the <The memory media can be safely removed.> message is displayed.
- 3** Remove the memory media.

IMPORTANT

- Make sure to follow the proper procedure when removing the memory media. Failure to do so may cause the memory media or machine to malfunction.

- The machine supports FAT16/FAT32 format memory media.
- Make sure that the memory media is oriented properly when connecting it to the machine. If it is not connected properly, it may cause the memory media or machine to malfunction.

Be sure to check before using memory media

- Set <Use Scan Function> and <Use Print Function> to <On>. ▶<Memory Media Settings>(P. 566)

NOTE

Unsupported devices and usages

- Memory media with security functions
- Memory media that does not meet the USB specification
- Memory card readers connected via USB
- Connecting memory media via an extension cable
- Connecting memory media via a USB hub

Back Side

19YU-022

1 Telephone line jack

Connect a telephone cable when connecting the machine to a telephone line. ▶ **Connecting the Telephone Line(P. 81)**

2 External telephone jack

Connect your telephone or answering machine. ▶ **Connecting the Telephone Line(P. 81)**

3 USB port (Back side of the machine)

Use this port to connect devices such as a third-party USB keyboard.

NOTE:

- The USB port (back side of the machine) supports USB 2.0.

4 USB connector

Connect a USB cable when connecting the machine and a computer.

NOTE:

- The USB connector supports USB 2.0.

5 LAN port

Connect a LAN cable when connecting the machine to a wired LAN router, etc. ▶ **Connecting to a Wired LAN(P. 15)**

Interior

19YU-023

1 Dust Proof Glass Cleaner

Use this cleaner when cleaning the dust proof glass.

2 Drum unit

The unit that sets toner onto paper. ▶ **Replacing the Drum Unit(P. 607)**

3 Toner cartridge

Replace the toner cartridge when the toner runs out. ▶ **Replacing the Toner Cartridge(P. 596)**

4 Fixing assembly

The unit that fixes toner onto paper. Check this when a paper jam has occurred inside the main unit. ▶ **Paper Jams in the Main Unit(P. 684)**

5 Duplexing unit

This is a device to enable printing on both sides of paper. Check this unit when a paper jam has occurred inside the main unit. ▶ **Paper Jams in the Main Unit(P. 684)**

6 Waste toner container

Replace the waste toner container when it is full of waste toner. ▶ **Replacing the Waste Toner Container(P. 600)**

Feeder

19YU-024

This section describes the name and use of each part of the feeder.

NOTE

- The feeder is optional for imageRUNNER C3025.

1 Original set indicator

Lights up when originals are placed in the original supply tray.

2 Feeder cover

Open this cover when removing paper jammed in the feeder. ▶ **Paper Jams in the Feeder(P. 681)**

3 Slide guides

Adjust these guides according to the width of an original.

4 Original supply tray

Originals placed here are automatically fed into the feeder. When two or more sheets are loaded, originals can be scanned continuously. ▶ **Placing Originals(P. 128)**

5 Document feed scanning area

Originals placed in the feeder are scanned in this area.

6 Platen glass

When scanning books, thick originals, thin originals, and other originals that cannot be scanned using the feeder, place them on the platen glass. ▶ **Placing Originals(P. 128)**

7 Original stopper

Lightly holds down originals so that they are output neatly. You do not need to manually adjust its position.

8 Original output tray

Scanned originals are output here.

9 Original output indicator

To prevent originals from being left in the original output tray, this indicator lights while the originals are being output, and blinks for a while after all the originals have been output.

IMPORTANT

- Do not place any objects in the original output area. Doing so may cause damage to the originals.
- Regularly clean the feeder and platen glass in order to obtain proper print results. ▶ **Regular Cleaning(P. 583)**

Multi-Purpose Tray

19YU-025

Use the multi-purpose tray when you want to print on a type of paper that is not loaded in the paper drawer, such as labels.

1 Paper guides

Adjust the paper guides to exactly the width of the loaded paper to ensure that paper is fed straight into the machine.

2 Paper tray

Open the paper tray when loading paper.

3 Tray extension

Pull out the tray extension when loading large-sized paper.

Turning ON the Machine

19YU-028

This section describes how to turn ON the machine.

1 Make sure that the power plug is firmly inserted into the power outlet.

2 Open the power switch cover and press the power switch toward " | ".

3 Close the power switch cover.

- The startup screen appears on the touch panel display. ➤ **Operation Panel(P. 108)**

NOTE

- You can select the screen that is displayed first after the machine is turned ON. ➤ **<Default Screen After Startup/Restoration>(P. 451)**
- The response of the touch panel display and keys on the control panel may not be optimal immediately after the machine is turned ON.
- If the machine is connected to a powered off Mac computer by USB cable, the computer may turn on automatically when this machine does. In this case, disconnect the USB cable from the machine. You may also be able to solve this problem by using a USB hub between the machine and the computer.

LINKS

➤ **Turning OFF the Machine(P. 111)**

Turning OFF the Machine

19YU-029

This section describes how to turn OFF the machine.

IMPORTANT

Check the machine's operation status before turning it OFF

- Do not turn OFF the machine while using the Fax/I-fax function. I-fax or fax documents cannot be sent or received when the machine is turned OFF.
- If the machine is turned OFF during scanning or printing, a paper jam may occur.

When removing the power plug

- It may take a while for the power to turn OFF completely. Do not remove the power plug until the display and lamps turn OFF.

1 Open the power switch cover and press the power switch toward "⏻".

- Check that the display and lamps are turned OFF.

2 Close the power switch cover.

NOTE

- To restart the machine, wait for at least 10 seconds after the system is turned off.
- You can specify the time for each day of the week and configure a setting to automatically turn OFF the machine. ➤ **Powering OFF at a Fixed Time(P. 112)**

LINKS

➤ **Turning ON the Machine(P. 110)**

Powering OFF at a Fixed Time

19YU-0FL

You can make a setting so that the power is automatically turned OFF at a specified time on each day of the week. This allows you to avoid useless power consumption that may occur due to failure to turn OFF the power. By default, this function is disabled.

NOTE

- For information about the basic operation to set up the machine from Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#).

- 1 Start the Remote UI and log in to System Manager Mode. [▶Starting Remote UI\(P. 427\)](#)
- 2 Click [Settings/Registration] on the Portal page. [▶Remote UI Screen\(P. 428\)](#)
- 3 Select [Timer Settings] ▶ [Edit].
- 4 Select the check box for [Set Auto Shutdown Weekly Timer], and set the time to turn OFF the power.

The screenshot shows the 'Edit Timer Settings' window in the Remote UI. The left sidebar contains a 'Settings/Registration' menu. The main area is titled 'Edit Timer Settings' and contains various configuration options. A yellow box highlights the 'Set Auto Shutdown Weekly Timer' checkbox, which is checked. Below this checkbox, there are seven rows corresponding to the days of the week: Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, and Saturday. Each row has a time selection field with hour, minute, and AM/PM dropdowns. Other settings visible include 'Date Format', 'Time Format', 'Current Date', 'Current Time', 'Time Zone', 'Use Daylight Saving Time', 'Use Auto Reset Time', 'Function After Auto Reset', 'Use Auto Shutdown Time', and 'Auto Sleep Time'.

[Set Auto Shutdown Weekly Timer]

Selecting the check box allows you to set the time to turn OFF the power on each day of the week.

[Sunday] to [Saturday]

Enter the desired time to turn OFF the power. For any day of the week, leaving the time field blank means that the auto shutdown function is disabled for that day.

5 Click [OK].

NOTE

If the power is not turned OFF automatically at the specified time*

- When the Data indicator is lit up or blinking
- When the menu screen or Check Counter screen is displayed
- When settings data is being imported/exported
- When the firmware is being updated

*If the power cannot be turned OFF automatically at the specified time, a retry will be performed up to ten times at intervals of one minute. If the power cannot be turned OFF even after ten retries, auto shutdown will be impossible for that day.

Using the Operation Panel

19YU-02A

You can use the display and keys of the operation panel to configure machine settings or operate functions. This section describes basic usage of the display and keys.

- ▶ **Basic Screens**(P. 115)
- ▶ **Basic Operation**(P. 121)
- ▶ **Entering Text**(P. 124)

TIPS

- If you want to invert the light and dark parts of the display: ▶ **<Invert Screen Colors>**(P. 476)
- If you want to adjust the brightness of the display: ▶ **<Brightness>**(P. 476)
- If you want to change various settings about the operability such as screen brightness: ▶ **<Accessibility>**(P. 476)

Basic Screens

19YU-02C

The Home screen or settings screen appears on the display, allowing you to initiate functions such as copying or scanning. You can also use the display to check information such as error messages and the machine's operation status. The screen is also a touch panel, so you can perform operations by touching the screen directly.

▶ **Home Screen(P. 116)**

▶ **<Status Monitor> Screen(P. 118)**

▶ **Message Display(P. 120)**

NOTE

- You can customize the Home screen by rearranging frequently used buttons for easier access to the respective functions. ▶ **Customizing the Display(P. 167)**

To Know How to Operate

- On some screens, the <?> button allows you to view the descriptions of functions or how to operate.

Home Screen

The Home screen is displayed when the power is turned ON or by pressing  on the operation panel. Use this screen to specify settings for and register functions.

1 Change page

Use this to view another page in the Home screen. You can also flick sideways to change pages.

2 <Check Counter>

Displays the totals for black and white and color printouts separately. ▶ **Viewing the Counter Value(P. 627)**

3 <Log Out>

Use this button to log out from the machine.

4 <Status Monitor>

Press to check the printing status, to view the usage history, or to view the network settings such as the IP address of the machine. You can also check the status of the machine, such as the remaining amount of paper and the toner, or whether any errors occurred. ▶ **<Status Monitor> Screen(P. 118)**

5 Wi-Fi icon

Displayed when the machine is connected to a wireless LAN.

6 <Copy>

Use this button to start copying. ▶ **Copying(P. 189)**

7 <Fax>

Use this button to send a fax from the machine. ▶ **Faxing(P. 217)**

NOTE:

The optional product is required for faxing to use the fax function. ▶ **System Options(P. 754)**

8 <Scan>

Scans an original and converts it into an electronic file. You can save scanned files on your computer or send them via e-mail. ▶ **Scanning(P. 281)**

9 <Memory Media Print>

Prints files stored in a USB memory media. ▶ **Printing from a USB Memory Device (Memory Media Print)(P. 272)**

10 <Secure Print>

Use this function to print a secure document. ▶ **Printing a Document Secured by a PIN (Secure Print)(P. 268)**

11 <Menu>

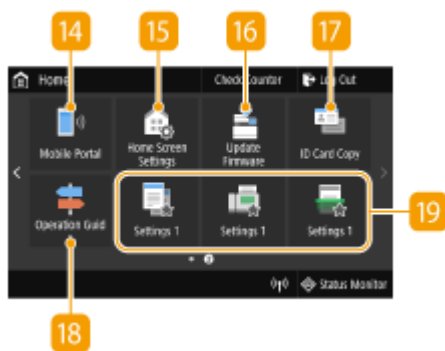

<Function Settings>, <Preferences>, and many other machine settings start from this button. ▶ **Setting Menu List(P. 449)**

12 <Address Book>

Use this to register or edit the destinations for e-mails and faxes. You can also display a registered destination when sending an e-mail or fax. ▶ **Registering Destinations(P. 180)**

13 <Paper Settings>

This button is also used for specifying the size and type of paper loaded in the paper drawer and multi-purpose tray. ▶ **Specifying Paper Size and Type(P. 152)**

**14 <Mobile Portal>**

Use this to establish a connection to a mobile device. ▶ **Connecting with Mobile Devices(P. 333)**

15 <Home Screen Settings>

Allows you to change the order that Home screen buttons are displayed in. ▶ **Customizing the Home Screen(P. 168)**

16 <Update Firmware>

Allows you to update the firmware via the Internet. ▶ **Updating the Firmware(P. 444)**

17 <ID Card Copy>

Use this function to copy the front and back sides of a driver's license or other card onto the same side of a page. ▶ **Making ID Card Copies(P. 215)**

18 <Operation Guide>

Press to view operation guidance and error causes/solutions.

19 Shortcut buttons

Display "Favorite Settings" that are registered to Copy, Fax, and Scan. ▶ **Adding Buttons to the Home Screen(P. 168)**

LINKS

▶ **Customizing the Home Screen(P. 168)**

<Status Monitor> Screen

19YU-02F

When you select <Status Monitor>, a screen appears in which you can check the progress of documents as well as the status of the machine (amount remaining in the toner cartridges, etc.) and network settings such as the machine's IP address.

1 <Error Information/Notification>

Displays the details of any errors that occurred. ▶ **Countermeasures for Each Message(P. 653)**

2 <Device Information>

Displays the status of the machine, such as the amount of paper or the amount remaining in the toner cartridges.

<Paper Information>

Displays whether paper is loaded in each paper source.

<Consumables Information>

You can check the status of the machine, such as the amount of toner or waste toner container.

<Secure Print Memory Usage>

Displays the amount of memory currently used for storing secured document data. ▶ **Printing a Document Secured by a PIN (Secure Print)(P. 268)**

<Version Information>

Displays firmware version information.

<Serial Number>

Displays the serial number.

3 Status and logs of copied, printed, and sent/received documents

Displays the current status of the selected item. The <Copy/Print Job> screen is shown below as an example.

4 <Network Information>

Displays the network settings such as the IP address of the machine and status such as the condition of wireless LAN communications. ▶ **Viewing Network Settings(P. 36)**

5 <Rmv. Mem. Media>

Used to safely remove a USB memory device. This is only displayed when a USB memory device is connected to the machine. ▶ **Disconnecting the USB memory device(P. 99)**

Message Display

19YU-02H

Messages are displayed on the screen in situations such as when paper runs out or when the expiration of the toner cartridge lifetime is reached. **▶Countermeasures for Each Message(P. 653)**

When an Error Occurs

In some cases when an error occurs, instructions on how to respond to the error are displayed. Follow the on-screen instructions to solve the problem. The screen displayed when a paper jam occurs is shown below as an example.

Basic Operation

19YU-02J

The display is a touch panel, allowing you to operate directly on the screen.

IMPORTANT

Avoid the following actions.

- The display may malfunction or be damaged.
 - Pressing forcefully
 - Pressing with pointed objects (fingernails, ballpoint pen, pencil, etc.)
 - Operating with wet/soiled hands
 - Operating the display while an object is placed on it

NOTE

- Before using the touch panel display, peel off the protective film from the display.

Tap

Touch the screen lightly and quickly. Use for selecting or finalizing items.

Flick

Flick with the finger on the display. The effect of flicking varies depending on the screen. For instance, flicking in the Home screen moves you one page in the direction of the flick.

■ Selecting Items

Tap an item name or button to make a selection.

NOTE

If an item is mistakenly touched

- Slide your finger away then release it from the screen to cancel the selection.

To return to the previous screen

- Tap  to return to the previous screen.

■ Scrolling the Screen

The scroll bar appears on the screen when there is still information that is undisplayed. If the scroll bar is displayed, flick the screen to scroll in the direction of the flick. Note that the scroll bar only appears while the screen is being touched.

■ Changing a Setting

Tap <+> / <-> to adjust the setting on the scale. You can also adjust a setting by flicking the slider left or right.

TIPS

- You can change a variety of display-related settings, such as the display language: ▶<**Display Settings**>(P. 451)
- To change the screen that is automatically displayed when the machine remains idle for a specified length of time: ▶<**Function After Auto Reset**>(P. 458)
- You can change various settings about the operability such as screen brightness: ▶<**Accessibility**>(P. 476)

Entering Text

When entering text or a number, use the keyboard displayed on the screen. The numeric keys are displayed on the screen to enter only numbers.

Switching the Type of Text

Tap <a1/#> to switch the type of text that is entered.

NOTE

- To enter upper case characters, tap .

Changing Keyboard Pages

When the keyboard consists of multiple pages, tap  or  to change pages.

Deleting Text

One character is deleted each time  is tapped. Holding down  allows you to delete successive characters.

Moving the Cursor (Entering a Space)

Tap  or  to move the cursor. To enter a space, move the cursor to the end of the text, and tap .

When the Numeric Keys are Displayed

When only the numeric value is entered, the numeric keys are displayed on the screen. Tap numeric keys to enter the numeric value.

NOTE

Value range

- Values in () displayed in the entry box are the enterable value range.

When buttons other than the numeric keys are displayed:

- When <+> / <-> or ◀ / ▶ are displayed, you can tap the buttons and increase or decrease the numeric value or move the cursor.

Entering Characters Using a USB Keyboard

You can connect a keyboard to the USB port for USB devices on the ► **Front Side(P. 97)** or ► **Back Side(P. 101)** and enter text from the keyboard. While connecting the keyboard, you can enter text from the operation panel.

NOTE

- Some keys on the USB keyboard, such as the [Backspace], [Home] and [End] keys, cannot be used. When keys that cannot be used are pressed, nothing is entered or changed.
- To delete text, press the [Delete] key.
- Pressing the [RETURN/ENTER] key completes text entry in the same way as selecting <Apply>.
- You can specify the type of keyboard layout (US layout or UK layout). ► **<English Keyboard Layout>(P. 455)**
- You can disconnect the USB keyboard from the machine at any time. No special operation is required to disconnect it.
- Depending on the display language, you may not be able to enter some characters correctly.
- The USB keyboard may not operate correctly depending on the type of keyboard.

Logging in to the Machine

19YU-02L

If Department ID Management is enabled or System Manager IDs are enabled, you must log in before using the machine. You also need to log in if use of the fax and scan functions is restricted.

NOTE

- The System Manager ID and PIN are set to "7654321" at the factory. It is recommended that you change this setting for higher security.

▶ **Department ID Management Login(P. 126)**

▶ **Logging in to Authorized Send(P. 127)**

Department ID Management Login

When the login screen appears, use the procedure below to enter the Department ID and PIN.

NOTE

When <Insert the card.> is displayed, see ▶ **Copy Card Reader(P. 755)** .

1 Enter an ID.

- 1 Select <Department ID> or <System Manager ID>.
- 2 Enter the ID.
 - If no PIN is registered, proceed to step 3.

2 Enter the PIN.

- 1 Select <PIN>.
- 2 Enter the PIN.

3 Select <Log In>.

- ➡ The login screen will be changed to the Home screen.
 - After you finish using the machine, select <Log Out> to display the login screen.

Logging in to Authorized Send

If the Send function authorization setting (**LDAP Server Authentication(P. 372)**) is enabled, the Authorized Send login screen appears when the fax or scan function is used.

1 Enter your user name.

- 1 Select <User Name>.
- 2 Enter your user name using the numeric keys.
 - On how to enter text, see **Entering Text(P. 124)** .

2 Enter the password.

- 1 Select <Password>.
- 2 Enter the password using the numeric keys.

3 Select <Server Name>, and select the server for your authentication.

- Select the LDAP server where your user name and password are registered.

4 Select <Log In>.

- ➡ The login screen switches to the fax or scan function Home screen.
 - After you finish using the machine, select <Log Out> to display the login screen.

NOTE:

If the <Select Logout Type> screen appears

- If you are logged in to both Authorized Send and Department ID Management, a dialog box appears in which you can select the items you want to log out of. In the case where you want to log out of Authorized Send (fax or scan function) while remaining logged in to Department ID Management, select <Log Out from Authenticated Sending>. In any other cases, select <Log Out from All Authenticated Functions>.

LINKS

- **Setting the Department ID Management(P. 364)**
- **Setting the System Manager ID and PIN(P. 362)**

Placing Originals

Place originals on the platen glass or in the feeder. Use the platen glass when scanning thick or bound documents such as books. You can load two or more sheets of originals in the feeder so that they can be scanned continuously. For information on loadable sizes, etc., see **▶Main Unit(P. 715)** or **▶Feeder (DADF-AV)(P. 717)**.

▶Placing Originals on the Platen Glass(P. 129)

▶Placing Originals in the Feeder(P. 130)

IMPORTANT

Use originals that are completely dry

- When placing originals, make sure that any glue, ink, or correction fluid on the originals has completely dried.

To avoid paper jams

- Do not place the following types of originals in the feeder as this may cause paper jams:

- Wrinkled or creased paper
- Carbon paper
- Curled or rolled paper
- Coated paper
- Torn originals
- Originals with large holes
- Onion skin or thin paper
- Stapled or clipped originals
- Paper printed by a thermal transfer printer
- Transparencies
- Originals with notes attached
- Originals pasted together
- Originals placed in a clear file

NOTE

To scan originals more accurately

- Originals placed in the feeder are scanned while being fed into the machine. On the other hand, originals placed on the platen glass remain in a fixed position while they are scanned. To ensure more accurate scanning results, placing originals on the platen glass is recommended.

To scan tracing paper or transparencies

- To scan transparent originals (for example, tracing paper or transparencies), place them on the platen glass and cover them with plain white paper.

Placing Originals on the Platen Glass

1 Open the feeder or the platen cover.

NOTE:

- If you place an original for which the opening of the feeder is insufficient, the size of the original may not be properly detected.

2 Place the original face down on the platen glass.

- Align the corner of the original with the top-left corner of the platen glass.

NOTE:

- When copying 2-sided original, place the original so that the top and the bottom are properly positioned, as shown in the illustration below.

3 Gently close the feeder or the platen cover.

- ➡ The original is ready for scanning.
- When scanning is complete, remove the original from the platen glass.

Placing Originals in the Feeder

1 Spread the slide guides apart.

- Move the slide guides outward until they are slightly farther apart than the actual width of the original.

2 Fan the original stack and align the edges.

- Fan the original stack in small batches, and align the edges by lightly tapping the stack on a flat surface a few times.

3 Place the originals face up in the feeder.

IMPORTANT:

- Make sure that the original stack does not exceed the load limit lines (). If you place originals that exceed the limit, they may not be scanned or may cause a paper jam.
- Always smooth out any folds in your originals before placing them into the feeder. If the original is folded, an error screen may be displayed because the size of originals cannot be detected correctly.
- Thin originals may become creased, if used in a high temperature or high humidity environment.

NOTE:

- When copying 2-sided original, place the original so that the top and the bottom are properly positioned, as shown in the illustration below.

- You can place different sized originals and scan them all at once.
 - ▶ **Copying Different Size Originals Together (Different Size Originals)(P. 211)**
 - ▶ **Scanning Different Size Originals Together (Different Size Originals)(P. 310)**

4 Align the slide guides against the edges of the original.

- Move the slide guides inward until they are aligned securely against the edges of the original.

➡ Originals are ready for scanning.

IMPORTANT:

Align the slide guides securely against the edges of the original

- Slide guides that are too loose or too tight can cause misfeeds or paper jam.

While originals are being scanned

- Do not add or remove originals.

When scanning is complete

- Remove the scanned originals from the original output tray to prevent paper jams. To prevent originals from being left in the original output tray, the original output indicator lights while the originals are being output, and blinks for a while after all the originals have been output.

When placing thin paper originals

- Make sure that you do not push too hard when placing the original. The original may not be fed correctly, or may cause a paper jam.

When repeatedly scanning the same original

- It is recommended that you do not repeatedly scan the same original more than five times (this varies depending on paper quality). The original may fold or become wrinkled, or become difficult to send.

Loading Paper

19YU-02S

You can load the paper into the paper drawer or multi-purpose tray. Load the paper you usually use into the paper drawer. The paper drawer is convenient when using large amounts of paper. Use the multi-purpose tray when you temporarily use size or type of paper that is not loaded in the paper drawer. See **Available Paper(P. 718)** for available paper sizes and types.

About Paper

- ▶ **Storing the Paper Printed with the Machine(P. 134)**
- ▶ **Storing the Paper Printed with the Machine(P. 134)**

How to Load Paper

- ▶ **Loading Paper in the Paper Drawer(P. 135)**
- ▶ **Loading Paper in the Multi-Purpose Tray(P. 138)**
- ▶ **Loading Envelopes(P. 141)**
- ▶ **Loading Preprinted Paper(P. 148)**

Configuring the Settings for the Loaded Paper

- ▶ **Specifying Paper Size and Type(P. 152)**

Precautions for Paper

IMPORTANT

Do not use the following types of paper:

- A paper jam or printing error may occur.
 - Wrinkled or creased paper
 - Curled or rolled paper
 - Torn paper
 - Damp paper
 - Very thin paper
 - Paper printed by a thermal transfer printer
 - Highly textured paper
 - Glossy paper

Notes on use of paper

- Only use paper that has fully acclimatized to the environment in which the machine is installed. Using paper that has been stored under different temperature or humidity may cause paper jams or result in poor print quality.

Paper handling and storage

- Store the paper on a flat surface.

- Keep the paper wrapped in its original package to protect the paper from moisture or dryness.
- Do not store the paper in such a way that may cause it to curl or fold.
- Do not store the paper vertically or stack too much paper.
- Do not store the paper in direct sunlight, or in a place subject to high humidity, dryness, or drastic changes in temperature or humidity.

NOTE

When printing on paper that has absorbed moisture

- Steam may emit from the paper output area, or water droplets may form around the paper output area. There is nothing unusual about any of these occurrences, which occur when the heat generated from fixing toner on the paper causes moisture in the paper to evaporate (most likely to occur at low room temperatures).

Storing the Paper Printed with the Machine

When handling/storing the paper printed with the machine, take the following precautions.

■ How to Store the Printed Paper

- Store on a flat surface.
- Do not store together with articles made of PVC (polyvinyl chloride) such as clear folders. Toner may melt, resulting in the paper's sticking to PVC articles.
- Take care that the paper gets folded or creased. Toner may peel off.
- To store over a long period of time (two years or longer), store in binders or equivalent.
- When the paper is stored over a long period of time, it may become discolored and thus the print may seem to have undergone a change of color.
- Do not store in a place where the temperature is high.

■ Precautions When Applying Adhesive

- Always use insoluble adhesive.
- Before applying adhesive, perform a test using a printout no longer required.
- When putting adhesive-applied paper sheets one over another, make sure that the adhesive is completely dried out.

Basic Paper Loading Method

19YU-02W

This section describes the method for loading paper that is used relatively frequently such as plain paper or recycled paper. Load the paper you usually use into the paper drawer. Use the multi-purpose tray when you temporarily use a size or type of paper that is not loaded in the paper drawer.

▶ **Loading Paper in the Paper Drawer(P. 135)**

▶ **Loading Paper in the Multi-Purpose Tray(P. 138)**

Loading Paper in the Paper Drawer

1 Hold the handle of the paper drawer and pull it out until it stops.

Paper drawer 1

Paper drawer 2

2 Adjust the position of the paper guides.

- Align the left and front guides with the size indicators for the paper to be loaded by sliding each guide while pressing the top part of that guide.

Paper drawer 1

Paper drawer 2

IMPORTANT:

- Slide the guides until they click into place. If the left guide and front guide are not aligned correctly, the paper size will not correctly appear on the touch panel display. It is also necessary to adjust the guides correctly to avoid causing a paper jam, dirty prints, or making the inside of the machine dirty.

NOTE:

Size abbreviations on the paper guides

The abbreviations on the paper guides in the paper drawer indicate paper sizes as follows:

- LGL: Legal
- LTR: Letter
- EXEC: Executive
- STMT: Statement

3 Prepare paper.

- Fan the paper stack well, and tap it on a flat surface to align the edges.

IMPORTANT:

- Fan all four sides of the paper stack well.

- Make sure that there is enough air between each sheet of paper.

4 Load the paper.

- 1 Make sure that the paper size setting of the paper drawer matches the size of the paper to load in the paper drawer.
- 2 Load the paper stack with the print side face up, and against the side wall of the paper drawer.

Paper drawer 1

Paper drawer 2

IMPORTANT:

Do not exceed the load limit line when loading paper

- Make sure that the paper stack does not exceed the load limit line. Loading too much paper can cause paper jams.

Paper (excluding envelopes):

Envelopes:

NOTE:

- If you use paper with a logo mark, pay attention to the orientation when loading it in the paper source. **▶ Loading Preprinted Paper(P. 148)**
- When placing envelopes, pay attention to the orientation and the preparations before placing envelopes. **▶ Loading Envelopes(P. 141)**
- For paper that can be loaded in each paper drawer, see **▶ Specifications(P. 714)**
- If there are instructions on the paper package about which side of the paper to load, follow those instructions.
- Paper may overlap when it is fed or a paper jam may occur, depending on the cut surface of the paper. Changing the paper orientation and loading it again may reduce the effect of the cut surface.
- If paper runs out and printing is stopped, load a new paper stack. Printing restarts after the new paper stack is loaded.

5 Gently insert the paper drawer into the machine.

IMPORTANT

When changing the paper size and type

- If you load a different type of paper into the machine, make sure to change the settings. If you do not change the settings, the machine cannot print properly. ➤ **Specifying Paper Size and Type in the Paper Drawer(P. 153)**
- When changing the paper size, change the paper size label as necessary.

Loading Paper in the Multi-Purpose Tray

1 Open the multi-purpose tray.

- Pull out the tray extension when loading large-sized paper.

2 Adjust the paper guides to match the size of the paper.

3 Prepare paper.

- Fan the paper stack well, and tap it on a flat surface to align the edges.

IMPORTANT:

- Fan all four sides of the paper stack well.
- Make sure that there is enough air between each sheet of paper.
- Especially when you use transparencies, completely separate them from each other before loading them.

4 Insert the paper into the multi-purpose tray until the paper stops.

- Load the paper with the print side face down.
- ➡ The screen for specifying the paper size and type is displayed when the paper is fully inserted.

IMPORTANT:

Do not exceed the load limit line when loading paper

- Make sure that the paper stack does not exceed the load limit line (). Loading too much paper can cause paper jams.

NOTE:

- If you use envelopes or paper with a logo mark, pay attention to the orientation when loading them in the paper source.
 - ▶ **Loading Envelopes(P. 141)**
 - ▶ **Loading Preprinted Paper(P. 148)**
- Feed coated paper one sheet at a time.

5 Check the paper size and paper type, and press <Apply>.

- If you load free size paper, or if the displayed size or type is different from the actual paper that is loaded, see [▶Specifying Paper Size and Type in the Multi-Purpose Tray\(P. 156\)](#) .

IMPORTANT:

- A paper jam or other printing problems may occur if the size and type of paper specified in the printer driver do not match those of the actual paper loaded in the multi-purpose tray.

TIPS

Printing on the back side of printed paper (2nd Side of 2-Sided Page)

- You can print on the back side of printed paper. Flatten any curls on the printed paper and insert it into the multi-purpose tray, with the side to print face down (previously printed side face up). Then press <Manual Back Side Print (2-Sided Only)> on the screen for selecting the paper type.
- Use only the paper printed with this machine.

Loading Transparencies

You can load A4 size transparencies in the paper drawers or in the multi-purpose tray. When loading transparencies, note the following points.

- It is recommended that you load transparencies one sheet at a time.
- If you leave transparencies loaded in the paper drawers or in the multi-purpose tray, the sheets may stick together and cause a multiple sheet feed or a paper jam. When printing is complete, return the remaining transparencies to their original package for storage, avoiding locations subject to high temperatures and humidity.

LINKS

- ▶[Specifications\(P. 714\)](#)

Loading Envelopes

Load envelopes in the paper drawer or the multi-purpose tray. Make sure to flatten any curls on envelopes before loading them. Also pay attention to the orientation of envelopes and which side should be face up.

➤ **Before Loading Envelopes(P. 141)**

➤ **Loading the Envelopes in the Paper Drawer(P. 143)**

➤ **Loading Envelopes in the Multi-Purpose Tray(P. 146)**

NOTE

- This section describes how to load envelopes with the proper orientation, as well as procedures that you need to complete before loading envelopes. For a description of the general procedure for loading envelopes in the paper drawer or multi-purpose tray, see ➤ **Basic Paper Loading Method(P. 135)** .

Before Loading Envelopes

Follow the procedure below to prepare the envelopes before loading.

IMPORTANT

- Do not use envelopes that have glue attached to their flaps, as the glue may melt due to the heat and pressure of the fixing unit.
- Wrinkles may occur depending on the type of envelopes or the storage environment for the envelopes.

1 Flatten any curls.

- Pick up about five envelopes. Flatten any curls, and loosen the stiff areas in the four corners.

- Repeat this step five times for each set of five envelopes.

2 Smooth the envelopes out, and remove any air inside them.

- Place the envelopes on a flat surface, and move your hands in the direction of the arrows to remove the air inside the envelopes.
- Repeat this step five times for each set of five envelopes.

3 Press down on the four sides.

- Press down firmly on all four sides. In particular, carefully press down on the side facing the direction in which the envelopes will be fed. Press down firmly so that the flap stays flat.

IMPORTANT:

- Failure to firmly press down on the flap may result in a paper jam. If this happens, press down firmly on all four sides of each individual envelope.

4 Align the envelopes on a flat surface.

NOTE:

- Check that no envelopes are tucked underneath the flap of the envelope above or below them.

Loading the Envelopes in the Paper Drawer

1 Attach the Envelope Feeder Attachment to the paper drawer.

- 1 Remove the Envelope Feeder Attachment A stored in paper drawer 2.

- 2 Attach the Envelope Feeder Attachment A by aligning the protruding areas of the Envelope Feeder Attachment A with the holes on paper receptor located on the bottom of the paper drawer.

NOTE:

- When loading Kakugata 2, it is not necessary to attach the Envelope Feeder Attachment A.
- When not using the Envelope Feeder Attachment A, store it in the storage area of paper drawer 2.

2 Adjust the position of the paper guides.

Paper drawer 1 (ISO-C5)

Paper drawer 2

3 Load the envelopes.

■ Loading to paper drawer 1

Load the envelopes as indicated below, with the front side of the envelopes (the side without the glued areas) face up.

ISO-C5

Close the flaps, and load the envelopes so that their flaps are on the right side.

■ Loading to paper drawer 2

Load the envelopes as indicated below, with the front side of the envelopes (the side without the glued areas) face up.

Yougatanaga 3

Close the flaps, and load the envelopes so that their flaps are on the far side.

Monarch, COM10 No. 10, DL

Close the flaps, and load the envelopes so that their flaps are on the near side.

Nagagata 3, Kakugata 2

Load the envelopes so that their flaps are on the left side.

NOTE

- When you print on envelopes, remove them from the output tray 10 at a time.

Loading Envelopes in the Multi-Purpose Tray

Load the envelopes as shown in the following illustrations, with the front side of the envelopes (the side without the glued areas) face down (recommended).

Yougatanaga 3

Close the flaps, and load the envelopes so that their flaps are on the far side.

Nagagata 3, Kakugata 2

Load the envelopes so that their flaps are on the right side.

Monarch, COM10 No. 10, DL, ISO-C5

Close the flaps, and load the envelopes so that their flaps are on the left side.

IMPORTANT

- If the envelopes are not fed properly even if they have been prepared according to the procedures, load the envelopes individually in the multi-purpose tray instead of loading several sheets together.
- Do not print on the reverse side of the envelopes (the side with the glued areas).

NOTE

- When you print on envelopes, remove them from the output tray 10 at a time.

If printing of envelopes loaded in normal orientation results in wrinkled printouts

Perform loading as shown in the figure, and change the settings and the orientation of the original.

- To perform printing, display the print settings screen of the printer driver and change the paper orientation setting.
- To perform copying, change the orientation of the original.

Loading Preprinted Paper

19YU-030

When you load paper that has been preprinted with a logo, pay attention to the orientation of the paper regardless of whether you use the paper drawer or the multi-purpose tray. Load the paper properly so that printing is performed on the same side as the logo.

▶ Loading Paper with Logos in the Paper Drawer(P. 149)

▶ Loading Paper with Logos in the Multi-Purpose Tray(P. 150)

IMPORTANT

When performing a copy operation, also pay attention to the orientation of the original document

- Place the original in the feeder with the side to copy face up, or place the original on the platen glass with the side to copy face down, as shown in the following illustrations.

Feeder (Portrait layout document of A4-, A5-size)

Platen glass (Portrait layout document of A4-, A5-size)

Feeder (Landscape layout document of A4-, A5-size)

Platen glass (Landscape layout document of A4-, A5-size)

Feeder (Portrait layout document of A3-size)

Platen glass (Portrait layout document of A3-size)

Feeder (Landscape layout document of A3-size)

Platen glass (Landscape layout document of A3-size)

NOTE

- This section describes how to load preprinted paper with the proper orientation. For a description of the general procedure for loading paper in the paper drawer or multi-purpose tray, see [Basic Paper Loading Method\(P. 135\)](#) .

Loading Paper with Logos in the Paper Drawer

The loading method varies depending on whether the orientation of the logo printed paper is portrait or landscape. Load the paper with the logo printed side (the side to print) face up, as shown in the following illustrations.

Specifying Paper Size and Type

19YU-031

You must specify the paper size and type settings to match the paper that is loaded. Make sure to change the paper settings when you load the paper that is different from the previously loaded paper.

- ▶ **Specifying Paper Size and Type in the Paper Drawer(P. 153)**
- ▶ **Specifying Paper Size and Type in the Multi-Purpose Tray(P. 156)**
- ▶ **Registering Default Paper Settings for the Multi-Purpose Tray(P. 159)**
- ▶ **Registering a Custom Paper Size(P. 162)**
- ▶ **Limiting the Paper Sizes Displayed for the Multi-Purpose Tray(P. 163)**
- ▶ **Automatically Selecting an Appropriate Paper Source for Each Function(P. 164)**
- ▶ **Set the Automatic Detection Size of the Paper Drawer(P. 165)**
- ▶ **A5R_STMTR Distinction of Paper(P. 166)**

IMPORTANT

- If the setting does not match the size and type of loaded paper, a paper jam or printing error may occur.

Specifying Paper Size and Type in the Paper Drawer

19YU-032

1 Select <Paper Settings> in the Home screen.  Home Screen(P. 116)

2 Check the paper size and type that is displayed.

- When loading standard size paper, the paper size is automatically detected. If both paper size and paper type are correct, the following operation is not necessary.
- **3** and **4** are displayed only when the optional cassette feeding unit is installed.

NOTE:

- If the displayed paper size is different from the loaded paper size, the paper may not be loaded properly. Load the paper again.

3 Select the target paper drawer.

4 Select paper size.

■When setting the standard size paper type

- 1 Select <Auto>.
- 2 Select the paper type.

■When loading custom size paper

- 1 Select <Custom Size>.
- 2 Specify the length of the <X> side and <Y> side.
 - Select <X> or <Y>, and enter the length of each side using the numeric keys.

NOTE:

- If you register the paper size you use frequently on buttons <S1> to <S3>, you can call them up with one touch. ► **Registering a Custom Paper Size(P. 162)**

- 3 Select <Apply>.
- 4 Select the paper type.

■When loading envelopes

NOTE:

- Envelopes can not be set in the paper drawer 3 and 4.

- 1 Select <Envelope>.
- 2 Select envelope type.
 - If you selected Nagagata 3 for **1**, press <Next>, and specify the flap length.

- 3 Select <Apply>.

- 5 Change the paper size label of the paper drawer as necessary.

- Attach the paper size label at the same height as the cassette number indicator, and approximately 5 mm to the left.

* Approximately 5 mm

LINKS

- ▶ **Limiting the Paper Sizes Displayed for the Multi-Purpose Tray(P. 163)**
- ▶ **Available Paper(P. 718)**

Specifying Paper Size and Type in the Multi-Purpose Tray

The screen shown here is displayed when paper is loaded in the multi-purpose tray. Follow the on-screen instructions to specify settings that match the size and type of the loaded paper.

NOTE

If the screen shown above is not displayed when paper is loaded

- If you always load the same paper in the multi-purpose tray, you can skip the paper setting operations by registering the paper size and type as the default setting. When the default setting is registered, however, the screen shown above is not displayed. To display the screen, select <Specify When Loading Paper> (**Registering Default Paper Settings for the Multi-Purpose Tray(P. 159)**).

When only changing the paper type

- Follow step 2 and the following steps.

1 Select the paper size.

■When loading standard size paper

- 1 Select <Standard Size>.
- 2 Select the paper size in the <Frequently Used Sizes> tab.
 - If the loaded paper size is not displayed, select <Other Sizes> tab.

NOTE:

When loading A4 or A5 size paper

- In the landscape orientation, select <A4> or <A5>. In the portrait orientation, select <A4R> or <A5R>.

■When loading custom size paper

- 1 Select <Custom Size>.
- 2 Specify the length of the <X> side and <Y> side.
 - Select <X> or <Y>, and enter the length of each side using the numeric keys.

**NOTE:**

- If you register the paper size you use frequently on buttons <S1> to <S3>, you can call them up with one touch. ► **Registering a Custom Paper Size(P. 162)**

- 3 Select <Apply>.

■When loading envelope

- 1 Select <Envelope>.
- 2 Select the orientation and type of envelopes.

- If you changed the placement of the envelopes, press <Short Edge Feed> or <Long Edge Feed>, and select the envelope type.
- If you selected vertical placement for Nagagata 3, press <Next>, and specify the flap length.

IMPORTANT:

- When using Kakugata 2, place it horizontally.

- 3 Select <Apply>.

- 2 Select <Change Ppr. Type>.

3 Select paper type.

4 Select <Apply>.

- ▶ Limiting the Paper Sizes Displayed for the Multi-Purpose Tray(P. 163)
- ▶ Available Paper(P. 718)

Registering Default Paper Settings for the Multi-Purpose Tray

19YU-034

You can register default paper settings for the multi-purpose tray. Registering default settings can save yourself the effort of having to specify the settings each time you load the same paper into the multi-purpose tray.

NOTE

- After the default paper setting is registered, the paper setting screen is not displayed when paper is loaded, and the same setting is always used. If you load a different paper size or type without changing the paper settings, the machine may not print properly. To avoid this problem, select <Specify When Loading Paper> in step 3, and then load the paper.

1 Select <Paper Settings> in the Home screen. ▶ Home Screen(P. 116)

2 Select multi-purpose tray.

3 Select the paper size.

■ When loading standard size paper

- Select <Standard Size>.
- Select the paper size in the <Frequently Used Sizes> tab.
 - If the loaded paper size is not displayed, select <Other Sizes> tab.

NOTE:**When loading A4 or A5 size paper**

- In the landscape orientation, select <A4> or <A5>. In the portrait orientation, select <A4R> or <A5R>.

■When loading custom size paper

- 1 Select <Custom Size>.
- 2 Specify the length of the <X> side and <Y> side.
 - Select <X> or <Y>, and enter the length of each side using the numeric keys.

**NOTE:**

- If you register the paper size you use frequently on buttons <S1> to <S3>, you can call them up with one touch. ➤ **Registering a Custom Paper Size(P. 162)**

- 3 Select <Apply>.

■When loading envelope

- 1 Select <Envelope>.
- 2 Select the orientation and type of envelopes.

- If you changed the placement of the envelopes, press <Short Edge Feed> or <Long Edge Feed>, and select the envelope type.
- If you selected vertical placement for Nagagata 3, press <Next>, and specify the flap length.

IMPORTANT:

- When using Kakugata 2, place it horizontally.

- 3 Select <Apply>.

4 Select paper type.

LINKS

- ▶ **Loading Paper in the Multi-Purpose Tray(P. 138)**
- ▶ **Limiting the Paper Sizes Displayed for the Multi-Purpose Tray(P. 163)**
- ▶ **Available Paper(P. 718)**

Registering a Custom Paper Size

19YU-035

You can register up to three frequently used custom paper sizes.

1 Select <Paper Settings> in the Home screen. ▶ Home Screen(P. 116)

2 Select <Register Custom Paper>.

3 Select the registration number.

NOTE:

Deleting a setting

- Select <Delete> ▶ <Yes>.

4 Specify the length of the <X> side and <Y> side.

- Select <X> or <Y>, and enter the length of each side using the numeric keys.

5 Select <Apply>.

Setting to the registered custom size

The paper sizes that are registered in the procedure above can be called when <Custom Size> is selected on the paper size selection screen for the paper drawer or multi-purpose tray.

LINKS

- ▶ Loading Paper in the Paper Drawer(P. 135)
- ▶ Loading Paper in the Multi-Purpose Tray(P. 138)

Limiting the Paper Sizes Displayed for the Multi-Purpose Tray

19YU-036

You can ensure that only frequently used paper sizes are shown in the <Frequently Used Sizes> tab of the screen for selecting the paper size setting.

1 Select <Paper Settings> in the Home screen.  Home Screen(P. 116)

2 Select <Select Frequently Used Paper Sizes>.

3 Select <Multi-Purpose Tray>.

4 Clear the check boxes for paper sizes you do not want displayed.

- Ensure that only the check boxes for frequently used paper sizes are selected.

NOTE:

- Paper sizes that are not selected can be viewed by selecting <Other Sizes> tab in the paper size setting selection screen.

5 Select <Apply>.

LINKS

-  Specifying Paper Size and Type in the Multi-Purpose Tray(P. 156)
-  Registering Default Paper Settings for the Multi-Purpose Tray(P. 159)

Automatically Selecting an Appropriate Paper Source for Each Function

19YU-0HJ

Enable or disable the automatic paper source selection feature for each paper source. If this feature is set to <On>, the machine automatically selects a paper source that is loaded with paper of the appropriate size for each print job. Also, when the paper in the selected paper source runs out, this feature enables continuous printing by switching from that paper source to another that is loaded with the same paper size.

- 1** Select <Menu> in the Home screen. ▶ Home Screen(P. 116)
- 2** Select <Function Settings> ▶ <Common> ▶ <Paper Feed Settings>.
- 3** Select <Paper Source Auto Selection>.

4 Select the target function.

- When the target function is report/list printing or memory media print, select <Other>.

5 For each paper source to which you want to apply the automatic paper source selection feature, select <On>.

- <Drawer 3> and <Drawer 4> are displayed only when the optional cassette feeding unit is installed.

NOTE:

- Always specify <On> for at least one paper drawer. If you specify <Off> for all the paper drawers, then you cannot finish the setting procedure.

6 Select <Apply>.

Set the Automatic Detection Size of the Paper Drawer

19YU-0F3

For each paper drawer, register the paper size to be detected automatically. This setting is useful when the size of the paper to be fed has been decided for each paper drawer. You can also set the paper size to be detected automatically for the multi-purpose tray.

IMPORTANT

- Be sure to register the paper size correctly. If you do not register the paper size correctly, paper jams may occur.

1 Select <Paper Settings> in the Home screen. ▶ Home Screen(P. 116)

2 Select <Paper Size Group for Auto Recognition in Drawer>.

3 Select the paper drawer to change the size.

- <Drawer 3> and <Drawer 4> are displayed only when the optional cassette feeding unit is installed.

4 Select the paper size you want to auto-sensing.

A5R_STMTR Distinction of Paper

19YU-0F4

For each paper drawer, you can set the paper size to use for the operation when the paper loaded in that paper drawer is either A5R or STMTR.

IMPORTANT

This item is effective when <All Sizes> is selected in <Ppr. Size Group for Auto Recog. in Drawer> ([▶Set the Automatic Detection Size of the Paper Drawer\(P. 165\)](#)) and <Auto> is selected in <Paper Size> ([▶Specifying Paper Size and Type in the Paper Drawer\(P. 153\)](#)).

- 1 Select <Paper Settings> in the Home screen. [▶Home Screen\(P. 116\)](#)
- 2 Select <A5R/STMTR Paper Selection>.
- 3 Select <A5R> or <STMTR> for each for each paper drawer, and then select <Apply>.

- <Drawer 3> and <Drawer 4> are displayed only when the optional cassette feeding unit is installed.

- 4 Check the message, choose the <Close>.

Customizing the Display

19YU-037

In order to make the Home screen easier to use, you can customize. In addition, you can work more efficiently by registering your favorite settings to the Basic Features screen for each function.

Customizing the Home Screen

You can rearrange buttons that are displayed in the Home screen. In addition, you can customize the Home screen to make it easier to select functions by adding shortcut buttons. ▶ **Customizing the Home Screen(P. 168)**

Registering "Favorite Settings"

To make it possible to quickly call up the same settings for Copy, Fax, and Scan, you can register them as your favorite settings. You can add registered setting combinations to the Home screen as shortcut buttons. ▶ **Registering Frequently Used Settings(P. 171)**

Customizing the Home Screen

19YU-038

You can add/delete shortcut buttons displayed in the Home screen according to your application or a preferred arrangement. You can also change the order that they are displayed in.

- ▶ **Adding Buttons to the Home Screen(P. 168)**
- ▶ **Changing the Arrangement of Buttons(P. 169)**

Adding Buttons to the Home Screen

You can add shortcut buttons to the Home screen for frequently used functions such as <Copy>, <Fax>, and <Scan>. For example, you can carry out tasks more quickly and efficiently by assigning a sequence of settings (e.g. "Scan both sides of an original, save it as a highly compressed PDF file and send it via e-mail") to a single button.

NOTE

- The settings to be added as a shortcut button must be registered beforehand as Favorite Settings. ▶ **Registering Frequently Used Settings(P. 171)**

1 Select <Home Screen Settings> in the Home screen. ▶ **Home Screen(P. 116)**

- If the login screen appears, enter the correct ID and PIN. ▶ **Logging in to the Machine(P. 126)**

2 Select <Select Button to Display>.

3 Select the function with the Favorite Settings you want to add as a button.

4 Select the check box for all settings to be displayed in the Home screen and select <Apply>.

NOTE:

Removing registered buttons

- Clear the check box for the name of the button you want to remove and then select <Apply>. Once you remove a registered button, a space appears where the button was displayed in the Home screen. If necessary, delete the space.

5 Read the message that is displayed, and select <OK>.

⇒ A button for the newly selected settings is added to the Home screen.

NOTE:

- If the Home screen is full and no more settings can be registered, Delete registered buttons and spaces in <Home Screen Settings>.

Changing the Arrangement of Buttons

To make the buttons easier to use, you can rearrange the buttons however you like. For instance, you can put the most frequently used functions first, or arrange the function buttons together with shortcut buttons for Favorite Settings. You can also insert a blank (space) instead of a button to make it easier to view the Home screen.

1 Select <Home Screen Settings> in the Home screen. ▶ Home Screen(P. 116)

- If the login screen appears, enter the correct ID and PIN. ▶ Logging in to the Machine(P. 126)

2 Select <Set Display Order>.

3 Select the button to move.

- The selected button is highlighted. Tap the selected button again to deselect it.

4 Select <Move Left> or <Move Right>.

- The button moves as many times as you tapped.
- Long touching <Move Left>/<Move Right> to move the button continuously.

■ Inserting a blank

- When <Insert Blank> is selected, a blank is inserted into the left side of the selected button.
- If the button at the end is selected, a blank is inserted even if <Move Right> is selected.

NOTE:

Deleting a blank

- Select the blank to be deleted, and select <Del. Blank>.

5 Select <Apply>.

LINKS

▶ **Basic Operation(P. 121)**

Registering Frequently Used Settings

19YU-039

If you register your frequently used settings as "favorite settings," you can quickly call up the same settings every time you make copies, send a fax, or scan. In addition, if you register complicated settings as "favorite settings," you can quickly call them up for ease of operation. You can also assign registered setting combinations to a shortcut button displayed in the Home screen. This section describes how to register frequently used settings and how to call them up when making a copy.

▶ **Registering Settings(P. 171)**

▶ **Recalling Registered Settings(P. 172)**

NOTE

- You can also register a fax or scan destination in the frequently used settings, however, it cannot be changed once it is registered. To change a destination, delete the settings and then register them again.

Registering Settings

- 1 Select <Copy> in the Home screen. ▶ Home Screen(P. 116)**
- 2 Change the values for the settings you want to register. ▶ Basic Copy Operations(P. 193)**
- 3 Select <Other Settings> ▶ <Favorite Settings>.**
- 4 Select unregistered settings, and select <Register>.**
 - To change the content of a registered setting, select that setting and select <Edit>.

- 5 Check the details of the settings to be registered, and select <Register>.**
 - To change the value of a setting to be registered, select the setting.
 - To rename the setting, select <Name>. On how to enter text, see ▶ **Entering Text(P. 124)** .

6 Select whether to register the settings as a shortcut button.

- If you select <Yes>, a message appears. Check the message and then select <OK>. The registered setting combination is added to the Home screen as a shortcut button.

NOTE:

- If the Home screen is full and the shortcut button cannot be added, use <Home Screen Settings> to delete registered buttons or blanks. ➤ **Customizing the Home Screen(P. 168)**

NOTE

- Registered settings are retained even when the machine is turned OFF.
- If you want to delete a registered setting, select <Copy> ➤ <Other Settings> ➤ <Favorite Settings> ➤ select the settings, and select <Delete> ➤ <Yes>.

Recalling Registered Settings

Simply select the setting combination that suits your purpose from the favorite settings.

<Copy> ➤ <Other Settings> ➤ <Favorite Settings> ➤ Select the setting combination to be recalled, and select <Apply>

NOTE

- Once you have recalled the setting combination, you can also change the copy settings as needed.

Changing the Default Settings for Functions

19YU-03A

The default settings are the settings that are displayed whenever you turn ON the machine, or when you select <Reset>. If you change these default settings to match the operations that you perform frequently, you can eliminate the need to specify the same settings every time you perform an action.

■ Copy

For information about changeable setting items, see  **<Change Default Settings (Copy)>(P. 493)** .

<Menu> ▶ <Function Settings> ▶ <Copy> ▶ <Change Default Settings (Copy)> ▶ Select the setting
▶ Change the default value of the selected item ▶ <Apply> ▶ 

■ FAX

For information about changeable setting items, see  **<Fax Settings>(P. 545)** .

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Fax Settings> ▶ <Change Default Settings (Fax)>
▶ Select the setting ▶ Change the default value of the selected item ▶ <Apply> ▶ 

■ Memory Media Print

For information about changeable setting items, see  **<Access Stored Files Settings>(P. 561)** .

<Menu> ▶ <Function Settings> ▶ <Store/Access Files> ▶ <Common Settings> ▶ <Access Stored Files Settings> ▶ <Change Default Settings (Memory Media Print)> ▶ Select the setting ▶ Change the default value of the selected item ▶ <Apply> ▶ 

■ USB Memory

For information about changeable setting items, see  **<USB Memory Settings>(P. 559)** .

<Menu> ▶ <Function Settings> ▶ <Store/Access Files> ▶ <Common Settings> ▶ <Scan and Store Settings> ▶ <USB Memory Settings> ▶ <Change Default Settings (USB Memory)> ▶ Select the setting ▶ Change the default value of the selected item ▶ <Apply> ▶ 

■ E-Mail

For information about changeable setting items, see  **<E-Mail Settings>(P. 540)** .

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Scan and Send Settings> ▶ <E-Mail Settings>
▶ <Change Default Settings (E-Mail)> ▶ Select the setting ▶ Change the default value of the selected item ▶ <Apply> ▶

■ I-Fax

For information about changeable setting items, see <I-Fax Settings>(P. 542) .

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Scan and Send Settings> ▶ <I-Fax Settings> ▶
<Change Default Settings (I-Fax)> ▶ Select the setting ▶ Change the default value of the selected item ▶ <Apply> ▶

■ Shared Folder/FTP Server

For information about changeable setting items, see <File Settings>(P. 544) .

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Scan and Send Settings> ▶ <File Settings> ▶ <Change Default Settings (File)> ▶ Select the setting ▶ Change the default value of the selected item ▶ <Apply> ▶

NOTE

- If you select <Initialize> on each setting screen, you can restore the default settings.

LINKS

- Basic Copy Operations(P. 193)**

Setting Sounds

19YU-03C

The machine produces sounds in a variety of situations, such as when fax sending is complete or when a paper jam or error occurs. You can set the volume of each of these sounds individually.

■ Adjusting <Fax Volume>

- 1** Press the  key.
- 2** Use the slider to set volume, select <Apply>.

- To mute the sound, move the cursor all the way to the left.

■ Adjusting <Other Volume Set.>

- 1** Press the  key.
- 2** Select <Other Volume Set.>.
- 3** Select a setting.

Setting	Description	Procedure
<Ring Tone>	Sound produced when an incoming fax is received	Go to step 4.
<TX Done Tone>	Sound produced when fax sending is complete	
<RX Done Tone>	Sound produced when fax receiving is complete	
<Scanning Done Tone>	Sound produced when fax original scanning is complete	

Setting	Description	Procedure
<Entry Tone>	Confirmation sound each time a key on the operation panel or button on the display is pressed	Select <On> (produce a tone) or <Off> (not produce a tone).
<Invalid Entry Tone>	Sound produced when an invalid key operation is performed, such as when you enter a number outside the valid setting range	
<Restock Supplies Tone>	Sound produced when a toner cartridge is almost empty	
<Warning Tone>	Sound produced when a paper jam or other error occurs	
<Job Done Tone>	Sound produced when an operation such as copying or scanning is complete	
<Energy Saver Alert>	Sound produced when the machine enters or exits sleep mode	
<Original in Feeder Detection Tone>	Sound produced when an original is loaded in the feeder	

4 Use the slider to set volume, select <Apply>.

- To mute the sound, move the cursor all the way to the left.

■ End sound only for error

In <Sound Only When Error Occurs>, select <On>, and select <Apply>.

Entering Sleep Mode

19YU-03E

The sleep mode function reduces the amount of power consumed by the machine by disabling power flow to the operation panel. If no operations will be performed on the machine for a while, such as during a lunch break, you can save power simply by pressing  on the operation panel.

NOTE

When in sleep mode

- When the machine enters sleep mode,  lights up yellow green.

Situations in which the machine does not enter sleep mode

- When the machine is in operation
- When the Data indicator is lit up or blinking
- When the machine is performing an operation such as adjustment or cleaning
- When a paper jam occurs
- When the receiver of an external telephone is off the hook
- When the machine is set such that the fax incoming ring will not sound
- When the menu screen is displayed
- When a job is waiting to be scanned to a USB memory device or to a computer
- When an error message is displayed on the screen (There are some exceptions. The machine sometimes enters sleep mode when error messages are displayed.)
- When the machine is communicating with an LDAP server, etc.
- When the SSID/network key screen for Direct Connection is displayed
- When settings are being imported or exported

Changing the Auto Sleep Time value

Auto Sleep Time is a function that automatically puts the machine into the sleep mode if it remains idle for a specified length of time. We recommend using the factory default settings ( **<Timer/Energy Settings>(P. 456)**) to reduce power usage. If you want to change the amount of time that elapses before the machine enters the auto sleep mode, perform the procedure below.

<Menu> ► <Preferences> ► <Timer/Energy Settings> ► <Auto Sleep Time> ► Set the amount of time that elapses before the machine automatically enters sleep mode ► <Apply> ►

Changing the sleep mode setting to the specified time

You can configure a setting so that the machine is placed into the sleep mode at the specified time. You can also configure a setting so that the sleep mode is released at the specified time.

<Menu> ► <Preferences> ► <Timer/Energy Settings> ► <Auto Sleep Daily Timer> or <Sleep Mode Exit Time Settings> ► Select <On> in <Set This Function>, and enter the time ► <Apply> ►

Exiting Sleep Mode

You can press or any other key on the operation panel to exit the sleep mode.

NOTE

- You can also tap the display to exit sleep mode.
- If an external telephone is connected, the machine exits sleep mode when you take the receiver off the hook.

Setting Auto Shutdown Time

19YU-0F5

By enabling this setting, you can set the machine to automatically shut down. The machine automatically turns OFF after the specified period of idle time has elapsed since entering sleep mode. You can cut electric power consumption at night and on holidays if you forget to turn OFF the machine.

<Menu> ▶ <Preferences> ▶ <Timer/Energy Settings> ▶ <Auto Shutdown Time> ▶ Set the time period ▶ <Apply> ▶ 

IMPORTANT

When the <Auto Shutdown Time> setting is enabled, the machine may automatically shut down even if you are operating the machine from the Remote UI.

NOTE

- The default setting is 4 hours.
- If any setting of the [Timer Settings] is changed from the Remote UI while the machine is in sleep mode, the timer for the <Auto Shutdown Time> setting is reset to the beginning. The machine automatically shuts down after the specified period of idle time has elapsed since the timer was reset.

Registering Destinations

19YU-03F

You can register frequently used fax/scan destinations in the Address Book and easily select them when needed (➤ **Registering Destinations in the Address Book(P. 182)**). Destinations can be searched alphabetically, from lists in the Address Book, or by entering three-digit numbers (coded dial numbers). You can also specify destinations more quickly by using the following features.

■ Favorites

Registering a lot of addresses in the Address Book makes it difficult to find the destination you need. To avoid this situation, register frequently used destinations as Favorites. Destinations registered in Favorites can be searched from the <★> in the Address Book.

■ Group Dial

You can select multiple destinations that have already been registered and register them together as a group. You can send faxes or e-mails to multiple destinations at the same time. Groups can also be registered in Favorites. ➤ **Registering Multiple Destinations as a Group(P. 185)**

■ Index

The registered destinations are classified into indexes depending on the initial character or the type of address. Changing indexes allows you to perform a destination search quickly. Tap <◀ / ▶> or flick the target index sideways to change the display.

<All>

Displays all the destinations registered in the Address Book.

Displays a list of destinations registered in Favorites.

<A-Z>/<0-9>/<ABC> to <YZ>

Displays destinations with recipient names whose first characters correspond to the characters of the selected index.

Displays destinations for faxes.

Displays destinations for e-mails.

Displays destinations for I-Faxes.

Displays destinations for shared folders and FTP servers. Registration of destinations is performed from the computer.

▶ **Registering Destinations from Remote UI(P. 437)**

Displays a list of destinations registered in Group Dial.

NOTE

- Use the computer to register a shared folder or FTP server as the destination for scans.
▶ **Registering Destinations from Remote UI(P. 437)**
- You can save the Address Book as a file on your computer (although you cannot use the computer to edit the Address Book). You can also import a saved Address Book from the computer to the machine. ▶ **Importing/Exporting the Setting Data(P. 441)**
- You can print a list of destinations registered in the Address Book. ▶ **Address Book List(P. 630)**
- If your office has an LDAP server installed, you can make search to find user information on the server and register it in the Address Book. You need to specify the settings for connecting to an LDAP server beforehand. ▶ **Registering LDAP Servers(P. 62)**

Registering Destinations in the Address Book

19YU-03H

This section describes how to register destinations from the operation panel. You can also use the Remote UI to register destinations. ► **Registering Destinations from Remote UI(P. 437)**

1 Select <Address Book> in the Home screen. ► **Home Screen(P. 116)**

2 Select <Register Dest.>

- If a screen appears prompting you to enter a PIN, enter the correct PIN using the numeric keys, and select <Apply>. ► **Restricting Use of the Address Book(P. 413)**

3 Select type of address to register.

■ Registering destinations with the LDAP server

If your office has an LDAP server installed, you can make search to find user information on the server and register it in the Address Book.

NOTE:

- To make registration from the LDAP server, you need to specify the settings for connecting to the LDAP server beforehand. ► **Registering LDAP Servers(P. 62)**

1 Select <LDAP Server>.

2 Select the LDAP server you are using.

3 Select conditions for user information to be searched.

- Name, fax numbers, e-mail addresses, organization names, and organization unit are available criteria for searching destinations.

4 Enter the search target character string, and select <Apply>.

- On how to enter text, see ► **Entering Text(P. 124)** .
- To specify multiple search criteria, repeat steps 3 and 4.

5 Select <Search Method>.

- 6** Select conditions to display the search result.

<Using All Conditions Below>

Searches and displays the users that meet all the search criteria specified in steps 3 and 4.

<Using Some Conditions Below>

If users that meet even one of the criteria specified in steps 3 and 4 are found, displays all those users.

- 7** Select <Start Search>.

⇒ The users meeting your search criteria are displayed.

NOTE:

- If the authentication screen appears when you select <Start Search>, enter the user name of the machine and the password registered in the LDAP server, and select <Apply>. ➤ **Registering LDAP Servers(P. 62)**

- 8** Select a user you want to register in the Address Book.

- 9** Select <Apply>.

⇒ The user name and the fax number or e-mail address registered on the LDAP server of the selected user are registered in the Address Book.

■ Registering destinations from recall settings

If recall settings are provided, you can select <Recall Settings> and register destinations.

- 4** Select <Name>.

- Registering <Name> is optional. If you register <Name>, the destination can be searched alphabetically.

- 5** Enter the name, and select <Apply>.

- On how to enter text, see ➤ **Entering Text(P. 124)** .

- 6** Select <Fax Number>, <E-Mail Address>, or <I-Fax Address>.

- 7** Enter the destination, and select <Apply>.

■ Making detailed settings (only when registered for fax)

After selecting <Set Details>, a screen similar to the following is displayed.

<ECM TX>

If an error occurs in an image that is being sent, the error is checked and corrected to prevent an improper image from being sent when setting <On>.

<TX Speed>

If it takes time for transmissions to start, such as when there is a poor telephone connection, you can adjust the transmission start speed downward.

<Long Distance>

Specify <International (1)> to <International (3)> according to the transmission conditions when registering overseas fax numbers.

NOTE

- You can also specify <ECM TX> and <TX Start Speed> from <Menu> ► <Function Settings> ► <Send> ► <Fax Settings>. However, settings made from <Address Book> are enabled for the detailed settings of destinations registered in the Address Book.

8 Select <Register As>.

9 Select <Favorites> or <Coded Dial>.

- If you select <Coded Dial>, select the destination number or select <Use Numeric Keys>, and enter the destination number.

10 Select <Apply>.

NOTE

- You can make a group of destinations already registered in the Address Book and register it as one destination. For more information, see ► **Registering Multiple Destinations as a Group(P. 185)** .
- When you want to change or delete items of information about destinations registered in the Address Book, see ► **Editing the Registered Destinations in the Address Book(P. 187)** .

Registering Multiple Destinations as a Group

19YU-03J

You can select multiple destinations that have already been registered and register them together as a group. This section describes how to register a group from the operation panel. You can also use the Remote UI to register a group. [▶Registering Destinations from Remote UI\(P. 437\)](#)

NOTE

- Only destinations of the same type of address can be registered in the same group.
- Shared folders or FTP servers cannot be registered in a group as destinations.

1 Select **<Address Book>** in the Home screen. [▶Home Screen\(P. 116\)](#)

2 Select **<Register Dest.>** ▶ **<Group>**.

- If a screen appears prompting you to enter a PIN, enter the correct PIN using the numeric keys, and select **<Apply>**. [▶Restricting Use of the Address Book\(P. 413\)](#)

3 Select **<Name>**.

- Registering **<Name>** is optional. If you register **<Name>**, the destination can be searched alphabetically.

4 Enter the name, and select **<Apply>**.

- On how to enter text, see [▶Entering Text\(P. 124\)](#) .

5 Select **<Destination>**.

6 Select **<Add>**.

7 Select the index containing the destination you want to register. [▶Index\(P. 180\)](#)

8 Select the destination.

- 9 Repeat steps 6 to 8 until you have registered all of the destinations that you want to register, and then select <Apply>.**

NOTE:

To view information about the destination

- Select the target destination, and select <Details>.

To remove a destination from the group

- Select the destination that you want to remove from the group, and select <Delete> ► <Yes>.

- 10 Select <Register As>.**

- 11 Select <Favorites> or <Coded Dial>.**

- If you select <Coded Dial>, select the destination number or select <Use Numeric Keys>, and enter the destination number.

- 12 Select <Apply>.**

Editing the Registered Destinations in the Address Book

19YU-03K

You can change your settings, such as changing a registered fax number or name, changing the type of destination registered as a fax number to an e-mail destination, changing a coded dial number, and adding or deleting group destinations. You can also delete destinations or groups.

NOTE

- If you delete a destination from the Address Book, it is also deleted from the favorite settings. ▶ **Registering Frequently Used Settings(P. 171)**

1 Select <Address Book> in the Home screen. ▶ **Home Screen(P. 116)**

2 Select the index containing the destination you want to edit. ▶ **Index(P. 180)**

3 Select the destination, and select <Edit>.

- If you select <Details>, you can view information about the destination.
- To delete the destination, select <Delete> ▶ <Yes>.
- If a screen appears prompting you to enter a PIN, enter the correct PIN using the numeric keys, and select <Apply>. ▶ **Restricting Use of the Address Book(P. 413)**

4 After editing the necessary items, select <Apply>.

Copying

19YU-03L

This chapter describes basic copy operations and various other useful functions, such as color balance adjustment and ID card copy.

■ Using Basic Operations

- ▶ Copy Basic Features Screen(P. 191)
- ▶ Basic Copy Operations(P. 193)
- ▶ Canceling Copies(P. 199)
- ▶ Checking the Copying Status and Log(P. 200)

■ Enhancing Quality ▶ Enhancing and Adjusting Copy Quality(P. 202)

▶ Selecting the Type of Original for Copying(P. 203)

▶ Adjusting Sharpness for Copying (Sharpness)(P. 204)

▶ Erasing Dark Borders When Copying (Erase Frame)(P. 205)

▶ Adjusting the Color(P. 207)

■ Using Useful Copy Functions ▶ **Useful Copy Functions(P. 208)**

▶ **Copying Multiple Documents onto One Sheet (N on 1)(P. 209)**

▶ **Copying a Facing Page Original as Two Separate Pages(P. 210)**

▶ **Copying Different Size Originals Together (Different Size Originals) (P. 211)**

▶ **Finishing by Collating/ Grouping(P. 212)**

▶ **Finishing with the Stapler(P. 214)**

▶ **Making ID Card Copies(P. 215)**

Copy Basic Features Screen

19YU-03R

When you select <Copy> in the Home screen, the Copy Basic Features screen appears.

1 Current setting status and setting buttons

The setting status, such as copy ratio, copy paper, and number of copies, are displayed. To copy correctly, be sure to check the settings displayed here. When you want to change a setting, select the desired setting item.

▶ **Basic Copy Operations(P. 193)**

2 <2-Sided>

You can select a combination of 1-sided copying and 2-sided copying for the original and printout paper. Configure the detailed settings from <Other Settings>. ▶ **Basic Copy Operations(P. 193)**

	Scans one side of an original and prints the scanned data on one side of the paper.
	Scans one side of an original and prints the scanned data on both sides of the paper.
	Scans both sides of an original and prints the scanned data on both sides of the paper.
	Scans both sides of an original and prints the scanned data on one side of the paper.

3 <N on 1>

You can select an "N on 1" pattern to arrange several pages of originals on the same side of one sheet. Specify the detailed settings from <Other Settings>. ▶ **Copying Multiple Documents onto One Sheet (N on 1)(P. 209)**

	Does not apply N on 1.
	Prints a two-page original on one page.
	Prints a four-page original on one page.

4 <Other Settings>

You can call the detailed settings or favorite settings that are not displayed in the Copy Basic Features screen.

5 <Reset>

You can collectively restore the default settings.

6 <Start>

Use this button to start copying.

Basic Copy Operations

19YU-03S

This section describes the basic operation procedure used to copy an original.

- 1 Place the original(s).** ▶ **Placing Originals(P. 128)**
- 2 Select <Copy> in the Home screen.** ▶ **Home Screen(P. 116)**
- 3 Select <Number of Copies> in the Copy Basic Features screen.** ▶ **Copy Basic Features Screen(P. 191)**
- 4 Enter the number of copies, and select <Close>.**
 - Tap **C** to cancel the entered quantity.
- 5 Specify the copy settings as necessary.**
 - ▶ Selecting Color Copying or Black and White Copying
 - ▶ Adjusting Density
 - ▶ 2-Sided Copying
 - ▶ Enlarging or Reducing
 - ▶ Selecting Copy Paper

Selecting Color Copying or Black and White Copying

Normally, the machine automatically detects whether the original is color or black and white for copying, but you can also specify it. For example, this enables you to save toner by copying color originals in black and white, or copying tickets with a single color such as red or blue to indicate the date they are distributed.

<Select Color> ▶ color to copy with <Auto (Color/B&W)>, <Full Color> and <Black & White> ▶ <Close>

<Auto (Color/B&W)>

Automatically detects the color of the original. Color pages are copied in four colors (CMYK), and black and white pages are copied in black (K) only.

<Full Color>

Copies in four colors (CMYK), regardless of the color of the original.

<Black & White>

Copies in black (K) only, regardless of the color of the original.

NOTE

- Originals with colors close to black, originals with light colors, or originals with small color areas may be detected as black and white originals, even if you set <Auto (Color/B&W)>.

Adjusting Density

Adjust the density of the scan if the text or images in an original are excessively light or dark. For example, you can sharpen text and lines written using a pencil. ▶

Adjusting Entire Density(P. 194)

Adjust the background density. You can make a clear copy of originals with colored backgrounds, or originals such as a newspaper that is printed on thin paper on which text or images on the other side are visible through the paper. ▶ **Adjusting the Background Density(P. 194)**

■ Adjusting Entire Density

<Other Settings> ▶ <Density> ▶ Adjust the density ▶ <Apply>

■ Adjusting the Background Density

<Other Settings> ▶ <Density> ▶ <Adjust Background Density> ▶ <Adjust (Manual)> ▶ Adjust the background density ▶ <Apply>

NOTE

- Depending on the original color, portions other than the background may be affected.
- If you select <Density by Color>, you can adjust the background density for each color.

2-Sided Copying

You can copy two pages of an original on both sides of the paper. You can also copy a 2-sided original on both sides of the paper, or on two separate pages.

NOTE

- <2-Sided> may not be available with some sizes and types of paper. ▶ **Available Paper(P. 718)**

<Other Settings> ▶ <2-Sided Printing> ▶ Select the type of 2-sided copying ▶ <Apply>

a Types of 2-sided copying

The illustration below shows the types of 2-sided copying.

b <Orig./Fin. Type>

Specify the original orientation, opening type, and finishing type.

Enlarging or Reducing

You can enlarge or reduce copies by using a preset copy ratio such as <A5->A4>, or by setting a custom copy ratio in increments of 1 %.

NOTE

- If you make a setting for <N on 1> after setting the copy ratio, the setting of reduction ratio in <N on 1> takes priority.

<Copy Ratio> ► Select the copy ratio

a Preset copy ratio

Select a copy ratio.

b Numeric keys

You can set any copy ratio from 25 % to 400 % in 1 % increments.

Selecting Copy Paper

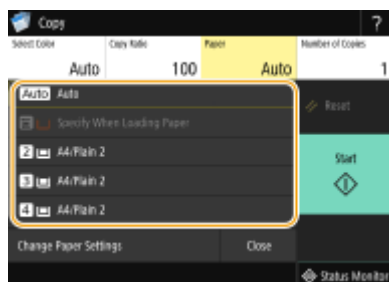

Specify the paper source that contains the paper to use for printing out copies.

NOTE

- You must first specify the size and type of paper that is loaded in the paper source.
 - **Specifying Paper Size and Type(P. 152)**
 - **Loading Paper(P. 133)**

<Paper> ► Select the paper source ► <Close>

Auto

Automatically selects the paper depending on the original size loaded.

	Uses the paper that is loaded in the multi-purpose tray to make copies.
	Uses the paper that is loaded in the paper drawer (Drawer 1) of the machine to make copies.
	Uses the paper that is loaded in the paper drawer (Drawer 2) of the machine to make copies.
 , 	Uses the paper that is loaded in the optional cassette feeding unit (Drawer 3, 4) to make copies.

NOTE:

- For information about other copy settings, see [Enhancing and Adjusting Copy Quality\(P. 202\)](#) or [Useful Copy Functions\(P. 208\)](#) .

6 Select <Start>.

➡ Copying starts.

- If you want to cancel, select <Cancel> ➡ <Yes>. [Canceling Copies\(P. 199\)](#)

■When placing originals in the feeder in step 1

The original is automatically scanned.

■When placing originals on the platen glass in step 1

For 2-sided copying or N on 1 copying, the screen prompting you to load the next original is displayed.

1 Place the next original on the platen glass, and select <Scan Next Original>.

- You can also specify <Select Color>, <Original Type>, <Density> and <Color Balance> separately for each original.

- Repeat this step until you finish scanning the entire original.

2 Select <Start Printing>.

NOTE:

- When the <Paper Settings and Loaded Size Mismatch> or <The memory is full. Scanning will be canceled. Do you want to print?> message is shown in the display. [Countermeasures for Each Message\(P. 653\)](#)

IMPORTANT

When copying originals with text or images that extend to the edges of the page

- The edges of the original might not be copied. For more information about the scan margins, see [Main Unit\(P. 715\)](#) .

TIPS

- If you always want to make copies with the same settings: ▶ **Changing the Default Settings for Functions(P. 173)**
- If you want to register a combination of settings to use when needed: ▶ **Registering Frequently Used Settings(P. 171)**

LINKS

- ▶ **Checking the Copying Status and Log(P. 200)**

Canceling Copies

If you want to cancel copying immediately after selecting <Start>, select <Cancel> on the screen or press  on the operation panel. You can also cancel copying after checking the copy status.

■ Select <Cancel> on the Screen That is Displayed While Copying

■ Press to Cancel

If the Screen Displays a List of Documents When is Pressed

Originals have been scanned and are waiting to be printed. Select a copy document in the <Copy/Print Job Status> tab ► <Cancel> ► <Yes>.

■ Check the copy job status before canceling

LINKS

► Basic Copy Operations(P. 193)

Checking the Copying Status and Log

19YU-03W

You can check the current copy statuses and the logs for copied documents.

IMPORTANT

- When <Display Job Log> is set to <Off>, you cannot check the copy job log. ▶<Display Job Log>(P. 572)

Useful in the Following Cases

- When some long time has already passed after scanning of your original to be copied but printing of the document has not started yet, you may want to see the waiting list of the documents waiting to be printed.
- When you cannot find your printouts that you thought had been copied, you may want to see whether an error has occurred.

1 Select <Status Monitor>.

2 Select <Copy/Print Job>.

3 Check the copy statuses and logs.

■To check the copy statuses

- 1** Select the document whose status you want to check in the <Copy/Print Job Status> tab.

▢ Displays detailed information about the document.

■To check the copy logs

- 1** Select the document whose log you want to check in the <Copy Job Log> tab.
- <OK> is displayed when a document was copied successfully, and <Error> is displayed when a document failed to be copied because it was canceled or there was some error.

▣▣▣▣ Displays detailed information about the document.

NOTE:

When a three-digit number is shown in the case of <Error>

- This number represents an error code. ▶ **Countermeasures for Each Error Code(P. 668)**

LINKS

▶ **Basic Copy Operations(P. 193)**

▶ **Canceling Copies(P. 199)**

Enhancing and Adjusting Copy Quality

19YU-03X

You can improve the copy quality by specifying more detailed settings, such as adjusting the brightness, erasing unnecessary shadows, etc.

▶ **Selecting the Type of Original for Copying(P. 203)**

▶ **Adjusting Sharpness for Copying (Sharpness)(P. 204)**

▶ **Erasing Dark Borders When Copying (Erase Frame)(P. 205)**

▶ **Adjusting the Color(P. 207)**

Selecting the Type of Original for Copying

19YU-03Y

You can select the optical image quality for the copy depending on the original type, such as text-only documents, documents with charts and graphs, or magazine photos.

<Copy> ► <Other Settings> ► <Original Type> ► Select the original type

<Text/Photo/Map>	Suitable when copying originals that contain both text and photos, or originals that include detailed lines, such as maps.
<Printed Image>	Suitable when making a clear copy of originals that contain printed photos (photos made of halftone dots), such as magazines or pamphlets.
<Text>	Suitable when copying documents that only contain text.

LINKS

► **Basic Copy Operations(P. 193)**

Adjusting Sharpness for Copying (Sharpness)

19YU-040

You can adjust sharpness of the copied image. Increase the sharpness to sharpen blurred text and lines, or decrease the sharpness to improve the appearance of magazine photos.

<Copy> ▶ <Other Settings> ▶ <Sharpness> ▶ Adjust the sharpness ▶ <Apply>

Example: If you want to sharpen text and lines written in pencil

Example: If you want to improve the appearance of magazine photos

LINKS

- ▶ Basic Copy Operations(P. 193)
- ▶ Adjusting the Color(P. 207)

Erasing Dark Borders When Copying (Erase Frame)

19YU-041

When copying originals that are smaller than the output paper size, frame lines may appear around the edges in the copied image. When copying facing pages from thick book, dark borders may appear. <Erase Frame> enables you to erase these frame lines and dark borders.

NOTE

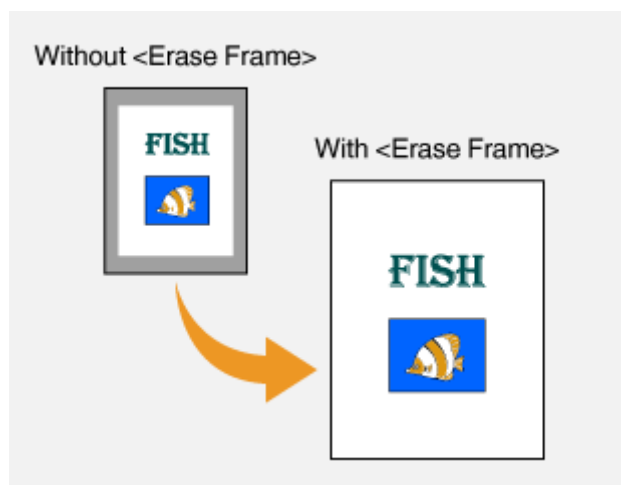

- The width of the frame to erase is increased or decreased relative to the <Copy Ratio> setting.
- <Erase Frame> is not available when using <N on 1>.

■ Erasing the frames in copies of documents

<Copy> ► <Other Settings> ► <Erase Frame> ► <Erase Original Frame> ► Specify the width of the frame to erase ► <Apply> ► Select the original size on the <Scan Size> screen

Example: If you want to erase the dark borders and frame lines

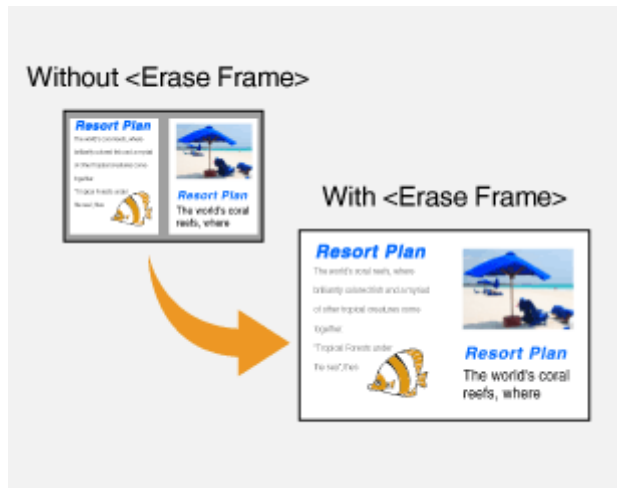

■ Erasing the dark borders in copies of books

<Copy> ► <Other Settings> ► <Erase Frame> ► <Erase Book Frame> ► Specify the width of the frame to erase for <Center Frame Width> or <Outer Frame Width> ► <Apply> ► Select the original size on the <Scan Size> screen

Example: If you want to erase the dark borders and frame lines for books

LINKS

► Basic Copy Operations(P. 193)

Adjusting the Color

Adjust the levels of yellow, magenta, cyan, or black.

<Copy> ► <Other Settings> ► <Color Balance> ► Select the color, and adjust the color level
► <Apply>

Example: If you want to make a copy with colors that more closely match the original

Example: If you want to make a copy with brighter colors than the original

NOTE

- If you select <Fine Adjust>, you can adjust the levels of the three density areas for each color.

LINKS

- Basic Copy Operations(P. 193)
- Adjusting Sharpness for Copying (Sharpness)(P. 204)

Useful Copy Functions

19YU-043

In order to eliminate waste of paper, you can copy multiple sheets onto one page, or check the finish to prevent a miscopy. Also, there is a function to copy originals of different sizes together or to copy both sides of a card, etc. onto one page.

▶ Copying Multiple Documents onto One Sheet (N on 1)(P. 209)

▶ Copying a Facing Page Original as Two Separate Pages(P. 210)

▶ Copying Different Size Originals Together (Different Size Originals) (P. 211)

▶ Finishing by Collating/ Grouping(P. 212)

▶ Finishing with the Stapler(P. 214)

▶ Making ID Card Copies(P. 215)

Copying Multiple Documents onto One Sheet (N on 1)

19YU-044

You can reduce the size of a multiple-page original and arrange all pages on one side of the paper. You can save the number of sheets as the document can be copied on fewer pages than those of the original.

NOTE

- Using <N on 1> reduces the copy ratio automatically (the copy ratio is displayed on the screen). If the copying process has not started, you can further reduce the image size by lowering the numeric value that is automatically displayed. But the edges of the original might not be copied if you increase it.
- <N on 1> is not available when using <Erase Frame>.
- When you copy multiple originals onto one page, margins may be created in the copied image.

<Copy> ► <Other Settings> ► <N on 1> ► Select the number of pages to be combined, and select <Next> ► Select the original size on the <Scan Size> ► On the <Output Size> screen, select the paper source that contains the paper you want to use

a Number of pages to be combined

Select the number of pages to be combined on one side of paper. For example, <4 on 1> means that "a four-page original can be combined on a single sheet."

b <Layout>

Specify how to arrange the originals on the page.

LINKS

► **Basic Copy Operations(P. 193)**

Copying a Facing Page Original as Two Separate Pages

19YU-0F6

You can copy an original with two facing pages such as books and magazines into separate pages, dividing the left and right pages. You can make 2-sided copies as well by copying the right page onto the front side and the left page onto the back side.

NOTE

- When scanning facing pages of a book or bound original, place the original on the platen glass. Place it face down with its corner aligned with the top-left corner of the platen glass, as shown below.

<Copy> ▶ <Other Settings> ▶ <Book->2 Pages> ▶ <On> (On (Left Opening Book))

LINKS

▶ **Basic Copy Operations(P. 193)**

Copying Different Size Originals Together (Different Size Originals)

19YU-0F7

You can place different size originals in the feeder and scan them at one time. You can eliminate the need to select paper and place the original again.

IMPORTANT

- You are limited to certain combinations of original sizes for scanning. Scanning with an improper combination may cause damage to the originals or paper jams.
- Do not place the originals together that are of different weights or paper types, as this may cause damage to the originals or paper jams.

NOTE

- If the originals have the same height, they can be copied/scanned at once even if they have different widths as in the figure below. Align the edges of the same size and set them in the feeder.

For originals with the same height but with different widths

<Copy> ► <Other Settings> ► <Different Size Originals> ► <On>

LINKS

► **Basic Copy Operations(P. 193)**

Finishing by Collating/Grouping

19YU-045

When copying two copies or more from the feeder, you can select collating or grouping for the order of printouts. Select "Collate" to print in sequential page order. Select "Group" to print bundles of each page, as in 10 sheets for the first page, 10 sheets for the second page, and so forth.

<Copy> ▶ <Other Settings> ▶ <Finishing> ▶ <Collate (Page Order)> or <Group (Same Pages)>

<Collate (Page Order)>

The copies are grouped into complete sets in sequential page order. For example, if you are making three copies of a five-page original, the printouts will be arranged in the following page order: 1, 2, 3, 4, 5, 1, 2, 3, 4, 5, 1, 2, 3, 4, 5.

<Group (Same Pages)>

A set number of copies grouped by pages are made. For example, if you are making three copies of a five-page original, the printouts will be arranged in the following page order: 1, 1, 1, 2, 2, 2, 3, 3, 3, 4, 4, 4, 5, 5, 5.

■ Other Finishing Functions

Depending on the installed options, you can use other finishing functions.  **Optional Equipment(P. 742)**

Offset

The copies are slightly offset vertically in the output tray as shown below.

<Copy> ▶ <Other Settings> ▶ <Finishing> ▶ <Collate (Page Order)> or <Group (Same Pages)>
▶ <Offset> ▶ <On> ▶ <Apply>

NOTE

- An optional device is required to use the offset function. ▶ **Optional Equipment(P. 742)**
- Depending on the paper type, you cannot use finishing functions. ▶ **Specifications(P. 714)**

LINKS

▶ **Basic Copy Operations(P. 193)**

Finishing with the Stapler

19YU-0F9

You can bind each copy with the stapler after a collate or group output

<Copy> ▶ <Other Settings> ▶ <Finishing> ▶ <Staple> ▶ Select <Next> ▶ Select how to staple.

<Corner>

To staple in one location in the corner of the page, select <Corner> for the staple position.

<Double>

To staple in two locations in the side of the page, select <Double> for the staple position.

<Eco (Max. 5 Sheets)>

You can bind each paper by pressure joining, without using staples.

NOTE

- An optional device is required to use the stapling function. ▶ **Optional Equipment(P. 742)**
- Depending on the paper type, you cannot use finishing functions. ▶ **Specifications(P. 714)**
- Make sure that the orientation of the original set in the feeder and the orientation of the paper loaded in the paper drawer correspond with each other. Stapling may not be possible depending on the orientation. ▶ **Inner Finisher-K(P. 724)**

LINKS

▶ **Basic Copy Operations(P. 193)**

Making ID Card Copies

19YU-046

You can use <ID Card Copy> to copy the front and back sides of a card onto the same side of a page. This function is useful when copying a driver's license or ID card.

NOTE

- <Copy Ratio> is automatically set to <100%>.

Place the card on the platen glass ▶ <ID Card Copy> ▶ <Start> ▶ Turn the card over ▶ <Scan Next Original>

Fax Basic Features Screen

19YU-048

Selecting <Fax> in the Home screen displays the FAX Basic Features screen that appears when you sending faxes.

1 <Enter Dest.> tab

Select this tab to directly enter a destination.

2 <Specify Destination> tab

Select this tab to search for an LDAP server, enter a coded dial, or specify a destination using the recall settings.

▶ **Basic Operations for Sending Faxes(P. 221)**

▶ **Recalling Previously Used Settings for Sending (Recall Settings)(P. 234)**

3 <TX/RX Settings> tab

Select this tab to specify the scanning settings. You can change the RX mode (▶ **Deciding Which Fax Receive Mode to Use(P. 78)**) of the machine.

4 <Confirm Destination>

You can check or change the name and fax number of the specified destination as well as the number of destinations.

5 <Address Book>

Specify destinations registered in the Address Book.

6 <Reset>

You can collectively restore the default settings.

7 <Start>

Use this button to start faxing.

Basic Operations for Sending Faxes

19YU-049

This section describes the basic operation procedure used to fax an original.

NOTE

- You need to complete some procedures before using fax functions. ▶ **Configuring Initial Settings for Fax Functions(P. 77)**

1 Place the original(s). ▶ **Placing Originals(P. 128)**

2 Select <Fax> in the Home screen. ▶ **Home Screen(P. 116)**

- When the login screen appears, enter your user name and password and set up the authentication server. ▶ **Logging in to Authorized Send(P. 127)**

3 Select <Reset> in the Fax Basic Features screen. ▶ **Fax Basic Features Screen(P. 220)**

- If the destinations set by the previous user are still selected, this can cause transmission errors. Always reset the settings before sending.

4 Specify the destination.

- ▶ Specifying from Address Book
- ▶ Specifying from Coded Dial Numbers
- ▶ Entering Destinations Directly
- ▶ Specifying Destinations in an LDAP Server

Specifying from Address Book

The Address Book enables you to specify a destination by selecting from a list of registered destinations or by searching by name for destinations with recipient names.

NOTE

- You need to register destinations in the Address Book before using this feature. ▶ **Registering Destinations(P. 180)**

1 Select <Address Book>.

2 Select an index. ▶Index(P. 180)

3 Select the check box for the desired destination, and select <Apply>.

TIPS

- If a destination is selected from <Address Book> in the Home screen, the Fax Basic Features screen can be displayed while the selected destination remains being specified.

Specifying from Coded Dial Numbers

Three-digit numbers (coded dial numbers) are assigned to addresses in the Address Book. You can specify an address simply by entering its coded dial number.

NOTE

- To use coded dial numbers, the destination must be registered in the Address Book beforehand. ▶
Registering Destinations(P. 180)

1 Select <Coded Dial> in the <Specify Destination> tab.

2 Enter a three-digit number.

- If you have entered an incorrect value, use **C** to clear it.

NOTE:

If a confirmation screen appears

- When <Confirm When Coded Dial TX> is set to <On>, a screen is displayed that shows the destination and the name for the number. (For Group Dial, the destination name and the number of destinations are

shown.) Check the contents and if everything is correct, select <OK>. To specify a different destination, select <Cancel> and then re-enter the three-digit coded dial number. ➤ **Displaying Destinations in Address Book(P. 415)**

Entering Destinations Directly

For a destination that is not registered in the Address Book, specify it by entering a fax number.

1 Enter the fax number in the <Enter Dest.> tab.

- If your machine is connected to a PBX (Private Branch Exchange), select <R> before entering the destination. If <R> is not available, you need to register the R-key settings. ➤ **<R-Key Setting> (P. 549)**
- If you have entered an incorrect value, use  to clear it.

NOTE

Adding a destination

- To enter a second or subsequent destination, select <Next Dest.>.

If a confirmation screen appears

- When <Confirm Entered Fax Number> is set to <On>, the input screen reappears so that you can confirm the destination (➤ **Confirming the Entered Fax Number(P. 417)**). Enter the destination again.

Sending a fax abroad

- Enter the international access code, the country code, and the fax number to specify the destination. If you are not able to successfully connect to a recipient, select <Pause> and insert a pause between numbers.

Specifying Destinations in an LDAP Server

If your office has an LDAP server installed, you can specify a destination using user information in the server. Access the LDAP server via the machine to search for the appropriate user information and specify it as destination.

NOTE

- You need to specify the settings for connecting to an LDAP server beforehand. ➤ **Registering LDAP Servers(P. 62)**

1 Select <LDAP Server> in the <Specify Destination> tab.

2 Select the LDAP server you are using.

3 Select conditions for user information to be searched.

- Name, fax numbers, e-mail addresses, organization names, and organization unit are available criteria for searching destinations.

4 Enter the search target character string, and select <Apply>.

- On how to enter text, see [▶Entering Text\(P. 124\)](#) .
- To specify multiple search criteria, repeat steps 3 and 4.

5 Select <Search Method>.

6 Select conditions to display the search result.

<Using All Conditions Below>

Searches and displays the users that meet all the search criteria specified in steps 3 and 4.

<Using Some Conditions Below>

If users that meet even one of the criteria specified in steps 3 and 4 are found, displays all those users.

7 Select <Start Search>.

⇒ The users meeting your search criteria are displayed.

NOTE:

- If the authentication screen appears when you select <Start Search>, enter the user name of the machine and the password registered in the LDAP server, and select <Apply>. [▶Registering LDAP Servers\(P. 62\)](#)

8 Select the check box for the user that you want to specify as destination, and select <Apply>.

NOTE:

Adding a destination

- To send faxes to multiple destinations at a time (sequential broadcast), repeat the appropriate steps to enter all destinations.
- You can also recall previously used destinations. **▶Recalling Previously Used Settings for Sending (Recall Settings)(P. 234)**

■To delete destinations

If you specified multiple destinations, you can delete destinations as necessary.

- 1 Select <Confirm Destination>.
- 2 Select the check box for the destination to be deleted, and select <Remove from Dest.>.
 - If you select Group Dial, select <Details> ▶ <Destination>; you can view the destinations registered in the group.
- 3 Select <Yes>.

5 Specify the scanning settings as necessary.

- ▶Adjusting Image Quality
- ▶Scanning 2-Sided Originals

Adjusting Image Quality

You can select the resolution suitable for your original type. The higher the resolution is, the clearer the image becomes, but the longer it takes to send. **▶Selecting Resolution(P. 225)**

You can adjust the density of the fax if the text or images in an original are too light or dark. **▶Adjusting Density(P. 226)**

You can adjust the sharpness of the image. Increase the sharpness to sharpen blurred text and lines, or decrease the sharpness to improve the appearance of magazine photos. **▶Adjusting Sharpness(P. 226)**

■Selecting Resolution

Select <Resolution> in the <TX/RX Settings> tab ▶ Select the resolution

■ Adjusting Density

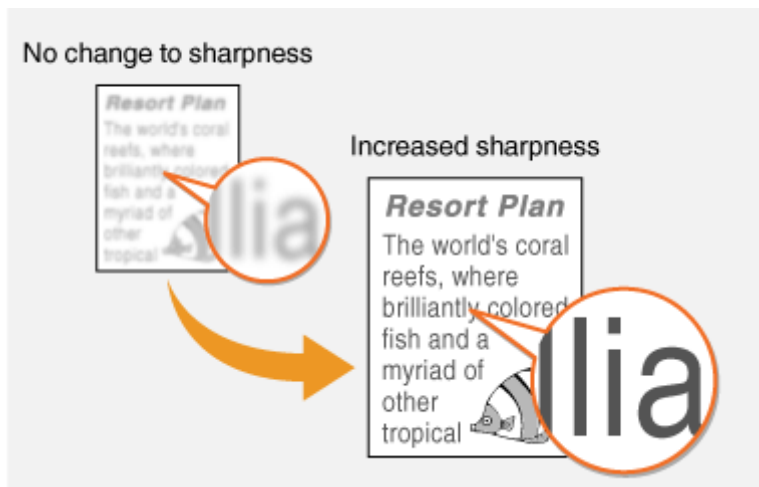

Select <Density> in the <TX/RX Settings> tab ► Adjust the density ► <Apply>

■ Adjusting Sharpness

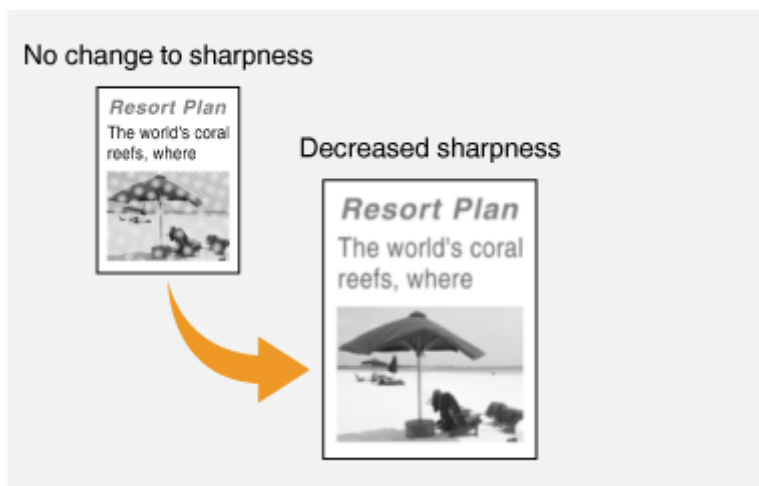

Select <Sharpness> in the <TX/RX Settings> tab ► Adjust the sharpness ► <Apply>

Example: If you want to sharpen text and lines written in pencil

Example: If you want to improve the appearance of magazine photos

Scanning 2-Sided Originals

The machine can automatically scan the front and back sides of originals in the feeder.

IMPORTANT

- The machine cannot scan both sides of originals automatically when the originals are placed on the platen glass or when the machine is set to Manual Sending.

Select <2-Sided Original> in the <TX/RX Settings> tab ► Select <Book Type> or <Calendar Type>

<Book Type>

Select for originals whose images on the front and back sides face the same direction.

<Calendar Type>

Select for originals whose images on the front and back sides face in opposite directions.

6 Select <Start>.

- If the <Confirm Destination> screen is displayed, check whether the destination is correct, and then select <Start Scanning>.

► Scanning of the original starts.

- If you want to cancel, select <Cancel> ► <Yes>. **Canceling Sending Faxes(P. 229)**

■When placing originals in the feeder in step 1

When scanning is complete, the faxes are sent.

■When placing originals on the platen glass in step 1

When scanning is complete, follow the procedures below.

1 Select the original size.

- When there is only one page to be scanned, proceed to step 3.

2 Place the next original on the platen glass, and select <Scan Next>.

- Repeat this step until you finish scanning all of the pages.

3 Select <Start Sending>. The faxes are sent.

TIPS

- If you always want to send faxes with the same settings:  **Changing the Default Settings for Functions(P. 173)**
- If you want to register a combination of settings to use when needed:  **Registering Frequently Used Settings(P. 171)**
- If you want to sound an alarm when the handset is off the hook:  **<Off-Hook Alarm>(P. 546)**

LINKS

 **Canceling Sending Faxes(P. 229)** **Useful Functions When Sending(P. 233)** **Checking Status and Log for Sent and Received Documents(P. 245)**

Canceling Sending Faxes

19YU-04A

If you want to cancel sending faxes immediately after selecting <Start>, select <Cancel> on the display or press  on the operation panel. You can also cancel sending faxes after checking the fax status.

■ Select <Cancel> on the screen during fax transmission

■ Press to cancel

If the screen displays a list of documents when is pressed

Originals have been scanned and are waiting to be processed. Select the document to cancel, and select <Cancel> ► <Yes>.

■ Check the transmission status before canceling

LINKS

▶ Checking Status and Log for Sent and Received Documents(P. 245)

Receiving Faxes

19YU-04C

This section describes the methods for receiving faxes and how to set up the machine to receive faxes. You need to complete some procedures for using fax functions before specifying the receiving settings. **▶Configuring Initial Settings for Fax Functions(P. 77)**

■ Methods for Receiving Faxes

The machine provides the following receiving methods. Select the method that best suits your needs and then set it up by following the procedures in **▶Setting Up the Machine to Receive Faxes(P. 231)** .

<p><Auto></p> 	<p>Dedicated to receiving faxes</p> <p>The machine receives faxes automatically. Even if someone makes a call to you, you cannot talk to the caller.</p>
<p><Fax/Tel (Auto Switch)></p> 	<p>When the call is a fax</p> <p>The machine receives the fax automatically.</p> <p>When the call is a telephone call</p> <p>An incoming call rings. Pick up the handset to answer the call.</p> <p>NOTE:</p> <ul style="list-style-type: none"> You need to connect your telephone to the machine beforehand.
<p><Manual></p> 	<p>When the call is a fax</p> <p>An incoming call rings. Pick up the handset. If you hear a beep, select  ▶ <Fax> ▶ <Start Receiving> to receive faxes.</p>  <p>When the call is a telephone call</p> <p>An incoming call rings. Pick up the handset. If you do not hear a beep, start your conversation.</p> <p>NOTE:</p> <ul style="list-style-type: none"> You need to connect your telephone to the machine beforehand. You can set the machine to automatically receive faxes when an incoming call rings within a specified timeframe. ▶<Switch to Auto RX>(P. 555)
<p><Answering Machine></p>	<p>When the call is a fax</p> <p>After an incoming call rings, the machine receives the fax automatically.</p> <p>When the call is a telephone call</p>

	<p>The answering machine activates, enabling the caller to leave a message. If you pick up the handset before the answering machine starts recording a message, you can talk with the caller.</p> <p>NOTE:</p> <ul style="list-style-type: none"> • You need to connect your answering machine to the machine beforehand. • Set the answering machine to answer after a few rings. • We recommend that you add approximately 4 seconds of silence at the beginning of the message or set the maximum recording time to 20 seconds.
<p><Net Switch></p> 	<p>The machine distinguishes between fax and telephone calls. This mode is only available for certain countries and requires subscription to a network switch service.</p> <p>NOTE:</p> <ul style="list-style-type: none"> • You need to connect your telephone to the machine beforehand.

NOTE

- Depending on the type of telephone connected to it, the machine may not be able to send or receive faxes properly.
- If you are connecting an external telephone with fax functions, set the telephone to not receive faxes automatically.
- If you pick up the telephone handset and hear a beep, the call is a fax. You can receive the fax just by using the telephone to enter a specific ID number. ▶ **Using a Telephone to Receive Faxes (Remote Reception) (P. 232)**

■ Setting Up the Machine to Receive Faxes

1 Select <Fax> in the Home screen. ▶ Home Screen(P. 116)

- When the login screen appears, enter your user name and password and set up the authentication server. ▶ **Logging in to Authorized Send(P. 127)**

2 Select <RX Mode> in the <TX/RX Settings> tab of the Fax Basic Features screen. ▶ Fax Basic Features Screen(P. 220)

3 Select the receiving method.

■ When selecting <Fax/Tel (Auto Switch)>

Specify the following three settings as necessary. When the setting is complete, select <Apply>.

<Ring Start Time>

Enables you to specify the duration during which the machine determines whether an incoming call is a fax or a telephone call.

<Incoming Ring Time>

Enables you to specify the duration during which an incoming call rings for a telephone call.

<Action After Ring>

Enables you to specify how the machine operates if you do not pick up the handset while an incoming call is ringing. Select <End> to disconnect the call or <Receive> to receive an incoming fax.

TIPS

- If you want to print received documents on both sides of paper: ➤<Print on Both Sides>(P. 553)
- If you want to print information, such as reception date and time, at the bottom of received documents: ➤<Print RX Page Footer>(P. 557)

■ Using a Telephone to Receive Faxes (Remote Reception)

When you pick up the telephone and get a fax signal, you do not need to go to the machine to receive the fax. Just enter a specific ID number with the telephone, and you can start receiving the fax.

NOTE

- When the telephone is not directly connected with the machine, the remote reception function is not available.

- 1 When an incoming call rings, pick up the telephone handset.**
- 2 If you hear a beep, enter the ID number for Remote Reception with the telephone.**
 - For more information about setting the ID number, see ➤<Remote RX>(P. 555) .
- 3 Hang up the handset.**

LINKS

Useful Functions When Sending

19YU-04E

This section describes how to forward a fax again to a previously specified destination, how to send a fax after a phone call, and how to save a copy of a fax document.

▶ **Recalling Previously Used Settings for Sending (Recall Settings)(P. 234)**

▶ **Sending a Fax after a Phone Call (Manual Sending)(P. 237)**

▶ **Saving a Copy of a Sent Original(P. 239)**

Recalling Previously Used Settings for Sending (Recall Settings)

19YU-04F

You can recall the destinations specified in the past. When you specify a previously used destination, the machine also sets the same fax settings such as density you used the last time you sent documents to that destination.

IMPORTANT

- When <Restrict Resending from Log> is set to <On>, you cannot use this feature. ▶ **Disabling Use of Previously Used Destinations(P. 415)**
- Turning OFF the machine or setting <Restrict New Destinations> to <On> deletes the past destinations, and disables this feature. ▶ **Restricting New Destinations that Can Be Specified(P. 415)**
- The destinations in Manual Sending are not available for this feature. ▶ **Sending a Fax after a Phone Call (Manual Sending)(P. 237)**

NOTE

- When you specify a destination using this feature, any destinations that you have already specified are deleted.

1 Place the original(s). ▶ **Placing Originals(P. 128)**

2 Select <Fax> in the Home screen. ▶ **Home Screen(P. 116)**

- When the login screen appears, enter your user name and password and set up the authentication server. ▶ **Logging in to Authorized Send(P. 127)**

3 Select <Reset> in the Fax Basic Features screen. ▶ **Fax Basic Features Screen(P. 220)**

- If the destinations set by the previous user are still selected, this can cause transmission errors. Always reset the settings before sending.

4 Select <Recall Settings> in the <Specify Destination> tab.

5 Select a destination.

- When you transmit to multiple destinations, only the address specified for the first transmission is displayed in the log, but all the destinations are specified.

- ➡ The selected destination and the fax settings used at the time are specified. You can also change the settings before sending.

■ To delete destinations

When you transmitted to multiple destinations, you can delete destinations as necessary.

- 1 Select <Confirm Destination>.
- 2 Select the check box for the destination to be deleted, and select <Remove from Dest.>.

NOTE:

- If you select the Group Dial check box, you can view the destinations registered in the group by selecting <Details> ► <Destination>

- 3 Select <Yes>.

6 Specify the scanning settings as necessary. ➡ Basic Operations for Sending Faxes(P. 221)

7 Select <Start>.

- If the <Confirm Destination> screen is displayed, check whether the destination is correct, and then select <Start Scanning>.

➡ Scanning of the original starts.

- If you want to cancel, select <Cancel> ► <Yes>. ➡ Canceling Sending Faxes(P. 229)

■ When placing originals in the feeder in step 1

When scanning is complete, the faxes are sent.

■ When placing originals on the platen glass in step 1

When scanning is complete, follow the procedures below.

- 1 Select the original size.
 - When there is only one page to be scanned, proceed to step 3.
- 2 Place the next original on the platen glass, and select <Scan Next>.
 - Repeat this step until you finish scanning all of the pages.

3 Select <Start Sending>.

▮▮▮▮▮ The faxes are sent.

LINKS

▶ **Basic Operations for Sending Faxes(P. 221)**

Sending a Fax after a Phone Call (Manual Sending)

19YU-04H

You can send faxes manually at the end of a phone conversation. When you hear a beep over the phone, it means the recipient is trying to receive your faxes. Select <Start> to send your faxes.

NOTE

- You need to connect your telephone to the machine beforehand.

1 Place the original(s). ▶ [Placing Originals\(P. 128\)](#)

- The machine cannot automatically scan both sides of the originals in Manual Sending.
- When the original is placed on the platen glass, only one page can be sent.

2 Select <Fax> in the Home screen. ▶ [Home Screen\(P. 116\)](#)

- When the login screen appears, enter your user name and password and set up the authentication server. ▶ [Logging in to Authorized Send\(P. 127\)](#)

3 Select <Reset> in the Fax Basic Features screen. ▶ [Fax Basic Features Screen\(P. 220\)](#)

- If the destinations set by the previous user are still selected, this can cause transmission errors. Always reset the settings before sending.

4 Specify the scanning settings as necessary. ▶ [Basic Operations for Sending Faxes\(P. 221\)](#)

5 Dial the recipient's fax number.

6 Ask the recipient to set their fax machine to receive your faxes.

- If you hear a beep, proceed to step 7.

7 Select <Start>.

- If you place the original on the platen glass, select the original size.
 - ➡ Scanning of the original starts.
 - If you want to cancel, select <Cancel> ▶ <Yes>. ▶ [Canceling Sending Faxes\(P. 229\)](#)

8 Hang up the handset.

LINKS

- ▶ **Checking Status and Log for Sent and Received Documents(P. 245)**

Saving a Copy of a Sent Original

19YU-04J

In addition to the address specified when the fax is sent, you can also send faxed documents to a preset storage address for archiving. This is useful for keeping a log of what has been sent. You can specify a fax number, an e-mail address, a shared folder on the computer, an FTP server or an I-Fax as the storage address.

NOTE

- Only destinations in the Address Book can be specified as a storage address. To use the Address Book, the destination must be registered beforehand. **▶ Registering Destinations(P. 180)**

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Fax Settings> ▶ <Archive TX Document> ▶ Select <On> and select <Archive Address> ▶ Select the check box for the target archive destination in the Address Book, and select <Apply> ▶ <Apply> ▶ 

Various Receiving Methods

19YU-04K

You can store received faxes in the machine's memory without printing them. You can reduce fax paper waste by checking the detailed information of fax documents and only printing necessary documents.

▶ **Saving Received Documents into the Machine (Memory Reception)(P. 241)**

Saving Received Documents into the Machine (Memory Reception)

19YU-04L

You can store received faxes into memory of the machine, and then print them later. This feature can prevent unauthorized persons from seeing confidential documents unintentionally.

- ▶ **Storing Documents into Memory(P. 241)**
- ▶ **Printing Documents in Memory(P. 241)**
- ▶ **Checking/Forwarding/Deleting Documents in Memory(P. 242)**

Storing Documents into Memory

To store received documents into memory, set <Use Memory Lock> to <On>. You can also specify optional settings such as a security setting that makes a password necessary to unlock the feature and a time setting that specifies a period of time during the day in which received documents are stored in memory.

<Menu> ▶ <Function Settings> ▶ <Receive/Forward> ▶ <Common Settings> ▶ <Set Fax/I-Fax Inbox> ▶ <Fax Memory Lock Settings> ▶ Select <On> in <Use Memory Lock> ▶ Specify each setting ▶ <Apply> ▶

<Report Print>

Enables you to print RX Result reports every time documents are stored into memory. To print reports, select <On>. You also need to set <RX Result Report> to <On>. ▶ **RX Result Report(P. 630)**

<Memory Lock Time>

Specify a period of time during the day in which received documents are stored in memory. If you do not set a period of time, the machine stores every document into memory when Memory Reception is turned on.

Printing Documents in Memory

To print received documents in memory, set <Use Memory Lock> to <Off>. All the documents in memory are printed.

NOTE

- You cannot select a specific document for printing.
- If a time for the feature to deactivate has been specified, the documents are automatically printed at the specified time.

<Menu> ► <Function Settings> ► <Receive/Forward> ► <Common Settings> ► <Set Fax/I-Fax Inbox> ► <Fax Memory Lock Settings> ► Select <Off> in <Use Memory Lock> ► <Apply> ►

Checking/Forwarding/Deleting Documents in Memory

You can check an outline of each document stored in memory, including sender fax numbers and number of pages sent. You can also select and forward a document stored in memory, and delete an unnecessary document, if any.

- 1** Select <Status Monitor>.
- 2** Select <RX Job>.
- 3** In the <RX Job Status> tab, select the document you want to check/forward/delete.

- Displays detailed information about the document.
 - To forward the checked document, select <Forward>, and specify the appropriate destination.
 - To delete the checked document, select <Delete> ► <Yes>.

LINKS

- **Receiving Faxes(P. 230)**

Sending Faxes from Your Computer (PC Fax)

19YU-04U

You can send fax documents created on your computer application directly from your computer. This feature eliminates the need to print documents for faxing and saves paper. You need to specify the basic fax settings ([▶ Configuring Initial Settings for Fax Functions\(P. 77\)](#)) and install the fax driver on your computer. For more information about how to install the fax driver, see the manuals for the relevant drivers on the online manual website.

▶ Sending PC Faxes(P. 248)

NOTE

- Depending on the operating system and the version of the fax driver you are using, the fax driver screens in this manual may differ from your screens.

About the Fax Driver Help

- Clicking [Help] on the fax driver screen displays the Help screen. On this screen you can see information that is not in the User's Guide, including information about driver features such as registering frequently used settings and how to set up those features.

Sending PC Faxes

19YU-04W

IMPORTANT

- When <Allow Fax Driver TX> is set to <Off> on the machine, you cannot send faxes from computers. **Restricting Fax Sending from a Computer(P. 417)**
- You need to enable Department ID Management on the fax driver you are using if Department ID Management is enabled on the machine. For more information, click [Help] on the fax driver screen. **Setting the Department ID Management(P. 364)**

1 Open a document in an application and display the print dialog box.

- How to display the print dialog box differs for each application. For more information, see the instruction manual for the application you are using.

2 Select the fax driver for this machine, and click [Print].

3 Specify the destination.

■To specify only one destination

- 1 Click the [Enter Destination] tab.
- 2 Set the communication mode and fax number.

The screenshot shows the 'Fax Sending Settings' dialog box with the 'Enter Destination' tab selected. The 'Communication Mode' is set to 'G3'. The 'Fax Number/URI' is set to 'Fax Number'. The 'Fax Number' field contains '98765432'. The 'Confirm Fax Number' field is empty. Below these fields are 'Destination Name', 'Use Subaddress' (checkbox), and 'Subaddress' fields.

■To specify multiple destinations at once

- 1 Click the [Select Destination] tab.
- 2 Click [Add Destination].
- 3 Set the communication mode and fax number, and click [OK].

The 'Add Destination' dialog box contains the following fields and options:

- Destination Name:** CAND001
- Communication Mode:** G3
- Fax Number/URI:** Fax Number
- Fax Number:** 98765432
- Confirm Fax Number:** (empty field)
- ☐ **Use Subaddress**
 - Subaddress:** (empty field)
 - Password:** (empty field)
- ☐ **Register to Address Book**
- Buttons:** OK (highlighted), Add Next Destination, Cancel, Help

4 Repeat steps 2 and 3 to add concurrent destinations.

- You can also add a destination by clicking [Add Next Destination] in step 3.

- If you need to specify a number to dial an outside line, select [Detailed Settings] ► [Add Outside Dialing Prefix to G3/G4/IP Fax Number] and enter the number in [Outside Dialing Prefix]. The specified number is added to the beginning of the fax number when the machine dials.
- To make it easier to specify destinations using the Address Book.
- Selecting [Store Sent Fax Information and Image] enables you to store the logs for sending documents and check detailed information of a sent document along with its image, including destinations and number of pages. For more information, click [Help] on the fax driver screen.

NOTE:

- When the [Confirm Fax Number] field is active, also enter the appropriate number in the field. The setting of whether to confirm entered numbers can be changed in the fax driver screen. For more information, click [Help] on the fax driver screen.

4 Click [Send] to send the document.

NOTE

When sending from the Windows Store app in Windows 8/10/Server 2012

- Display the charms on the right side of the screen and use the procedure shown below.

Windows 8/Server 2012

Tap or click [Devices] ► the fax driver for this machine ► [Print].

Windows 8.1/Server 2012 R2

Tap or click [Devices] ► [Print] ► the fax driver for this machine ► [Print].

Windows 10

Tap or click [...] ► [Print].

- If you send faxes using this method, only a limited number of fax functions are available.
- If the message [The printer requires your attention. Go to the desktop to take care of it.] is displayed, go to the desktop and proceed to step 3. This message appears when the machine is set to display the user name when sending a fax and similar instances.

Using Internet Fax (I-Fax)

19YU-04X

The Internet Fax (I-Fax) function allows you to send and receive faxes over the Internet. Originals are sent attached as TIFF images files to e-mail. Since a telephone connection is not used, you can send faxes to distant locations and send documents with many pages without worrying about communications charges. Some advance preparation is required, such as specifying the mail server settings. ➤ **Procedure for Setting to Send E-Mail/Send and Receive I-Fax(P. 84)**

➤ **Sending I-Faxes(P. 251)**

➤ **Receiving I-Faxes(P. 258)**

Sending I-Faxes

19YU-04Y

To send a fax to a computer or another I-Fax-compatible device, specify an e-mail address instead of a fax number as the destination. If you send an I-Fax to a computer, it is sent as an e-mail attachment in TIFF format. And in the same way as when you send e-mail to a computer, you can specify multiple destinations and specify Cc and Bcc destinations.

1 Place the original(s). ▶ **Placing Originals(P. 128)**

2 Select <Scan> on the Home screen. ▶ **Home Screen(P. 116)**

- When the login screen appears, enter your user name and password and set up the authentication server. ▶ **Logging in to Authorized Send(P. 127)**

3 Select <I-Fax> on the Scan Basic Features screen. ▶ **Scan Basic Features Screen(P. 283)**

4 Specify the destination.

- ▶ Specifying from Address Book
- ▶ Specifying from Coded Dial Numbers
- ▶ Directly Entering a Destination
- ▶ Specifying Destinations in an LDAP Server

Specifying from Address Book

The Address Book enables you to specify a destination by selecting from a list of registered destinations or by searching by name for destinations with recipient names.

NOTE

- You need to register destinations in the Address Book before using this feature. ▶ **Registering Destinations(P. 180)**

1 Select <Address Book> in the <Specify Destination> tab.

2 Select <To>.

3 Select an index. ▶ **Index(P. 180)**

4 Select the check box for the desired destination, and select <Apply>.

TIPS

- If a destination is selected from <Address Book> in the Home screen, the Basic Features screen for I-Fax sending can be displayed while the selected destination remains being specified.

Specifying from Coded Dial Numbers

Three-digit numbers (coded dial numbers) are assigned to addresses in the Address Book. You can specify an address simply by entering its coded dial number.

NOTE

- To use coded dial numbers, the destination must be registered in the Address Book beforehand. ▶
Registering Destinations(P. 180)

1 Select <Coded Dial> in the <Specify Destination> tab.

2 Select <To>.

3 Enter a three-digit number.

- If you have entered an incorrect value, use **C** to clear it.

NOTE:

If a confirmation screen appears

- When <Confirm When Coded Dial TX> is set to <On>, a screen is displayed that shows the destination and the name for the number. (For Group Dial, the destination name and the number of destinations are shown.) Check the contents and if everything is correct, select <OK>. To specify a different destination, select <Cancel> and then re-enter the three-digit coded dial number. **▶Displaying Destinations in Address Book(P. 415)**

Directly Entering a Destination

For a destination that is not registered in the Address Book, specify it by entering an I-Fax address.

1 Select <Use Keyboard> in the <Specify Destination> tab.

2 Enter the I-Fax address, and select <Apply>.

- On how to enter text, see **▶Entering Text(P. 124)** .

Specifying Destinations in an LDAP Server

If your office has an LDAP server installed, you can specify a destination using user information in the server. Access the LDAP server via the machine to search for the appropriate user information and specify it as destination.

NOTE

- You need to specify the settings for connecting to an LDAP server beforehand. **▶Registering LDAP Servers(P. 62)**

1 Select <LDAP Server> in the <Specify Destination> tab.

2 Select the LDAP server you are using.

3 Select conditions for user information to be searched.

- Name, fax numbers, e-mail addresses, organization names, and organization unit are available criteria for searching destinations.

4 Enter the search target character string, and select <Apply>.

- On how to enter text, see [▶Entering Text\(P. 124\)](#) .
- To specify multiple search criteria, repeat steps 3 and 4.

5 Select <Search Method>.

6 Select conditions to display the search result.

<Using All Conditions Below>

Searches and displays the users that meet all the search criteria specified in steps 3 and 4.

<Using Some Conditions Below>

If users that meet even one of the criteria specified in steps 3 and 4 are found, displays all those users.

7 Select <Start Search>.

⇒ The users meeting your search criteria are displayed.

NOTE:

- If the authentication screen appears when you select <Start Search>, enter the user name of the machine and the password registered in the LDAP server, and select <Apply>. [▶Registering LDAP Servers\(P. 62\)](#)

8 Select the check box for the user that you want to specify as destination, and select <Apply>.

NOTE:

If a screen on which a destination is already specified appears

- You can only send to your own e-mail address. To send to other destinations, you must configure the send function authentication settings so that e-mail transmission is not restricted. Contact your administrator for details. [▶LDAP Server Authentication\(P. 372\)](#) .

Specifying destinations from the transmission records

- You can also recall previously used destinations. [▶Recalling Previously Used Settings for Sending/ Saving \(Recall Settings\)\(P. 316\)](#)

5 Specify multiple destinations, including Cc/Bcc destinations, as necessary.

- Select the method used to specify destinations in the <Specify Destination> tab, and then specify the destination.

- If you selected <LDAP Server> or <Specify Myself as Destination>, the destination is specified in the <To> field.
- <Cc> and <Bcc> addresses can only be selected using <Address Book> or <Coded Dial>.

■ To delete destinations

If you specified multiple destinations, you can delete destinations as necessary.

- 1 Select <Confirm Destination>.
- 2 Select the check box for the destination to be deleted, and select <Remove from Dest.>.
 - If you select Group, select <Details> ► <Destination>; you can view the destinations registered in the group.
- 3 Select <Yes>.

6 Specify the scanning settings as necessary.

- For more information about each setting, see [▶ Sending Data by E-Mail/Saving Data to a Shared Folder or FTP Server\(P. 293\)](#) or [▶ Scanning Clearly\(P. 305\)](#) .

7 Specify the subject, message, and reply-to address for the e-mail as necessary.

■ To specify subject/message

- 1 Select <Subject/Message> in the <Send Settings> tab.
- 2 Select <Subject>
- 3 Enter the subject, and select <Apply>.
- 4 Select <Message>.
- 5 Enter the message, and select <Apply>.
- 6 Select <Apply>.

■ To specify reply-to address

Specify the reply-to address when you want to notify the recipient of an e-mail address different from that of the machine as the reply-to address. Select the target reply-to address from the destinations registered in the

Address Book, and specify it. If the destination has not been registered in the Address Book, see [Registering Destinations\(P. 180\)](#) .

- 1** Select <Reply To> in the <Send Settings> tab.
- 2** Select <Specify from Address Book>.
- 3** Select the check box for the desired reply-to address, and select <Apply>.

NOTE:

- The reply-to address that can be specified is always one of the e-mail addresses registered in the Address Book.

8 Select <Start>.

- If the <Confirm Destination> screen is displayed, check whether the destination is correct, and then select <Start Scanning>.

⇒ Scanning of the original starts.

- If you want to cancel, select <Cancel> ► <Yes>. [Canceling Sending Faxes\(P. 229\)](#)

■ When placing originals in the feeder in step 1

When scanning is complete, the I-Faxes are sent.

■ When placing originals on the platen glass in step 1

When scanning is complete, follow the procedures below.

- 1** If there are additional pages of originals to be scanned, place the next original on the platen glass, and select <Scan Next>.
 - Repeat this step until you finish scanning all of the pages.
 - When there is only one page to be scanned, proceed to the next step.

- 2** Select <Start Sending>.

⇒ The I-Faxes are sent.

NOTE:

If the <SMTP Authentication> screen is displayed

- Enter the user name and password, and select <Apply>.

If a Send Error Occurs

Error notifications are sometimes sent to the e-mail address set to the machine. If you leave it as-is, it may result in an insufficient remaining capacity of mailbox depending on your mail server. It is recommended that you clear the mailbox periodically.

■ To clear the mailbox

IMPORTANT:

- When the mailbox is cleared, all e-mail in the server mailbox is deleted. When you specify the e-mail account that you use usually, you should first check whether any e-mail in the mailbox needs to be kept.

- 1** Start the Remote UI and log in to System Manager Mode. [Starting Remote UI\(P. 427\)](#)

- 2 Click [Settings/Registration] on the Portal page.  **Remote UI Screen(P. 428)**
- 3 Select [TX Settings] ► [Network Settings - E-Mail/I-Fax Settings].
- 4 Click [Clear] in [Clear Mail Box].
- 5 Read the message that is displayed, and click [OK].
 ▢ E-mail is deleted from the mailbox.

TIPS

- If you always want to send with the same settings:  **Changing the Default Settings for Functions(P. 173)**
- If you want to register a combination of settings to use when needed:  **Registering Frequently Used Settings(P. 171)**
- If you want to specify the I-Fax sender name:  **<Register Unit Name>(P. 540)**

Receiving I-Faxes

19YU-050

■ When an I-Fax Arrives

When an I-Fax arrives, the Data indicator on the operation panel blinks. After the I-Fax is completely received, the document is printed out automatically and the indicator goes out.

NOTE

- To cancel reception, select <Status Monitor> ► <RX Job> ► select a document in the <RX Job Status> tab ► <Delete> ► <Yes>.

■ Receiving I-Faxes Manually

If you want to connect to the server before receiving I-Faxes automatically, or if you want to configure the machine so that it does not receive I-Faxes automatically, use the method below to receive I-Faxes manually. If there is a document on the server, printing begins.

<Status Monitor> ► <RX Job> ► <Check I-Fax RX>

■ Printout Paper

Regardless of the received document size, incoming I-Faxes are printed at the size specified in <RX Print Size>. ► <RX Print Size>(P. 553)

NOTE

- If paper of the size specified in <RX Print Size> is not loaded in the paper drawer, the <No Paper> error message is displayed. ► **Countermeasures for Each Message(P. 653)**

TIPS

- If you want to print received documents on both sides of paper: ► <Print on Both Sides>(P. 553)

Printing

There are many ways to use the machine as a printer. You can print documents on your computer by using the printer driver or print image files from a USB memory device. Make full use of the print functions to suit your needs.

■ Printing from a Computer

You can print a document made on your computer by using the printer driver.

▶ **Printing from a Computer(P. 261)**

■ Advanced functions for printing

You can send print data to the machine after adding a PIN. Since data cannot be printed unless the PIN is input from the operation panel, you can improve the security level.

▶ **Various Printing Methods(P. 267)**

Printing from Mobile Devices

- Linking mobile devices such as smartphones or tablets to this machine provides a quick and easy way to print photos and web pages. The machine also supports Google Cloud Print™.

▶ **Linking with Mobile Devices(P. 332)**

▶ **Using Google Cloud Print(P. 354)**

Printing from a Computer

19YU-052

You can print a document made with an application on your computer by using the printer driver. There are useful settings on the printer driver, such as enlarging/reducing and 2-sided printing, that enable you to print your documents in various ways. Before you can use this function, you need to complete some procedures, such as installing the printer driver on your computer. For more information, see the manuals for the relevant drivers on the online manual website.

- ▶ **About the Printer Driver Help(P. 261)**
- ▶ **To Use the Optional Items(P. 261)**
- ▶ **Basic Printing Operations(P. 261)**

About the Printer Driver Help

Clicking [Help] on the printer driver screen displays the Help screen. On this screen, you can see the detailed descriptions that are not in the User's Guide.

To Use the Optional Items

If the optional cassette feeding unit or inner finisher is attached to the machine, perform the following operation on the printer driver.

IMPORTANT

- To perform the following procedure, log in to your computer with an administrator account.

Open the printer folder (▶ **Displaying the Printer Folder(P. 764)**) ▶ Right-click the printer driver icon for this machine ▶ [Printer Properties] or [Properties] ▶ [Device Settings] tab ▶ Select the check box for attached optional equipment ▶ [OK]

Basic Printing Operations

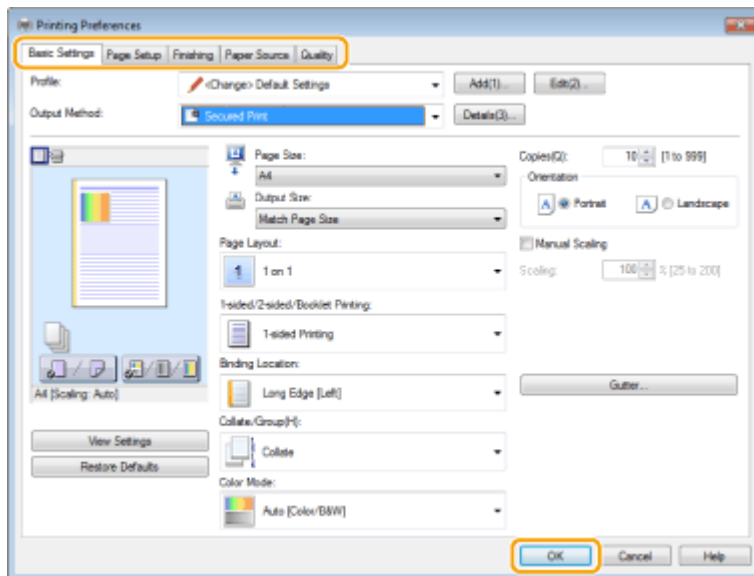

This section describes how to print a document on your computer by using the printer driver.

NOTE

Paper settings on the machine

- Normally, it is necessary to specify the paper size and type for the paper loaded in each paper source before proceeding to printing.

- 1** Open a document in an application and display the print dialog box.
- 2** Select the printer driver for this machine, and click [Preferences] or [Properties].
- 3** Specify the print settings as necessary, and click [OK].
 - Switch the tab according to the settings.

- 4** Click [Print] or [OK].

⇒ Printing starts.

- If you want to cancel printing, see **Canceling Prints(P. 263)** .

NOTE

When printing from the Windows Store app in Windows 8/10/Server 2012

Display the charms on the right side of the screen and use the procedure shown below.

Windows 8/Server 2012

- Tap or click [Devices] ► The printer driver for this machine ► [Print]

Windows 8.1/Server 2012 R2

- Tap or click [Devices] ► [Print] ► The printer driver for this machine ► [Print]

Windows 10

Tap or click [...] ► Tap or click [Print]

- If you print using this method, only a limited number of print settings are available.
- If the message [The printer requires your attention. Go to the desktop to take care of it.] is displayed, go to the desktop and follow the instructions in the displayed dialog box. This message appears when the machine is set to display the user name during printing and similar instances.

LINKS

- **Checking the Printing Status and Log(P. 265)**

Canceling Prints

19YU-053

You can cancel printing from your computer or on the operation panel of the machine.

- ▶ **From a Computer(P. 263)**
- ▶ **From the Operation Panel(P. 264)**

From a Computer

You can cancel printing from the printer icon displayed on the system tray on the desktop.

1 Double-click the printer icon.

NOTE:

When the printer icon is not displayed

- Open the printer folder (▶ **Displaying the Printer Folder(P. 764)**), right-click the printer driver icon for this machine, and click [See what's printing] (or double-click the icon of the printer driver for this machine).

2 Select the document you want to cancel, and click [Document] ▶ [Cancel].

3 Click [Yes].

⇒ Printing of the selected document is canceled.

NOTE

- Several pages may be output after you cancel printing.

TIPS

Canceling from the Remote UI

- You can cancel printing from the [Job Status] page on the Remote UI: ▶ **Checking Current Status of Print Documents(P. 430)**

Canceling from an application

- On some applications, a screen like shown below appears. You can cancel printing by clicking [Cancel].

From the Operation Panel

Cancel printing using  or <Status Monitor>.

■ Press to Cancel

If the Screen Displays a List of Documents When is Pressed

Select the document you want to cancel, and select <Cancel> ► <Yes>.

■ Check the Print Job Status Before Canceling

NOTE

- Several pages may be output after you cancel printing.

LINKS

- ▶ Basic Printing Operations(P. 261)
- ▶ Checking the Printing Status and Log(P. 265)

Checking the Printing Status and Log

19YU-054

You can check the current print statuses and the logs for printed documents.

IMPORTANT

- When <Display Job Log> is set to <Off>, you cannot check the print logs.  <Display Job Log>(P. 572)

Useful in the Following Cases

- When your documents are not printed for a long time, you may want to see the waiting list of the documents waiting to be printed.
- When you cannot find your printouts that you thought had been printed, you may want to see whether an error has occurred.

1 Select <Status Monitor>.

2 Select <Copy/Print Job>.

3 Check the print statuses and logs.

■To check the print statuses

- 1** Select the document whose status you want to check in the <Copy/Print Job Status> tab.

 Displays detailed information about the document.

■To check the print logs

- 1** Select the document whose log you want to check in the <Print Job Log> tab.
- <OK> is displayed when a document was printed successfully, and <Error> is displayed when a document failed to be printed because it was canceled or there was some error.

▢ Displays detailed information about the document.

- The displayed document name or user name may not reflect the actual document or user name.

NOTE:

When a three-digit number is shown in the case of <Error>

- This number represents an error code. ▶ **Countermeasures for Each Error Code(P. 668)**

LINKS

▶ **Basic Printing Operations(P. 261)**

▶ **Canceling Prints(P. 263)**

Various Printing Methods

19YU-055

This section describes how to print a document by adding a PIN, and how to print a file stored on a USB memory device without using the printer driver.

▶ **Printing a Document Secured by a PIN (Secure Print)(P. 268)**

▶ **Printing from a USB Memory Device (Memory Media Print)(P. 272)**

Printing a Document Secured by a PIN (Secure Print)

19YU-056

By setting a PIN to a document when printing from a computer, the document is held in the memory of the machine, and is not printed until the correct PIN is entered on the operation panel of the machine. This function is called "Secure Print," and the document that is protected by a PIN is called a "secured document." Using Secure Print keeps printouts of confidential documents from being left unattended.

▶ **Printing via Secure Print(P. 269)**

Printing via Secure Print

19YU-058

This section describes how to print a document from an application as a secured document. The first part of this section describes how to send a secured document to the machine, and the second part of this section describes how to print the secured document on the machine.

- **Sending a Secured Document from a Computer to the Machine(P. 269)**
- **Printing Out Secured Documents(P. 270)**
- **Changing the Valid Time Period for Secured Documents(P. 271)**

Sending a Secured Document from a Computer to the Machine

- 1** Open a document in an application and display the print dialog box.
- 2** Select the printer driver for this machine, and click [Preferences] or [Properties].
- 3** Select [Secured Print] in [Output Method].

➡ The [Information] pop-up screen is displayed. Check the message, and click [Yes] or [No].

- 4** Specify the print settings as necessary, and click [OK].

- Switch the tab according to the settings.

- 5** Click [Print] or [OK].

➡ After the secured document is sent to the machine, it is held in the memory of the machine waiting to be printed.

Printing Out Secured Documents

Prints secured documents sent to the machine. After a valid time period (**Changing the Valid Time Period for Secured Documents(P. 271)**) has elapsed, the secured document will be deleted from the memory of the machine and can no longer be printed.

NOTE

- If secured documents are left unprinted, they occupy the memory and may prevent the machine from printing even ordinary (not secured) documents. Make sure that you print your secured documents as soon as you can.
- You can check how much memory is being used for secured documents.
<Status Monitor> ▶ <Device Information> ▶ <Secure Print Memory Usage>

1 Select <Secure Print> in the Home screen. ▶ Home Screen(P. 116)

NOTE:

- You cannot proceed to the next step if the <Remote Scanner> screen shown below is displayed. In this case, select to close the screen, and select <Secure Print>.

2 Select the check box for the secured document to print, and select <Start>.

- You can select multiple documents that have the same PIN.

NOTE:

If a screen to select a user is displayed

- If secured documents from two or more users are stored in memory, the screen for user selection is displayed prior to the screen for file selection. Select your user name.

Deleting a secured document

- You can collectively delete multiple documents. Select the check box for the secured document to delete, and select <Delete>.

3 Enter the PIN, and select **<Apply>**.

- When you select multiple documents with different PINs in step 2, a message is displayed. Select <Close>, and select the secured documents again in step 2.

➡ Printing starts.

- If you want to cancel printing, select <Cancel> ► <Yes>.

Changing the Valid Time Period for Secured Documents

You can change the valid time period from the time secured document data is sent to the machine until the time it is deleted within a certain period of time.

1 Select **<Menu>** in the Home screen.  **Home Screen(P. 116)**

2 Select **<Function Settings>**.

3 Select **<Secure Print>**.

- If the login screen appears, enter the correct ID and PIN.  **Logging in to the Machine(P. 126)**

4 Select **<Secure Print Deletion Time>**.

NOTE:

When <Secure Print Deletion Time> cannot be selected

- Set **<Use Secure Print>** to **<On>**.

Disabling Secure Print

- Set **<Use Secure Print>** to **<Off>**, and then restart the machine.

5 Specify how long the machine holds secured documents, and select **<Apply>**.

- The secured document is deleted from the memory of the machine unless it is printed before the time specified here elapses.

6 Select **<Apply>**.

7 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

LINKS

 **Checking the Printing Status and Log(P. 265)**

 **Restricting Printing from a Computer(P. 419)**

Printing from a USB Memory Device (Memory Media Print)

19YU-059

You can print files directly by connecting a USB memory device to the machine. Using this function, you can print without using a computer. For more information about the available USB memory devices and how to insert/remove the USB memory device, see **▶Connecting a USB Memory Device(P. 99)** .

1 Select <Memory Media Print> in the Home screen. **▶Home Screen(P. 116)**

2 Select the check box for the file print.

- You can select multiple files.

- To clear a selection, select the file you have selected (✓) again.
- Selecting a folder displays its contents. To return to the folder in the upper level, select .

NOTE:

- Folders and files lower than the fifth directory are not displayed.
- When you move to another folder, the previous file selections will be cleared.

■To select all files

- Select <Select All>.
 - To clear all selections, select <Clear Selection>.
- If file types are mixed, select <JPEG/TIFF Files> or <PDF Files>.

■To change the file display method

You can select the file display method from "Preview" and "Details."

Preview

Details

NOTE:

- You cannot view the contents of a PDF file.
- You can specify the file display method used to display the <Memory Media Print> screen. ▶<Default Display Settings>(P. 565)

■To change the file sort order

You can change the sort order of the files in a USB memory device.

NOTE:

- You can specify a sort setting such as <Name (Ascending)> or <Date/Time (Ascending)> as the default setting for the file sort order. ▶<File Sort Default Settings>(P. 565)

- 1 Select <Sort Files>.
- 2 Select the criteria for file sorting.

NOTE:

- When you select <Date/Time (Ascending)> or <Date/Time (Descending)>, files are sorted based on the modification dates and time of the files.

3 Select <Apply>.

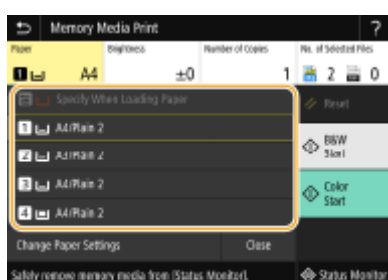

4 Specify the print settings as necessary.

- You can select <Reset> to restore all the default print settings.

<Paper>

Select the paper source that contains the paper to use for printing.

	Uses the paper that is loaded in the multi-purpose tray to print files.
	Uses the paper that is loaded in the paper drawer (Drawer 1) of the machine to print files.
	Uses the paper that is loaded in the paper drawer (Drawer 2) of the machine to print files.
	Uses the paper that is loaded in the optional cassette feeding unit (Drawer 3, 4) to make copies

NOTE:

- When specifying other print settings, select <Close>.

<Brightness>

You can adjust the brightness of the entire image.

NOTE:

- When configuring other print settings, select <Close>.

<Number of Copies>

Enter the number of copies.

NOTE:

- When configuring other print settings, select <Close>.

<2-Sided Printing>

You can make 2-sided printouts. Select the binding position.

	Does not make 2-sided printouts.
---	----------------------------------

	<p>Prints images in such a way that the printed pages are opened horizontally when bound.</p> 
	<p>Prints images in such a way that the printed pages are opened vertically when bound.</p> 

NOTE:

- <2-Sided Printing> may not be available with some sizes or types of paper.  **Available Paper(P. 718)**

<N on 1>

- <N on 1> is not available for printing TIFF files.

You can print images on multiple pages onto one page. Select the number of pages to be combined onto one page.

	<p>Does not apply N on 1.</p>
	<p>Prints images on two pages onto one page.</p>
	<p>Prints images on four pages onto one page.</p>
 (PDF only)	<p>Prints images on eight pages onto one page.</p>

NOTE:

- To combine images on nine or 16 pages onto one page when printing a PDF file, select <Set PDF Details>  <N on 1>.

<Set JPEG/TIFF Details>

You can change the print settings for JPEG and TIFF images.

<2-Sided Printing>

You can make 2-sided printouts. Select the binding position.

<N on 1> (JPEG files only)

Prints data for multiple pages of image data on the same side of a sheet of paper. You can specify the number of pages to print on one side of a sheet of paper. For example, to print four pages on one side of a sheet of paper, select <4 on 1>.

<Original Type>

You can select the type of original depending on the image to print.

<Photo Priority>

Gives priority to printing photo images smoothly.

<Text Priority>

Gives priority to printing text clearly.

<Halftones>

You can select the printing method used to reproduce halftones (the intermediate range between the lighter and darker areas of an image) for optimal image quality.

<Gradation>

Prints images with fine gradation, such as digital camera images, with a smooth finish.

<Error Diffusion>

Prints images with small text or fine lines with a clear finish.

<Set PDF Details>

You can change the print settings for PDFs.

<2-Sided Printing>

You can make 2-sided printouts. Select the binding position.

<N on 1>

Prints data for multiple pages of image data on the same side of a sheet of paper. You can specify the number of pages to print on one side of a sheet of paper. For example, to print four pages on one side of a sheet of paper, select <4 on 1>.

<Print Range>

Specify pages you want to print.

<All Pages>

Prints all pages.

<Specified Pages>

Specify the range of pages you want to print. Enter the desired value in each of <Start Page> and <End Page> , and select <Apply>.

IMPORTANT:

- When the specified page range does not match any of the pages of the PDF file, printing is not performed.

<Enlarge/Reduce to Fit Paper Size>

Specify whether to enlarge or reduce the original according to the print range of paper. Note that size enlargement/reduction will not affect the aspect ratio of the original.

<Enlarge Print Area>

Specify whether to extend the print range to the paper size.

NOTE:

- If you set to <On>, part of print data may not be printed in edge areas or paper may be partly smudged depending on the document.

<Print Comments>

This setting specifies whether to print annotations in the PDF file.

**<Off>**

Prints no annotations.

<Auto>

Prints only those annotations that are specified to be printed in the PDF file.

<Password to Open Document>

You can print password protected PDF files by entering the password required to open them. Enter the password, and select <Apply>.

<Other Settings>**<Halftones>**

You can select the printing method used to reproduce halftones (the intermediate range between the lighter and darker areas of an image) for optimal image quality. You can make this setting for each of the types of image contained in one document. See [▶<Halftones>\(P. 531\)](#) for the description of the setting.

<Pure Black Text>

You can print black text of which color information is "R=G=B=0%," "C=M=Y=100%," or "C=M=Y=0% / K=100%," using only the K (black) toner. See [▶<Pure Black Text>\(P. 527\)](#) for the description of the setting.

<Black Overprint>

Specify the printing method used when black text overlaps a colored background or figure. See [▶<Black Overprint>\(P. 527\)](#) for the description of the setting.

<RGB Source Profile>

Select the source profile for color matching to print RGB data, according to the monitor you are using. See [▶<RGB Source Profile>\(P. 527\)](#) for the description of the setting.

<CMYK Simulation Profile>

This setting allows you to specify the simulation target to print the CMYK (Cyan Magenta Yellow Black) data. The machine converts CMYK data into a device dependent CMYK color model based on this simulation. See [▶<CMYK Simulation Profile>\(P. 528\)](#) for the description of the setting.

<Use Grayscale Profile>

Specify whether to convert gray data to CMYK (cyan, magenta, yellow, and black) data using the grayscale profile of the machine. See [▶<Use Grayscale Profile>\(P. 529\)](#) for the description of the setting.

<Output Profile>

Select the appropriate profile for print data. This option can be specified for each image type in one document. See [▶<Output Profile>\(P. 529\)](#) for the description of the setting.

<Matching Method>

Select the element to be prioritized when making color adjustment in <RGB Source Profile>. See [▶<Matching Method>\(P. 530\)](#) for the description of the setting.

<Composite Overprint>

Specify whether to overprint CMYK data, with overprint specified, as composite output. See [▶<Composite Overprint>\(P. 532\)](#) for the description of the setting.

<Grayscale Conversion>

Specify the way of printing color data in black and white. See [▶<Grayscale Conversion>\(P. 533\)](#) for the description of the setting.

<Print Quality>**<Density>**

Adjust the toner density to be used for printing. See [▶<Density>\(P. 498\)](#) for the description of the setting.

<Toner Save>

Selecting <On> prints in toner saving mode. Select <On> when you want to check the layout or other appearance characteristics before proceeding to final printing of a large job. See [▶<Toner Save>\(P. 499\)](#) for the description of the setting.

<Gradation>

Specify the processing method used to reproduce gradation. <High 2> gives finer gradation than <High 1>. See [▶<Gradation>\(P. 499\)](#) for the description of the setting.

<Resolution>

Specify the resolution to process print data. See [▶<Resolution>\(P. 499\)](#) for the description of the setting.

<Special Smoothing Mode>

Specify the mode to print data with a smooth finish. If the quality of the printout is not acceptable in <Mode 1> (default), try another mode. See [▶<Special Smoothing Mode>\(P. 500\)](#) for the description of the setting.

<Toner Volume Correction>

When the toner volume for text or lines exceeds the limit value of the machine, make a correction so that the toner volume does not exceed the limit value. See [▶<Toner Volume Correction>\(P. 501\)](#) for the description of the setting.

<Line Control>

Specify the processing method used to reproduce lines. See [▶<Line Control>\(P. 501\)](#) for the description of the setting.

<Width Adjustment>

Configure a setting to print text or fine lines in bold. See [▶<Width Adjustment>\(P. 502\)](#) for the description of the setting.

<Advanced Smoothing>

Configure the smoothing setting to print the outline of graphics (e.g., illustrations created using applications) or text with a smooth finish. <Level 2> applies a stronger smoothing effect than <Level 1>. You can apply the setting separately for text and graphics. See [▶<Advanced Smoothing>\(P. 502\)](#) for the description of the setting.

<Gradation Smoothing>

Configure the smoothing setting to print the gradation (color density) of graphics (e.g., illustrations created using applications) or bit map images with a smooth finish. <Level 2> applies a stronger smoothing effect than <Level 1>. You can apply the setting separately for graphics and images. See [▶<Gradation Smoothing>\(P. 503\)](#) for the description of the setting.

5 Select <Start Printing>.

⇒ Printing starts.

- If you want to cancel printing, select <Cancel> ▶ <Yes>.

TIPS

- If you always want to print with the same settings: [▶Memory Media Print\(P. 173\)](#)

Scanning

19YU-05A

You can scan original documents by using the operation panel of the machine or an application on a computer. Whichever way you use, the scanned originals are converted into electronic file formats such as PDFs. Use the scan function to convert large-volume paper documents into files so that you can organize them easily.

NOTE

- To use this machine as a scanner, you must complete preparations in advance, including installation of software to a computer. For more information, see the manuals for the relevant drivers or software on the online manual website. To connect the machine to your computer via a network, you must register the machine to the installed software. ▶ **Preparing to Use the Machine as a Scanner(P. 83)**
- Depending on the operating system and the version of the scanner driver or applications you are using, the screens in this manual may differ from your screens.

■ Using Basic Operations

You can scan and save originals to your computer by using the operation panel of the machine. You can also save originals to a USB memory device or send them as e-mail attachments.

- ▶ **Scan Basic Features Screen(P. 283)**
- ▶ **Basic Operations for Scanning Originals(P. 286)**
- ▶ **Canceling Sending Documents(P. 302)**
- ▶ **Checking Status and Log for Scanned Originals(P. 303)**

■ Enhancing Quality

You can find instructions on how to resolve problems such as "blurry photos" or "text unreadable due to too deep color of the paper."

- ▶ **Scanning Clearly(P. 305)**

■ Efficiently, Reliably

You can find instructions on how to enhance efficiency when sending data and descriptions of useful settings.

▶ Useful Scanning Functions(P. 311)**■ Scanning from a Computer**

You can scan originals placed on the machine from a computer. The scanned originals are saved to the computer. You can scan using MF Scan Utility (included with the machine), or with other applications such as an image-processing or word-processing application.

**▶ Using Your Computer to Scan (Remote Scan) (P. 322)****Scanning from Mobile Devices**

- Linking mobile devices such as smartphones or tablets to this machine provides a quick and easy way to scan originals set on this machine. **▶ Linking with Mobile Devices(P. 332)**

Scan Basic Features Screen

19YU-05C

When you select <Scan> on the Home screen, the Scan Basic Features screen appears.

1 <Computer>

Saves the scanned data to a computer. ▶ **Computer Scan Basic Features Screen(P. 283)**

2 <Remote Scanner>

Puts the machine into the online status when originals are scanned from a computer. ▶ **Using Your Computer to Scan (Remote Scan) (P. 322)**

3 <USB Memory>

Saves the scanned data to a USB memory device. ▶ **Basic Features Screen for USB Scanning(P. 284)**

4 <E-Mail>

Sends the scanned data by e-mail. ▶ **Basic Features Screen for E-Mail Sending/I-Fax Sending/File Saving(P. 284)**

5 <I-Fax>

Sends the scanned data by I-Fax. ▶ **Basic Features Screen for E-Mail Sending/I-Fax Sending/File Saving(P. 284)**

6 <File>

Saves the scanned data to a shared folder or FTP server. ▶ **Basic Features Screen for E-Mail Sending/I-Fax Sending/File Saving(P. 284)**

Computer Scan Basic Features Screen

1 Scan type

Select the scan setting. ▶ **Scanning and Saving to a Computer(P. 287)**

2 <Start>

Use this button to start scanning.

Basic Features Screen for USB Scanning

**1 Send Settings**

The original is scanned based on the settings configured here.

2 <Reset>

You can collectively restore the default settings.

3 <Start>

Use this button to start scanning. Selecting <B&W> starts black and white scanning. Selecting <Color> starts color scanning.

Basic Features Screen for E-Mail Sending/I-Fax Sending/File Saving

E-Mail Sending**I-Fax Sending****File Saving****1 <Specify Destination> tab**

Select this tab to search for a destination in the Address Book or an LDAP server, enter a coded dial, or specify a destination using the recall settings.

▶ **Sending Data by E-Mail/Saving Data to a Shared Folder or FTP Server(P. 293)**

▶ **Recalling Previously Used Settings for Sending/Saving (Recall Settings)(P. 316)**

2 <Send Settings> tab

Select this tab to configure the original scan settings.

3 <Confirm Destination>

You can check or change the name and address of the specified destination as well as the number of destinations.

4 <Reset>

You can collectively restore the default settings.

5 <Start>

Use this button to start scanning. Selecting <B&W> starts black and white scanning. Selecting <Color> starts color scanning.

Basic Operations for Scanning Originals

19YU-05E

This section describes the basic procedures for scanning originals.

■ Scanning

▶ Scanning and Saving to a Computer(P. 287)

▶ Saving Data to a USB Memory Device(P. 289)

▶ Sending Data by E-Mail/Saving Data to a Shared Folder or FTP Server(P. 293)

■ Operating Jobs

- ▶ Canceling Sending Documents(P. 302)
- ▶ Checking Status and Log for Scanned Originals(P. 303)

Scanning and Saving to a Computer

19YU-05F

The sequence of "scanning an original and saving it to a computer" can only be done when scanning from the machine. Scan while specifying what computer originals will be saved to; whether to scan originals in color or black and white; whether to save originals as PDFs or JPEGs; and other settings. Incidentally, if you want to specify a computer connected to the network as the destination, you must register the machine with the computer in advance (**▶Preparing to Use the Machine as a Scanner(P. 83)**).

1 Place the original(s). **▶Placing Originals(P. 128)**

2 Select <Scan> in the Home screen. **▶Home Screen(P. 116)**

- When the login screen appears, enter your user name and password and set up the authentication server. **▶Logging in to Authorized Send(P. 127)**

3 Select <Computer> in the Scan Basic Features screen. **▶Scan Basic Features Screen(P. 283)**

- If only a computer connected to the machine via USB is used, proceed to step 5.

4 Select the destination computer.

5 Select the scan type on the Computer Scan Basic Features screen. **▶Computer Scan Basic Features Screen(P. 283)**

- The scan types and settings that are displayed can be confirmed and changed by using MF Scan Utility. For more information, click [Instructions] on MF Scan Utility.

NOTE:

- If you are a macOS user, see the manuals for the relevant drivers or software on the online manual website.

6 Select <Start>.

■ Scanning of the original starts.

- If you want to cancel, select <Cancel> **▶<Yes>.** **▶Canceling Sending Documents(P. 302)**

IMPORTANT:

- You cannot scan while the ScanGear MF is displayed. Close the screen before scanning.

■ When placing originals in the feeder in step 1

When scanning is complete, the save destination folder is displayed on the computer.

■ When placing originals on the platen glass in step 1

When scanning is complete, follow the procedures below (except if you selected JPEG as a file format).

- 1 If there are additional pages of originals to be scanned, place the next original on the platen glass, and select <Scan Next>.
 - Repeat this step until you finish scanning all of the pages.
 - When there is only one page to be scanned, proceed to the next step.
- 2 Select <Finish>.
 - ➡ The save destination folder is displayed on the computer.

NOTE

About the save destination folder

- By default, the scanned data is saved to the My Documents folder. A subfolder named with the scanning date is created, and the data is saved to that folder.
- You can change the save destination from the MF Scan Utility. For more information, click [Instructions] on MF Scan Utility.

Saving Data to a USB Memory Device

19YU-05H

This section describes how to scan the original and save the scanned data to a USB memory device.

NOTE

- Before saving data to a USB memory device, insert the USB memory device into the USB port. For information about the available USB memory devices and how to insert and remove a USB memory device, see [▶Connecting a USB Memory Device\(P. 99\)](#) .

1 Place the original(s). [▶Placing Originals\(P. 128\)](#)

2 Select <Scan> in the Home screen. [▶Home Screen\(P. 116\)](#)

- When the login screen appears, enter your user name and password and set up as well as the authentication server. [▶Logging in to Authorized Send\(P. 127\)](#)

3 Select <USB Memory> in the Scan Basic Features screen. [▶Scan Basic Features Screen\(P. 283\)](#)

4 Specify the scan settings as necessary.

- [▶Specifying the Scanning Size of the Original](#)
- [▶Selecting a File Format](#)
- [▶Scanning the 2-Sided Originals](#)

Specifying the Scanning Size of the Original

You can specify the scanning size of your originals.

<Scan Size> ▶ Select the original size

Selecting a File Format

You can select the file format to which originals are scanned from PDF/JPEG/TIFF. For PDF, you can select Compact PDF that reduces the data size or the PDF format that enables a text search by including text data scanned with OCR (optical character recognition). You can also create a PDF file with enhanced security by encrypting data or adding the signature. **▶ Enhancing the Security of Electronic Files(P. 312)**

<File Format> ▶ Select a file format

NOTE

- If you select JPEG in <File Format> and try to scan the original from the platen glass, you can only scan one page. To scan multiple pages of the original all at once, use the feeder. Each page of the original is saved as a separate file. If you select TIFF or PDF, you can scan an original with multiple pages either from the platen glass or using the feeder. In this case, whether the original is to be saved as a single file or each page as separate files can be specified in **▶ Dividing a PDF file by Page(P. 290)** or **▶ Dividing a TIFF File by Page(P. 290)** .
- <PDF (Compact)> and <PDF (Compact/OCR)> compress photos and illustrations on the original more than <PDF> and <PDF (OCR)>, and the file size will be smaller. However, the image quality or the number of pages in the original that can be scanned at once may be lower depending on the original type.
- In <PDF (Compact/OCR)> and <PDF (OCR)>, you can configure the settings so that the machine automatically detects the original orientation based on the direction of the text read by the OCR function when scanning the original. **▶ <OCR (Text Searchable) Settings>(P. 492)**

■ Dividing a PDF file by Page

Specify whether to convert the original with multiple pages into a single PDF file or create a separate PDF file for each page. This setting can be configured for each PDF format.

<File Format> ▶ <Set PDF Details> ▶ Select the PDF format ▶ <Divide into Pages> ▶ Select <Off> or <On>

■ Dividing a TIFF File by Page

Specify whether to convert the original with multiple pages into a single TIFF file or create a separate TIFF file for each page.

<File Format> ▶ <Set TIFF Details> ▶ <Divide into Pages> ▶ Select <Off> or <On>

Scanning the 2-Sided Originals

The machine can automatically scan the front and back sides of originals in the feeder.

IMPORTANT

- The machine cannot automatically scan both sides of the original placed on the platen glass.

<2-Sided Original> ► Select <Book Type> or <Calendar Type>

<Book Type>

Select for originals whose images on the front and back sides face the same direction.

<Calendar Type>

Select for originals whose images on the front and back sides face in opposite directions.

NOTE:

- For information about other scan settings, see [▶Scanning Clearly\(P. 305\)](#) or [▶Adjusting Balance between File Size and Image Quality\(P. 315\)](#) .

5 Select <Start>.

➡ Scanning of the original starts.

- If you want to cancel, select <Cancel> ► <Yes>. [▶Canceling Sending Documents\(P. 302\)](#)

■When placing originals in the feeder in step 1

When scanning is complete, the saving process starts.

■When placing originals on the platen glass in step 1

When scanning is complete, follow the procedures below (except if you selected JPEG as a file format).

- 1 If there are additional pages of originals to be scanned, place the next original on the platen glass, and select <Scan Next>.
 - Repeat this step until you finish scanning all of the pages.
 - When there is only one page to be scanned, proceed to the next step.

2 Select <End>.

▢▢▢▢ The saving process starts.

NOTE:

- A new folder is created on the USB memory device, and the scanned document is stored in that folder. The file name of a scanned document is automatically assigned based on the following format: the characters SCAN followed by a four-digit number.file extension name.

TIPS

- If you always want to scan with the same settings: **▶ Changing the Default Settings for Functions(P. 173)**
- If you want to register a combination of settings to use when needed: **▶ Registering Frequently Used Settings(P. 171)**

Sending Data by E-Mail/Saving Data to a Shared Folder or FTP Server

The section describes the procedures for scanning originals and sending the scanned data directly from the machine by attaching it to an e-mail or saving it to a shared folder or FTP server.

NOTE

- Before you can send the data directly by e-mail, you need to complete certain procedures, such as specifying the e-mail server settings. ▶ **Procedure for Setting to Send E-Mail/Send and Receive I-Fax(P. 84)**
- Before you can save the data to a shared folder or FTP server, you need to complete certain procedures, such as specifying the location to save the scanned originals to.
 - ▶ **Procedure for Setting a Shared Folder as a Save Location(P. 89)**
 - ▶ **Procedure for Setting a FTP Server as a Save Location(P. 90)**

1 Place the original(s). ▶ **Placing Originals(P. 128)**

2 Select <Scan> in the Home screen. ▶ **Home Screen(P. 116)**

- When the login screen appears, enter your user name and password and set up the authentication server. ▶ **Logging in to Authorized Send(P. 127)**

3 Select <E-Mail> or <File> in the Scan Basic Features screen. ▶ **Scan Basic Features Screen(P. 283)**

4 Specify the destination.

- ▶ Specifying from Address Book
- ▶ Specifying from Coded Dial Numbers
- ▶ Entering Destinations Directly (E-mail Sending)
- ▶ Specifying Destinations in an LDAP Server

Specifying from Address Book

The Address Book enables you to specify a destination by selecting from a list of registered destinations or by searching by name for destinations with recipient names.

NOTE

- You need to register destinations in the Address Book before using this feature. ▶ **Registering Destinations(P. 180)**

- Register the shared folder or FTP server address from a computer.
▶ **Registering Destinations from Remote UI(P. 437)**

1 Select <Address Book> in the <Specify Destination> tab.

2 Select <To>.

3 Select an index. ▶ **Index(P. 180)**

4 Select the check box for the desired destination, and select <Apply>.

TIPS

- If a destination is selected from <Address Book> in the Home screen, the Basic Features screen for e-mail sending or file saving can be displayed while the selected remains being destination specified.

Specifying from Coded Dial Numbers

Three-digit numbers (coded dial numbers) are assigned to addresses in the Address Book. You can specify an address simply by entering its coded dial number.

NOTE

- To use coded dial numbers, the destination must be registered in the Address Book beforehand. ▶ **Registering Destinations(P. 180)**
- Register the shared folder or FTP server address from a computer.
▶ **Registering Destinations from Remote UI(P. 437)**

1 Select <Coded Dial> in the <Specify Destination> tab.

2 Select <To>.

3 Enter a three-digit number.

- If you have entered an incorrect value, use **C** to clear it.

NOTE:

If a confirmation screen appears

- When <Confirm When Coded Dial TX> is set to <On>, a screen is displayed that shows the destination and the name for the number. (For Group Dial, the destination name and the number of destinations are shown.) Check the contents and if everything is correct, select <OK>. To specify a different destination, select <Cancel> and then re-enter the three-digit coded dial number. **▶Displaying Destinations in Address Book(P. 415)**

Entering Destinations Directly (E-mail Sending)

For a destination that is not registered in the Address Book, specify it by entering an e-mail address.

1 Select <Use Keyboard> in the <Specify Destination> tab.

2 Enter the e-mail address, and select <Apply>.

- On how to enter text, see **▶Entering Text(P. 124)** .

Specifying Destinations in an LDAP Server

If your office has an LDAP server installed, you can specify a destination using user information in the server. Access the LDAP server via the machine to search for the appropriate user information and specify it as destination.

NOTE

- You need to specify the settings for connecting to an LDAP server beforehand. **▶Registering LDAP Servers(P. 62)**

1 Select <LDAP Server> in the <Specify Destination> tab.

2 Select the LDAP server you are using.

3 Select conditions for user information to be searched.

- Name, fax numbers, e-mail addresses, organization names, and organization unit are available criteria for searching destinations.

4 Enter the search target character string, and select <Apply>.

- On how to enter text, see [▶Entering Text\(P. 124\)](#) .
- To specify multiple search criteria, repeat steps 3 and 4.

5 Select <Search Method>.

6 Select conditions to display the search result.

<Using All Conditions Below>

Searches and displays the users that meet all the search criteria specified in steps 3 and 4.

<Using Some Conditions Below>

If users that meet even one of the criteria specified in steps 3 and 4 are found, displays all those users.

7 Select <Start Search>.

⇒ The users meeting your search criteria are displayed.

NOTE:

- If the authentication screen appears when you select <Start Search>, enter the user name of the machine and the password registered in the LDAP server, and select <Apply>. [▶Registering LDAP Servers\(P. 62\)](#)

8 Select the check box for the user that you want to specify as destination, and select <Apply>.

NOTE:

If a screen on which a destination is already specified appears

- You can only send to a limited number of destinations. To send to other destinations, you must configure the authentication settings for send function in such a way that e-mail transmission is not restricted. Contact your administrator for details. ➤ **LDAP Server Authentication(P. 372)**

Specifying destinations from the transmission records

- You can also recall previously used destinations. ➤ **Recalling Previously Used Settings for Sending/ Saving (Recall Settings)(P. 316)**

Saving the original in the shared folder or FTP server

- Only one destination can be specified.

5 When sending an e-mail, specify multiple destinations, including Cc/Bcc destinations, as necessary.

- Select the method used to specify destinations in the <Specify Destination> tab, and then specify the destination.

- If you selected <LDAP Server> or <Specify Myself as Destination>, the destination is specified in the <To> field.
- <Cc> and <Bcc> addresses can only be selected using <Address Book> or <Coded Dial>.

■ To delete destinations

If you specified multiple destinations, you can delete destinations as necessary.

- 1 Select <Confirm Destination>.
- 2 Select the check box for the destination to be deleted, and select <Remove from Dest.>.
 - If you select Group, select <Details> ➤ <Destination>; you can view the destinations registered in the group
- 3 Select <Yes>.

6 Specify the scan settings as necessary.

- Specifying the Scanning Size of the Original
- Selecting a File Format
- Scanning 2-Sided Original

Specifying the Scanning Size of the Original

You can specify the scanning size of your originals.

Select <Scan Size> in the <Send Settings> tab ► Select the original size

Selecting a File Format

You can select the file format to which originals are scanned from PDF/JPEG/TIFF. For PDF, you can select Compact PDF that reduces the data size or the PDF format that enables a text search by including text data scanned with OCR (optical character recognition). You can also create a PDF file with enhanced security by encrypting data or adding the signature. ► **Enhancing the Security of Electronic Files(P. 312)**

Select <File Format> in the <Send Settings> tab ► Select a file format

NOTE

- If you select JPEG in <File Format> and try to scan a original from the platen glass, you can only scan one page. To scan a multiple-page original all at once, use the feeder. Each page of the original is saved as a separate file. If you select TIFF or PDF, you can scan multiple-page originals either from the platen glass or from the feeder. In this case, whether the original is to be saved as a single file or each page as separate files can be specified in ► **Dividing a PDF file by Page(P. 298)** or ► **Dividing a TIFF File by Page(P. 299)** .
- <PDF (Compact)> and <PDF (Compact/OCR)> compress photos and illustrations on originals more than <PDF> and <PDF (OCR)>. The file will be smaller, but the image quality of some originals or the number of originals that can be scanned at once may be lower.
- In <PDF (Compact/OCR)> and <PDF (OCR)> you can configure the settings so that the machine automatically detects the original direction during scanning based on the direction of the text read by the OCR function. ► **<OCR (Text Searchable) Settings>(P. 492)**

■ Dividing a PDF file by Page

Specify whether to convert the original with multiple pages into a single PDF file or create a separate PDF file for each page. This setting can be configured for each PDF format.

Select <File Format> ► <Set PDF Details> ► Select the PDF format ► <Divide into Pages> ► Select <On> or <Off> in the <Send Settings> tab

■ Dividing a TIFF File by Page

Specify whether to convert the original with multiple pages into a single TIFF file or create a separate TIFF file for each page.

Select <File Format> ► <Set TIFF Details> ► <Divide into Pages> ► Select <On> or <Off> in the <Send Settings> tab

Scanning 2-Sided Original

The machine can automatically scan the front and back sides of originals in the feeder.

IMPORTANT

- The machine cannot automatically scan both sides of the original placed on the platen glass.

Select <2-Sided Original> in the <Send Settings> tab ► Select <Book Type> or <Calendar Type>

<Book Type>

Select for originals whose images on the front and back sides face the same direction.

<Calendar Type>

Select for originals whose images on the front and back sides face in opposite directions.

NOTE:

- For information about other scan settings, see **Scanning Clearly(P. 305)** or **Adjusting Balance between File Size and Image Quality(P. 315)** .
- For e-mail, you can specify the subject, message, reply-to address, and priority as necessary. **Specifying E-Mail Settings(P. 319)**

7 Select <Start>.

- If the <Confirm Destination> screen is displayed, check whether the destination is correct, and then select <Start Scanning>.

⇒ Scanning of the original starts.

- If you want to cancel, select <Cancel> ► <Yes>. **Canceling Sending Documents(P. 302)**

■ When placing originals in the feeder in step 1

When scanning is complete, the sending/saving process starts.

■ When placing originals on the platen glass in step 1

When scanning is complete, follow the procedures below (except if you selected JPEG as a file format).

- 1 If there are additional pages of originals to be scanned, place the next original on the platen glass, and select <Scan Next>.
 - Repeat this step until you finish scanning all of the pages.
 - When there is only one page to be scanned, proceed to the next step.

- 2 Select <Start Sending>.

⇒ The sending/saving process starts.

NOTE:

If the <File Authentication> screen or <SMTP Authentication> screen appears

- Enter the user name and password, and then select <Apply>.

File name of the sent document

- The file name of a sent document is automatically assigned based on the following format: communication management number (four digits)_sent date and time_document number (three digits).file extension name.

If an E-Mail Send Error Occurs

Error notifications are sometimes sent to the e-mail address set to the machine. If you leave it as-is, it may result in an insufficient remaining capacity of mailbox depending on your mail server. It is recommended that you clear the mailbox periodically.

■ To clear the mailbox

IMPORTANT:

- When the mailbox is cleared, all e-mail in the server mailbox is deleted. When you specify the e-mail account that you use usually, you should first check whether any e-mail in the mailbox needs to be kept.

- 1 Start the Remote UI and log in to System Manager Mode. **Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. **Remote UI Screen(P. 428)**
- 3 Select [TX Settings] ► [Network Settings - E-Mail/I-Fax Settings].
- 4 Click [Clear] in [Clear Mail Box].
- 5 Read the message that is displayed, and click [OK].

⇒ E-mail is deleted from the mailbox.

TIPS

- If you always want to scan with the same settings:  **Changing the Default Settings for Functions(P. 173)**
- If you want to register a combination of settings to use when needed:  **Registering Frequently Used Settings(P. 171)**

Canceling Sending Documents

19YU-05K

If you want to cancel sending documents immediately after selecting <Start>, select <Cancel> on the display or press . You can also cancel sending documents after checking the sending status.

■ Select <Cancel> to cancel

■ Press to cancel

If the screen displays a list of documents when is pressed

Originals have been scanned and are waiting to be processed. Select the document to cancel, and select <Cancel> ► <Yes>

■ Check the transmission status before canceling

LINKS

- ▶ Basic Operations for Scanning Originals(P. 286)
- ▶ Checking Status and Log for Scanned Originals(P. 303)

Checking Status and Log for Scanned Originals

19YU-05L

You can check the status and log for scanned originals sent directly from the machine.

IMPORTANT

- When <Display Job Log> is set to <Off>, you cannot check the logs for sent documents. ▶<Display Job Log>(P. 572)

- 1 Select <Status Monitor>.
- 2 Select <TX Job>.
- 3 Check the statuses and logs for sent documents.

■To check the statuses for sent documents

- 1 Select the document whose status you want to check in the <TX Job Status> tab.

Displays detailed information about the document.

- If you specified multiple destinations, the number of specified destinations is displayed on the screen. To check the details of specified multiple destinations, select <Destination>.

■To check the logs for sent documents

- 1 Select the document whose log you want to check in the <TX Job Log> tab.
 - <OK> is displayed when a document was sent successfully, and <Error> is displayed when a document failed to be sent because it was canceled or there was some error.

Displays detailed information about the document.

NOTE:

When a three-digit number is shown in the case of <Error>

- This number represents an error code. ▶ **Countermeasures for Each Error Code(P. 668)**

LINKS

- ▶ **Basic Operations for Scanning Originals(P. 286)**
- ▶ **Canceling Sending Documents(P. 302)**
- ▶ **Printing Reports and Lists(P. 628)**

Scanning Clearly

19YU-05R

When creating files for brochures that contain many pictures or reports written in pencil, you can adjust density and brightness to achieve clearer image quality.

▶ Adjusting Image Quality(P. 306)

▶ Adjusting Density(P. 307)

▶ Adjusting Sharpness When Scanning (Sharpness)(P. 308)

▶ Scanning Different Size Originals Together (Different Size Originals) (P. 310)

Adjusting Image Quality

19YU-05S

You can select the image quality for the scan depending on the original type, such as text-only originals, originals with charts and graphs, or magazine photos.

Saving Data to a USB Memory Device

<Scan> ▶ <USB Memory> ▶ <Original Type> ▶ Select the original type

Sending Data by E-Mail/I-Fax or Saving Data to the Server

<Scan> ▶ Specify destinations in <E-Mail>/<I-Fax>/<File> ▶ Select <Original Type> in the <Send Settings> tab ▶ Select the original type

LINKS

- ▶ **Basic Operations for Scanning Originals(P. 286)**
- ▶ **Sending I-Faxes(P. 251)**

Adjusting Density

19YU-05U

You can adjust the density of the scan if the text or images in an original are too light or dark.

Saving Data to a USB Memory Device

<Scan> ► <USB Memory> ► <Density> ► Adjust the density ► <Apply>

Sending Data by E-Mail/I-Fax or Saving Data to the Server

<Scan> ► Specify destinations in <E-Mail>/<I-Fax>/<File> ► Select <Density> in the <Send Settings> tab ► Adjust the density ► <Apply>

- ▶ **Sending I-Faxes(P. 251)**
- ▶ **Adjusting Density(P. 307)**

Scanning Different Size Originals Together (Different Size Originals)

19YU-05X

You can place different size originals in the feeder and scan them at the same time. This eliminates the need to place originals separately.

IMPORTANT

- The combination of original sizes that you can scan is limited. Scanning with an improper combination may cause damage to the originals or paper jams. ➤ **Specifications(P. 714)**
- Do not place the originals together that are of different weights or paper types. Doing so may cause damage to the originals or paper jams.

NOTE

- If the originals have the same height, they can be copied/scanned at once even if they have different widths as in the figure below. Align the edges of the same size and set them in the feeder.

For originals with the same height but with different widths

Saving Data to a USB Memory Device

<Scan> ➤ <USB Memory> ➤ <Different Size Originals> ➤ <On>

Sending Data by E-Mail/I-Fax or Saving Data to the Server

<Scan> ➤ Specify destinations in <E-Mail>/<I-Fax>/<File> ➤ Select <Different Size Originals> in the <Send Settings> tab ➤ <On>

Useful Scanning Functions

19YU-05Y

The machine is equipped with useful functions such as those that can create secure PDF files to prevent them from being tampered with, and that can send data again to previously specified destinations.

▶ **Enhancing the Security of Electronic Files(P. 312)**

▶ **Adjusting Balance between File Size and Image Quality(P. 315)**

▶ **Recalling Previously Used Settings for Sending/Saving (Recall Settings)(P. 316)**

▶ **Specifying E-Mail Settings(P. 319)**

Enhancing the Security of Electronic Files

Digital files are vulnerable in terms of security because they can be easily viewed or tampered with leaving no trace. When scanning important documents, you can take appropriate measures such as encrypting data and adding a device signature to enhance security.

▶ **Encrypting a PDF File(P. 312)**

▶ **Adding a Device Signature(P. 313)**

IMPORTANT

To use these functions

- Some options need to be installed in the machine. ▶ **System Options(P. 754)**

NOTE

- Encryption and device signature are only available for PDF files.
- Both the encryption and device signature can be used at the same time.

Encrypting a PDF File

You can encrypt and send/save a PDF file by setting a password when scanning originals. The password setting helps reduce the risk of the PDF file being viewed or edited by others.

1 Select <Scan> on the Home screen. ▶ **Home Screen(P. 116)**

- When the login screen appears, enter your user name and password and set up the authentication server. ▶ **Logging in to Authorized Send(P. 127)**

2 Select <USB Memory>, <E-Mail>, or <File> on the Scan Basic Features screen. ▶ **Scan Basic Features Screen(P. 283)**

- If you select <USB Memory>, proceed to step 4.

3 Specify a destination, and configure the scan settings as necessary. ▶ **Basic Operations for Scanning Originals(P. 286)**

4 Proceed to <Set PDF Details>.

■ **Saving data to a USB memory device**

- Select <File Format> ▶ <Set PDF Details>.

■ **Sending e-mail/saving data to a shared folder or FTP server**

- Select <File Format> ▶ <Set PDF Details> in the <Send Settings> tab.

5 Select PDF format.

- This setting can be changed for each PDF format.

6 Select <Encryption>.

7 Select the encryption level.

<Acrobat 7.0 or Later/128-bit AES>

Encrypt the file in the 128-bit environment, which can be opened by Adobe Acrobat 7.0 or later.

<Acrobat 10.0 or Equivalent/256-bit AES>

Encrypt the file in the 256-bit environment, which can be opened by Adobe Acrobat 10.0.

NOTE:

- <Acrobat 10.0 or Equivalent/256-bit AES> can be changed to <Acrobat 9.0 or Equivalent/256-bit AES> with a different compatible version. ➤<256-bit AES Settings for Encrypted PDF>(P. 492)

8 Enter the encryption password, and select <Apply>.

- On how to enter text, see ➤<Entering Text>(P. 124) .

9 Enter the password, and select <Apply>.

Adding a Device Signature

Convert the scanned original into a PDF file with a device signature. The device signature serves the same purpose as sealing or signing a document; it can be used to check where the file was created and whether the document has been tampered with or falsified after the signature was appended. To assign the device signature to a PDF file, you need to generate the key and certificate for the device signature in advance. ➤<Generating a Device Signature Key>(P. 425)

1 Select <Scan> on the Home screen. ➤<Home Screen>(P. 116)

- When the login screen appears, enter your user name and password and set up the authentication server. ➤<Logging in to Authorized Send>(P. 127)

2 Select <USB Memory>, <E-Mail>, or <File> in the Scan Basic Features screen. ➤<Scan Basic Features Screen>(P. 283)

- If you select <USB Memory>, proceed to step 4.

3 Specify a destination, and configure the scan settings as necessary. ▶ **Basic Operations for Scanning Originals(P. 286)**

4 Proceed to <Set PDF Details>.

■ **Saving data to a USB memory device**

- Select <File Format> ▶ <Set PDF Details>.

■ **Sending e-mail/saving data to a shared folder or FTP server**

- Select <File Format> ▶ <Set PDF Details> in the <Send Settings> tab.

5 Select PDF format.

- This setting can be changed for each PDF format.

6 Select <Digital Signatures>.

7 Select <Top Left>.

Adjusting Balance between File Size and Image Quality

19YU-061

You can specify the file compression ratio when converting scanned originals into the JPEG format. <Small: Memory Priority> makes the compression ratio higher than normal to create smaller files with lower image quality. On the other hand, <Large: Image Quality Priority> makes the compression ratio lower than normal larger files with higher image quality.

Saving data to a USB memory device

<Scan> ► <USB Memory> ► <Data Size> ► Configure settings.

Sending e-mail/saving data to a shared folder or FTP server

<Scan> ► Specify destinations in <E-Mail>/<File> ► Select <Data Size> in the <Send Settings> tab ► Specify the setting

LINKS

► **Basic Operations for Scanning Originals(P. 286)**

Recalling Previously Used Settings for Sending/Saving (Recall Settings)

You can select a destination from among the past destinations. When you specify a previously used destination, the machine also sets the same scan settings such as density you used the last time you sent documents to that destination.

IMPORTANT

- When <Restrict Resending from Log> is set to <On>, you cannot use this feature. ▶ **Disabling Use of Previously Used Destinations(P. 415)**
- Turning OFF the machine or setting <Restrict New Destinations> to <On> deletes the past destinations, and disables this feature. ▶ **Restricting New Destinations that Can Be Specified(P. 415)**

NOTE

- When you specify a destination using this feature, any destinations that you have already specified are deleted.

1 Place the original(s). ▶ **Placing Originals(P. 128)**

2 Select <Scan> in the Home screen. ▶ **Home Screen(P. 116)**

- When the login screen appears, enter your user name and password and set up the authentication server. ▶ **Logging in to Authorized Send(P. 127)**

3 Select <E-Mail>, <I-Fax>, or <File> in the Scan Basic Features screen. ▶ **Scan Basic Features Screen(P. 283)**

4 Select <Recall Settings> in the <Specify Destination> tab.

5 Select a destination.

- When you transmit to multiple destinations, only the address specified for the first transmission is displayed in the log, but all the destinations are specified.

- ➡ The selected destination and its scan settings are specified. You can also change the settings before sending.

■ To delete destinations (e-mail/I-Fax)

If you specified multiple destinations, you can delete destinations as necessary.

- 1 Select <Confirm Destination>.
- 2 Select the check box for the destination to be deleted, and select <Remove from Dest.,>.

NOTE:

- If you select the Group check box, you can view the destinations registered in the group by selecting <Details> ► <Destination>.

- 3 Select <Yes>.

6 Select <Start>.

- If the <Confirm Destination> screen is displayed, check whether the destination is correct, and then select <Start Scanning>.

- ➡ Scanning of the original starts.

- If you want to cancel, select <Cancel> ► <Yes>. **Canceling Sending Documents(P. 302)**

■ When placing originals in the feeder in step 1

When scanning is complete, the sending/saving process starts.

■ When placing originals on the platen glass in step 1

When scanning is complete, follow the procedures below (except if you selected JPEG as a file format).

- 1 If there are additional pages of originals to be scanned, place the next original on the platen glass, and select <Scan Next>.
 - Repeat this step until you finish scanning all of the pages.
 - When there is only one page to be scanned, proceed to the next step.
- 2 Select <Start Sending>.

▢▢▢▢▶ The sending/saving process starts.

NOTE:

If the <File Authentication> screen or <SMTP Authentication> screen appears

- Enter the user name and password, and then select <Apply>.

LINKS

▶ **Basic Operations for Scanning Originals(P. 286)**

▶ **Sending I-Faxes(P. 251)**

Specifying E-Mail Settings

19YU-063

When attaching scanned originals to an e-mail, you can specify the subject, message, reply-to address, and priority for the e-mail before sending it.

- 1 Place the original(s).** ▶ **Placing Originals(P. 128)**
- 2 Select <Scan> in the Home screen.** ▶ **Home Screen(P. 116)**
 - When the login screen appears, enter your user name and password and set up the authentication server. ▶ **Logging in to Authorized Send(P. 127)** .
- 3 Select <E-Mail> in the Scan Basic Features screen.** ▶ **Scan Basic Features Screen(P. 283)**
- 4 Specify a destination, and configure the scan settings as necessary.** ▶ **Basic Operations for Scanning Originals(P. 286)**
- 5 Specify the subject, message, reply-to address, and priority for the e-mail.**

■ To specify subject/message

- 1** Select <Subject/Message> in the <Send Settings> tab.
- 2** Select <Subject>.
- 3** Enter the subject, and select <Apply>.
 - On how to enter text, see ▶ **Entering Text(P. 124)** .
- 4** Select <Message>.
- 5** Enter the message, and select <Apply>.
- 6** Select <Apply>.

■ To specify reply-to address

Specify the reply-to address when you want to notify the recipient of an e-mail address different from that of the machine as the reply-to address. Select the target reply-to address from the destinations registered in the

Address Book, and specify it. If the destination has not been registered in the Address Book, see [▶ Registering Destinations\(P. 180\)](#) .

- 1 Select <Reply To> in the <Send Settings> tab.
- 2 Select <Specify from Address Book>.
- 3 Select the check box for the desired reply-to address, and select <Apply>.

■To specify priority

- 1 Select <Priority> in the <Send Settings> tab.
- 2 Select a priority level.

6 Select <Start>.

- If the <Confirm Destination> screen is displayed, check whether the destination is correct, and then select <Start Scanning>.

⇒ Scanning of the original starts.

- If you want to cancel, select <Cancel> ▶ <Yes>. [▶ Canceling Sending Documents\(P. 302\)](#)

■When placing originals in the feeder in step 1

When scanning is complete, the e-mails are sent.

■When placing originals on the platen glass in step 1

When scanning is complete, follow the procedures below (except if you selected JPEG as a file format).

- 1 If there are additional pages of originals to be scanned, place the next original on the platen glass, and select <Scan Next>.
 - Repeat this step until you finish scanning all of the pages.
 - When there is only one page to be scanned, proceed to the next step.
- 2 Press <Start Sending>.

⇒ The e-mails are sent.

NOTE:

If the <SMTP Authentication> screen is displayed

- Enter the user name and password, and select <Apply>.

TIPS

- If you always want to scan with the same settings: [▶ Changing the Default Settings for Functions\(P. 173\)](#)
- If you want to register a combination of settings to use when needed: [▶ Registering Frequently Used Settings\(P. 171\)](#)
- If you want to specify the e-mail sender name: [▶ <Register Unit Name>\(P. 540\)](#)

LINKS

▶ **Checking Status and Log for Scanned Originals(P. 303)**

Using Your Computer to Scan (Remote Scan)

19YU-064

To scan from a computer, you can use MF Scan Utility or an application such as an image processing or word processing application. If you use ScanGear MF supplied with the machine, you can configure advanced scan settings ([▶Using ScanGear MF\(P. 325\)](#)).

IMPORTANT

- When using the machine with a USB connection, exit sleep mode before scanning. [▶Entering Sleep Mode\(P. 177\)](#)

Scanning Using MF Scan Utility

MF Scan Utility is an application included with the machine that enables you to scan documents or images to a computer. You can forward the scanned data to a specified application, or attach it to an e-mail message. For more information, click [Instructions] on MF Scan Utility.

NOTE

- If you are a macOS user, see the manuals for the relevant drivers or software on the online manual website.

Scanning Using an Application

You can scan images by using an application such as a word-processing or image-processing application, and load the images directly into the application. You do not need to start another application to scan. [▶Scanning Documents from an Application\(P. 323\)](#)

Scanning Documents from an Application

19YU-065

You can scan originals from applications such as image-processing or word-processing software. The scanned image is directly loaded in the application, allowing you to edit or process the image immediately. The following procedure varies depending on the application.

IMPORTANT

- The application must be compatible with TWAIN or WIA*. For more information, see the instruction manual for your application.

*TWAIN is a standard for connecting image input devices, such as scanners, with computers. WIA is a function that is an integrated standard in Windows.

1 Place the original(s). ▶ Placing Originals(P. 128)

IMPORTANT:

- The second or subsequent originals may not be scanned, or an error message may be displayed depending on the application. In such a case, place and scan one original at a time.
- When <Auto Online> is set to <Off>, you must select <Scan> ▶ <Remote Scanner> in the Home screen to bring the machine online. ▶ <Auto Online>(P. 490)

2 From the application, select the start scan command.

- The procedure for selecting the start scan command varies depending on the application. For more information, see the instruction manual for your application.

3 Select the scanner driver for this machine.

- Select ScanGear MF or WIA. If you select ScanGear MF, you can configure advanced scan settings.

4 Specify the scanning settings as necessary.

5 Click [Scan].

⇒ Scanning of the original starts.

- When scanning is complete, the scanned image is forwarded to an application.

How to use ScanGear MF

- Click  for ScanGear MF, and see help.

LINKS

▶ **Using ScanGear MF(P. 325)**

Using ScanGear MF

19YU-066

You can use ScanGear MF to configure advanced scan settings when you scan. The way of starting ScanGear MF differs depending of the way of scanning from the computer.

Starting from MF Scan Utility

When scanning from MF Scan Utility, click [ScanGear] to start ScanGear MF. For more information, click [Instructions] on MF Scan Utility.

NOTE

- If you are a macOS user, see the manuals for the relevant drivers or software on the online manual website.

Starting from an application

To scan from applications such as image-processing or word-processing software, select ScanGear MF as scanner driver. **➡ Scanning Documents from an Application (P. 323)**

TIPS

Operations available with ScanGear MF

- Previewing the image before scanning
- Specifying the scanning area
- Finely adjusting the image quality

How to use ScanGear MF

- Click  for ScanGear MF, and see help.

Using WSD

19YU-0FC

"WSD (Web Services on Devices)" is a function to search devices located on the network. Using WSD enables you to automatically find the machine on the network from a computer, and start scanning the original on the machine. This function is called "WSD Scan." You need to complete some procedures before using WSD Scan. ▶ **Preparing for WSD Scan(P. 326)**

■ Preparing for WSD Scan

From the control panel

- 1** Select <Menu> in the Home screen. ▶ **Home Screen(P. 116)**
- 2** Select <Preferences> ▶ <Network> ▶ <TCP/IP Settings> ▶ <WSD Settings>.
- 3** Select <On> in <Use WSD Scanning> and then select <On> in <Use Computer Scanning>.
- 4** Select <Apply>.

From a computer

- 5** Click [Start] ▶ [Devices and Printers].
- 6** Click [Add a device].

7 Select this machine and click [Next].

- Follow the on-screen instructions to operate.

NOTE:

- If this machine is not displayed, a Firewall setting problem may exist. For more information, see the instruction manual of the computer.

Scanning Originals Using WSD (WSD Scan)

19YU-0FE

This section describes how to scan originals from a computer using WSD.

From the control panel

- 1 Place the original(s).** ▶ **Placing Originals(P. 128)**
- 2 Select <Scan> in the Home screen.** ▶ **Home Screen(P. 116)**
- 3 Select <Remote Scanner>.**

⇒ Now you are ready for scanning from your computer.

From a computer

- 4 Click [Start] ▶ [All Programs] ▶ [Windows Fax and Scan].**
- 5 Click [Scan].**

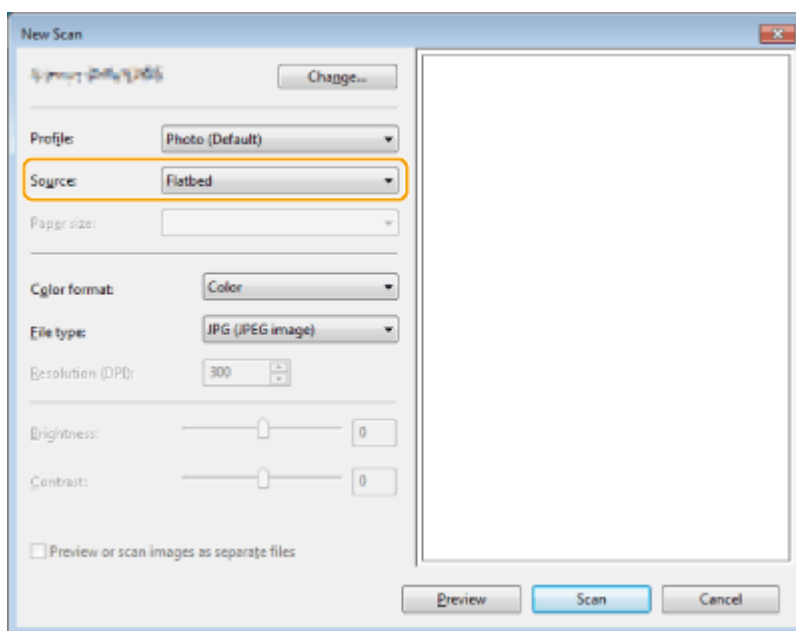

- 6 Click [New Scan].**

- When the [Select Device] dialog box is displayed, select the machine and click [OK].

7 From the [Source] drop-down list, select the location where the original is placed.

- When placing the original on the platen glass, select [Flatbed]. When placing in the feeder, select [Feeder (Scan one side)].

8 Specify the scan settings as necessary.

- Selecting the type of original from the [Profile] drop-down list enables you to make adjustments for the optimal image quality. For originals mainly consisting of text, select [Document]. For originals consisting of photographs only, select [Photo (Default)].
- From the [File type] drop-down list, select the file format for the saved image of the scanned original.
- To check the scanned image with the specified settings reflected, click [Preview].

9 Click [Scan].

- ➡ Scanning an original starts.

- When scanning is complete, the scanned document is displayed in the list of files on the [Windows Fax and Scan] screen and saved in the [Scanned Documents] folder of [Documents].

NOTE

Registering frequently used scan settings

- If you always scan with the same settings, follow the procedures below to register the settings. You can easily and conveniently recall them when scanning.
Select [Add profile] from the [Profile] drop-down list ► Specify the scan settings you want to register
► Enter a name in the [Profile name] text box ► Click [Save Profile]

Sending the document to a computer using WSD

- You can also send the scanned document to computers on the network that support WSD. In this case, select <Computer> on the Main Menu ► select the computer you want to send.
The [Windows Fax and Scan] screen and the folder open in the computer, and the scanned document is displayed.

Linking with Mobile Devices

Linking with Mobile Devices	332
Connecting with Mobile Devices	333
Connecting via a Wireless LAN Router (LAN Connection)	334
Connecting Directly (Access Point Mode)	336
Utilizing the Machine through Applications	340
Using AirPrint	341
Printing with AirPrint	346
Scanning with AirPrint	349
Faxing with AirPrint	351
If AirPrint Cannot Be Used	353
Using Google Cloud Print	354
Managing the Machine by the Remote Control	356

Linking with Mobile Devices

19YU-067

Linking the machine with mobile devices such as smart phones and tablets enables you to use an appropriate application to perform printing, or other operation with ease. In addition, you can operate the machine from mobile devices via remote control to confirm printing status and change the settings of the machine.

- ▶ **Connecting with Mobile Devices(P. 333)**
- ▶ **Connecting Directly (Access Point Mode)(P. 336)**
- ▶ **Utilizing the Machine through Applications(P. 340)**
- ▶ **Using Google Cloud Print(P. 354)**
- ▶ **Managing the Machine by the Remote Control(P. 356)**

IMPORTANT

- Depending on your mobile device, the machine may not operate correctly.

Connecting with Mobile Devices

19YU-068

There are two methods used to connect a mobile device with the machine: connecting via a wireless LAN router, and communicating wirelessly and directly with the machine. Select a connection method in accordance with the communication environment and the device you are using. Perform communication with mobile devices from <Mobile Portal> (▶ **Home Screen(P. 116)**).

■ Connecting via a Wireless LAN Router

Just as connecting a computer to the machine, connect a mobile device to the machine via a wireless LAN router. ▶ **Connecting via a Wireless LAN Router (LAN Connection)(P. 334)**

■ Connecting Directly

Directly connect a mobile device to the machine wirelessly without using wireless LAN. It is possible to immediately connect to the machine wirelessly even outside of a wireless LAN environment. ▶ **Connecting Directly (Access Point Mode)(P. 336)**

Connecting via a Wireless LAN Router (LAN Connection)

19YU-069

If a wireless LAN router is connected to the network connected to the machine, you can establish a communication with a mobile device via the wireless LAN router in the same way for a computer. For information about how to connect a mobile device to your wireless LAN router, see the instruction manuals for your networking devices or contact your manufacturer. Connect the machine to a router via the wired or wireless LAN. ➤ **Setting Up the Network Environment(P. 12)**

NOTE

- To perform the procedures below, use the IPv4 address. ➤ **Setting IPv4 Address(P. 30)**
- Select <LAN Connection> and proceed with the procedure, if the <Direct Connection> screen is displayed after <Mobile Portal> is selected in the procedure below.
- For information about the operating systems compatible with Canon PRINT Business, the detailed setting procedure, and the operating procedure, please see the application's Help or the Canon website (<http://www.canon.com/gomp/>).
- Optional products are required to use NFC. ➤ **System Options(P. 754)**

■ Connecting Manually

- 1** Select <Mobile Portal> in the Home screen. ➤ **Home Screen(P. 116)**
- 2** Connect from the mobile device to the IP address that appears on the screen.

■ Connecting Using a QR Code

- 1** Select <Mobile Portal> in the Home screen. ➤ **Home Screen(P. 116)**
- 2** Select <QR Code>.
- 3** Launch Canon PRINT Business on the mobile device. ➤ **Utilizing the Machine through Applications(P. 340)**
- 4** Read the QR code on the screen using the mobile device.

■ Connecting Using the NFC (Android)

Before using the NFC, check whether <Use NFC> is set to <On>. ▶<Use NFC>(P. 572)

1 Launch Canon PRINT Business on the mobile device. ▶Utilizing the Machine through Applications(P. 340)

IMPORTANT:

- If you pass the mobile device over the machine without launching Canon PRINT Business, Canon PRINT Business starts automatically after passing it over.

2 Enable the NFC settings of the mobile device.

3 Move the mobile device closer to the machine.

IMPORTANT:

- When touching an NFC compatible device to the machine, make sure that NFC compatible device is placed precisely on top of the NFC mark of the machine.

Connecting Directly (Access Point Mode)

19YU-06A

Even in an environment without a wireless LAN router, using "Access Point Mode," which can directly connect a mobile device to the machine wirelessly, enables you to connect the mobile device on hand to the machine without difficult settings.

▶ **Preparing for Direct Connection (Access Point Mode)**(P. 336)

▶ **Connecting Directly**(P. 337)

NOTE

- Optional products are required to use NFC. ▶ **System Options**(P. 754)

Preparing for Direct Connection (Access Point Mode)

Establish a connection by using Access Point Mode in the following order.

1

Check the network settings of the machine.

- Set the IPv4 address. ▶ **Setting IPv4 Address**(P. 30)

2

Preparing the Mobile Device

- Configure settings to connect the mobile device to Wi-Fi.

3

Put the machine into the connection standby status.

- <Menu> ▶ <Preferences> ▶ <Network> ▶ <Direct Connection Settings> ▶ set <Use Direct Connection> to <On>.

NOTE

Specifying the value for time until auto termination

- You can specify the time to automatically establish a disconnection when the direct connection is enabled. ▶ **<Direct Connection Termination>** (P. 463)

Connecting multiple mobile devices at the same time

- Configure the machine's SSID and network key arbitrarily. ▶<Access Point Mode Settings> (P. 463)

Canon PRINT Business

- For information about the operating systems compatible with Canon PRINT Business, the detailed setting procedure, and the operating procedure, please see the application's Help or the Canon website (<http://www.canon.com/gomp/>).

Connecting Directly**IMPORTANT**

- It may take time until connection of the machine and the mobile device is established.

■ Connecting Manually**1 Select <Mobile Portal> in the Home screen. ▶Home Screen(P. 116)**

- When any mobile device is already connected, proceed to step 3.

2 Select <Connect>.**3 Configure the Wi-Fi settings from the mobile device using the SSID and network key information that appears on the touch panel display.****4 When the target operation is completed, select <Disconnect>.****■ Connecting Using a QR Code****1 Select <Mobile Portal> in the Home screen. ▶Home Screen(P. 116)**

- When any mobile device is already connected, proceed to step 3.

2 Select <Connect>.**3 Select <QR Code>.****4 Launch Canon PRINT Business on the mobile device. ▶Utilizing the Machine through Applications(P. 340)**

5 Read the QR code on the touch panel display using the mobile device.

6 When the target operation is completed, then select <Disconnect>.

■ Connecting Using the NFC (Android)

Before using the NFC, check whether <Use NFC> is set to <On>. ▶<Use NFC>(P. 572)

1 Launch Canon PRINT Business on the mobile device. ▶Utilizing the Machine through Applications(P. 340)

IMPORTANT:

- If you pass the mobile device over the machine without launching Canon PRINT Business, Canon PRINT Business starts automatically after passing it over.

2 Enable the NFC settings of the mobile device.

3 Move the mobile device closer to the machine.

IMPORTANT:

- When touching an NFC compatible device to the machine, make sure that NFC compatible device is placed precisely on top of the NFC mark of the machine.

4 When the target operation is completed, then select <Disconnect>.

TIPS

- Select <Connection Information> on the <Direct Connection> screen to check the connected mobile device.

IMPORTANT

- While connecting via direct connection, you may not be able to connect to the Internet depending on the mobile device you are using.

- If a wireless connection from a mobile device is not performed within 5 minutes while the SSID and network key are displayed, the status waiting for connection ends.
- If the status without data transmission between a mobile device and the machine continues during communication by direct connection, the communication may end.
- Power saving performance of sleep mode degrades while connecting via direct connection.
- If the machine is used with a wireless LAN, you need to keep the machine connected to the wireless LAN when using direct connection. When the machine is not connected to a wireless LAN or the connection process is not complete yet, the direct connection process cannot begin. If the connection between the machine and the wireless LAN is lost during communication through direct connection, the communication may end.
- When you finish the desired operation, be sure to terminate the connection between the machine and the mobile device. If they remain connected, power saving performance of sleep mode degrades.
- If you use the direct connection, do not set the IP address manually on the mobile device. Doing so may prevent proper communication after using the direct connection.

Utilizing the Machine through Applications

19YU-06C

Perform printing and other operations from the mobile device connected to the machine using applications. Various applications including those exclusive to Canon are supported. Use properly in accordance with your device, the application, and the situation.

■ Using Canon PRINT Business

This application is used to perform printing and other operations from mobile devices that support iOS/Android. When printing, it is not necessary to perform operations on the machine. For more information on supported operating systems, detailed setting methods, and operations, see the application's Help or the Canon website (<http://www.canon.com/gomp/>).

IMPORTANT

- You can download Canon PRINT Business for free, but you will be charged the Internet connection fee.

■ Printing with Canon Print Service

You can easily print from the menu of applications that support the Android print subsystem. For more information on supported operating systems and detailed settings and procedures, see the Canon website (<http://www.canon.com/>).

■ Printing by Mopria™

The machine also supports Mopria™. Using Mopria™ enables you to print from mobile devices that support Android using common operations and settings, even if manufacturers and models differ. For example, if you are using printers supporting Mopria™ made by multiple manufacturers or a printer supporting Mopria™ that is located in a place you are visiting, you can print without installing an application exclusive for each manufacturer or model. For more information on supporting models or operation environments, see <http://www.mopria.org>.

Confirming Mopria™ Settings

Log in to the Remote UI with Administrator privileges (▶ **Starting Remote UI(P. 427)**) ▶ [Settings/Registration] ▶ [Network Settings] ▶ [Mopria Settings] ▶ [Edit] ▶ Check that the [Use Mopria] check box is selected ▶ [OK]

■ Printing with Google Cloud Print

You can use applications and services which support Google Cloud Print to print from a computer or mobile device without using a printer driver. ▶ **Using Google Cloud Print(P. 354)**

Using AirPrint

This section describes the settings required to use AirPrint and the procedures to be performed using Apple devices.

AirPrint Settings

- ▶ **Configuring AirPrint Settings(P. 341)**
- ▶ **Displaying the Screen for AirPrint(P. 344)**

Functions of the AirPrint

- ▶ **Printing with AirPrint(P. 346)**
- ▶ **Scanning with AirPrint(P. 349)**
- ▶ **Faxing with AirPrint(P. 351)**

Troubleshooting

- ▶ **If AirPrint Cannot Be Used(P. 353)**

Configuring AirPrint Settings

You can register information, including the name of the machine and installation location, that is used for identifying the machine. You can also disable the AirPrint function of the machine. Use the Remote UI to change these settings.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see ▶ **Setting Up Menu Options from Remote UI(P. 434)** .

1 Start the Remote UI and log in to System Manager Mode. ▶Starting Remote UI(P. 427)

2 Click [Settings/Registration] on the Portal page. ▶Remote UI Screen(P. 428)

- If you are using a mobile device, such as an iPad, iPhone, or iPod touch, read "click" as "tap" in this section.

3 Select [Network Settings] ▶ [AirPrint Settings].

4 Click [Edit].

5 Specify the required settings.

[Use AirPrint]

Select the check box to enable AirPrint. To disable AirPrint, clear the check box.

[Printer Name]

Enter the name of the machine. If an mDNS name has already been registered in [mDNS Settings] ([▶ Configuring DNS\(P. 54\)](#)), the registered name is displayed.

[Location]

Enter the location of the machine. If a location has already been registered in [Device Information Settings] ([Device Management] in [Management Settings] (Settings/Registration)), the registered name is displayed.

[Latitude]

Enter the latitude of the location where the machine is installed.

[Longitude]

Enter the longitude of the location where the machine is installed.

6 Click [OK].

IMPORTANT

If you select [Use AirPrint], the following settings in <Network> are set to <On>.

- Use HTTP
- IPP Print Settings
- IPv4Use mDNS
- IPv6Use mDNS
- Use Network Link Scan

NOTE

- If you change [Printer Name] that you have once specified, you may be unable to print any more from the Mac that has been able to be used for printing so far. This phenomenon occurs because <mDNS Name> ([▶ Configuring DNS\(P. 54\)](#)) of IPv4 is also changed automatically. In this case, add the machine to the Mac again.
- Entering the printer name makes it easier to identify multiple printers that support AirPrint.

■ Changing the Setting of Functions Available with AirPrint

If you want to disable functions that you are not going to use with AirPrint or encrypt communications, configure the necessary setting using the operation panel.

Changing Print and Fax Settings

To perform printing or fax sending with AirPrint, IPP protocol is used.

Turning the Function On/Off

You can specify whether to perform printing and fax sending with AirPrint. The factory default setting is <On>.

<Menu> ▶ <Preferences> ▶ <Network> ▶ <TCP/IP Settings> ▶ <IPP Print Settings> ▶ Set <Use IPP Printing> to <Off> or <On> ▶ <Apply> ▶ 

Changing the TLS Setting

You can specify whether to encrypt communications using TLS when performing printing or sending faxes with AirPrint. The factory default setting is <Off>.

<Menu> ▶ <Preferences> ▶ <Network> ▶ <TCP/IP Settings> ▶ <IPP Print Settings> ▶ Set <Use TLS> to <Off> or <On> ▶ <Apply> ▶ 

Changing the Scan Setting

Configure the scan setting using AirPrint.

Set the Function to Enable or Disable

You can turn on/off the scan function available with AirPrint. The factory default setting is <On>.

<Menu> ▶ <Preferences> ▶ <Network> ▶ <TCP/IP Settings> ▶ <Network Link Scan Settings> ▶ Set <Use Network Link Scan> to <Off> or <On> ▶ <Apply> ▶ 

Change TLS Settings

You can specify whether or not to encrypt TLS communications when scanning data using AirPrint. The factory default setting is <Off>.

<Menu> ▶ <Preferences> ▶ <Network> ▶ <TCP/IP Settings> ▶ <Network Link Scan Settings> ▶ Set <Use TLS> to <Off> or <On> ▶ <Apply> ▶ 

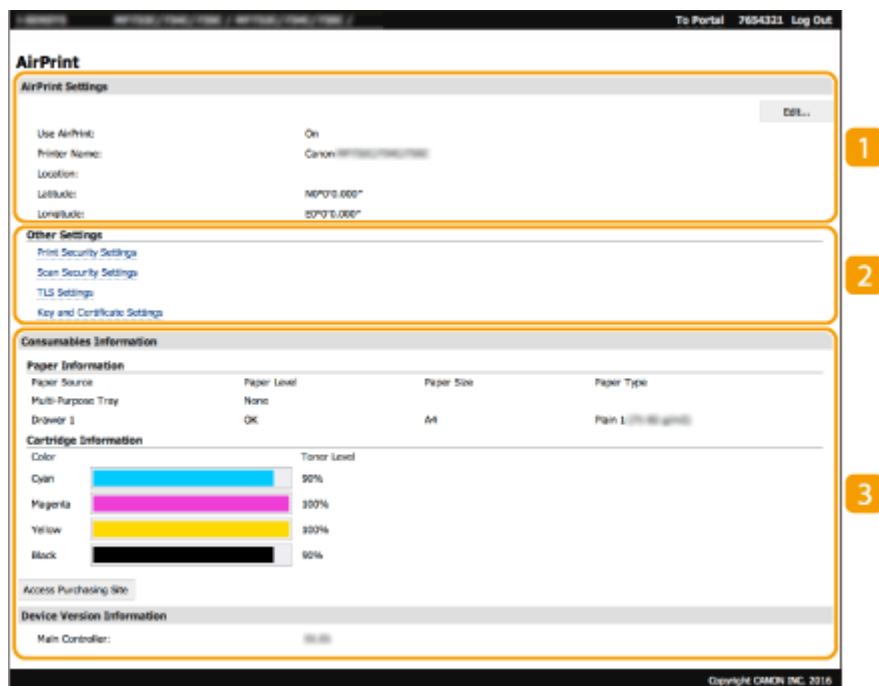

Displaying the Screen for AirPrint

You can display the screen for AirPrint, on which you can not only access the AirPrint Settings but also view information about consumables, such as paper and toner cartridge. Further, you can configure security function settings.

- 1 Select [System Preferences] ► [Printers & Scanners], then add the machine to the Mac you are using.**
 - If the machine has already been added, this operation is not required.
- 2 Select this machine from the list of printers in [Printers & Scanners].**
- 3 Click [Options & Supplies].**
- 4 Click [Show Printer Webpage].**
- 5 Logging in to the Remote UI.**
 - To change the AirPrint settings, it is necessary to log in as an administrator.

■ AirPrint-Dedicated Page

When you log in with administrator privileges, the AirPrint-dedicated page is displayed as shown below.

1 [AirPrint Settings]

Enables you to check the values entered in the AirPrint settings, such as the name and location of the machine. You can click [Edit] to change the settings.

2 [Other Settings]**[Print Security Settings]**

Configure the print security settings using TLS or authentication.

[Scan Security Settings]

Configure the scan security settings using TLS.

[TLS Settings]

Enables you to change the key and certificate used for TLS. ▶ **Configuring the Key and Certificate for TLS(P. 388)**

[Key and Certificate Settings]

Enables you to generate and install a key and certificate, or request a certificate to be issued. ▶ **Configuring the Key and Certificate for TLS(P. 388)**

3 [Consumables Information]

Enables you to check the information of each paper source and consumables of the machine and the device version.

Trademarks

Apple, Bonjour, iPad, iPhone, iPod touch, Mac, macOS, OS X and Safari are trademarks of Apple Inc., registered in the U.S. and other countries. AirPrint and the AirPrint logo are trademarks of Apple Inc.

Printing with AirPrint

You can print from an iPad, iPhone, iPod touch, or Mac without using a printer driver.

▶ **Printing from an iPad, iPhone, or iPod touch(P. 346)**

▶ **Printing from a Mac(P. 347)**

System Requirements

One of the following Apple devices is required to print with AirPrint.

- iPad (all models)
- iPhone (3GS or later)
- iPod touch (3rd generation or later)
- Mac (Mac OS X 10.7 or later)*

*OS X v10.9 or later when using a USB connection

Network Environment

One of the following environments is required.

- An environment where an Apple device and the machine are connected to the same LAN
- An environment where an Apple device and the machine are connected directly
- An environment where a Mac is connected to the machine via USB

IMPORTANT

- For printing, it is required to set <Use IPP Printing> to <On>. ▶ **Changing the Setting of Functions Available with AirPrint(P. 343)**

Printing from an iPad, iPhone, or iPod touch

1 Make sure that the machine is turned ON and connected to the Apple device.

- For how to make sure of this, see ▶ **Setting Up the Network Environment(P. 12)** .
- For information on the Direct Connection, see ▶ **Connecting Directly (Access Point Mode)(P. 336)** .

2 From the application on your Apple device, tap  to display the menu options.

3 Tap [Print].**4 Select this machine from [Printer].**

- The printers connected to the network are displayed here. Select this machine in this step.

IMPORTANT:

- The screen for selecting this machine in [Printer] is not displayed on applications that do not support AirPrint. You cannot print by using those applications.

5 Specify the print settings as necessary.**NOTE:**

- The available settings and paper sizes differ depending on the application you are using.

6 Tap [Print].

⇒ Printing starts.

NOTE:**Checking the print status**

- During printing, press the Home button of the Apple device twice ► tap [Print].

Printing from a Mac

1 Make sure that the machine is turned ON and connected to the Mac.

- For how to make sure of this, see ► **Setting Up the Network Environment(P. 12)** .

2 Add the machine to the Mac from [System Preferences] ► [Printers & Scanners].

- If the machine has already been added, this operation is not required.

3 Open a document in an application and display the print dialog box.

- How to display the print dialog box differs for each application. For more information, see the instruction manual or Help for the application you are using.

4 Select the machine in the print dialog box.

- The printers connected to the Mac are displayed. Select this machine in this step.

5 Specify the print settings as necessary.

NOTE:

- The available settings and paper sizes differ depending on the application you are using.

6 Click [Print].

▢▶ Printing starts.

Scanning with AirPrint

19YU-06H

You can use AirPrint to transfer the data scanned by the machine directly to a Mac.

System Requirements

To scan with AirPrint, you need a Mac with OS X 10.9 or later installed. To scan using TLS, you need a Mac with OS X 10.11 or later installed.

Network Environment

One of the following environments is required.

- An environment where an Apple device and the machine are connected to the same LAN
- An environment where a Mac is connected to the machine via USB

IMPORTANT

- For scanning, it is required to set <Use Network Link Scan> to <On>. **▶Changing the Setting of Functions Available with AirPrint(P. 343)**
- Before scanning, it is required to put the machine into online state. When the auto online function (**▶<Auto Online>(P. 490)**) is set to <Off>, first put the machine into online state by selecting <Scan> ▶ <Remote Scanner>, then start the procedure for scanning.
- You cannot scan while settings for operations are being made, or while the machine is performing any operation whatsoever.

Scanning from a Mac

- 1 Make sure that the machine is turned ON and connected to the Mac.**
 - For how to make sure of this, see **▶Setting Up the Network Environment(P. 12)** .
- 2 Add the machine to the Mac from [System Preferences] ▶ [Printers & Scanners].**
 - If the machine has already been added, this operation is not required.
- 3 Select this machine from the list of printers in [Printers & Scanners].**
- 4 Click [Scan].**

5 Click [Open Scanner].

⇒ The [Scanner] screen is displayed.

6 Configure the scan settings as necessary.

7 Click [Scan].

⇒ The original is scanned, and the image is displayed.

Faxing with AirPrint

You can send faxes from a Mac in almost the same way as when you print from a Mac.

System Requirements

To send faxes with AirPrint, you need a Mac with OS X 10.9 or later installed.

Network Environment

One of the following environments is required.

- An environment where an Apple device and the machine are connected to the same LAN
- An environment where a Mac is connected to the machine via USB

IMPORTANT

- For faxing, it is required to set <Use IPP Printing> to <On>. [▶ Changing the Setting of Functions Available with AirPrint\(P. 343\)](#)

Faxing from a Mac

1 Make sure that the machine is turned ON and connected to the Mac.

- For how to make sure of this, see [▶ Setting Up the Network Environment\(P. 12\)](#) .

2 Add the machine to the Mac from [System Preferences] ▶ [Printers & Scanners].

- If the machine has already been added, this operation is not required.

3 Open a document in an application and display the print dialog box.

- How to display the print dialog box differs for each application. For more information, see the instruction manual for the application you are using.

4 Select this machine in the print dialog box.

⇒ The printers connected to the Mac are displayed. Select the fax driver of this machine in this step.

5 Specify the destination.

6 Click [Fax].

⇒ Fax sending starts.

If AirPrint Cannot Be Used

19YU-06K

If AirPrint cannot be used, try taking the following solutions.

- Make sure that the machine is turned ON. If the machine is turned ON, first turn it OFF, then wait for at least 10 seconds and then turn it back ON to check if the problem is solved.
- Make sure that no error messages are displayed on the machine.
- Make sure that Apple devices and the machine are connected to the same LAN. If the machine is turned ON, it may take several minutes before the machine is ready for communication.
- Make sure that Bonjour on your Apple device is enabled.
- Make sure that the machine is configured to enable execution of jobs from a computer even when no department ID and password are entered. ➤ **Blocking Jobs When Department ID Is Unknown(P. 368)**
- For printing, make sure that the paper is loaded in the machine and that the machine contains a sufficient amount remaining in the toner. ➤ **Displaying the Screen for AirPrint(P. 344)**
- For scanning, make sure that the machine's setting for Network Link Scan is <On>. ➤ **Changing the Setting of Functions Available with AirPrint(P. 343)**

Using Google Cloud Print

19YU-06L

Google Cloud Print is a service that enables a user with a Google account to print from a smartphone, tablet, or computer connected to the Internet using applications compatible with Google Cloud Print. Unlike conventional printing from a computer, it does not require a printer driver.

- ▶ **Checking the Settings of the Machine(P. 354)**
- ▶ **Registering the Machine with Google Cloud Print(P. 354)**

IMPORTANT

- An environment in which you can connect to the internet is required when registering the machine and when printing using Google Cloud Print. In addition, the customer is responsible for any fees regarding internet connection.
- Google Cloud Print may not be available, depending on your country or region.
- Google Cloud Print does not support printing from an IPv6 address.

NOTE

- A Google account is required to use Google Cloud Print. If you do not have a Google account, create one on the Google website.

Checking the Settings of the Machine

Check the following before configuring cloud printing.

- Make sure that the IPv4 address is specified for the machine, and that the machine is able to communicate with computers on a network.
 - ▶ **Connecting to a Wired LAN(P. 15)**
 - ▶ **Connecting to a Wireless LAN(P. 16)**
- Check whether the date and time of the machine are specified correctly. ▶ **Setting the Date/Time(P. 10)**
- If Department ID Management is set, make sure that you can print from a computer without entering a Department ID or PIN. ▶ **Blocking Jobs When Department ID Is Unknown(P. 368)**

Registering the Machine with Google Cloud Print

Registering the machine with Google Cloud Print enables you to print from anywhere using the service.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

- 1 Start the Remote UI and log in as an administrator.** [▶Starting Remote UI\(P. 427\)](#)
- 2 Click [Settings/Registration] on the Portal page.** [▶Remote UI Screen\(P. 428\)](#)
- 3 Select [Network Settings] ▶ [Google Cloud Print Settings].**
- 4 Click [Edit] for [Basic Settings].**
- 5 Select the [Use Google Cloud Print] check box ▶ [OK].**
- 6 Click [Register] in [Registration Status].**

NOTE:

Re-Registering the Machine

- To re-register the machine, delete its registration before registering it again.

- 7 Click the URL link displayed for [URL for Registration].**
- 8 Follow the instructions on the screen to register the machine.**

■▶▶ Printing can now be performed from applications that support Google Cloud Print, such as Google Chrome™.

NOTE:

- For information on the latest applications that support Google Cloud Print, check the Google Cloud Print home page.

NOTE

Configuring Settings on the Operation Panel

- You can also enable or disable the Cloud Print function from <Menu> in the Home screen. [▶<Google Cloud Print Settings>\(P. 473\)](#)

Registering from a Mobile Device or Google Chrome

- You can register the machine from a mobile device or Google Chrome. The machine's display shows the following confirmation screen before completion of the registration. Press <Yes> to complete the registration.
- For information on registration methods, see the manual of your device or the Google Cloud Print website.

Managing the Machine by the Remote Control

19YU-06R

You can use the Remote UI from a Web browser installed on your mobile device. This allows you to check the machine's status and specify machine's settings from your mobile device. Note that the Remote UI screen may not be displayed properly for some devices and environments.

Starting the Remote UI from Mobile Devices

Enter the IP address of the machine on the Web browser to start the Remote UI. Prior to operation, confirm the IP address set for the machine ([Viewing Network Settings\(P. 36\)](#)). If it is unknown, ask your network administrator.

1 Start the Web browser of the mobile device.

2 Enter "http://< the IP address of the machine>/" in the address entry column.

- If you want to use an IPv6 address, enclose the IPv6 address with brackets.
Example: http://[fe80::2e9e:fcff:fe4e:dbce]/

NOTE:

- For a "Smartphone Version" of the Remote UI, a portion of items displayed are omitted. If you want to confirm all of the items, see the "PC Version."

Managing the Machine

19YU-06S

To reduce the various risks associated with the use of this machine, such as leaks of personal information or unauthorized use by third parties, constant and effective security measures are required. An administrator should manage important settings, such as access privileges and security settings, to ensure that the machine is used safely.

NOTE

- You can build the best security measures by establishing an environment that multifunction printers on the company network cannot be accessed from the Internet, along with the security functions of this machine.
▶Preventing Unauthorized Access(P. 6)

■ Configuring the Basic Management System

▶Setting Access Privileges(P. 361)

▶Configuring the Network Security Settings(P. 376)

■ Preparing for Risks from Negligence or Misuse

▶Restricting the Machine's Functions(P. 410)

▶Increasing the Security of Documents(P. 424)

■ Ensuring Effective Management

▶Managing the Machine from a Computer (Remote UI)(P. 426)

■ Managing the System Configuration and Settings

▶ **Updating the Firmware(P. 444)**

▶ **Initializing Settings(P. 446)**

Setting Access Privileges

19YU-06U

Protect the machine from unauthorized access by only allowing users with access privileges to use the machine. Access privileges are set separately for system administrators, general users, and the Remote UI. When privileges are set, the user must enter an ID and PIN to print or change settings.

Set up an account with full access privileges called "System Manager ID" for a system manager. Registering an account called "Department ID" allows you to manage general users. Using a Department ID, you can set a PIN for using this machine as well as keep track of the number of pages printed for each department ID. And by setting a Remote UI Access PIN, you can restrict use of the Remote UI.

System Manager ID

System Manager ID is an account with full access privileges. If you specify a System Manager ID, you need to log on to the machine using the System Manager ID information in order to access items that requires administrator privileges such as <Network> and <Management Settings>. We recommend that you set and register the System Manager ID. Otherwise, anyone will be able to change the machine settings. Only one System Manager ID can be registered. ➤ **Setting the System Manager ID and PIN(P. 362)**

Department ID (Department ID Management)

You can specify access privileges for a user (or group of users) by registering a Department ID. You can register multiple Department IDs. If a user tries to operate the machine when Department IDs are enabled, a login screen is displayed, and the user must enter their own Department ID and PIN to use the machine. Information such as how many pages have been printed for each Department ID can be compiled. ➤ **Setting the Department ID Management(P. 364)**

Remote UI PIN (Remote UI Access PIN)

This is a PIN for using the Remote UI. Only users who know the PIN can access the Remote UI. ➤ **Setting a Remote UI PIN(P. 370)**

Authentication Settings for Send Function (Authorized Send)

If your system has an LDAP server installed, you can set LDAP server authentication to be carried out when the fax or scan function is used. ➤ **LDAP Server Authentication(P. 372)**

Setting the System Manager ID and PIN

19YU-06W

Set the system manager account, "System Manager ID." The System Manager ID and PIN are set to "7654321" at the factory. You can also set a PIN for the System Manager ID. If the System Manager ID is specified, you can access items that require administrator privileges, for example, <Network> and <Management Settings>, only when the System Manager ID and PIN have been entered correctly. The System Manager ID settings information is critical to the security of the machine, so make sure that only Administrators know the System Manager ID and PIN.

1 Select <Menu> in the Home screen. ➤ **Home Screen(P. 116)**

2 Select <Management Settings>.

NOTE:

If the System Manager ID has already been set

- If the login screen appears, enter the correct ID and PIN. ➤ **Logging in to the Machine(P. 126)**

3 Select <User Management> ➤ <System Manager Information Settings>.

4 Select <System Manager ID and PIN>.

5 Specify the System Manager ID and PIN.

- Specify the <System Manager ID> ➤ <System Manager PIN>.
- Enter the number in each item, and select <Apply>.
- The Confirm screen is displayed. Enter the PIN once again to confirm.

NOTE:

- You cannot register an ID or PIN that consists only of zeros, such as "00" or "0000000."
- To cancel the System Manager ID and PIN settings, clear the information you entered in **C** and select <Apply> with the fields blank.

■Setting the System Manager Name

- 1** Select <System Manager Name>.
- 2** Enter the System Manager Name, and select <Apply>.
 - On how to enter text, see ➤ **Entering Text(P. 124)** .

IMPORTANT

- Do not forget your PIN. If you forget your PIN, contact your local authorized Canon dealer or the Canon help line.

NOTE

Configuring settings via the Remote UI

- Start the Remote UI and log in to System Manager Mode. Click [Settings/Registration] ► [User Management] ► [System Manager Information] ► [Edit] and specify the necessary settings on the displayed screen.
- By using the Remote UI, you can register a variety of information, including contact information, Administrator comments, the installation location of the machine, as well as to the settings that you can register by using the operation panel. The registered information can be viewed on the [Device Information] page of the Remote UI. ► **Checking System Manager Information(P. 432)**

Logging in to the machine

- If you try to access items that require administrator privileges, for example, <Network> and <Management Settings>, when the System Manager ID is specified, the Login screen is displayed. ► **Logging in to the Machine(P. 126)**
- You must also enter the System Manager ID and PIN to log in using the Remote UI in System Manager Mode. ► **Starting Remote UI(P. 427)**

LINKS

- **Setting Access Privileges(P. 361)**
- **Setting the Department ID Management(P. 364)**

Setting the Department ID Management

19YU-06X

You can control access to the machine by using multiple IDs for multiple users or groups. If a user tries to operate the machine when Department ID Management is enabled, a login screen is displayed, and the user must enter their own Department ID and PIN to use the machine. When Department ID Management is enabled, usage of functions, such as printing, is recorded for each Department ID. To configure Department ID Management, register department IDs as necessary and then enable Department ID Management function. Additional settings are required if you want to enable Department ID Management for operation from a computer.

- ▶ **Registering/Editing Department ID and PIN(P. 364)**
- ▶ **Enabling the Department ID Management(P. 366)**
- ▶ **Enabling the Department ID Management for Jobs from a Computer(P. 367)**
- ▶ **Blocking Jobs When Department ID Is Unknown(P. 368)**

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see ▶ **Setting Up Menu Options from Remote UI(P. 434)** .

Registering/Editing Department ID and PIN

Register a Department ID and set a PIN for it. Register all the department IDs to be managed.

- 1 Start the Remote UI and log in to System Manager Mode. ▶ Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ▶ Remote UI Screen(P. 428)**
- 3 Select [User Management] ▶ [Department ID Management].**
- 4 Register or edit Department IDs.**

■ Registering a Department ID

- 1** Click [Register New Department].
- 2** Specify the required settings.

[Department ID]

Enter the Department ID number to be registered.

[Set PIN]

To set a PIN, select the check box and enter the same number both in the [PIN] and [Confirm] text boxes.

[Restrict Functions]

You can restrict the number of pages to print and the available functions for departments to be registered. To restrict the number of pages to print, select the check box for the target type, and enter the appropriate number of pages in [Number of Pages]. Select the check box for the target functions to restrict functions.

NOTE:

- If the [Restrict Scan] check box is selected, the Save to USB Memory Device, Send E-mail, and Save to Shared Folder or FTP Server functions are all restricted. You can also restrict other methods that scan documents by importing them to a computer, but in that case you cannot block access for each Department ID (➤ **Blocking Jobs When Department ID Is Unknown(P. 368)**).

3 Click [OK].**■ Editing the settings of the registered Department ID**

- 1** Click the corresponding text link under Department ID to edit.
- 2** Change the settings as necessary and click [OK].

NOTE:**Deleting a Department ID**

- Click [Delete] on the right of the Department ID you want to delete ➤ click [OK].

NOTE**[Department ID Page Total]**

- You can check the total number of pages for jobs that have been executed to date on a department ID basis.

- If you want to return the counts to zero, click the corresponding text link under [Department ID] and click [Clear Count] ► [OK]. If you want to return the counts of all Department IDs to zero, click [Clear All Counts] ► [OK].

Department ID Page Total

Register New Department... **Clear All Counts**

Department ID	Page Total/Page Restriction			Color			Black & White			
	Total	Color	Black & White	Copy	Scan	Print	Copy	Scan	Print	
7654321	1	1	0	1	0	0	0	0	0	
0000001	0	1	0	1	0	0	0	0	0	Delete Clear Count
Unknown ID Jobs	0	0	0	0	0	0	0	0	0	
FX Print/Auto Report	0	0	0	0	0	0	0	0	0	

Using control cards

- When the optional Copy Card Reader is attached to the machine, Department IDs will be registered automatically.
- Do not delete the registered department IDs. The control cards that correspond to the deleted department IDs will become unavailable.
- You cannot use [Restrict Functions] to restrict the allowable number of pages to print.

Enabling the Department ID Management

After you register as many Department IDs as necessary, enable Department ID Management.

- 1 Start the Remote UI and log in to System Manager Mode. ►Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ►Remote UI Screen(P. 428)**
- 3 Select [User Management] ► [Department ID Management].**
- 4 Click [Edit].**
- 5 Select the [Department ID Management] check box.**

[Department ID Management]

Select the check box to enable Department ID Management. If you do not want to use Department ID Management, clear the check box.

NOTE:

- For information about the [Allow Print Jobs with Unknown IDs]/[Allow Scan Jobs with Unknown IDs]/[Allow Black & White Copy Jobs] check boxes, see **Blocking Jobs When Department ID Is Unknown(P. 368)** .

6 Click [OK].

NOTE

Using the operation panel

- You can also switch Department ID Management On/Off from <Menu> in the Home screen. **<Department ID Management>(P. 570)**

Logging in to the machine

- When you try to operate the machine when Department ID Management is enabled, the login screen is displayed. **Logging in to the Machine(P. 126)**

Enabling the Department ID Management for Jobs from a Computer

When you want to enable Department ID Management for jobs from a computer, you need to specify the department ID and PIN using the driver pre-installed on each computer.

IMPORTANT

- To perform the following procedure, log in to your computer with an administrator account.

- 1 Open the printer folder. ▶Displaying the Printer Folder(P. 764)**
- 2 Right-click the driver icon for this machine, and click [Printer properties] or [Properties].**
- 3 Click the [Device Settings] tab.**
- 4 Enable the Department ID Management function.**
 - **Printer driver**
Select the [Use Department ID Management] check box.
 - **Fax driver**
Select [Department ID Management] under [User Management].
- 5 Click [Settings] found to the right.**

6 Specify the settings as necessary and click [OK].

[Allow PIN Settings]

Select the check box to enable the PIN setting.

[Department ID]

Enter the Department ID number.

[PIN]

Enter the PIN corresponding to the Department ID as necessary.

[Verify]

Click to verify that the correct ID and PIN are entered. This function is not available if the machine and the computer are connected via a USB or WSD (Web Services on Devices) port.

[Confirm Department ID/PIN When Printing]/[Confirm Department ID/PIN When Sending Faxes]

Select the check box to display the [Confirm Department ID and PIN.] pop-up screen each time you send job from a computer.

[Do Not Use Department ID Management When B&W Printing]

Select the check box to send black and white print data as an unknown ID job.

[Authenticate Department ID/PIN at Device]

Select the check box if the machine and the computer are connected via a USB or WSD port.

7 Click [OK].

NOTE

Logging in to the machine

- When you try to send job from a computer when Department ID Management is enabled, the following pop-up screen is displayed (unless the [Confirm Department ID/PIN When Printing]/[Confirm Department ID/PIN When Sending Faxes] check box is cleared):

Blocking Jobs When Department ID Is Unknown

If you do not change the default settings, any user can print from a computer, scan (via <Computer> and <Remote Scanner>), send a PC fax from a computer, or make black and white copies without entering an ID and PIN even when Department ID Management is enabled for the machine. You can change the default settings so that the machine cannot be used for these functions without a correct ID and PIN.

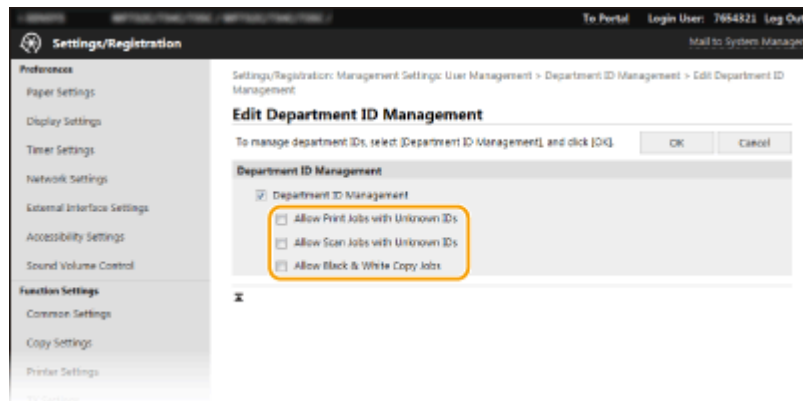

1 Start the Remote UI and log in to System Manager Mode. ▶ Starting Remote UI(P. 427)

2 Click [Settings/Registration] on the Portal page. ▶ Remote UI Screen(P. 428)

3 Select [User Management] ▶ [Department ID Management].

4 Click [Edit].

5 Clear the check boxes as necessary.

[Allow Print Jobs with Unknown IDs]

In order to send job from a computer when Department ID Management is enabled, you need to enter the correct ID and PIN (▶ **Enabling the Department ID Management for Jobs from a Computer(P. 367)**). However, if the check box is selected for this setting, jobs are executed even when the ID and PIN are not entered. When you want to configure a setting so that no jobs are executed unless the correct department ID and PIN are entered, clear the check box.

[Allow Scan Jobs with Unknown IDs]

If the check box is selected, you can select <Computer> or <Remote Scanner> on the main screen and scan documents into a computer anytime. If the check box is cleared, you cannot scan documents into a computer if Department ID Management is enabled. It is not possible to restrict scanning of documents into a computer for individual department IDs.

[Allow Black & White Copy Jobs]

If the check box is selected when Department ID Management is enabled, you can copy in black and white without entering the correct ID and PIN. Clear the check box to require entering an ID and PIN.

6 Click [OK].

LINKS

▶ **Setting Access Privileges(P. 361)**

▶ **Setting the System Manager ID and PIN(P. 362)**

Setting a Remote UI PIN

19YU-06Y

You can set a PIN for access to the Remote UI. All users use a common PIN.

NOTE

- When Department ID Management is enabled, setting here is not required. [▶Setting the Department ID Management\(P. 364\)](#)
- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

- 1** Start the Remote UI and log in to System Manager Mode. [▶Starting Remote UI\(P. 427\)](#)
- 2** Click [Settings/Registration] on the Portal page. [▶Remote UI Screen\(P. 428\)](#)
- 3** Select [License/Other] ▶ [Remote UI Settings].
- 4** Click [Edit].
- 5** Select the [Use Remote UI Access PIN] check box and set the PIN.

[Use Remote UI Access PIN]

If you select the check box, you must enter a PIN to access the Remote UI.

[Set/Change PIN]

To set or change a PIN, select the check box and enter the same number both in the [PIN] and [Confirm] text boxes.

- 6** Click [OK].

NOTE

Using the operation panel

- Remote UI Access PIN settings can also be accessed from <Menu> in the Home screen. ▶<Remote UI Settings>(P. 574)

If <Management Settings> are initialized

- The Remote UI Access PIN is also initialized. After an initialization, reset the PIN. ▶<Initialize Menu>(P. 577)

LINKS

- ▶Setting Access Privileges(P. 361)
- ▶Setting the System Manager ID and PIN(P. 362)

LDAP Server Authentication

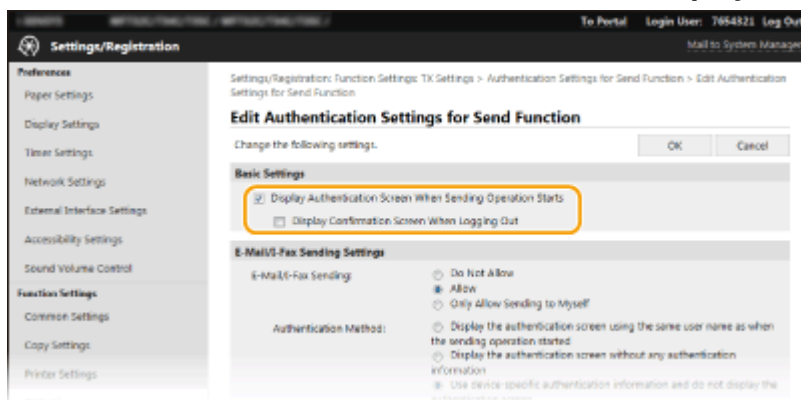

19YU-070

If your system has an LDAP server installed, you can ensure that LDAP server authentication is carried out when the send function is used. This enables you to prevent unauthorized use by third parties and information disclosure. Once the authorization settings are enabled, the Authorized Send screen appears when the fax or scan function is used and operation can only continue if it is correctly authorized by the LDAP server. Use the settings described here to configure LDAP server authentication. For more information about registering the server to be used for authentication, see [Registering LDAP Servers\(P. 62\)](#) .

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [Setting Up Menu Options from Remote UI\(P. 434\)](#) .

- 1 Start the Remote UI and log in to System Manager Mode. [Starting Remote UI\(P. 427\)](#)
- 2 Click [Settings/Registration] on the Portal page. [Remote UI Screen\(P. 428\)](#)
- 3 Select [TX Settings] ► [Authentication Settings for Send Function].
- 4 Click [Edit].
- 5 Select the [Display Authentication Screen When Sending Operation Starts] check box and select whether a confirmation screen is displayed at logout.

[Display Authentication Screen When Sending Operation Starts]

Select the check box to display the Authorized Send login screen when the fax or scan function is used (LDAP server authentication).

[Display Confirmation Screen When Logging Out]

Select the check box to display a screen that allows you to selectively log out when you are logged on for both Authorized Send and Department ID Management. If you clear this check box, no selection screen is displayed when you log out and you are logged out from both Authorized Send and Department ID Management.

6 Configure the settings for sending e-mail/I-Faxes.

[E-Mail/I-Fax Sending]

Select whether to allow sending e-mail and I-Faxes.

[Do Not Allow]	Blocks sending e-mail and I-Faxes. <E-Mail> and <I-Fax> in the scan function can no longer be used.
[Allow]	Permits outgoing e-mail and I-Faxes.
[Only Allow Sending to Myself]	Blocks all outgoing e-mail and I-Faxes other than those to users with authorized e-mail addresses. The e-mail addresses of authorized users must be registered on the LDAP server.

[Authentication Method]

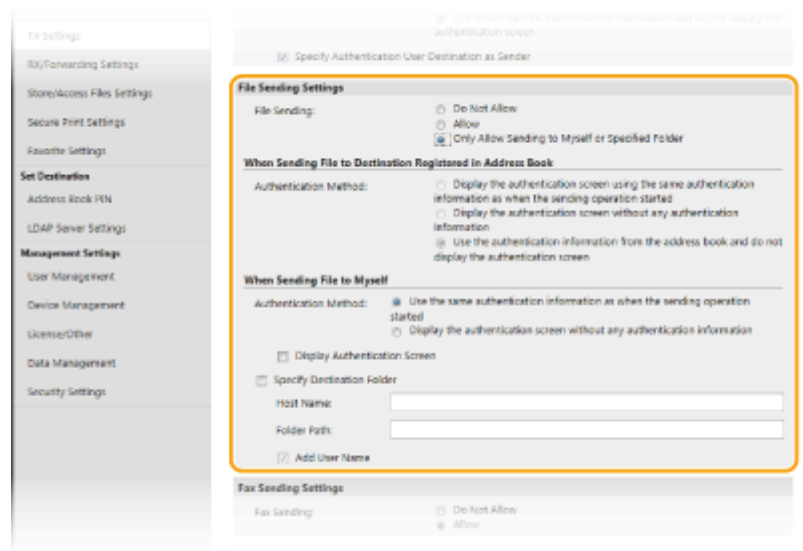

When [Allow] or [Only Allow Sending to Myself] is selected in [E-Mail/I-Fax Sending], this allows you to specify whether an authentication screen is shown on the SMTP server when e-mail is sent.

[Display the authentication screen using the same user name as when the sending operation started]	Displays the authentication screen showing the same user name and password entered in the Authorized Send login screen.
[Display the authentication screen without any authentication information]	Displays the authentication screen with the user name and password fields blank.
[Use device-specific authentication information and do not display the authentication screen]	No authentication screen is displayed when e-mail or I-Faxes are sent. Authorization on the SMTP server is carried out using the user name and password set in [E-Mail/I-Fax Settings]  Configuring E-Mail/I-Fax Communication Settings(P. 85) .

[Specify Authentication User Destination as Sender]

Select the check box when the e-mail address of an authorized user will be set as the sender. The e-mail addresses of authorized users must be registered on the LDAP server. If you clear this check box, the e-mail address set in the [E-Mail/I-Fax Settings] is set as the sender.

7 Configure the file transfer settings (for saving to shared folders and FTP servers).

[File Sending]

Select whether to allow saving to shared folders and FTP servers.

[Do Not Allow]	Blocks saving to shared folders and FTP servers. <File> in the scan function can no longer be used.
[Allow]	Saving to shared folders and FTP servers is not blocked.
[Only Allow Sending to Myself or Specified Folder]	Blocks all saving to shared folders and FTP servers other than specified folders. The data is saved to folders registered on the LDAP server or to the folder specified in [Specify Destination Folder].

■When [Allow] is specified in [File Sending]

[Authentication Method]

Allows you to specify whether an authentication screen is shown on the server when sending.

[Display the authentication screen using the same authentication information as when the sending operation started]	Displays the authentication screen showing the same user name and password entered in the Authorized Send login screen.
[Display the authentication screen without any authentication information]	Displays the authentication screen with the user name and password fields blank.
[Use the authentication information from the address book and do not display the authentication screen]	No authentication screen is displayed when sending. Authentication is carried out on the server using the user name and password set in the Address Book.

■When [Only Allow Sending to Myself or Specified Folder] is specified in [File Sending]

[Authentication Method]

Allows you to specify whether an authentication screen is shown on the server when sending.

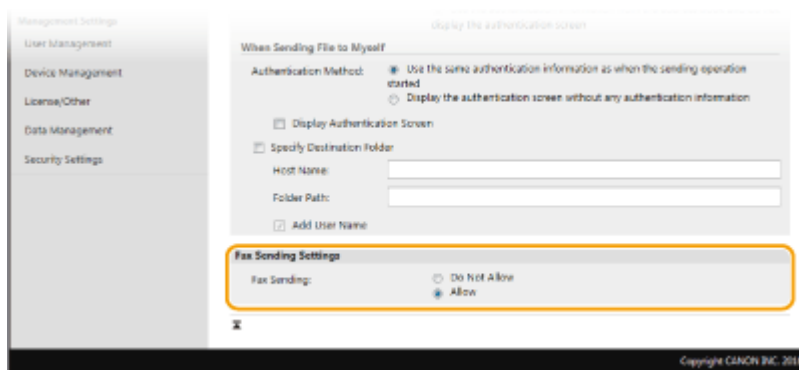

[Use the same authentication information as when the sending operation started]	Carries out authorization on the server using the user name and password entered in the Authorized Send login screen. Selecting the [Display Authentication Screen When Sending] check box displays the authentication screen with this user name and password already entered when you send the data.
[Display the authentication screen without any authentication information]	Displays the authentication screen with the user name and password fields blank.

[Specify Destination Folder]

Selecting this check box allows you to specify the folder where the data is saved. If the check box is not selected, the save destination is set based on authorized user information registered on the LDAP server.

[Host Name]	Enter a host name for the shared folder or FTP server.
[Folder Path]	Enter a path name for the save destination folder (excluding the host name). When the [Add User Name] check box is selected, the user name and path used for LDAP authentication are added.

8 Configure the settings for sending faxes.

**[Fax Sending]**

Select whether to allow sending faxes. [Do Not Allow] prevents the user from sending faxes from the machine.

9 Click [OK].

LINKS

▶ [Registering LDAP Servers\(P. 62\)](#)

Configuring the Network Security Settings

19YU-071

Authorized users may incur unanticipated losses from attacks by malicious third parties, such as sniffing, spoofing, and tampering of data as it flows over a network. To protect your important and valuable information from these attacks, the machine supports the following features to enhance security and secrecy.

Firewall Settings

Unauthorized access by third parties, as well as network attacks and intrusions, can be blocked by limiting communication only to devices that have a specific IP address or MAC address. **Restricting Communication by Using Firewalls(P. 378)**

Changing Port Numbers

A protocol that is used to exchange information with other devices is assigned port numbers that are predetermined according to the type of protocol. The port number must be the same for all communication devices; therefore, changing it to an arbitrary number is important to prevent hacking from outside. **Changing Port Numbers(P. 385)**

Proxy Settings

When the client devices are connected to an external network, communication is established through the proxy server. When the proxy server is used, websites can be browsed more safely, therefore, security can be expected to be enhanced. **Setting a Proxy(P. 386)**

TLS Encrypted Communication

TLS is a protocol for encryption for data sent over a network and is often used for communication via a Web browser or an e-mail application. SSL enables secure network communication when you access the machine from a computer via the Remote UI. **Configuring the Key and Certificate for TLS(P. 388)**

IPSec Communication

While TLS only encrypts data used on a specific application, such as a Web browser or an e-mail application, IPSec encrypts the whole (or payloads of) IP packets. This enables IPSec to offer a more versatile security system than SSL. **Configuring IPSec Settings(P. 399)**

IEEE 802.1X Authentication

IEEE 802.1X is a standard and mechanism for blocking unauthorized access to the network by collectively managing user authentication information. If a device tries to connect to the 802.1X network, the device must go through user authentication in order to prove that the connection is made by an authorized user. Authentication information is sent to and checked by a RADIUS server, which permits or rejects communication to the network depending on the authentication result. If authentication fails, a LAN switch (or an access point) blocks access from the outside of the network. The machine can connect to an 802.1X network as a client device. **Configuring IEEE 802.1X Authentication Settings(P. 406)**

Restricting Communication by Using Firewalls

19YU-072

Without proper security, unauthorized third parties can access computers and other communication devices that are connected to a network. To prevent this unauthorized access, specify the settings for packet filter, a feature that restricts communication to devices with specified IP addresses or MAC addresses.

- Specifying IP Addresses for Firewall Settings(P. 379)
- Specifying MAC Addresses for Firewall Settings(P. 382)

Specifying IP Addresses for Firewall Settings

19YU-073

You can either limit communication to only devices with specified IP addresses, or block devices with specified IP addresses but permit other communications. You can specify a single IP address or a range of IP addresses.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

1 Start the Remote UI and log in to System Manager Mode. [▶Starting Remote UI\(P. 427\)](#)

2 Click [Settings/Registration] on the Portal page. [▶Remote UI Screen\(P. 428\)](#)

3 Select [Network Settings] ▶ [Firewall Settings].

4 Click [Edit] for the target IP address filter.

- Select the filter that matches the target IP address. To restrict data sent from the machine to a computer, select [Outbound Filter]. To restrict data received from a computer, select [Inbound Filter].

5 Specify the settings for packet filtering.

- Select the default policy to allow or reject the communication of other devices with the machine, and then specify IP addresses for exceptions.

- 1 Select the [Use Filter] check box and click the [Reject] or [Allow] radio button for the [Default Policy].

[Use Filter]

Select the check box to restrict communication. Clear the check box to disable the restriction.

[Default Policy]

Select the precondition to allow or reject the communication of other devices with the machine.

[Reject]	Select to pass communication packets only when they are sent to or received from devices whose IP addresses are entered in [Exception Addresses]. Communications with other devices are prohibited.
[Allow]	Select to block communication packets when they are sent to or received from devices whose IP addresses are entered in [Exception Addresses]. Communications with other devices are permitted.

- 2 Specify address exceptions.

- Enter the IP address (or the range of IP addresses) in the [Address to Register] text box and click [Add].

IMPORTANT:

Check for entry errors

- If IP addresses are incorrectly entered, you may be unable to access the machine from the Remote UI, in which case you need to set <IPv4 Address Filter> or <IPv6 Address Filter> to <Off>.
 - ▶<IPv4 Address Filter> (P. 472)
 - ▶<IPv6 Address Filter> (P. 473)

NOTE:

Entry form for IP addresses

	Description	Example
Entering a single address	IPv4: Delimit numbers with periods.	192.168.0.10
	IPv6: Delimit alphanumeric characters with colons.	fe80::10
Specifying a range of addresses	Insert a hyphen between the addresses.	192.168.0.10-192.168.0.20
Specifying a range of addresses with a prefix	Enter the address, followed by a slash and a number indicating the prefix length.	192.168.0.32/27 fe80::1234/64

When [Reject] is selected for an outbound filter

- Outgoing multicast and broadcast packets cannot be filtered.

Deleting an IP address from exceptions

- Select an IP address and click [Delete].

3 Click [OK].

6 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE

Using the operation panel

- You can also enable or disable IP address filtering from <Menu> in the Home screen.
 - ▶<IPv4 Address Filter> (P. 472)
 - ▶<IPv6 Address Filter> (P. 473)

LINKS

▶Specifying MAC Addresses for Firewall Settings(P. 382)

Specifying MAC Addresses for Firewall Settings

19YU-074

You can limit communication to only devices with specified MAC addresses, or block devices with specified MAC addresses but permit other communications.

IMPORTANT

This function is unavailable when the machine is connected to a wireless LAN.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

1 Start the Remote UI and log in to System Manager Mode. ▶Starting Remote UI(P. 427)

2 Click [Settings/Registration] on the Portal page. ▶Remote UI Screen(P. 428)

3 Select [Network Settings] ▶ [Firewall Settings].

4 Click [Edit] for the target MAC address filter.

- To restrict data sent from the machine to a computer, select [Outbound Filter]. To restrict data received from a computer, select [Inbound Filter].

5 Specify the settings for packet filtering.

- Select the precondition (default policy) to allow or reject the communication of other devices with the machine, and then specify MAC addresses for exceptions.

- 1 Select the [Use Filter] check box and click the [Reject] or [Allow] radio button for the [Default Policy].

[Use Filter]

Select the check box to restrict communication. Clear the check box to disable the restriction.

[Default Policy]

Select the precondition to allow or reject other devices to communicate with the machine.

[Reject]	Select to pass communication packets only when they are sent to or received from devices whose MAC addresses are entered in [Exception Addresses]. Communications with other devices are prohibited.
[Allow]	Select to block communication packets when they are sent to or received from devices whose MAC addresses are entered in [Exception Addresses]. Communications with other devices are permitted.

- 2 Specify address exceptions.

- Enter the MAC address in the [Address to Register] text box and click [Add].
- You do not need to delimit the address with hyphens or colons.

IMPORTANT:

Check for entry errors

- If MAC addresses are incorrectly entered, you may become unable to access the machine from the Remote UI, in which case you need to set <MAC Address Filter> to <Off>. **▶<MAC Address Filter> (P. 473)**

NOTE:

When [Reject] is selected for an outbound filter

- Outgoing multicast and broadcast packets cannot be filtered.

Deleting a MAC address from exceptions

- Select a MAC address and click [Delete].

3 Click [OK].

6 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE

Using the operation panel

- You can also enable or disable MAC address filtering from <Menu> in the Home screen. **▶<MAC Address Filter> (P. 473)**

LINKS

▶Specifying IP Addresses for Firewall Settings(P. 379)

Changing Port Numbers

19YU-075

Ports serve as endpoints for communicating with other devices. Typically, conventional port numbers are used for major protocols, but devices that use these port numbers are vulnerable to attacks because these port numbers are well-known. To enhance security, your Network Administrator may change the port numbers. When a port number has been changed, the new number must be shared with the communicating devices, such as computers and servers. Specify the port number settings depending on the network environment.

NOTE

- To change the port number for proxy server, see [▶Setting a Proxy\(P. 386\)](#) .
- To change the port number for LDAP server, see [▶Registering LDAP Servers\(P. 62\)](#) .

1 Select <Menu> in the Home screen. [▶Home Screen\(P. 116\)](#)

2 Select <Preferences> ▶ <Network>.

- If the login screen appears, enter the correct ID and PIN. [▶Logging in to the Machine\(P. 126\)](#)

3 Select <TCP/IP Settings> ▶ <Port Number Settings>.

4 Selecting the protocol of which you want to change the port number.

NOTE:

Learning more about the protocols

- <LPD>/<RAW>/<WSD Multicast Discovery> [▶Configuring Printing Protocols and WSD Functions\(P. 39\)](#)
- <HTTP> [▶Disabling HTTP Communication\(P. 422\)](#)
- <POP3>/<SMTP> [▶Configuring E-Mail/I-Fax Communication Settings\(P. 85\)](#)
- <SNMP> [▶Monitoring and Controlling the Machine with SNMP\(P. 67\)](#)
- <Multicast Discovery> [▶Monitoring the Machine from the Device Management Systems\(P. 72\)](#)
- <FTP> [▶Procedure for Setting a FTP Server as a Save Location\(P. 90\)](#)

5 Enter the port number, and select <Apply>.

6 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

LINKS

[▶Configuring Printer Ports\(P. 42\)](#)

Setting a Proxy

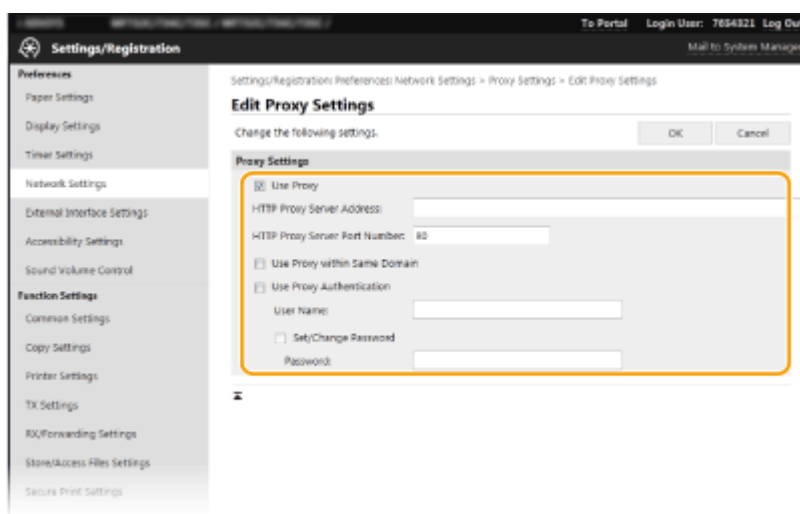

19YU-076

A proxy (or HTTP proxy server) refers to a computer or software that carries out HTTP communication for other devices, especially when communicating with resources outside the network, such as when browsing Web sites. The client devices connect to the outside network through the proxy server, and do not communicate directly to the resources outside. Setting a proxy not only facilitates management of traffic between in-house and outside networks but also blocks unauthorized access and consolidates anti-virus protection for enhanced security. When you use Google Cloud Print to print over the Internet, you can enhance security by setting a proxy. When setting a proxy, make sure that you have the necessary proxy information, including the IP address, port number, and a user name and password for authentication.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#).

- 1 Start the Remote UI and log in to System Manager Mode. ▶Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ▶Remote UI Screen(P. 428)**
- 3 Select [Network Settings] ▶ [Proxy Settings].**
- 4 Click [Edit].**
- 5 Select the [Use Proxy] check box and specify the required settings.**

[Use Proxy]

Select the check box to use the specified proxy server when communicating with an HTTP server.

[HTTP Proxy Server Address]

Enter the address of the proxy server. Specify the IP address or host name depending on the environment.

[HTTP Proxy Server Port Number]

Change the port number as necessary.

[Use Proxy within Same Domain]

Select the check box to also use the specified proxy server for communication with devices in the same domain.

[Use Proxy Authentication]

To enable authentication by the proxy server, select the check box and enter alphanumeric characters for the user name in the [User Name] text box.

[Set/Change Password]

To set or change the password for the proxy authentication, when it is enabled, select the check box and enter alphanumeric characters for the new password in the [Password] text box.

6 Click [OK].

Configuring the Key and Certificate for TLS

19YU-077

You can encrypt communication between the machine and a Web browser on the computer by using Transport Layer Security (TLS). TLS is a mechanism for encrypting data sent or received over the network. TLS must be enabled when the Remote UI is used for specifying settings for IPSec (Pre-Shared Key Method), IEEE 802.1X authentication (TTLS/PEAP), or SNMPv3. To use TLS encrypted communication for the Remote UI, you need to specify a "key and certificate" (server certificate) you want to use before enabling TLS. Generate or install the key and certificate for TLS before enabling TLS ([▶Management Functions\(P. 735\)](#)).

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

- 1 Start the Remote UI and log in to System Manager Mode. [▶Starting Remote UI\(P. 427\)](#)
- 2 Click [Settings/Registration] on the Portal page. [▶Remote UI Screen\(P. 428\)](#)
- 3 Select [Network Settings] ▶ [TLS Settings].
- 4 Click [Key and Certificate].
- 5 Click [Register Default Key] on the right of the key and certificate you want to use.

NOTE:

Viewing details of a certificate

- You can check the details of the certificate or verify the certificate by clicking the corresponding text link under [Key Name], or the certificate icon.

- 6 Select [License/Other] ▶ [Remote UI Settings].

7 Click [Edit].

8 Select the [Use TLS] check box and click [OK].

9 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE

Using the operation panel

- You can also enable or disable TLS encrypted communication from <Menu> in the Home screen. ➡<Remote UI>(P. 574)

Starting the Remote UI with TLS

- If you try to start the Remote UI when TLS is enabled, a security alert may be displayed regarding the security certificate. In this case, check that the correct URL is entered in the address field, and then proceed to display the Remote UI screen. ➡Starting Remote UI(P. 427)

Using TLS to encrypt e-mail/I-Fax communication

- If the SMTP server and the POP3 server support TLS, you can enable TLS for communication with these servers (➡Configuring E-Mail/I-Fax Communication Settings(P. 85)). For more information about the SMTP server and the POP3 server, contact your Internet service provider or Network Administrator.

Limiting the TLS version

- Select [Allowed Versions] on the [TLS Settings] page of Remote UI, and specify the upper limit and lower limit.

Generating the Key and Certificate for Network Communication

19YU-078

A key and certificate can be generated with the machine when it is required for encrypted communication via Transport Layer Security (TLS). You can use TLS when accessing the machine via the Remote UI. Self-signed certificates are used with the key and certificate generated in "Network Communication."

NOTE

- If you want to use a server certificate that has a CA signature, you can generate a CSR together with a key instead of a certificate. ▶ **Generating a Key and Certificate Signing Request (CSR)(P. 394)**
- For more information about the basic operations to be performed when setting the machine from the Remote UI, see ▶ **Setting Up Menu Options from Remote UI(P. 434)** .

- 1 Start the Remote UI and log in to System Manager Mode. ▶ Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ▶ Remote UI Screen(P. 428)**
- 3 Select [Device Management] ▶ [Key and Certificate Settings].**
- 4 Click [Generate Key].**

NOTE:

Deleting a registered key and certificate

- Click [Delete] on the right of the key and certificate you want to delete ▶ click [OK].
- A key and certificate cannot be deleted if it is currently used for some purpose, such as when "[TLS]" or "[IEEE 802.1X]" is displayed under [Key Usage]. In this case, disable the function or replace the other key and certificate before deleting it.

- 5 Select [Network Communication] and click [OK].**
- 6 Specify settings for the key and certificate.**

a [Key Settings]

[Key Name]

Enter alphanumeric characters for naming the key. Set a name that will be easy for you to find later in a list.

[Signature Algorithm]

Select the signature algorithm from the drop-down list.

[Key Algorithm]

Select the key generation algorithm from [RSA] or [ECDSA], then select the key length from the drop-down list. In either case, the larger the number for the key length is, the higher the security level becomes. However, the communication speed becomes slower.

NOTE:

- When [SHA384] or [SHA512] is selected in [Signature Algorithm], [512-bit] cannot be selected as the key length when [RSA] is selected in [Key Algorithm].

b [Certificate Settings]

[Validity Start Date (YYYY/MM/DD)]

Enter the validity start date of the certificate, in the order of: year, month, day.

[Validity End Date (YYYY/MM/DD)]

Enter the validity end date of the certificate, in the order of: year, month, day. A date earlier than [Validity Start Date (YYYY/MM/DD)] cannot be set.

[Country/Region]

Click the [Select Country/Region] radio button and select the country/region from the drop-down list. You can also click the [Enter Internet Country Code] radio button and enter a country code, such as "US" for the United States.

[State]/[City]

Enter alphanumeric characters for the location as necessary.

[Organization]/[Organization Unit]

Enter alphanumeric characters for the organization name as necessary.

[Common Name]

Enter alphanumeric characters for the common name of the certificate as necessary. "Common Name" is often abbreviated as "CN."

7 Click [OK].

- Generating a key and certificate may take some time.
- After the key and certificate is generated, it is automatically registered to the machine.

LINKS

- ▶ **Registering the Key and Certificate for Network Communication(P. 397)**

Generating a Key and Certificate Signing Request (CSR)

19YU-079

Because certificates generated on the machine do not have a CA signature, a communication error may result depending on devices it communicates with. To have the certificate authority issue the certificate with the CA signature, you need to obtain data of CSR (Certificate Signing Request), which the administrator can generate from Remote UI. When the certificate is issued, register it in the key with the CSR generated.

▶ **Generating a Key and CSR(P. 394)**

▶ **Registering a Certificate to a Key(P. 396)**

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see ▶ **Setting Up Menu Options from Remote UI(P. 434)** .

Generating a Key and CSR

- 1 Start the Remote UI and log in to System Manager Mode. ▶ Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ▶ Remote UI Screen(P. 428)**
- 3 Select [Device Management] ▶ [Key and Certificate Settings].**
- 4 Click [Generate Key].**

NOTE:

Deleting a registered key and certificate

- Click [Delete] on the right of the key and certificate you want to delete ▶ click [OK].
- A key and certificate cannot be deleted if it is currently used for some purpose, such as when "[TLS]" or "[IEEE 802.1X]" is displayed under [Key Usage]. In this case, disable the function or replace the key and certificate before deleting it.

- 5 Select [Key and Certificate Signing Request (CSR)] and click [OK].**
- 6 Specify settings for the key and CSR.**

a [Key Settings]

[Key Name]

Enter alphanumeric characters for naming the key. Set a name that will be easy for you to find later in a list.

[Signature Algorithm]

Select the signature algorithm from the drop-down list.

[Key Algorithm]

Select the key generation algorithm from [RSA] or [ECDSA], then select the key length from the drop-down list. In any case, the larger the number for the key length is, the slower the communication becomes. However, the security becomes tighter.

NOTE:

- When [SHA384] or [SHA512] is selected in [Signature Algorithm], [512-bit] cannot be selected as the key length when [RSA] is selected in [Key Algorithm].

b [Certificate Signing Request (CSR) Settings]

[Country/Region]

Click the [Select Country/Region] radio button and select the country/region from the drop-down list. You can also click the [Enter Internet Country Code] radio button and enter a country code, such as "US" for the United States.

[State]/[City]

Enter alphanumeric characters for the location as necessary.

[Organization]/[Organization Unit]

Enter alphanumeric characters for the organization name as necessary.

[Common Name]

Enter alphanumeric characters for the common name of the certificate as necessary. "Common Name" is often abbreviated as "CN."

7 Click [OK].

- Generating a key and CSR may take some time.

8 Click [Store in File].

- A dialog box for storing the file appears. Choose where to store the file and click [Save].
 ➡ The CSR file is stored on the computer.

9 Attach the stored file and submit the application to the certification authority.

Registering a Certificate to a Key

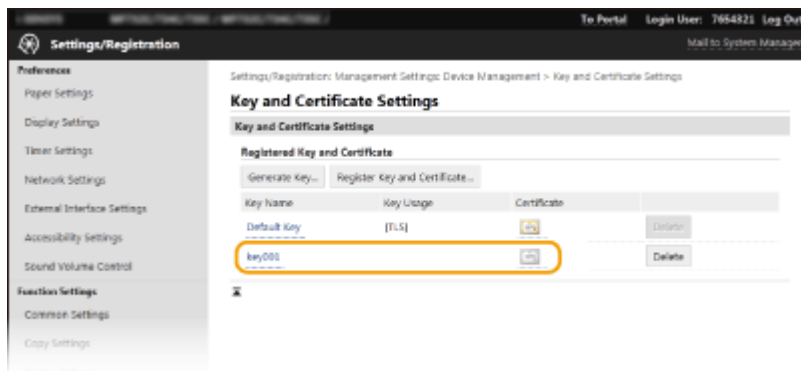

The key with the CSR generated cannot be used until the certificate issued from the certificate authority based on the CSR is registered in the key. Once the certification authority has issued the certificate, register it using the procedure below.

1 Start the Remote UI and log in to System Manager Mode. ▶Starting Remote UI(P. 427)

2 Click [Settings/Registration] on the Portal page. ▶Remote UI Screen(P. 428)

3 Select [Device Management] ▶ [Key and Certificate Settings].

4 Click [Key Name] or [Certificate] required to register the certificate.

5 Click [Register Certificate].

6 Click [Browse], specify the file for the certificate signing request, and click [Register].

LINKS

- ▶Configuring the Key and Certificate for TLS(P. 388)

Registering the Key and Certificate for Network Communication

19YU-07A

You can obtain the key and certificate, and the CA certificate from a certification authority (CA) for use with the machine. Install and register the obtained key and certificate file and CA certificate file in this machine using Remote UI. Check the key and certificate, and CA certificate conditions that are required for the machine in advance. ([▶](#) **Management Functions(P. 735)**).

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

1 Start the Remote UI and log in to System Manager Mode. [▶Starting Remote UI\(P. 427\)](#)

2 Click [Settings/Registration] on the Portal page. [▶Remote UI Screen\(P. 428\)](#)

3 Select [Device Management] ▶ [Key and Certificate Settings] or [CA Certificate Settings].

- Click [Key and Certificate Settings] to install a key and certificate, or [CA Certificate Settings] to install a CA certificate.

4 Click [Register Key and Certificate] or [Register CA Certificate].

NOTE:

Deleting a registered key and certificate or CA certificate

- Click [Delete] on the right of the key and certificate or CA certificate you want to delete ▶ click [OK]. You cannot delete the preinstalled CA certificates.
- A key and certificate cannot be deleted if it is currently used for some purpose, such as when "[TLS]" or "[IEEE 802.1X]" is displayed under [Key Usage]. In this case, disable the function or replace the key and certificate before deleting it.

Disabling or enabling the preinstalled CA certificates

- Click [Disable] on the right of the preinstalled CA certificate you want to disable. To enable the certificate again, click [Enable] on the right of the certificate.

5 Click [Install].

NOTE:**Deleting the key and certificate file or CA certificate file**

- Click [Delete] on the right of the file you want to delete ► click [OK].

6 Click [Browse], specify the file to install, and click [Start Installation].

► The key and certificate file or the CA certificate file is installed on the machine from a computer.

7 Register the key and certificate or CA certificate.**■ Registering a key and certificate**

- 1 Click [Register] on the right of the key and certificate file you want to register.
- 2 Enter the name of the key and password.

**[Key Name]**

Enter alphanumeric characters for the name of the key to be registered.

[Password]

Enter alphanumeric characters for the password of the private key set for the file to be registered.

- 3 Click [OK].

■ Registering a CA certificate

Click [Register] on the right of the CA certificate file you want to register.

LINKS

- **Configuring the Key and Certificate for TLS(P. 388)**
- **Configuring IPsec Settings(P. 399)**
- **Configuring IEEE 802.1X Authentication Settings(P. 406)**

Configuring IPsec Settings

19YU-07C

Internet Protocol Security (IPsec or IPsec) is a protocol suite for encrypting data transported over a network, including Internet networks. While TLS only encrypts data used on a specific application, such as a Web browser or an e-mail application, IPsec encrypts either whole IP packets or the payloads of IP packets, offering a more versatile security system. The IPsec of the machine works in transport mode, in which the payloads of IP packets are encrypted. With this feature, the machine can connect directly to a computer that is in the same virtual private network (VPN). Check the system requirements ([▶Management Functions\(P. 735\)](#)) and set the necessary configuration on the computer before you configure the machine.

NOTE

Using IPsec with IP address filter

- IP address filter settings are applied before the IPsec policies. [▶Specifying IP Addresses for Firewall Settings\(P. 379\)](#)

Configuring IPsec Settings

Before using IPsec for encrypted communication, you need to register security policies (SP). A security policy consists of the groups of settings described below. After registering policies, specify the order in which they are applied.

Selector

Selector defines conditions for IP packets to apply IPsec communication. Selectable conditions include IP addresses and port numbers of the machine and the devices to communicate with.

IKE

IKE configures the IKEv1 that is used for key exchange protocol. Note that instructions vary depending on the authentication method selected.

[Pre-Shared Key Method]

This authentication method uses a common key word, called Shared Key, for communication between the machine and other devices. Enable TLS for the Remote UI before specifying this authentication method ([▶Configuring the Key and Certificate for TLS\(P. 388\)](#)).

[Digital Signature Method]

The machine and the other devices authenticate each other by mutually verifying their digital signatures. Generate or install the key and certificate beforehand ([▶Registering the Key and Certificate for Network Communication\(P. 397\)](#)).

AH/ESP

Specify the settings for AH/ESP, which is added to packets during IPsec communication. AH and ESP can be used at the same time. You can also select whether or not to enable PFS for tighter security.

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

1 Start the Remote UI and log in to System Manager Mode. ▶Starting Remote UI(P. 427)

2 Click [Settings/Registration] on the Portal page. ▶Remote UI Screen(P. 428)

3 Select [Network Settings] ▶ [IPSec Settings].

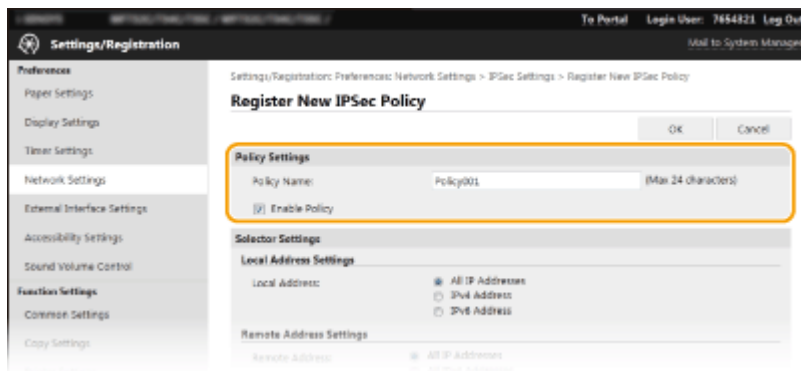

4 Click [Edit].

5 Select the [Use IPSec] check box and click [OK].

- If you want the machine to only receive packets that match one of the security policies that you define in the steps below, clear the [Receive Non-Policy Packets] check box.

6 Click [Register New Policy].

7 Specify the Policy Settings.

1 In the [Policy Name] text box, enter alphanumeric characters for a name that is used for identifying the policy.

2 Select the [Enable Policy] check box.

8 Specify the Selector Settings.

[Local Address]

Click the radio button for the type of IP address of the machine to apply the policy.

[All IP Addresses]	Select to use IPSec for all IP packets.
[IPv4 Address]	Select to use IPSec for all IP packets that are sent to or from the IPv4 address of the machine.
[IPv6 Address]	Select to use IPSec for all IP packets that are sent to or from an IPv6 address of the machine.

[Remote Address]

Click the radio button for the type of IP address of the other devices to apply the policy.

[All IP Addresses]	Select to use IPSec for all IP packets.
[All IPv4 Addresses]	Select to use IPSec for all IP packets that are sent to or from IPv4 addresses of the other devices.
[All IPv6 Addresses]	Select to use IPSec for all IP packets that are sent to or from IPv6 addresses of the other devices.
[IPv4 Manual Settings]	Select to specify a single IPv4 address or a range of IPv4 addresses to apply IPSec. Enter the IPv4 address (or the range) in the [Addresses to Set Manually] text box.
[IPv6 Manual Settings]	Select to specify a single IPv6 address or a range of IPv6 addresses to apply IPSec. Enter the IPv6 address (or the range) in the [Addresses to Set Manually] text box.

[Addresses to Set Manually]

If [IPv4 Manual Settings] or [IPv6 Manual Settings] is selected for [Remote Address], enter the IP address to apply the policy. You can also enter a range of addresses by inserting a hyphen between the addresses.

NOTE:

Entering IP addresses

	Description	Example
Entering a single address	IPv4: Delimit numbers with periods.	192.168.0.10

	Description	Example
	IPv6: Delimit alphanumeric characters with colons.	fe80::10
Specifying a range of addresses	Insert a hyphen between the addresses.	192.168.0.10-192.168.0.20

[Subnet Settings]

When manually specifying IPv4 address, you can express the range by using the subnet mask. Enter the subnet mask using periods to delimit numbers (example:"255.255.255.240").

[Prefix Length]

Specifying the range of IPv6 addresses manually also allows you to specify the range using prefixes. Enter a range between 0 and 128 as the prefix length.

[Local Port]/[Remote Port]

If you want to create separate policies for each protocol, such as HTTP or WSD, enter the appropriate port number for the protocol to determine whether to use IPSec.

IMPORTANT:**IPSec is not applied to the following packets**

- Loopback, multicast, and broadcast packets
- IKE packets (using UDP on port 500)
- ICMPv6 neighbor solicitation and neighbor advertisement packets

9 Specify the IKE Settings.

The screenshot shows the 'IKE Settings' configuration page. The left sidebar contains navigation links: Set Credentials, Address Book PIN, LDAP Server Settings, Management Settings, User Management, Device Management, License/Other, Data Management, and Security Settings. The main content area has three sections: 'Port Settings' with 'Local Port' and 'Remote Port' (both set to 'All Ports'), 'IKE Settings' (highlighted with an orange border) with 'IKE Mode' set to 'Main', 'Authentication Method' set to 'Pre-Shared Key Method', 'Validity' set to '480 min', 'Authentication/Encryption Algorithm' set to 'SHA1 and SHA2' and 'IDMS-CRC and AES-CRC', and 'DH Group' set to 'Group 2 (1024)'. Below is the 'IPSec Network Settings' section with 'Use PFS' checked and 'Validity' set to 'Specify by Time: 480 min'.

[IKE Mode]

The mode used for the key exchange protocol is displayed. The machine supports the main mode, not the aggressive mode.

[Authentication Method]

Select [Pre-Shared Key Method] or [Digital Signature Method] for the method used when authenticating the machine. You need to enable TLS for the Remote UI before selecting [Pre-Shared Key Method]. You need to generate or install the key and certificate before selecting [Digital Signature Method]. **Configuring the Key and Certificate for TLS(P. 388)**

[Valid for]

Specify how long a session lasts for IKE SA (ISAKMP SA). Enter the time in minutes.

[Authentication]/[Encryption]/[DH Group]

Select an algorithm from the drop-down list. Each algorithm is used in the key exchange.

[Authentication]	Select the hash algorithm.
[Encryption]	Select the encryption algorithm.
[DH Group]	Select the Diffie-Hellman group, which determines the key strength.

■ Authenticating a machine using a pre-shared key

- 1 Click the [Pre-Shared Key Method] radio button for [Authentication Method] and then click [Shared Key Settings].
- 2 Enter alphanumeric characters for the pre-shared key and click [OK].
- 3 Specify the [Valid for] and [Authentication]/[Encryption]/[DH Group] settings.

■ Authenticating a machine using digital signature method

- 1 Click the [Digital Signature Method] radio button for [Authentication Method] and then click [Key and Certificate].
- 2 Click [Register Default Key] on the right of the key and certificate you want to use.

NOTE:

Viewing details of a certificate

- You can check the details of the certificate or verify the certificate by clicking the corresponding text link under [Key Name], or the certificate icon.
- 3 Specify the [Valid for] and [Authentication]/[Encryption]/[DH Group] settings.

10 Specify the IPSec Network Settings.

[Use PFS]

Select the check box to enable Perfect Forward Secrecy (PFS) for IPSec session keys. Enabling PFS enhances the security while increasing the load on the communication. Make sure that PFS is also enabled for the other devices.

[Specify by Time]/[Specify by Size]

Set the conditions for terminating a session for IPSec SA. IPSec SA is used as a communication tunnel. Select either or both of the check boxes as necessary. If both check boxes are selected, the IPSec SA session is terminated when either of the conditions has been satisfied.

[Specify by Time]	Enter a time in minutes to specify how long a session lasts.
[Specify by Size]	Enter a size in megabytes to specify how much data can be transported in a session.

[Select Algorithm]

Select the [ESP], [ESP (AES-GCM)], or [AH (SHA1)] check box(es) depending on the IPSec header and the algorithm used. AES-GCM is an algorithm for both authentication and encryption. If [ESP] is selected, also select algorithms for authentication and encryption from the [ESP Authentication] and [ESP Encryption] drop-down lists.

[ESP Authentication]	To enable the ESP authentication, select [SHA1] for the hash algorithm. Select [Do Not Use] if you want to disable the ESP authentication.
[ESP Encryption]	Select the encryption algorithm for ESP. You can select [NULL] if you do not want to specify the algorithm, or select [Do Not Use] if you want to disable the ESP encryption.

[Connection Mode]

The connection mode of IPSec is displayed. The machine supports transport mode, in which the payloads of IP packets are encrypted. Tunnel mode, in which whole IP packets (headers and payloads) are encapsulated is not available.

11 Click [OK].

- If you need to register an additional security policy, return to step 6.

12 Arrange the order of policies listed under [Registered IPSec Policies].

- Policies are applied from one at the highest position to the lowest. Click [Up] or [Down] to move a policy up or down the order.

**NOTE:****Editing a policy**

- Click the corresponding text link under [Policy Name] for the edit screen.

Deleting a policy

- Click [Delete] on the right of the policy name you want to delete ► click [OK].

13 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE

Using the operation panel

- You can also enable or disable IPSec communication from <Menu> in the Home screen.  **<Use IPSec>(P. 468)**

LINKS

 **Configuring the Key and Certificate for TLS(P. 388)**

 **IPSec Policy List(P. 631)**

Configuring IEEE 802.1X Authentication Settings

19YU-07E

The machine can connect to an 802.1X network as a client device. A typical 802.1X network consists of a RADIUS server (authentication server), LAN switch (authenticator), and client devices with authentication software (supplicants). If a device tries to connect to the 802.1X network, the device must go through user authentication in order to prove that the connection is made by an authorized user. Authentication information is sent to and checked by a RADIUS server, which permits or rejects communication to the network depending on the authentication result. If authentication fails, a LAN switch (or an access point) blocks access from the outside of the network.

IEEE 802.1X Authentication Method

Select the authentication method from the options below. If necessary, install or register a key and certificate or a CA certificate before configuring IEEE 802.1X authentication ([▶Registering the Key and Certificate for Network Communication\(P. 397\)](#)).

■ TLS

The machine and the authentication server authenticate each other by mutually verifying their certificates. A key and certificate issued by a certification authority (CA) is required for the client authentication (when authenticating the machine). For the server authentication, a CA certificate installed via the Remote UI can be used in addition to a CA certificate preinstalled in the machine.

■ TTLS

This authentication method uses a user name and password for the client authentication and a CA certificate for the server authentication. MSCHAPv2 or PAP can be selected as the internal protocol. TTLS can be used with PEAP at the same time. Enable TLS for the Remote UI before configuring this authentication method ([▶Configuring the Key and Certificate for TLS\(P. 388\)](#)).

■ PEAP

The required settings are almost the same as those of TTLS. MSCHAPv2 is used as the internal protocol. Enable TLS for the Remote UI before configuring this authentication method ([▶Configuring the Key and Certificate for TLS\(P. 388\)](#)).

NOTE

- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

- 1 Start the Remote UI and log in to System Manager Mode. [▶Starting Remote UI\(P. 427\)](#)**

- 2 Click [Settings/Registration] on the Portal page. ▶ Remote UI Screen(P. 428)
- 3 Select [Network Settings] ▶ [IEEE 802.1X Settings].
- 4 Click [Edit].
- 5 Select the [Use IEEE 802.1X] check box, and enter the login name in the [Login Name] text box.

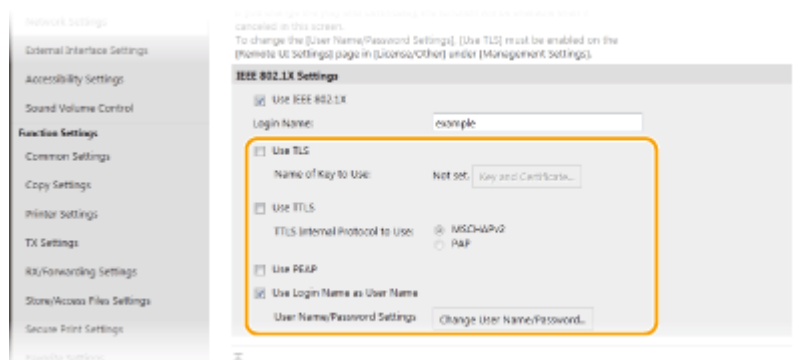

[Use IEEE 802.1X]

Select the check box to enable IEEE 802.1X authentication.

[Login Name]

Enter alphanumeric characters for a name (EAP identity) that is used for identifying the user.

- 6 Configure the required settings according to the specified authentication method.

■ Setting TLS

- 1 Select the [Use TLS] check box and click [Key and Certificate].
 - You cannot use TLS with TTLS or PEAP.
- 2 Click [Register Default Key] on the right of the key and certificate you want to use for the client authentication.

NOTE:

Viewing details of a certificate

- You can check the details of the certificate or verify the certificate by clicking the corresponding text link under [Key Name], or the certificate icon.

■ Setting TTLS/PEAP

- 1 Select the [Use TTLS] or [Use PEAP] check box.

NOTE:

Internal protocol for TTLS

- You can select MSCHAPv2 or PAP.

- 2 Click [Change User Name/Password].

- To specify a user name other than the login name, clear the [Use Login Name as User Name] check box. Select the check box if you want to use the login name as the user name.

- 3 Set the user name/password.

[User Name]

Enter alphanumeric characters for the user name.

[Change Password]

To set or change the password, select the check box and enter alphanumeric characters for the new password both in the [Password] and [Confirm] text boxes.

- 4 Click [OK].

- 7 Click [OK].

- 8 Restart the machine.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE

Using the operation panel

- You can also enable or disable IEEE 802.1X authentication from <Menu> in the Home screen. ▶<Use IEEE 802.1X>(P. 472)

LINKS

- ▶<Configuring the Key and Certificate for TLS(P. 388)>

Restricting the Machine's Functions

19YU-07F

Some of the functions of the machine may rarely be used or provide opportunities for misuse. For security purposes, the machine can be set to limit its capabilities by partially or completely disabling these functions.

Restricting Access to Address Book and Sending Functions

You can specify the PIN in the Address Book to disable a general user from modifying data or limit destinations that can be specified for fax sending. You can also disable a user from collectively sending a fax to multiple destinations (Sequential Broadcast). ➤**Restricting Access to Address Book and Sending Functions(P. 412)**

Restricting Printing from a Computer

You can limit "printing from computer" only to secure documents so that no print jobs can be executed unless the PIN is entered on the machine side. ➤**Restricting Printing from a Computer(P. 419)**

Restricting USB Functions

The USB connection allows an easy connection with peripheral devices, but it may cause a security risk such as an information leakage. You can restrict a USB connection with a computer or saving to a USB memory device.

➤**Restricting USB Functions(P. 420)**

Disabling HTTP Communication

When not performing operations via the network, for example, when using the machine via USB connection, you can disable HTTP communication to prevent a hacking via the HTTP port. ➤**Disabling HTTP Communication(P. 422)**

Disabling Remote Management

When not using Remote UI, you can disable functions to prevent an unauthorized remote operation via Remote UI. ▶ **Disabling Remote UI(P. 423)**

Restricting Access to Address Book and Sending Functions

19YU-07H

Some cases of information leakage can be prevented by limiting the available fax and e-mail destinations to those registered in the Address Book or LDAP servers, or by setting a PIN for the Address Book so that unauthorized users cannot add or edit Address Book entries. You can also avoid sending documents to unintended recipients if the machine is set to ask you to enter the fax number twice for confirmation.

- ▶ **Restricting Use of the Address Book(P. 413)**
- ▶ **Limiting Available Destinations(P. 415)**
- ▶ **Restricting the Fax Sending Functions(P. 417)**

Restricting Use of the Address Book

19YU-07J

The Address Book can be set to require users to enter a PIN in order to add new entries to the Address Book or edit existing entries. Setting a PIN to the Address Book can reduce the risk of documents being sent to unintended recipients because changes to the Address Book can only be made by users who know the PIN.

1 Select <Menu> in the Home screen. ▶ **Home Screen(P. 116)**

2 Select <Set Destination>.

- If the login screen appears, enter the correct ID and PIN. ▶ **Logging in to the Machine(P. 126)**

3 Select <Address Book PIN>.

4 Specify the PIN.

- Enter the number, and select <Apply>.
- The Confirm screen is displayed. Enter the PIN once again to confirm.

NOTE:

- You cannot set a PIN that consists only of zeros, such as "00" or "0000000".
- To cancel the PIN setting, use **C** to clear the entered information, and select <Apply> with the field blank.

NOTE

In addition to setting the Address Book PIN, you can further enhance security by performing the following operations:

- Restricting the addition of new destinations, see ▶ **Restricting New Destinations that Can Be Specified(P. 415)** .
- Disabling the PC fax function, see ▶ **Restricting Fax Sending from a Computer(P. 417)** .

LINKS

▶ **Registering Destinations(P. 180)**

- **Registering Destinations from Remote UI(P. 437)**
- **Specifying E-Mail Settings(P. 319)**

Limiting Available Destinations

19YU-07K

By limiting destinations that can be specified to those registered in the Address Book or LDAP servers, you can reduce the possibility of specifying unintended destinations and prevent users from leaking information. You can configure the setting to display the confirmation screen to prevent the user from misdialing when specifying a coded dial number in the Address Book.

- ▶ **Restricting New Destinations that Can Be Specified(P. 415)**
- ▶ **Disabling Use of Previously Used Destinations(P. 415)**
- ▶ **Displaying Destinations in Address Book(P. 415)**
- ▶ **Checking Destinations when Sending Data(P. 416)**

Restricting New Destinations that Can Be Specified

Restrict destinations that can be specified when sending faxes or scanned documents to "those already registered in the Address Book," "those previously used," or "those searchable from the LDAP servers." When this function is enabled, the machine prohibits users from entering destinations using the numeric keys, adding new entries to the Address Book, and editing the existing Address Book entries.

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Common Settings> ▶ <Restrict New Destinations> ▶ <On> ▶

IMPORTANT

- This function does not limit the available destinations for PC faxing. ▶ **Restricting Fax Sending from a Computer(P. 417)**

Disabling Use of Previously Used Destinations

Prohibits the specification of destinations from the transmission records. Using this restriction prevents destinations being selected from the transmission records for "Send Fax," "Scan and Send as E-mail" and "Scan and Save to Shared Folder or FTP Server."

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Common Settings> ▶ <Restrict Resending from Log> ▶ <On> ▶

Displaying Destinations in Address Book

When using coded dial numbers to specify destinations, you need to precisely remember whose destination (or what group) is registered in what coded dial number. If you do not remember all these numbers accurately, you may send your documents to unintended destinations. You can avoid sending data to unintended recipients by configuring the

machine to display the details of the coded dial number you selected/entered as a sending destination on the screen before you send documents to that destination.

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Common Settings> ▶ <Confirm When Coded Dial TX> ▶ <On> ▶

Checking Destinations when Sending Data

You can configure a setting so that the destination confirmation screen is displayed when fax, e-mail, or I-Fax sending starts. If <Only for Sequential Broadcast> is selected, the confirmation screen is displayed only when multiple destinations are specified.

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Common Settings> ▶ <Confirm Dest. Before Sending> ▶ Select <On> or <Only for Sequential Broadcast> ▶

LINKS

- ▶ **Sending I-Faxes(P. 251)**
- ▶ **Sending Data by E-Mail/Saving Data to a Shared Folder or FTP Server(P. 293)**
- ▶ **Recalling Previously Used Settings for Sending/Saving (Recall Settings)(P. 316)**
- ▶ **Restricting Use of the Address Book(P. 413)**
- ▶ **Restricting the Fax Sending Functions(P. 417)**

Restricting the Fax Sending Functions

You can set various restrictions for sending faxes, which can prevent information leakage to third parties or sending documents to unintended destinations.

- ▶ **Confirming the Entered Fax Number(P. 417)**
- ▶ **Restricting Fax Sending from a Computer(P. 417)**
- ▶ **Restricting Sequential Broadcasts(P. 417)**

Confirming the Entered Fax Number

You can configure the setting to display the confirmation screen to prevent the user from misdialing when entering a destination fax number using the numeric keys.

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Fax Settings> ▶ <Confirm Entered Fax Number>
▶ <On> ▶

Restricting Fax Sending from a Computer

You can prohibit users from PC faxing (faxing from a computer).

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Fax Settings> ▶ <Allow Fax Driver TX> ▶ <Off> ▶

Restricting Sequential Broadcasts

You can prohibit a function that collectively sends a fax to multiple destinations (Sequential Broadcast).

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Fax Settings> ▶ <Restrict Sequential Broadcast> ▶ <On> ▶

LINKS

- ▶ **Basic Operations for Sending Faxes(P. 221)**
- ▶ **Recalling Previously Used Settings for Sending (Recall Settings)(P. 234)**

- ▶ **Sending Faxes from Your Computer (PC Fax)(P. 247)**
- ▶ **Enabling the Department ID Management for Jobs from a Computer(P. 367)**
- ▶ **Restricting Use of the Address Book(P. 413)**
- ▶ **Limiting Available Destinations(P. 415)**

Restricting Printing from a Computer

19YU-07R

You can drastically reduce information leakage risks by limiting the documents printable from a computer to the Secure-Print documents (▶ **Printing a Document Secured by a PIN (Secure Print)(P. 268)**).

<Menu> ▶ <Function Settings> ▶ <Secure Print> ▶ <Restrict Printer Jobs> ▶ <On> ▶ Restart the machine

Restricting USB Functions

19YU-07S

USB is a convenient way of connecting peripheral devices and storing or relocating data, but USB can also be a source of information leakage if it is not properly managed. Be especially careful when handling USB memory devices. This section describes how to restrict connection via the USB port of the machine and how to prohibit use of USB memory devices.

- ▶ **Restricting the USB Connection with a Computer(P. 420)**
- ▶ **Restricting the Scan to USB Function(P. 420)**
- ▶ **Restricting the USB Print Function(P. 420)**

Restricting the USB Connection with a Computer

You can disable the computer connection USB port located on the back side of the machine. If this port is disabled, the machine cannot communicate with a computer via USB. This setting does not affect the front USB port, which is for attaching USB memory devices.

<Menu> ▶ <Preferences> ▶ <External Interface> ▶ <USB Settings> ▶ Select <Off> in <Use as USB Device> ▶ <Apply> ▶ Restart the machine

Restricting the Scan to USB Function

You can disable storing scanned original data into a USB memory device.

<Menu> ▶ <Function Settings> ▶ <Store/Access Files> ▶ <Memory Media Settings> ▶ Select <Off> in <Use Scan Function> ▶ <Apply> ▶ Restart the machine

Restricting the USB Print Function

You can disable printing data from a USB memory device. The data in the USB memory device cannot be printed.

<Menu> ▶ <Function Settings> ▶ <Store/Access Files> ▶ <Memory Media Settings> ▶ Select <Off> in <Use Print Function> ▶ <Apply> ▶ Restart the machine

- ▶ **Basic Operations for Scanning Originals(P. 286)**
- ▶ **Printing from a USB Memory Device (Memory Media Print)(P. 272)**

Disabling HTTP Communication

19YU-07U

HTTP is used for communications over the network, such as when you access the machine via the Remote UI. If you are using a USB connection or are otherwise not using HTTP, you can disable HTTP to block malicious third-party intrusions via the unused HTTP port.

IMPORTANT

- Disabling HTTP disables some of the network capabilities, such as the Remote UI, WSD printing, and printing with Google Cloud Print.

<Menu> ▶ <Preferences> ▶ <Network> ▶ <TCP/IP Settings> ▶ <Use HTTP> ▶ <Off> ▶ <Yes> ▶ 

LINKS

- ▶ **Managing the Machine from a Computer (Remote UI)(P. 426)**
- ▶ **Changing Port Numbers(P. 385)**
- ▶ **Configuring Printing Protocols and WSD Functions(P. 39)**
- ▶ **Using Google Cloud Print(P. 354)**

Disabling Remote UI

19YU-07W

The Remote UI is useful because the machine settings can be specified by using a Web browser on a computer. To use the Remote UI, the machine must be connected to a computer over the network. If the machine is connected to a computer via USB, or if you do not need to use the Remote UI, you might want to disable the Remote UI to reduce the risk of having your machine controlled remotely over the network by malicious third parties.

<Menu> ▶ <Management Settings> ▶ <License/Other> ▶ <Remote UI Settings> ▶ <Remote UI>
 ▶ Select <Off> in <Use Remote UI> ▶ <Apply> ▶ Restart the machine

LINKS

- ▶ **Managing the Machine from a Computer (Remote UI)(P. 426)**
- ▶ **Disabling HTTP Communication(P. 422)**

Increasing the Security of Documents

19YU-07X

The machine is equipped with security functions designed to prevent documents from being leaked or tampered with.

Device Signature

The digital signature is added to scanned documents using a key and certificate mechanism in order to prove to the recipient that the document has been created on the machine. The recipient can verify "the device that created the document" and "whether the document has been tampered with." Before adding a device signature, you need to generate a key and certificate (device certificate) that is used for the device signature using the machine. ➤ **Generating a Device Signature Key(P. 425)**

Generating a Device Signature Key

19YU-07Y

You can generate a key and certificate for the device signature that show a document was scanned on the machine. The certificate is appended when a document is scanned and converted into a PDF file.

IMPORTANT

- Only one key and certificate for the device signature can be generated. It cannot be deleted.
- An optional Send PDF Security Feature Set is required. [▶System Options\(P. 754\)](#)

NOTE

- Key and certificate for the device signature are valid for five years. Renew them when required.
- For more information about the basic operations to be performed when setting the machine from the Remote UI, see [▶Setting Up Menu Options from Remote UI\(P. 434\)](#) .

- 1 Start the Remote UI and log in to System Manager Mode.** [▶Starting Remote UI\(P. 427\)](#)
- 2 click [Settings/Registration] on the Portal page.** [▶Remote UI Screen\(P. 428\)](#)
- 3 Select [Device Management] ▶ [Key and Certificate Settings].**
- 4 Click [Generate Key].**
- 5 Select the [Device Signature] check box, and click [OK].**

⇒ A key and certificate for the device signature is generated.

■Renewing the Device Signature Key and the Key and Certificate

- 1** Click [Update] at the right of the key and certificate for the device signature.
- 2** Click [OK].

Managing the Machine from a Computer (Remote UI)

19YU-080

Using a Web browser to operate the machine remotely, you can check the documents waiting to be printed or the status of the machine. You can also make various settings. You can do this without leaving your desk, making system management easier. For more information about the system requirements for the Remote UI, see **System Environment(P. 737)** .

Functions of the Remote UI

- ▶ **Checking the Status and Logs(P. 430)**
- ▶ **Setting Up Menu Options from Remote UI(P. 434)**
- ▶ **Registering Destinations from Remote UI(P. 437)**
- ▶ **Importing/Exporting the Setting Data(P. 441)**

Basics of the Remote UI

- ▶ **Starting Remote UI(P. 427)**

Starting Remote UI

19YU-081

To operate remotely, you need to input the IP address of the machine into a Web browser and start the Remote UI. Check the IP address set to the machine in advance ([▶Viewing Network Settings\(P. 36\)](#)). If you have any questions, ask your Network Administrator.

1 Start the Web browser.

2 Enter "http://<the IP address of the machine>/" in the address field, and press the [ENTER] key.

- If you want to use an IPv6 address, enclose the IPv6 address with brackets (example: http://[fe80::2e9e:fcff:fe4e:dbce]/).

NOTE:

If a security alert is displayed

- A security alert may be displayed when the Remote UI communication is encrypted ([▶Configuring the Key and Certificate for TLS\(P. 388\)](#)). When certificate settings or TLS settings have no errors, continue browsing the Web site.

3 Log in to the Remote UI.

■When the Department ID Management is disabled

Select [System Manager Mode] or [General User Mode], and enter a value in [Remote UI Access PIN] as necessary.

[System Manager Mode]

You can perform all the Remote UI operations and settings. Enter the appropriate ID in [System Manager ID] and PIN in [System Manager PIN]. [▶Setting the System Manager ID and PIN\(P. 362\)](#)

[General User Mode]

You can check the status of documents or the machine, and you can also change some of the settings. When you want to check if a specific document of yours is in the print queue or cancel the printing of a document of yours in the print queue, enter the user name of the document in [User Name]. The user name is automatically set to print documents based on information such as your computer name or computer login name.

[Remote UI Access PIN]

If [Remote UI Access PIN] is set, enter the PIN.  **Setting a Remote UI PIN(P. 370)**

■ When the Department ID Management is enabled

Enter the appropriate ID in [Department ID] and PIN in [PIN].  **Setting the Department ID Management(P. 364)**

4 Click [Log In].

 The Portal page (main page) will be displayed.  **Remote UI Screen(P. 428)**

Remote UI Screen

When you log into the Remote UI, the following Portal page appears. This section describes the items displayed on the Portal page and the basic operations.

The screenshot shows the 'ImageRUNNER Remote UI: Portal' page. It includes a header with 'Device Name', 'Product Name (Serial Number)', 'Location', 'Login User: 765432', and a 'Log Out' button. Below the header is a 'Remote UI: Portal' section with a 'Language' dropdown and a 'Go to System Manager' button. The main content area is divided into several sections: 'Device Basic Information' (1), 'Consumables Information' (2), and 'Support Link' (3). The 'Device Basic Information' section shows 'Device Status' (Printer, Scanner, Fax) and 'Error Information'. The 'Consumables Information' section includes 'Paper Information' (Paper Source, Paper Level, Paper Size, Paper Type) and 'Toner Cartridge Information' (Color, Toner Level). The 'Support Link' section shows a 'Support Link' button. The right sidebar contains 'Status Monitor/Cancel' (8), 'Settings/Registration' (9), and 'Address Book' (10).

1 [Device Basic Information]

Displays the current status of the machine and error information. If an error has occurred, the link to the Error Information page will be displayed.

2 [Consumables Information]

Displays paper information and the amount remaining in the toner cartridges.

3 [Support Link]

Displays the support link specified in [Support Link] under [License/Other].

4 Refresh Icon

Refreshes the currently displayed page.

5 [Language]

Selects the display language used for the Remote UI screens.

6 [Log Out]

Logs off from the Remote UI. The Login page will be displayed.

7 [Mail to System Manager]

Displays a window for creating an e-mail to the system manager specified in [System Manager Information] under [User Management].

8 [Status Monitor/Cancel]

Displays the [Status Monitor/Cancel] page. For any of the waiting documents, you can check the status/history or cancel the processing.

9 [Settings/Registration]

Displays [Settings/Registration] page. When you have logged on in System Manager Mode, you can change the settings items and save/load the registered data. ▶ **Setting Up Menu Options from Remote UI(P. 434)**

10 [Address Book]

Displays the coded dial numbers and the Favorites list registered in the Address Book. You can also register or edit the Address Book when you have logged on in System Manager Mode. ▶ **Registering Destinations from Remote UI(P. 437)**

Checking the Status and Logs

19YU-082

- ▶ Checking Current Status of Print Documents(P. 430)
- ▶ Checking History of Documents(P. 431)
- ▶ Checking Error Information(P. 431)
- ▶ Checking Consumables(P. 431)
- ▶ Checking Device Specifications(P. 432)
- ▶ Checking System Manager Information(P. 432)
- ▶ Checking Print Total Counter(P. 433)

NOTE

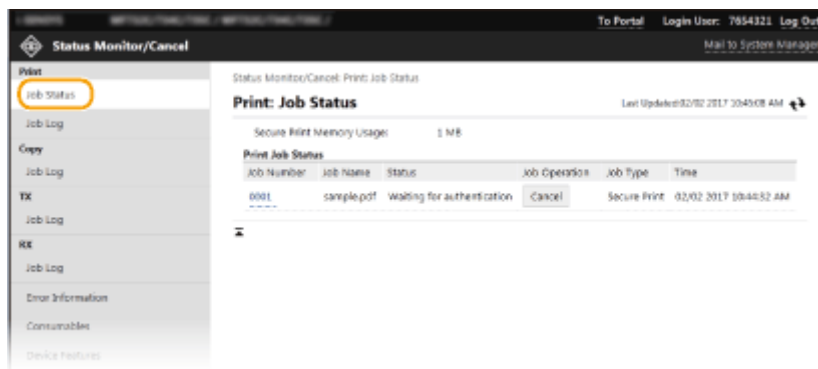

- A file name of a document may not be displayed in full. The printed application name may be added to the file name.

Checking Current Status of Print Documents

The list of the documents currently printing or waiting to be printed is displayed.

Log in to the Remote UI (▶ **Starting Remote UI(P. 427)**) ▶ [Status Monitor/Cancel] ▶ [Job Status]

- You can delete a document job by clicking [Cancel].

NOTE

- Regardless of the Department ID Management setting, all the print documents currently printing and waiting to be printed will be listed.
- If you entered your user name when you logged on in General User Mode, your user name will only be displayed on the documents that you printed.
- Click [Job Number] on the paused documents and secure documents to display detailed information. You can check the user name and the page count of the printed document.

Checking History of Documents

The history of print, copy, sending faxes/e-mails (TX), or receiving faxes (RX) is displayed.

Log in to the Remote UI ([▶ Starting Remote UI\(P. 427\)](#)) ▶ [Status Monitor/Cancel] ▶ [Job Log]

Status Monitor/Cancel

Status Monitor/Cancel: Print Job Log

Print Job Log

Last Updated: 02/02 2017 10:51:26 AM

Job Number	Result	Start Time	End Time	Job Type	File Name	User Name	Original Pages	Output
0005	OK	02/02 2017 10:49:54 AM	02/02 2017 10:50:02 AM	Printer	Microsoft Word - Document_1.docx	User01	1	1
0002	OK	02/02 2017 10:49:32 AM	02/02 2017 10:49:41 AM	Printer	Microsoft Word - Document_1.docx	User01	1	1

Checking Error Information

When an error occurs, this page will be displayed by clicking the message displayed under [Error Information] on the Portal page (main page). [▶ Remote UI Screen\(P. 428\)](#)

Log in to the Remote UI ([▶ Starting Remote UI\(P. 427\)](#)) ▶ [Status Monitor/Cancel] ▶ [Error Information]

Status Monitor/Cancel

Status Monitor/Cancel: Error Information

Error Information

Last Updated: 04/08 2016 03:09:17 AM

An error occurred.

Error Information

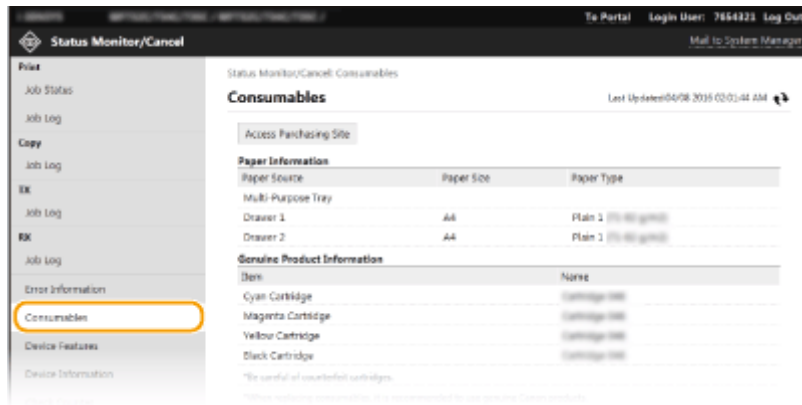

No paper.
Check the control panel, then load paper.

Checking Consumables

Paper size and paper type for the paper source, toner cartridge model number, etc. are displayed. You can also click [Check Consumables Details] in the Portal page (main page) to display this page ([▶ Remote UI Screen\(P. 428\)](#)).

Log in to the Remote UI ([▶ Starting Remote UI\(P. 427\)](#)) ▶ [Status Monitor/Cancel] ▶ [Consumables]

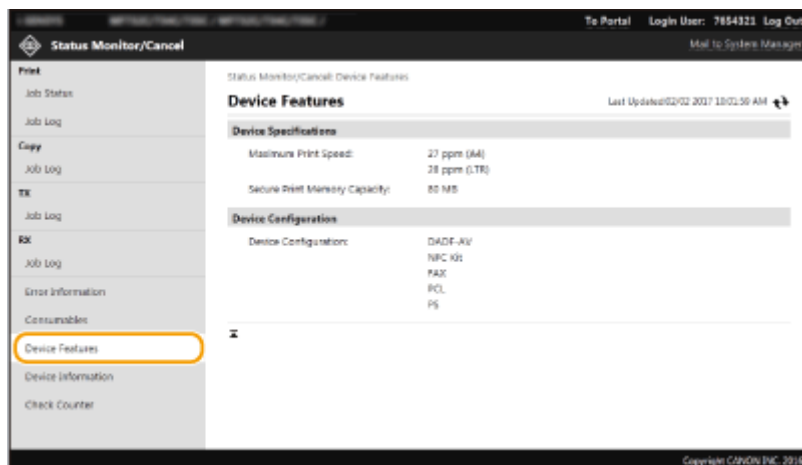

Checking Device Specifications

The maximum print speed and machine features are displayed.

Log in to the Remote UI ([▶ Starting Remote UI\(P. 427\)](#)) ▶ [Status Monitor/Cancel] ▶ [Device Features]

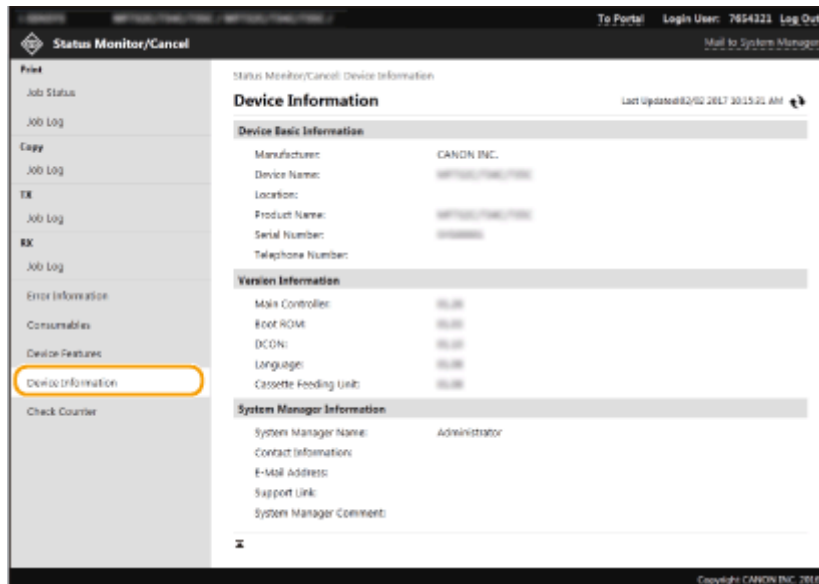

Checking System Manager Information

Information about the machine and the system manager is displayed. The device name and other system manager information displayed here correspond to the settings in [User Management] or [Device Management] on the [Settings/Registration] page.

Log in to the Remote UI ([▶ Starting Remote UI\(P. 427\)](#)) ▶ [Status Monitor/Cancel] ▶ [Device Information]

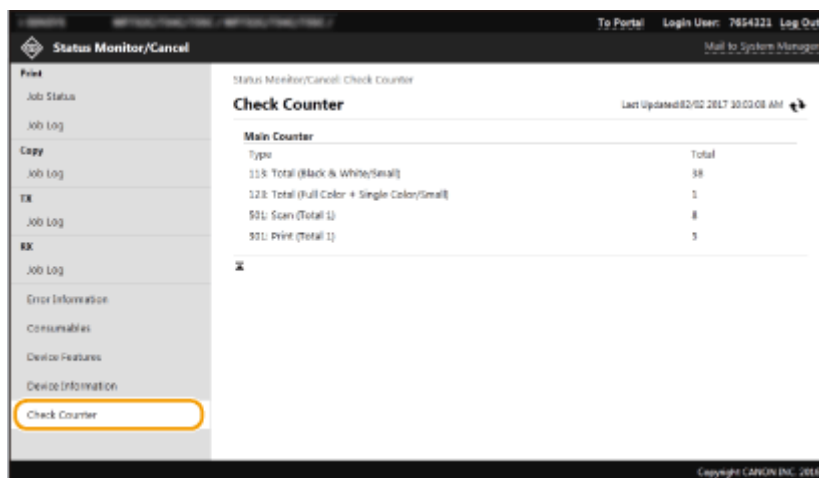

Checking Print Total Counter

The total number of pages that have been printed by the copy, print, and fax functions is displayed.

Log in to the Remote UI (▶ **Starting Remote UI(P. 427)**) ▶ [Status Monitor/Cancel] ▶ [Check Counter]

LINKS

▶ **Remote UI Screen(P. 428)**

Setting Up Menu Options from Remote UI

19YU-083

You can change the various machine settings by using the Remote UI. Most of the settings can be set also on the machine, but some settings can only be set using the Remote UI. This section describes the basic flow of changing the settings of the machine using the Remote UI.

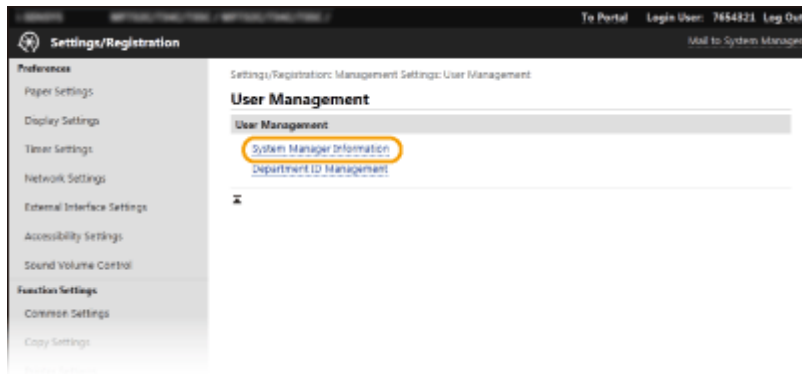

NOTE

- Some settings can only be changed when you have logged on in System Manager Mode.
- Some settings may require operations that differ from the procedure described here.

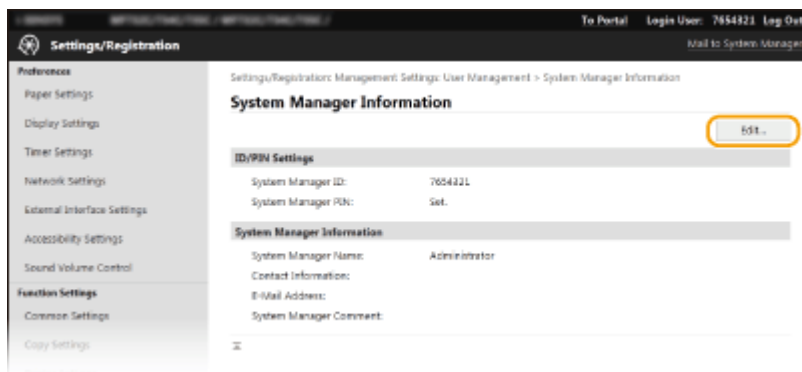

- 1 Start the Remote UI. ▶Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ▶Remote UI Screen(P. 428)**
- 3 Click the setting you want to configure in the menu on the left side of the screen.**

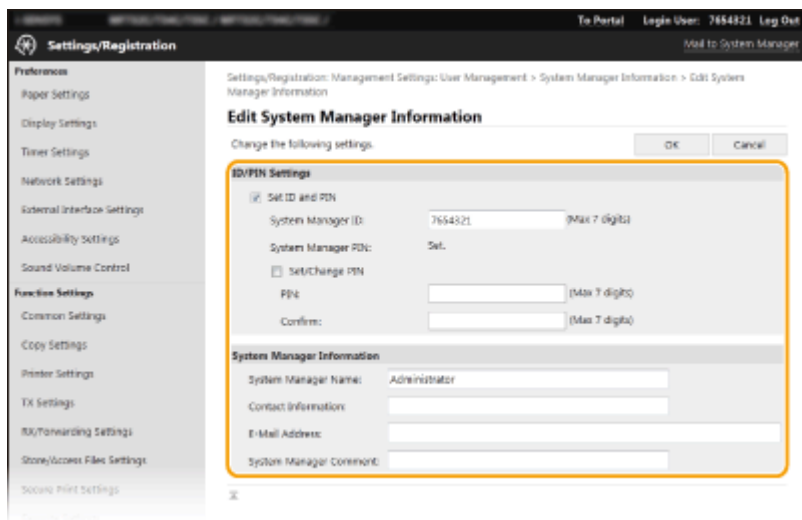

- 4 Click the link to display the desired page as necessary.**

5 Click [Edit].

6 Specify the required settings.

7 Click [OK].

8 Restart the machine as necessary.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

NOTE:

- For information about whether you need to restart the machine, view the message on the edit screen.

Registering Destinations from Remote UI

You can use the computer to register destinations in the Address Book of the machine and edit information of registered destinations. Specify the shared folder or FTP server destination here.

NOTE

- You can change the settings only when you have logged on in System Manager Mode.

1 Start the Remote UI. ▶Starting Remote UI(P. 427)

2 Click [Address Book] on the Portal page. ▶Remote UI Screen(P. 428)

NOTE:

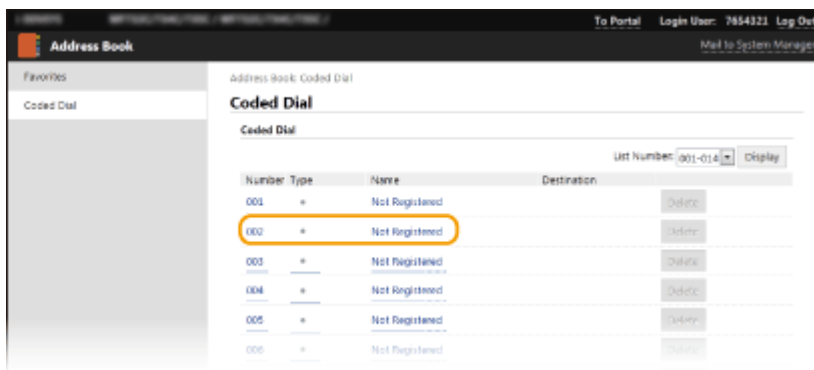

If the enter PIN page is displayed

- The Address Book is protected by a PIN. Enter the [PIN] and click [OK].

3 Click [Coded Dial].

- You can also register destinations in Favorites. In this case, click [Favorites] instead of [Coded Dial]. ▶Favorites(P. 180)

4 Click the text link under [Number], [Type], or [Name] for an item named "Not Registered."

NOTE:

- You can edit a registered item by clicking the corresponding text link under [Number], [Type] or [Name].
- You can delete a registered destination by clicking the corresponding [Delete] button.
- If you delete a destination from the Address Book, it is also deleted from the favorite settings. ▶Registering Frequently Used Settings(P. 171)

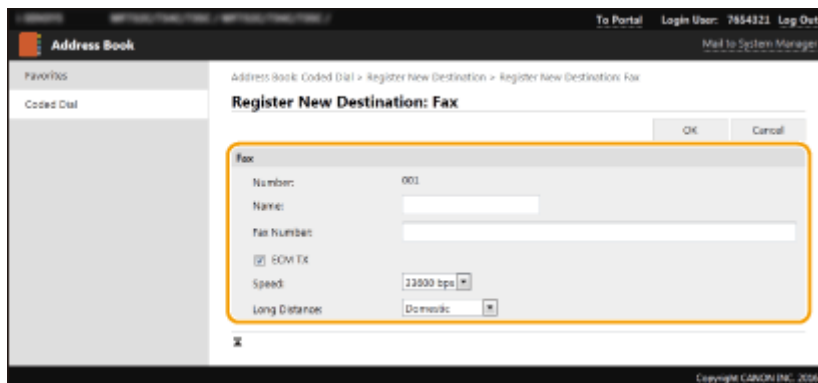

5 Select [Destination Type to Register] and click [OK].

- To register the shared folder or FTP server destination, select [File].

6 Specify the destination.

■ To register the fax destination

[Name]

Enter the name of the destination.

[Fax Number]

Enter the fax number of the destination.

[ECM TX]

Select the check box to make the following possible: if an error occurs in an image that is being sent, the error is checked and corrected to prevent an improper image from being sent.

[Speed]

If it takes time for transmissions to start, such as when there is a poor telephone connection, you can adjust the transmission start speed downward.

[Long Distance]

Specify [International (1)] to [International (3)] according to the transmission conditions when registering overseas fax numbers.

NOTE:

- You can also specify [ECM TX] and [TX Start Speed] from <Fax Settings> ( <Send>(P. 539)) on the operation panel. However, settings made from <Address Book> are enabled for the detailed settings of destinations registered in the Address Book.

■ To register the e-mail or I-Fax destination

The screenshot shows the 'Address Book' application window. On the left is a 'Favorites' sidebar with 'Coded Dial'. The main area displays the breadcrumb 'Address Book: Coded Dial > Register New Destination > Register New Destination: E-Mail'. The title is 'Register New Destination: E-Mail'. There are 'OK' and 'Cancel' buttons. The form contains:

- 'Number' field with value '001'.
- 'Name' field, highlighted with an orange border.
- 'E-Mail Address' field, also highlighted with an orange border.

 At the bottom right, it says 'Copyright CANON INC. 2016.'

[Name]

Enter the name of the destination.

[E-Mail Address]/[I-Fax Address]

Enter the e-mail address of the destination.

■ To register the shared folder or FTP server destination

The screenshot shows the 'Address Book' application window. On the left is a 'Favorites' sidebar with 'Coded Dial'. The main area displays the breadcrumb 'Address Book: Coded Dial > Register New Destination > Register New Destination: File'. The title is 'Register New Destination: File'. There are 'OK' and 'Cancel' buttons. The form contains:

- 'Number' field with value '001'.
- 'Name' field.
- 'Protocol' dropdown menu with 'Windows (SMB)' selected.
- 'Host Name' field, highlighted with an orange border.
- 'Folder Path' field, also highlighted with an orange border.
- 'User Name' field.
- 'Password' field with a 'Set Password' checkbox.

 At the bottom right, it says 'Copyright CANON INC. 2016.'

[Name]

Enter the name for the destination.

[Protocol]

Select the protocol for the destination.

[Windows (SMB)]	Select this when registering a shared folder as a destination.
[FTP]	Select this when registering an FTP server as a destination.

[Host Name]

- **For a shared folder**

Enter the computer name or IP address. You can include a path to the shared folder with the computer name or IP address (e.g. "\\swan\share" or "\\192.168.2.100\share").

- **For an FTP server**

Enter the IP address of the FTP server (e.g. "192.168.2.100").

NOTE:

Using a DNS server

- You can also enter the host name (or FQDN) instead of the computer name or IP address (e.g. for a shared folder: "\\swan.organization.company.com\share").

[Folder Path]

Enter the location of the folder to which the data will be sent.

- **For a shared folder**

Use "\" as a separator. Specify the level that follows the path specified in [Host Name].

- **For an FTP server**

Use "/" as a separator. The path is an absolute path when a "/" is placed at its top, otherwise a relative path with respect to the current directory of the user who has logged in.

[User Name]

Enter the user name set for the shared folder or FTP server.

[Set Password]

To set a password for the shared folder or FTP server, select this check box and enter a [Password].

IMPORTANT

Ensure that the same display language is selected on both the computer and the Remote UI.

- [Host Name] and [Folder Path] may not be displayed correctly or may not be referenceable.

7 Click [OK].

LINKS

- ▶ Remote UI Screen(P. 428)
- ▶ Importing/Exporting the Setting Data(P. 441)
- ▶ Address Book List(P. 630)

Importing/Exporting the Setting Data

19YU-085

Address Book and machine settings data can be saved in your computer (export). Data that is saved on your computer can also be registered in the machine (import). You can easily copy the destinations in the Address Book to multiple machines. * To use these features, it is required that you have logged on in System Manager Mode.

*Depending on the model, you cannot import the Address Book data that exported from the machine. If using the same model, you can import/export machine settings data.

▶ **Exporting the Setting Data(P. 441)**

▶ **Importing the Setting Data(P. 442)**

IMPORTANT

Do not turn OFF the machine until the import or export process is complete

- It may take a few minutes to complete the process. If the machine is turned OFF during the process, it may result in damage to data or the machine.

Do not operate the machine during the import or export process

- Before importing/exporting, check that no operation such as printing documents is currently processing.

NOTE

- For the settings that cannot be imported/exported, see ▶ **Setting Menu List(P. 449)** .
- You can also import/export settings data via a USB memory device by using the operation panel of the machine. ▶ **<Import/Export>(P. 576)**
- For more information about the basic operations to be performed when setting the machine from the Remote UI, see ▶ **Setting Up Menu Options from Remote UI(P. 434)** .

Exporting the Setting Data

You can export Address Book and machine settings data, and save them on a computer. It is recommended that you regularly back up important settings.

- 1 Start the Remote UI and log in to System Manager Mode. ▶ Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ▶ Remote UI Screen(P. 428)**
- 3 Select [Data Management] ▶ [Export].**
- 4 Select items to be exported, and specify the encryption password.**

**[Address Book]**

Select the check box to export Address Book data.

[Address Book PIN]

If the Address Book is code-protected, enter the code for the Address Book. ► **Restricting Use of the Address Book(P. 413)**

[Settings/Registration]

Select the check box to export machine settings data.

[Encryption Password]

Enter a password to encrypt the export data using alphanumeric characters. Enter the same password in [Confirm]. To export the data, you must set an encryption password.

NOTE:

- The password is required when exported data is imported. ► **Importing the Setting Data(P. 442)**

5 Click [Start Exporting].**6 Follow the on-screen instructions to specify the location where the exported setting data is saved.**

► The setting data will be saved.

Importing the Setting Data

Load (import) data that was exported from the machine. You can also import machine settings data from another machine to this machine if the models are the same. Furthermore, when applying the security policy to the machine, follow the procedure described below to specify the security policy file.

- 1 Start the Remote UI and log in to System Manager Mode. ► Starting Remote UI(P. 427)**
- 2 Click [Settings/Registration] on the Portal page. ► Remote UI Screen(P. 428)**
- 3 Select [Data Management] ► [Import].**
- 4 Specify the file and enter the password. Then, select items to be imported.**

**[File Path]**

Click [Browse] and select the file.

[Decryption Password]

Enter the password set when the settings were exported.

[Address Book]

Select the check box to import Address Book data.

IMPORTANT:

- Importing Address Book data will overwrite the Address Book entries currently registered on the machine.

[Address Book PIN]

If the Address Book is code protected, enter the code for the Address Book. ▶ **Restricting Use of the Address Book(P. 413)**

[Settings/Registration]

Select the check box to import machine settings data.

5 Click [Start Importing].**6 Click [OK].**

➡ The selected settings data is loaded into the machine.

7 Click [OK].

➡ If the [Settings/Registration] check box is selected in step 4, the machine automatically restarts.

Updating the Firmware

19YU-086

For the firmware, select the method of update depending on the installation condition of the machine. There are two methods of update: the one is to access the latest firmware version on the Internet from the machine and perform the update if the version currently installed in the machine is not the latest, and the other is to access the latest firmware version on the Internet from a computer and perform the update from the computer if the version currently installed in the machine is not the latest. In an environment where connection to the Internet cannot be established via a wireless LAN, establish connection via a wired LAN or USB and perform the update from the computer.

Installation Condition of the Machine	How to Install the Update
Wireless LAN connection	▶ Updating via the Internet(P. 444)
Wired LAN connection	▶ Updating via the Internet(P. 444) ▶ Updating from a Computer(P. 445)
USB connection	▶ Updating from a Computer(P. 445)

IMPORTANT

- If you are in an IPv6 environment, you cannot perform firmware update. Use USB to re-establish connection, and perform the update from the computer.

NOTE

Checking the firmware version

- You can check the firmware version from the operation panel of the machine. After completion of the firmware update operation, make sure that the update was performed correctly. ▶ **Checking the Firmware Version(P. 445)**

Updating via the Internet

You can access the Canon server from the machine to update the firmware to the latest version.

1 Select <Update Firmware> in the Home screen. ▶ **Home Screen(P. 116)**

- If the login screen appears, enter the correct ID and PIN. ▶ **Logging in to the Machine(P. 126)**
⇒ A check for existence of the latest firmware is performed.

NOTE:

- If the <This is the latest firmware version.> message is displayed, there is no need to update the firmware.

2 When a license screen appears, select <Accept>.

3 Select <OK>.

- ⇒ When the firmware update is complete, the machine restarts automatically.

IMPORTANT:

- Do not turn OFF the machine while the restart is in progress.

Updating from a Computer

When you have downloaded the latest firmware version from the Canon website, use "User Support Tool" utility software to update the firmware from a computer. For how to perform firmware update from a computer, see the "User Support Tool Operation Guide" included with the firmware.

To Put the Machine into a Firmware Update Waiting State

Checking the Firmware Version

1 Select <Menu> in the Home screen. ► **Home Screen(P. 116)**

2 Select <Management Settings>.

- If the login screen appears, enter the correct ID and PIN. ► **Logging in to the Machine(P. 126)**

3 Select <License/Other> ► <Update Firmware>.

4 Select <Version Information>.

⇒ The current firmware version is displayed.

Initializing Settings

19YU-087

You can restore the following settings:

- ▶ **Initializing Menu(P. 446)**
- ▶ **Initializing Key and Certificate(P. 446)**
- ▶ **Initializing Address Book(P. 447)**
- ▶ **Initializing All Data/Settings(P. 447)**

Initializing Menu

You can restore the settings of the machine (▶ **Setting Menu List(P. 449)**). Depending on the settings selected, you may need to restart the machine after initialization.

<Menu> ▶ <Management Settings> ▶ <Data Management> ▶ <Initialize Menu> ▶ Select the item you want to initialize ▶ <Yes> ▶  ▶ Restart the machine if necessary

NOTE

- You can restore the default settings only for <Network> in <Preferences>.
<Menu> ▶ <Preferences> ▶ <Network> ▶ <Initialize Network Settings> ▶ <Yes> ▶ Restart the machine

Initializing Key and Certificate

You can restore the settings of the key and certificate and the CA certificate. Note that all the keys and certificates and CA certificates that you registered in the machine (except the preinstalled keys and CA certificates) will be deleted after initializing.

NOTE

- After initializing, functions that require a key and certificate such as TLS encrypted communication and IKE of IPSec communication are not available. To use these functions, configure the settings for the key and certificate and activate the functions again.

<Menu> ▶ <Management Settings> ▶ <Data Management> ▶ <Initialize Key and Certificate> ▶ <Yes> ▶ 

Initializing Address Book

You can restore the settings of the Address Book. Note that all the information registered in the Address Book will be deleted after initializing.

<Menu> ► <Management Settings> ► <Data Management> ► <Initialize Address Book> ► <Yes> ► 

Initializing All Data/Settings

This enables restoration of all data and machine settings, including logs, to the factory default values. This prevents sensitive data from being leaked when replacing or disposing of the machine. When the initialization process finishes, the machine automatically restarts.

IMPORTANT

- Before initializing, make sure that there are no documents being processed or waiting to be processed. These documents will be deleted when initialization is performed.
- To use the machine after initializing it, you need to configure all settings from the beginning.

<Menu> ► <Management Settings> ► <Initialize All Data/Settings> ► <Yes> ► <Yes>

Setting Menu List

19YU-088

You can customize the machine based on your environment and needs by configuring settings described in this chapter. To start configuration, select <Menu> on the Home screen ( **Home Screen(P. 116)**). This section describes what each item in the setting menu can configure.

 <Preferences>(P. 450)	This section describes the display and network settings.
 <Adjustment/Maintenance>(P. 477)	This section describes how to adjust print image quality and the cleaning functions of the machine.
 <Function Settings>(P. 483)	This section describes the settings for the individual functions.
 <Set Destination>(P. 568)	This section describes the Address Book settings.
 <Management Settings>(P. 569)	This section describes the user and hardware information management, security settings, etc.

TIPS

- You can print the setting menu in list form to check the current settings:  **Printing Lists of Settings(P. 630)**

<Preferences>

19YU-089

Item	Description
▶<Display Settings>(P. 451)	This section describes the settings related to viewing of the display.
▶<English Keyboard Layout>(P. 455)	This section describes the USB keyboard settings.
▶<Timer/Energy Settings>(P. 456)	This section describes the timer settings and energy settings.
▶<Network>(P. 461)	This section describes the network settings.
▶<External Interface>(P. 475)	This section describes the USB settings and other relevant settings.
▶<Accessibility>(P. 476)	This section describes settings for improving accessibility, such as inverting the screen colors and message display time.

<Display Settings>

All the settings related to viewing of the display are listed with descriptions. Default settings are marked with a dagger (†).

NOTE

Asterisks (*)

- Settings marked with "*1" may not be displayed depending on the model you are using, options, or other setting items.
- Settings marked with "*2" cannot be imported or exported.
- Settings marked with "*3" may be unavailable or vary or have different defaults depending on your country or region.

<Time Format>

Select the 12- or 24-hour clock display setting.

<12 Hour (AM/PM)> [†]

<24 Hour>

<Menu> ► <Preferences> ► <Timer/Energy Settings> ► <Time Format> ► Select the display setting ►

<Auto Reset Time>

If a key is not pressed for a specified period of time, the screen and the settings are initialized to display the default screen (Auto Reset). Specify the interval at which the Auto Reset is performed. The Auto Reset is not performed in the following cases:

- The setting menu is displayed.
- The machine is processing data, such as when printing documents or sending or receiving faxes.
- An error message is displayed and the Error indicator is blinking (However, Auto Reset is performed when the error does not prevent the user from continuing to use a function.)

<Set This Function>

<Off>

<On>

<Set Time>

1 to 2 to 9 (min.)

<Menu> ► <Preferences> ► <Timer/Energy Settings> ► <Auto Reset Time> ► Select <On> in <Set This Function> ► Enter the time in <Set Time> ► <Apply> ►

NOTE

- The screen displayed after the Auto Reset is performed can be selected in <Function After Auto Reset>.

<Function After Auto Reset>

Select whether to return the display to the default screen after the Auto Reset is performed. If <Default Function> is selected, the main screen of the function selected in <Default Screen After Startup/Restoration> is displayed (**<Default Screen After Startup/Restoration>(P. 451)**). If <Selected Function> is selected, the display returns to the main screen of the function that was selected.

<Default Function>

<Selected Function>

<Menu> ► <Preferences> ► <Timer/Energy Settings> ► <Function After Auto Reset> ► Select <Default Function> or <Selected Function> ►

<Auto Shutdown Time>

Set a timer to automatically shut down the machine after the specified period of idle time has elapsed since the machine entered the sleep mode. This setting is available when a telephone line cable is not connected to the machine or when the machine is not communicating with the computer via USB cable or LAN Cable.

<Set This Function>
 <Off>
 <On> 
 <Set Time>
 1 to 4  to 8 (hr.)

<Menu> ► <Preferences> ► <Timer/Energy Settings> ► <Auto Shutdown Time> ► Select <On>, and set the Auto Shutdown time ► <Apply> ► 

IMPORTANT

Before setting <Auto Shutdown Time>

- When the <Auto Shutdown Time> setting is enabled, the machine may automatically shut down even if you are operating the machine from the Remote UI. A malfunction may occur, particularly if the machine shuts down while data is being imported. When you import data using the Remote UI, set <Auto Shutdown Time> to <Off> in advance.

NOTE

- If any setting of the [Timer Settings] is changed from the Remote UI while the machine is in the sleep mode, the timer for the <Auto Shutdown Time> setting is reset to the beginning. The machine automatically shuts down after the specified period of idle time has elapsed since the timer was reset.
- Specifying an auto shutdown time shorter than the default setting (4 hours) may shorten the life of the toner.

<Auto Sleep Time>

If the machine has not been operated or has had no data to process for a specified period of time, the machine enters sleep mode to save energy consumption (Auto Sleep). Specify the period of time after which auto sleep is performed. Auto Sleep is not performed when the setting menu is displayed. We recommend using the factory default settings to save the most power.  **Entering Sleep Mode(P. 177)**

1  to 60 (min.)

<Auto Sleep Daily Timer>

You can specify the time when the machine is automatically set to the sleep mode.  **Entering Sleep Mode(P. 177)**

<Set This Function>

<Off> 
 <On>
 (0:00 to 12:59) <AM>/<PM>

<Sleep Mode Exit Time Settings>

Specify the time when the machine is recovered from the sleep mode.  **Entering Sleep Mode(P. 177)**

<Set This Function>
 <Off> 
 <On>
 (0:00 to 12:59) <AM>/<PM>

<Network>

All the settings about the network are listed with short descriptions. Default settings are marked with a dagger (†).

NOTE

Asterisks (*)

- Settings marked with "*"1" cannot be imported or exported.
- Settings marked with "*"2" may not be displayed depending on the options or other setting items.

 <Register Manual Address>
 <Off> 
 <On>
 <Register Stateful Address>
 <Off> 
 <On>
 <Register Stateless Address>
 <Off> 
 <On>
 <DNS Dynamic Update Interval>
 0 to 24  to 48 (hr.)

<mDNS Settings>

Specify settings for using DNS functions without DNS servers.

```

<IPv4>
  <Use mDNS>
    <Off>
    <On> +
      <mDNS Name>

<IPv6>
  <Use mDNS>
    <Off>
    <On> +
      <Use Same mDNS Name as IPv4>
        <Off>
        <mDNS Name>
      <On> +

```

<WINS Settings>

Specify settings for Windows Internet Name Service (WINS), which provides a NetBIOS name for IP address resolutions in a mixed network environment of NetBIOS and TCP/IP. ➤ **Configuring WINS(P. 60)**

```

<WINS Resolution>
  <Off> +
  <On>
    <WINS Server Address>: 0.0.0.0

```

<LPD Settings>

Enable or disable LPD, a printing protocol that can be used on any hardware platform or operating system. You can also set the reception timeout period after which printing is canceled if print data reception is interrupted.

➤ **Configuring Printing Protocols and WSD Functions(P. 39)**

```

<Use LPD Printing>
  <Off>
  <On> +

<RX Timeout>
  1 to 5 + to 60 (min.)

```

<RAW Settings>

Enable or disable RAW, a Windows specific printing protocol. You can also set the reception timeout period after which printing is canceled if print data reception is interrupted. ➤ **Configuring Printing Protocols and WSD Functions(P. 39)**

```

<Use RAW Printing>
  <Off>
  <On> +

<RX Timeout>
  1 to 5 + to 60 (min.)

```

<WSD Settings>

Enable or disable automatic browsing and acquiring information for the printer or scanner by using the WSD protocol. **▶Configuring Printing Protocols and WSD Functions(P. 39)**

<Switch Paper Feed Method>

Specify this setting when you print a document on paper with logos. In general use, to print on paper with logos, you need to change how the paper loaded in the paper source is facing depending on whether you are performing 1- or 2-sided printing. However, if you change the setting to <Print Side Priority>, you can just load the paper with the logo side facing down for 1-sided printing in the same way as for 2-sided printing. For more information, see  **Loading Preprinted Paper(P. 148)** .

<Speed Priority> 

<Print Side Priority>

<Menu> ▶ <Function Settings> ▶ <Common> ▶ <Paper Feed Settings> ▶ <Switch Paper Feed Method> ▶ Select the paper source ▶ Select <Speed Priority> or <Print Side Priority> ▶ 

a Paper Sources

Select the paper source that you want to change the setting for.

b <Speed Priority>

When using paper that has been preprinted with a logo, you need to change how it is facing when you perform 1-sided and 2-sided printing.

NOTE:

- We recommend selecting <Speed Priority> if you do not need to consider which side to print on.

<Print Side Priority>

To print on a specific side of paper, you do not need to flip over paper in the paper source whether 1- or 2-sided printing is selected.

NOTE:

- If <Print Side Priority> is set for a paper source that is loaded with paper you cannot use for 2-sided printing ( **Available Paper(P. 718)**), <Speed Priority> is applied to the paper source instead. In this case, you need to load the paper in the same way as when <Speed Priority> is selected ( **Loading Preprinted Paper(P. 148)**).
- 1-sided printing speed may be slower when <Print Side Priority> is selected.

<Paper Output Settings> *1

Configure paper output settings.

<Output Tray Settings>

You can set the output tray for each functions independently.

- Set this function properly depending on the optional equipment attached. If the output tray that is not attached is set, a paper may not be output properly.

<Offset Jobs> *1

This enables you to shift the output for each job when multiple jobs are printed consecutively.

<Off> †

<On>

<Menu> ▶ <Function Settings> ▶ <Common> ▶ <Paper Output Settings> ▶ <Offset Jobs> ▶ Select <Off> or <On> ▶

<Scan Settings>

Configure scan settings.

<Scanner Noise Settings>

You can set whether priority is given to scanning speed or to noise reduction when the original is scanned from the feeder.

<Speed Priority> [†]
<Quiet>

<Menu> ▶ <Function Settings> ▶ <Common> ▶ <Scan Settings> ▶ <Scanner Noise Settings> ▶ Select <Speed Priority> or <Quiet> ▶ <Yes> ▶

<LTRR/STMT Original Selection>

You can forcibly designate the way the machine handles LTRR and STMT originals that are placed on the platen glass.

<Select Manually>
<Use LTRR Format> [†]
<Use STMT Format>

<Menu> ▶ <Function Settings> ▶ <Common> ▶ <Scan Settings> ▶ <LTRR/STMT Original Selection> ▶ Select <Select Manually>, <Use LTRR Format> or <Use STMT Format> ▶

<Select Manually>

When you set LTRR or STMT originals on the platen glass, the screen for specifying the size of the original appears while reading.

<Use LTRR Format>

When you set LTRR or STMT originals on the platen glass, the original is read with LTRR size while reading.

<Use STMT Format>

When you set LTRR or STMT originals on the platen glass, the original is read with STMT size while reading.

<Auto Online>

When scanning from the computer, use this to specify whether to automatically go online for remote scanning (scan standby mode) without using the operation panel.

<Off>
<On> [†]

<Menu> ▶ <Function Settings> ▶ <Common> ▶ <Scan Settings> ▶ <Auto Online> ▶ Select <Off> or <On> ▶

<Auto Offline>

If scan is not performed within a specified period of time after the screen below is displayed (the machine is set online for scanning), the machine automatically becomes offline. Specify the time period at which the machine becomes offline.

<Set This Function>

<Off>

<On> †

<Set Time>

1 to 5 † to 60 (min.)

<Menu> ▶ <Function Settings> ▶ <Common> ▶ <Scan Settings> ▶ <Auto Offline> ▶ Select <On> in <Set This Function> ▶ Enter the time in <Set Time> ▶ <Apply> ▶

<Generate File>

Configure file generation settings.

<Output File Image Settings>

Specify settings for the gamma value for converting scanned originals into files.

<YCbCr TX Gamma Value>

Select the gamma value used when converting scanned color originals into the specified file format. You can specify the same gamma value as that of the monitor which is to be used for viewing the converted files. The files are displayed with brightness that is true to the original documents.

<Gamma 1.0>

<Gamma 1.4>

<Gamma 1.8> †

<Gamma 2.2>

<Menu> ▶ <Function Settings> ▶ <Common> ▶ <Generate File> ▶ <Output File Image Settings> ▶ <YCbCr TX Gamma Value> ▶ Select the gamma value ▶

NOTE:

- For the gamma value of a monitor display, see the instruction manual included with the display.

<OCR (Text Searchable) Settings>

To run OCR (Optical Character Recognition) on a text original to create a "searchable PDF," specify whether the machine determines the original's text direction and detects the original direction.

<Smart Scan>

<Off>

<On> [†]

<Menu> ▶ <Function Settings> ▶ <Common> ▶ <Generate File> ▶ <OCR (Text Searchable) Settings> ▶ Select <Off> or <On> in <Smart Scan> ▶ <Apply> ▶

<256-bit AES Settings for Encrypted PDF> *1

When generating an encrypted PDF, the PDF encryption level can be set to "128-bit" or "256-bit." If "256-bit" is selected, the version compatible with Acrobat can be changed.

<Acrobat 9.0 or Equivalent>

<Acrobat 10.0 or Equivalent> [†]

<Menu> ▶ <Function Settings> ▶ <Common> ▶ <Generate File> ▶ <256-bit AES Settings for Encrypted PDF> ▶ Select <Acrobat 9.0 or Equivalent> or <Acrobat 10.0 or Equivalent> ▶

<Fax Setup Guide> *1*2

Select to display on-screen instructions for specifying settings, including the fax number and the RX mode.

Configuring Initial Settings for Fax Functions(P. 77)

<Auto Collate> *

If you set this setting to <On>, finishing mode is switched between <Collate (Page Order)> and <Offset> automatically. This prevents you from forgetting to collate the output when making multiple copies.

<Off>

<On> 

<Menu> ▶ <Function Settings> ▶ <Copy> ▶ <Auto Collate> ▶ Select <Off> or <On> ▶ 

NOTE

- If the setting for <Copy> ▶ <Other Settings> ▶ <Finishing> is other than <Off> from the Home screen, the setting for this item becomes disabled.
- As the offset function is performed, the output destination will be <Tray A> regardless of the setting for  **<Output Tray Settings>(P. 487)** .

<Auto Recognize Original Orientation>

If you set this setting to <On>, even if the orientations of your original and the paper set in the multi-purpose tray or paper drawer differ, the image of the original is rotated 90 degrees automatically according to the orientation of the paper when printing copies.

<Off>

<On> 

<Menu> ▶ <Function Settings> ▶ <Copy> ▶ <Auto Recog. Orig. Orientation> ▶ Select <Off> or <On> ▶ 

NOTE

- If you are enlarging A4 or A5 originals onto A3 copy paper, Auto Orientation is not performed even if it is set to <On>.
- Only the images of standard size originals up to A4 size can be rotated when the copy ratio is set to 100%.

<Printer>

All the settings about the printer are listed with short descriptions. Default settings are marked with a dagger (†).

NOTE

Asterisks (*)

- Settings marked with "*"1" may not be displayed depending on the model you are using, options, or other setting items.
- Settings marked with "*"2" cannot be imported or exported.

Priority of settings

- If a print setting is specified both from the printer driver and the operation panel of the machine, the specification from the printer driver overrides that from the operation panel. The specification from the operation panel becomes effective in some specific cases, such as when performing PS/PCL printing and printing from UNIX or other operating system that does not support printer drivers.

◀<Printer Settings>(P. 497)

◀<PDL Selection (Plug and Play)>(P. 537)

<Printer Settings>

Configure settings about printing and printer operations.

<Copies>

Set the number of copies to print.

1 † to 999

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Copies> ▶ Set the number of copies to print ▶ <Apply> ▶

<2-Sided Printing>

Select whether to make 2-sided printouts.

<Off> †
<On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <2-Sided Printing> ▶ Select
<Off> or <On> ▶

<Default Paper>

Use this item to specify the paper size and type. **Available Paper(P. 718)**

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Default Paper> ▶ Select the
paper size ▶ Select the paper type ▶

<Paper Size Override>

Select whether to switch between printing on A4 and LTR size paper if one of these paper sizes is loaded but the other is not. When you select <On>, if you specify A4 size paper to print from the computer but A4 size paper is not loaded in the machine, it will print your document on Letter size paper.

<Off>
<On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Paper Size Override> ▶ Select
<Off> or <On> ▶

NOTE

- You can specify print settings, such as the number of copies or 1-sided/2-sided printing, from an application or the printer driver. However, the <Paper Size Override> setting can only be specified on the machine.

<Print Quality>

You can change settings related to print quality.

<Density> *1

Adjust the toner density.

Yellow/Magenta/Cyan/Black

17 Levels

<Fine Adjust>

<Yellow>/<Magenta>/<Cyan>/<Black>

<High>/<Medium>/<Low>

17 Levels

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Density> ▶ Adjust the density of each color ▶ <Apply> ▶

NOTE

- You can use <Fine Adjust> to adjust the toner density of each color to three density levels: high density, medium density, and low density.

NOTE:

- When <Toner Save> is set to <On>, you cannot set this item.

<Toner Save>

You can save toner consumption. Select <On> when you want to check the layout or other appearance characteristics before proceeding to final printing of a large job.

<Off>

<On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Toner Save> ▶ Select <Off> or <On> ▶

<Gradation>

Specify the processing method used to reproduce gradation. To obtain quality higher than <High 1>, set to <High 2>.

<High 1>

<High 2>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Gradation> ▶ Select <High 1> or <High 2> ▶

NOTE:

- This setting is only available when <Resolution> is set to <600 dpi>.

<Resolution>

Specify the resolution to be used for print data processing.

<1200 dpi>

<600 dpi>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Resolution> ▶ Select <1200 dpi> or <600 dpi> ▶

<Special Smoothing Mode>

Specify the mode to print data with a smooth finish. If the quality of the printout is not acceptable in <Mode 1> (default), try another mode.

<Mode 1>
 <Mode 2>
 <Mode 3>
 <Mode 4>
 <Mode 5>
 <Mode 6>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Special Smoothing Mode> ▶ Select a mode ▶

<Mode 1>

Prints an outline of dark text or a figure with a smooth finish. This is the optimal mode for various types of printing.

<Mode 2>

Prints figure outline and internal halftones with a smooth finish.

<Mode 3>

Prints dark text or lines on an area with a colored background with a smooth finish.

<Mode 4>

Prints an image such as a photo or an outline of a figure or text with a smooth finish.

<Mode 5>

Prints an image and halftones with an even balance.

<Mode 6>

Prints the entire image with a smooth finish.

NOTE:

- When <Error Diffusion> is set to <On> in <Halftones>, printing in modes other than <Mode 5> all produces the same results.
- This setting is only available when <Resolution> is set to <600 dpi>.

<Toner Volume Correction>

When the toner volume for text or lines exceeds the limit value of the machine, make a correction so that the toner volume does not exceed the limit value.

<Standard> [†]
 <Gradation Priority>
 <Text Priority>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Toner Volume Correction> ▶ Select an item ▶

<Standard>

Adjusts the toner supply amount so that proper resolution is ensured for text and lines, and that proper color tone is ensured for other types of print data.

<Gradation Priority>

Adjusts the toner supply amount so that proper color tone is ensured for all types of print data.

<Text Priority>

Adjusts the toner supply amount so that proper resolution is ensured for all types of print data.

<Line Control>

Specify the processing method used to reproduce lines.

<Resolution Priority> [†]
 <Gradation Priority>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Line Control> ▶ Select <Resolution Priority> or <Gradation Priority> ▶

<Resolution Priority>

Draws lines with the same resolution as for text.

<Gradation Priority>

Draws lines while maintaining color and gradation.

<Width Adjustment>

Configure a setting to print text or fine lines in bold.

<Off> 
 <On>
 <Text>
 <Line>
 <Text and Line> 

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Width Adjustment> ▶ <On> ▶ Select the target 

NOTE:

- If you set to <On>, the printing speed may be slower or image quality may be affected.
- Even if you set to <On>, bold printing may not be possible depending on the printing application.

<Advanced Smoothing>

Configure the smoothing setting to print the outline of graphics (e.g., illustrations created using applications) or text with a smooth finish.

<Advanced Smoothing>

Select whether to perform smoothing processing. <Level 2> prints an outline with a smoother finish than <Level 1>. First try with <Level 1>

<Off>
 <Level 1> 
 <Level 2>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Advanced Smoothing> ▶ <Advanced Smoothing> ▶ Select an item 

<Apply to Graphics> *1

Specify whether to apply smoothing processing to graphics when <Advanced Smoothing> is set to <Level 1> or <Level 2>.

<Off> 
 <On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Advanced Smoothing> ▶ <Apply to Graphics> ▶ Select <Off> or <On> 

<Apply to Text> *1

Specify whether to apply smoothing processing to the text when <Advanced Smoothing> is set to <Level 1> or <Level 2>.

<Off>
<On> 

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Advanced Smoothing> ▶ <Apply to Text> ▶ Select <Off> or <On> ▶ 

NOTE:

- The settings of <Apply to Graphics> and <Apply to Text> are only effective when [Advanced Smoothing] is set to [Printer Default] in the printer driver.

<Gradation Smoothing>

Configure the smoothing setting to print the gradation (color density) of graphics (e.g., illustrations created using applications) or bit map images with a smooth finish.

<Gradation Smoothing>

Select whether to perform smoothing processing. <Level 2> prints an outline with a smoother finish than <Level 1>. First try with <Level 1>.

<Off> 
<Level 1>
<Level 2>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Gradation Smoothing> ▶ <Gradation Smoothing> ▶ Select an item ▶ 

<Apply to Graphics> *1

Specify whether to apply smoothing processing to graphics when <Gradation Smoothing> is set to <Level 1> or <Level 2>.

<Off>
<On> 

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Gradation Smoothing> ▶ <Apply to Graphics> ▶ Select <Off> or <On> ▶ 

<Apply to Images> *1

Specify whether to apply smoothing processing to images when <Gradation Smoothing> is set to <Level 1> or <Level 2>.

<Off>
<On> 

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Print Quality> ▶ <Gradation Smoothing> ▶ <Apply to Images> ▶ Select <Off> or <On> ▶

NOTE:

- [Gradation Smoothing] in the printer driver applies only to graphics data. The setting configured here applies to smoothing processing for image data.

<Layout>

Specify the page layout settings such as binding position and margin values.

<Binding Location>

If you are binding the printouts with a binding tool such as a stapler, use this item to specify whether to bind on the long or short edge. Specify the setting of this item in combination with <Gutter>, which specifies the binding margin to apply to the binding position.

<Long Edge>
<Short Edge>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Layout> ▶ <Binding Location> ▶ Select <Long Edge> or <Short Edge> ▶

<Long Edge>

Specify this to bind on the long edge of paper.

<Short Edge>

Specify this to bind on the short edge of paper.

<Gutter>

Shift the print position to adjust the binding margin to apply to the binding edge specified by <Binding Location>. The value "00.0" exerts no effect on the binding margin.

-50.0 to 00.0 to +50.0 (mm)

a Entering the setting value

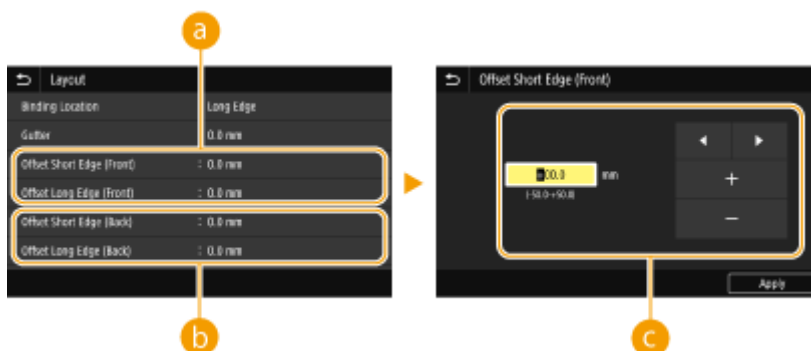

Specify the print position shift direction and shift width. Whether the setting value is a "+" or "-" value determines the binding edge along which to adjust the binding margin. The margin width can be adjusted in 0.5 mm increments. ▶ **Basic Operation(P. 121)**

Setting Value	Long Edge	Short Edge
A value with a "+" sign	Left edge of paper 	Top edge of paper
A value with a "-" sign	Right edge of paper 	Bottom edge of paper

<Offset Short Edge/Offset Long Edge>

Irrespective of the paper source, you can shift the print position in units of "0.5 mm" for all print jobs.

-50.0 to 00.0 + to +50.0 (mm)

a <Offset Short Edge (Front)>/<Offset Long Edge (Front)>

Shifts the print position on the side of paper facing up.

b <Offset Short Edge (Back)>/<Offset Long Edge (Back)>

Shifts the print position on the side of paper facing down.

c Entering the setting value

For <Offset Short Edge (Front)>/<Offset Short Edge (Back)>, specify a value with a "+" sign to shift the print position in the left-to-right direction. For <Offset Long Edge (Front)>/<Offset Long Edge (Back)>, specify a value with a "+" sign to shift the print position in the up-to-down direction. To shift in the reverse direction, specify a value with a "-" sign.  **Basic Operation(P. 121)**

<Offset Short Edge (Front)>

<Offset Short Edge (Back)>

"-" direction ← "—" direction

<Offset Long Edge (Front)>

<Offset Long Edge (Back)>

"-" direction ↑

"+" direction ↓

**<Auto Skip Error>**

Printing stops if a certain error occurs in the process. However, if you set this item to <On>, the certain error will be skipped and printing can continue. Normally, set this item to <Off>.

<Off> 
<On>

<Menu> ► <Function Settings> ► <Printer> ► <Printer Settings> ► <Auto Skip Error> ► Select
<Off> or <On> ► 

<Timeout>

Set the time period after which the current print job is automatically canceled in the case of a print data reception interruption.

5 to 15  to 300 (sec.)

<Menu> ► <Function Settings> ► <Printer> ► <Printer Settings> ► <Timeout> ► Set the time
period ► <Apply> ► 

<Personality>

Specify the mode in which the machine should operate when the format of document data is unknown.

<Auto> [†]
 <PS>*1
 <PCL>
 <PDF>
 <XPS>
 <Imaging>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Personality> ▶ Select the Personality mode ▶

<Color Mode>

Select whether to print data in color or black and white.

<Auto (Color/B&W)> [†]
 <Black & White>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Color Mode> ▶ Select <Auto (Color/B&W)> or <Black & White> ▶

<Compressed Image Output>

Specify the operation that is to be performed when the image quality has degraded due to insufficient memory during printing.

<Output> [†]
 <Display Error>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <Compressed Image Output> ▶ Select <Output> or <Display Error> ▶

<Output>

Continues printing regardless of how much the image quality has degraded.

<Display Error>

If the image quality has degraded significantly, an error message is displayed, and printing is stopped.

<UFR II>

You can change the settings that become effective when printing from the UFR II printer driver.

<Halftones>

You can select the printing method used to reproduce halftones (the intermediate range between the lighter and darker areas of an image) for optimal image quality.

<Error Diffusion>

Produces finer printing results than using <Resolution/Gradation>. This option is suitable for printing sharp outlines of the text or fine-line data.

<Off>  <On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <UFR II> ▶ <Halftones>
 ▶ <Error Diffusion> ▶ Select <Off> or <On> ▶ 

NOTE:

- This setting is only available when <Resolution> is set to <600 dpi>.

<Resolution/Gradation> *1

Select a method used to reproduce halftones, if <Error Diffusion> is set to <Off>. This option can be specified for each image type in any one document.

<Text> <Resolution>  <Gradation>
<Graphics> <Resolution> <Gradation> 
<Image> <Resolution> <Gradation> 

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <UFR II> ▶ <Halftones> ▶ <Resolution/Gradation> ▶ Select an image type ▶ Select <Resolution> or <Gradation> ▶ 

a Type of image

Select the object for which to change the setting. <Text> represents letters and characters, <Graphics> represents lines and figures, and <Image> represents photos and images.

b Setting value

<Resolution>

Produces a fine print with clear edges of text. It is suitable for printing characters and fine lines.

<Gradation>

Produces a print with smooth gradation or smooth edges. It is suitable for printing figures or graphs containing gradation areas.

<Matching Method>

Specify the processing method used to correct the color.

<General> †
 <Perceptual>
 <Colorimetric>
 <Vivid Photo>

<General>

Performs processing so that the color tone is suitable for printing general papers such as photos or documents.

<Perceptual>

Performs processing so that the color tone is suitable for printing bitmap images. When this item is selected, an image is printed in the colors closest to those displayed on the monitor.

<Colorimetric>

Minimizes a color variance that occurs when RGB data is converted to CMYK data.

<Vivid Photo>

Performs processing so that the color tone is deeper and more vivid than <General>.

<Gray Compensation>

Configures a setting so that black or gray data of which color information is "R = G = B" is printed using only the K (black) toner. If <Off> is selected, data is printed using the toner of four colors: CMYK. This option can be specified for each image type in any one document.

<Append CR to LF>

Select whether to append a carriage return (CR) when the machine receives a line feed code (LF). If <Yes> is selected, the print position moves to the beginning of the next line when the machine receives an LF code. If <No> is selected, the print position moves to the next line, just under the received LF code.

<Yes>

<No> †

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PCL> ▶ <Append CR to LF> ▶ Select <Yes> or <No> ▶

<Enlarge A4 Print Width>

Select whether to expand the width of the printable area of A4 size paper in portrait orientation to that of LTR size.

<Off> †

<On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PCL> ▶ <Enlarge A4 Print Width> ▶ Select <Off> or <On> ▶

<Halftones>

You can select the printing method used to reproduce halftones (the intermediate range between the lighter and darker areas of an image) for optimal image quality.

<Error Diffusion>

Produces finer printing results than using <Resolution/Gradation>. This option is suitable for printing sharp outlines of the text or fine-line data.

<Off> †

<On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PCL> ▶ <Halftones> ▶ <Error Diffusion> ▶ Select <Off> or <On> ▶

NOTE:

- This setting is only available when <Resolution> is set to <600 dpi>.

<Resolution/Gradation> *1

Select a method used to reproduce halftones, if <Error Diffusion> is set to <Off>. This option can be specified for each image type in any one document.

<Text>	
<Resolution>	†
<Gradation>	
<Graphics>	
<Resolution>	
<Gradation>	†
<Image>	
<Resolution>	
<Gradation>	†

**a Type of image**

Select the object for which to change the setting. <Text> represents letters and characters, <Graphics> represents lines and figures, and <Image> represents photos and images.

b Setting value**<Resolution>**

Produces a fine print with clear edges of text. It is suitable for printing characters and fine lines.

<Gradation>

Produces a print with smooth gradation or smooth edges. It is suitable for printing figures or graphs containing gradation areas.

<Matching Method>

Specify the processing method used to correct the color.

<General>	†
<Perceptual>	
<Colorimetric>	
<Vivid Photo>	

<General>

Performs processing so that the color tone is suitable for printing general papers such as photos or documents.

<Perceptual>

Performs processing so that the color tone is suitable for printing bitmap images. When this item is selected, an image is printed in the colors closest to those displayed on the monitor.

<Colorimetric>

Minimizes a color variance that occurs when RGB data is converted to CMYK data.

<Vivid Photo>

Performs processing so that the color tone is deeper and more vivid than <General>.

<Gray Compensation>

Configures a setting so that black or gray data of which color information is "R = G = B" is printed using only the K (black) toner. If <Off> is selected, data is printed using the toner of four colors: CMYK. This option can be specified for each image type in any one document.

<Text> <Off> <On>
<Graphics> <Off> <On>
<Image> <Off> <On>

<BarDIMM> *1

This setting enables you to print bar codes supported by the Barcode Printing Kit. If <Enable> is selected, the machine will generate bar codes when it receives bar code commands from the host computer. If <Disable> is selected, bar codes will not be generated, even if bar code commands are sent from the host computer.

<Disable>

<Enable>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PCL> ▶ <BarDIMM> ▶ Select
<Enable> or <Disable> ▶

IMPORTANT

- To enable the BarDIMM menu, it is necessary to activate the Barcode Printing Kit. When you are not printing bar codes, make sure to disable the BarDIMM menu. Otherwise, the processing speed of regular print jobs may be reduced.

NOTE

- The default setting is <Disable>. If you activate the Barcode Printing Kit, it changes to <Enable>.

<FreeScape>

Specify the AEC (Alternate Escape Code) to be used for bar code commands when the host computer does not support the standard Escape Code.

<Off>
 <~> †
 <">
 <#>
 <\$>
 </>
 <\>
 <?>
 <{>
 <}>
 <|>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PCL> ▶ <FreeScape> ▶ Select
an escape code ▶

NOTE

- This setting is available only when <BarDIMM> is enabled.

<PS> *1

Specify the PS printing settings such as page layout and print quality.

<Job Timeout>

This setting enables you to specify the amount of time before a job times out. If a job has not finished within the set time limit, the job automatically cancels.

0  to 3600 (sec.)

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <Job Timeout>
▶ Specify the seconds for job timeout ▶ <Apply> ▶ 

<Print PS Errors>

This setting determines whether an error page is printed when an error is encountered.

<Off> 
<On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <Print PS Errors>
▶ Select <Off> or <On> ▶ 

<Pure Black Text>

Configures a setting so that black text of which color information is "R = G = B = 0%," "C = M = Y = 100%," or "C = M = Y = 0%/K = 100%" is printed using only the K (black) toner. When <Off> is selected, text is printed based on the <Output Profile> setting.

<Off>
<On> 

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <Pure Black Text>
▶ Select <Off> or <On> ▶ 

<Black Overprint> *1

Specify the printing method used when black text overlaps a colored background or figure. This option is not displayed when <Pure Black Text> is set to <Off>.

<Off>
<On> 

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <Black Overprint>
▶ Select <Off> or <On> ▶ 

**<Off>**

Outlines black text from a colored background or figure first, then prints black text in the outlined part. Printouts may be faded much more than <On>, or text may be outlined.

**<On>**

Prints all the colored backgrounds and figures, and overlaps black text on these backgrounds and figures using only the black (K) toner, then prints.

**<RGB Source Profile>**

Select a profile for RGB data according to the monitor you are using.

<sRGB> †

<Gamma 1.5>

<Gamma 1.8>

<Gamma 2.4>

<None>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <RGB Source Profile>
 ▶ Select a profile ▶ 🏠

**<sRGB>**

Sets the image quality to the industry standard for general Windows computer monitors. If the monitor supports sRGB, data can be printed in the color tones closest to the displayed colors.

<Gamma 1.5> to <Gamma 2.4>

Adjusts the brightness of the print result to prevent the image quality of the brightest and darkest parts from being degraded. The greater the gamma value is, the darker the printed text or image becomes.

<None>

Carries out color separation from RGB data to CMYK data without applying an RGB source profile.

<CMYK Simulation Profile>

Select a simulation target to print the CMYK data. The machine converts CMYK data into a device dependent CMYK color model based on the simulation.

<JapanColor(Canon)>
 <U.S. Web Coated v1.00(Canon)>
 <Euro Standard v1.00(Canon)>
 <None> 

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <CMYK Simulation Profile> ▶ Select a profile ▶ 

**<JapanColor(Canon)>**

Set a JapanColor profile. Data is printed in the color tones closest to those of the Japanese printing standard.

<U.S. Web Coated v1.00(Canon)>

Set a U.S. Web Coated profile. Data is printed in the color tones closest to those of the U.S. printing standard.

<Euro Standard v1.00(Canon)>

Set a Euro Standard profile. Data is printed in the color tones closest to those of the European printing standard.

<None>

Prints CMYK data by using a device-dependent CMYK color model without applying the CMYK simulation profile.

NOTE:

- When <None> is selected, the dark color gradation may become uneven depending on data.

<Use Grayscale Profile>

Specify whether to convert gray data to CMYK data using the grayscale profile of the machine.

<Off> 
 <On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <Use Grayscale Profile> ▶ Select <Off> or <On> ▶ 

NOTE:

- Even if <On> is selected, data is printed using only the K (black) toner depending on the setting of <Output Profile> or <Pure Black Text>.

<Output Profile>

Select the appropriate profile for the print data. This option can be specified for each image type in any one document.

<Text> <Normal> <Photo> <TR Normal> <TR Photo> †
<Graphics> <Normal> <Photo> <TR Normal> <TR Photo> †
<Image> <Normal> <Photo> <TR Normal> <TR Photo> †

a Image type

Select a target you want to change a setting for. Text is targeted for <Text>, a line or figure for <Graphics>, and an image such as a photo for <Image>.

b Profile

<Normal>

Prints data by adjusting it to the color tones closest to those displayed on the monitor.

<Photo>

Prints data by adjusting it to photo-like color tones.

<TR Normal>

Prints data by adjusting it to the color tones closest to those displayed on the monitor and using only the K (black) toner to reproduce black and gray elements.

<TR Photo>

Prints data by adjusting it to photo-like color tones and using only the K (black) toner to reproduce black and gray elements.

NOTE:

The setting of this item is unavailable when one of the following settings is selected.

- <RGB Source Profile> is set to <None>
- <CMYK Simulation Profile> is set to <None>
- <Use Grayscale Profile> is set to <Off>

<Matching Method>

Select the element to be prioritized when carrying out color matching in <RGB Source Profile>.

<Perceptual> [†]
 <Saturation>
 <Colorimetric>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <Matching Method>
 ▶ Select an item ▶

**<Perceptual>**

Provides the color tone that is suitable for printing photos or bit map images.

<Saturation>

Provides the color tone that is suitable for printing artworks, graphs, and other images used for presentation materials.

<Colorimetric>

Set this option when you want to reproduce the RGB color value in the color reproduction range of the machine as accurately as possible.

NOTE:

- The setting of this item is unavailable when <RGB Source Profile> is set to <None>.

<Halftones>

You can select the printing method used to reproduce halftones (the intermediate range between the lighter and darker areas of an image) for optimal image quality.

<Error Diffusion>

Produces finer printing results than using <Resolution/Gradation>. This option is suitable for printing sharp outlines of the text or fine-line data.

<Off> [†]
 <On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <Halftones> ▶ <Error Diffusion> ▶ Select <Off> or <On> ▶

NOTE:

- This setting is only available when <Resolution> is set to <600 dpi>.

<Resolution/Gradation> *1

Select a method used to reproduce halftones, if <Error Diffusion> is set to <Off>. This option can be specified for each image type in any one document.

<Text>	
<Resolution>	†
<Gradation>	
<Graphics>	
<Resolution>	
<Gradation>	†
<Image>	
<Resolution>	
<Gradation>	†

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <Halftones> ▶ <Resolution/Gradation> ▶ Select an image type ▶ Select <Resolution> or <Gradation> ▶

a Type of image

Select the object for which to change the setting. <Text> represents letters and characters, <Graphics> represents lines and figures, and <Image> represents photos and images.

b Setting value

<Resolution>

Produces a fine print with clear edges of text. It is suitable for printing characters and fine lines.

<Gradation>

Produces a print with smooth gradation or smooth edges. It is suitable for printing figures or graphs containing gradation areas.

<Brightness> *1

Adjust the brightness of the entire image in increments of 5 %. The lower the setting value is, the brighter the image or text becomes. The greater the setting value is, the darker the image or text becomes.

85 to 100 [†] to 115 (%)

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <Brightness> ▶ Adjust the brightness ▶ <Apply> ▶

<Composite Overprint>

Specify the way of printing color data in black and white.

<Off> [†]
<On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <Composite Overprint> ▶ Select <Off> or <On> ▶

NOTE:

- Overprinting using special colors is not permitted.

<Grayscale Conversion> *1

You can select ways to convert color values to a grayscale value when you print color print data.

<sRGB>
<NTSC> [†]
<Uniform RGB>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PS> ▶ <Grayscale Conversion> ▶ Specify the grayscale conversion ▶

**<sRGB>**

Prints in black and white with emphasis on color differences so that a smooth gradation is achieved.

<NTSC>

Prints in black and white so that the resulting image looks like a black and white television picture (of the NTSC system).

<Uniform RGB>

Prints in black and white so that R, G, and B are uniformly converted to the same gray level by using only brightness as the reference.

NOTE

- This section describes the settings to convert the color data into grayscale data.
- This setting is invalid for black-and-white data.

<Imaging Settings>

You can change the print settings that will apply when printing image files (JPEG/TIFF).

<Halftones>

You can change the printing method used to reproduce halftones (the intermediate range between the lighter and darker areas of an image) for optimal image quality.

<Gradation> ↑
<Error Diffusion>

<Gradation>

Prints images with fine gradation, such as digital camera images, with a smooth finish.

<Error Diffusion>

Prints images with small text or fine lines with a clear finish.

<PDF>

You can change settings for PDF files.

<Enlarge/Reduce to Fit Paper Size>

Specify whether to enlarge or reduce the original according to the print range of paper. Note that size enlargement/reduction will not affect the aspect ratio of the original.

<Off> ↑
<On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PDF> ▶ <Enlarge/Reduce to Fit Paper Size> ▶ Select <Off> or <On> ▶

<Enlarge Print Area>

Specify whether to extend the print range to the paper size.

<Off>
<On>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PDF> ▶ <Enlarge Print Area> ▶ Select <Off> or <On> ▶

NOTE:

- If you specify <On>, it may occur that edge-adjacent portions of page are not printed or that printouts come out partially smudged depending on the original.

<N on 1>

Specify whether to shrink multiple pages and print them on one page in such arrangement that the first page is positioned at top left. For example, to print 4 pages onto a single sheet, select <4 on 1>.

<Off>
<2 on 1>
<4 on 1>
<6 on 1>
<8 on 1>
<9 on 1>
<16 on 1>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PDF> ▶ <N on 1> ▶ Select the number of pages to be combined ▶

<Print Comments>

Specify whether to print comments. If you specify <Auto>, comments in PDF files will be printed.

<Off>
<Auto>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PDF> ▶ <Print Comments> ▶ Select <Auto> or <Off> ▶

<Pure Black Text>

Configures a setting so that black text of which color information is "R = G = B = 0%," "C = M = Y = 100%," or "C = M = Y = 100%" is printed using only the K (black) toner. When <Off> is selected, text is printed based on the <Output Profile> setting.

<Off>
<On> 

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PDF> ▶ <Pure Black Text>
▶ Select <Off> or <On> ▶ 

<Black Overprint> *1

Specify the printing method used when black text overlaps a colored background or figure. This option is not displayed when <Pure Black Text> is set to <Off>.

<Off>
<On> 

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PDF> ▶ <Black Overprint>
▶ Select <Off> or <On> ▶ 

**<Off>**

Outlines black text from a colored background or figure first, then prints black text in the outlined part. Printouts may be faded much more than <On>, or text may be outlined.

**<On>**

Prints all the colored backgrounds and figures, and overlaps black text on these backgrounds and figures using only the black (K) toner, then prints.

**<RGB Source Profile>**

Select a profile for RGB data according to the monitor you are using.

<sRGB> 
 <Gamma 1.5>
 <Gamma 1.8>
 <Gamma 2.4>
 <None>

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PDF> ▶ <RGB Source Profile>
 ▶ Select a profile ▶ 

<sRGB>

Sets the image quality to the industry standard for general Windows computer monitors. If the monitor supports sRGB, data can be printed in the color tones closest to the displayed colors.

<Gamma 1.5> to <Gamma 2.4>

Adjusts the brightness of the print result to prevent the image quality of the brightest and darkest parts from being degraded. The greater the gamma value is, the darker the printed text or image becomes.

<None>

Carries out color separation from RGB data to CMYK data without applying an RGB source profile.

<CMYK Simulation Profile>

Select a simulation target to print the CMYK data. The machine converts CMYK data into a device dependent CMYK color model based on the simulation.

<JapanColor(Canon)>
 <U.S. Web Coated v1.00(Canon)>
 <Euro Standard v1.00(Canon)>
 <None> 

<Menu> ▶ <Function Settings> ▶ <Printer> ▶ <Printer Settings> ▶ <PDF> ▶ <CMYK Simulation Profile> ▶ Select a profile ▶ 

<JapanColor(Canon)>

Set a JapanColor profile. Data is printed in the color tones closest to those of the Japanese printing standard.

<U.S. Web Coated v1.00(Canon)>

Set a U.S. Web Coated profile. Data is printed in the color tones closest to those of the U.S. printing standard.

<Euro Standard v1.00(Canon)>

Set a Euro Standard profile. Data is printed in the color tones closest to those of the European printing standard.

<None>

Prints CMYK data by using a device-dependent CMYK color model without applying the CMYK simulation profile.

NOTE:

- When <None> is selected, the dark color gradation may become uneven depending on data.

<Use Grayscale Profile>

Specify whether to convert gray data to CMYK data using the grayscale profile of the machine.

<Off-Hook Alarm>

Select whether the machine makes an alert sound when the handset of a telephone connected to the machine is not properly set on the cradle. You can also adjust the volume of the alert sound.

0  to 3

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Fax Settings> ▶ <Off-Hook Alarm> ▶ Select the volume of the alert sound ▶ <Apply> ▶ 

<ECM TX>

Enable or disable error correction mode (ECM). ECM checks for fax data errors and corrects them. To reduce errors on received faxes, see  **<ECM RX>(P. 554)** .

<Off>
 <On> 

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Fax Settings> ▶ <ECM TX> ▶ <On> ▶ 

NOTE

- ECM must be enabled on both the machine and the other fax device because error checks are performed on both the sending and receiving devices.

- Even when ECM is enabled, errors may occur due to telephone line conditions.
- It may take a longer time than usual to process data when ECM is enabled because the error checks and corrections are performed while the data is transmitted.

<Set Pause Time> *2

For example, when you make calls by dialing "0 - (pause) - (telephone number)," 0 is dialed first and then a few seconds later, the telephone number. When sending faxes overseas, you need to specify destinations by dialing "(international access code) - (country code) - (area code) - (fax number)" but consecutive numbers that are input without pauses may not be recognized correctly. In this case, try adding a pause after the international access code or the fax number. If the code or the number is still not recognized correctly, change the duration of the pause. For instructions on how to enter a pause, see step 4 on **Basic Operations for Sending Faxes(P. 221)** .

1 to 4 ↑ to 15 (sec.)

<Menu> ► <Function Settings> ► <Send> ► <Fax Settings> ► <Set Pause Time> ► Specify the duration of pause ► <Apply> ►

<Auto Redial> *2

Specify settings for Auto Redial, a function that automatically redials the fax number after several minutes if the first attempt fails because the line is busy. You can specify how many times the machine redials and the interval between redials.

<Use Auto Redial>

<Off>

<On> ↑

<Number of Times to Redial>

1 to 2 ↑ to 10 (time(s))

<Redial Interval>

2 ↑ to 99 (min.)

<Redial When Error Occurs>

<Off>

<On> ↑

<Menu> ► <Function Settings> ► <Send> ► <Fax Settings> ► <Auto Redial> ► Select <On> in <Use Auto Redial> ► Specify the settings ► <Apply> ►

<Number of Times to Redial>

Specifies how many times the machine redials. Enter a number, and select <Apply>.

<Redial Interval>

Specifies the interval between redials. Enter a number for the interval, and select <Apply>.

<Redial When Error Occurs>

When set to <On>, specifies to redial when a transmission error occurs.

<Check Dial Tone Before Sending> *2

Select whether to check the dial tone before a fax number is dialed.

<Off> [†]
<On>

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Fax Settings> ▶ <Check Dial Tone Before Sending> ▶ <On> ▶

<Set Line>

Specify a fax number, unit name, and line type.

<Register Unit Telephone Number>

Register the fax number for the machine. **Registering the Fax Number and Unit Name(P. 79)**

<Register Unit Name>

Register the name of a company or person (**Registering the Fax Number and Unit Name(P. 79)**). The registered name is sent as sender information to the destination (**<TX Terminal ID>(P. 550)**).

<Select Line Type> *2

Select the telephone line type used for fax transmission. **Connecting the Telephone Line(P. 81)**

<Select Line Type (Manual)>
<Pulse>
<Tone> [†]

<Rotate Img to Send(Long Edge)>

Select whether to rotate the original that is set sideways by 90 degrees and send automatically.

<Off>
<On> [†]

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Fax Settings> ▶ <Rotate Img to Send(Long Edge)> ▶ Select <Off> or <On> ▶

<TX Start Speed>

If it takes time to start sending originals, such as when there is a poor connection, you can adjust the transmission start speed downward incrementally.

<33600 bps> [†]

<14400 bps>
 <9600 bps>
 <7200 bps>
 <4800 bps>
 <2400 bps>

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Fax Settings> ▶ <TX Start Speed> ▶ Select a communication start speed ▶

<R-Key Setting>

If your machine is connected through a PBX (Private Branch Exchange), it is necessary to set the access method. If you set it to <PBX>, the <R> key will be displayed on the Fax Basic Features screen. If you register the outside line access number to the <R> key, you can easily access the outside line.

<PSTN> †

<PBX>

<Prefix>

<Code>

<Hooking> † *1

<Menu> ▶ <Function Settings> ▶ <Send> ▶ <Fax Settings> ▶ <R-Key Setting> ▶ <PBX> ▶ Select <Prefix> or <Hooking> ▶ Enter the outside line access number if you select <Prefix> ▶ <Apply> ▶

a <PBX>

Select <PBX> when you want the machine to be connected through a PBX (Private Branch Exchange). Set the function of the <R> key displayed on the Fax Basic Features screen to <Prefix> or <Hooking>. If you select <Prefix>, register the prefix code on the next screen. Enter the prefix code using the numeric keys, select <Pause>, and then select <Apply>. If you do not insert a pause, the prefix code is not registered.

<Archive TX Document> *3

In addition to the destination specified when the fax is sent, you can specify whether faxed documents are also sent to a preset storage address for archiving.  **Saving a Copy of a Sent Original(P. 239)**

<Archive TX Document><Off> 

<On>

<Archive Address>

<Confirm Entered Fax Number>

Select whether to display the details of an entered coded dial number when it is selected as a destination.  **Confirming the Entered Fax Number(P. 417)**

<Off> 

<On>

<Allow Fax Driver TX>

Enable or disable PC faxing (sending faxes from a computer).  **Restricting Fax Sending from a Computer(P. 417)**

<Off>

<On> **<Restrict Sequential Broadcast>**

Select whether to prohibit sequential broadcasting, a feature that sends faxes to multiple destinations in succession.  **Restricting Sequential Broadcasts(P. 417)**

<Off> 

<On>

<TX Terminal ID>

Specify settings for adding the sender information, including the fax number and the name of the machine, to the fax header. The recipient can check who sent the fax by looking at the added information.

<Restrict Access>

Specify so that entry of a PIN is required for access to the Remote UI. Set a PIN of up to 7 digits. All users use a common PIN.  **Setting a Remote UI PIN(P. 370)**

<Off> 
 <On>
 <Remote UI Access PIN>

<Menu> ▶ <Management Settings> ▶ <License/Other> ▶ <Remote UI Settings> ▶ <Restrict Access> ▶ <On> ▶ Enter PIN ▶ <Apply> ▶ PIN (Confirm) ▶ <Apply> ▶ 

<Update Firmware> *

Select how to install the firmware update according to the environment of the machine.  **Updating the Firmware(P. 444)**

<Via PC>
 <Via Internet>
 <Version Information>

<Data Management>

19YU-098

The settings for utilizing the machine settings and for initializing data are listed with descriptions. Default settings are marked with a dagger (†).

NOTE

Asterisks (*)

- Settings marked with an asterisk (*) cannot be imported or exported.

▶<Import/Export>(P. 576)

▶<Initialize Key and Certificate>(P. 577)

▶<Initialize Address Book>(P. 577)

▶<Initialize Menu>(P. 577)

<Import/Export> *

You can use a USB memory device to import and export data in the Address Book and various settings of the machine.

<Import>
<Export>

Import

<Menu> ▶ <Management Settings> ▶ <Data Management> ▶ <Import/Export> ▶ <Import>
▶ <Yes> ▶ Enter the password ▶ <Apply>

Export

<Menu> ▶ <Management Settings> ▶ <Data Management> ▶ <Import/Export> ▶ <Export>
▶ Enter the password ▶ <Apply> ▶ Enter the password (Confirm) ▶ <Apply>

NOTE

When the <Address Book PIN> screen appears

- If a PIN has been set for the Address Book, the <Address Book PIN> screen appears during importing/exporting. Enter the Address Book PIN and select <Apply>. Select <Skip> to cancel Address Book data importing/exporting.

When import is executed

- The machine automatically restarts after the import process has finished.

<Initialize Key and Certificate> *

Select to restore [Key and Certificate Settings] and [CA Certificate Settings] to the factory defaults.  **Initializing Key and Certificate(P. 446)**

<Initialize Address Book> *

Select to restore the Address Book settings.  **Initializing Address Book(P. 447)**

<Initialize Menu> *

Select to restore the settings listed below to the factory defaults. You can restore all the settings listed below at once, or you can restore individual settings separately.  **Initializing Menu(P. 446)**

<ul style="list-style-type: none"><Preferences><Adjustment/Maintenance><Function Settings><Set Destination><Management Settings><Initialize All>

<Security Settings>

19YU-099

All the settings associated with the authentication function and encryption are listed with descriptions. Default Settings are marked with a dagger †.

▶<Authentication/Password Settings>(P. 578)

▶<Encryption Settings>(P. 578)

<Authentication/Password Settings>

You can reinforce the security of the authentication function.

<Authentication Function Settings>

Configure the security functions for user authentication.

<Lockout>

When a user has failed user authentication, specify whether to disable the user from temporarily logging in to the machine (lockout). When <On> is selected, specify how many consecutive times failures are permitted before lockout is activated and also the time required before a user can log in again after lockout.

<Enable Lockout>

<Off> †

<On>

<Lockout Threshold>

1 † to 10 (time(s))

<Lockout Period>

1 † to 60 (min.)

<Menu> ▶ <Management Settings> ▶ <Security Settings> ▶ <Authentication/Password Settings>
▶ <Authentication Function Settings> ▶ <Lockout> ▶ Select <On> in <Enable Lockout> ▶ Specify
each setting item ▶ <Apply> ▶ Restart the machine

IMPORTANT:

- This option is not applied to login using the department ID.

<Encryption Settings>

Configure a setting for disabling a weak encryption or the key and certification using a weak encryption.

<Prohibit Use of Weak Encrypt.>

<Off> †

<On>

<Prohibit Weak Encrypt. Key/Cert.>

<Off> †

<On>

<Menu> ▶ <Management Settings> ▶ <Security Settings> ▶ <Encryption Settings> ▶ Select <On>
in <Prohibit Use of Weak Encrypt.> ▶ Select <Off> or <On> in <Prohibit Weak Encryp. Key/Cert.>

Maintenance

19YU-09A

This chapter describes upkeep of the machine, including how to clean the machine and initialize settings.

■ Basic Cleaning

▶ Regular Cleaning(P. 583)

■ Replacing Consumables

▶ Replacing the Toner Cartridge(P. 596)

▶ Replacing the Waste Toner Container(P. 600)

▶ Replenishing the Staples (Optional)(P. 604)

▶ Replacing the Drum Unit(P. 607)

▶ Replacement Parts(P. 632)

▶ Checking the Remaining Amount of Consumables(P. 611)

■ Others: Maintenance and Adjustment

▶ Adjusting Print Quality(P. 613)

▶ Printing Reports and Lists(P. 628)

▶ Viewing the Counter Value(P. 627)

Regular Cleaning

19YU-09C

It is recommended that you periodically clean the machine to prevent loss of print quality and enable you to use the machine comfortably and safely. Clean the locations indicated by **a** to **e** in the following figures.

- a** Exterior ▶ **Cleaning the Exterior(P. 584)**
- b** Platen glass ▶ **Cleaning the Platen Glass(P. 585)**
- c** Feeder ▶ **Cleaning the Feeder(P. 587)**
- d** Interior ▶ **Cleaning the Interior(P. 592)**
- e** Dust-proof glass ▶ **Cleaning the Dust-Proof Glass(P. 594)**

Cleaning the Exterior

19YU-09E

Periodically wipe the surface of the machine to keep it clean.

1 Turn the power OFF, and remove the power plug from the power outlet.

▶Turning OFF the Machine(P. 111)

IMPORTANT:

- Check the operation status of the machine before turning the power OFF. You can turn the power OFF even if the machine is executing an operation, but this may cause the operation to be interrupted or data to become damaged.

2 Wipe the surface of the machine.

- Wet a soft cloth with water or diluted mild detergent, wring the cloth out well, and wipe the machine.

- Wait until the moisture has completely dried before proceeding to the next step.

3 Insert the power plug into the power outlet, and turn the power ON.

▶Turning ON the Machine(P. 110)

Cleaning the Platen Glass

19YU-09F

If the platen glass is dirty, originals may not be scanned clearly, or the size of the original may not be detected clearly.

1 Turn the power OFF, and remove the power plug from the power outlet.

▶Turning OFF the Machine(P. 111)

IMPORTANT:

- Check the operation status of the machine before turning the power OFF. You can turn the power OFF even if the machine is executing an operation, but this may cause the operation to be interrupted or data to become damaged.

2 Open the feeder or the platen cover.

3 Wipe the reverse side of the feeder or the platen cover and the platen glass.

1 Wipe the platen glass.

- Wipe the platen glass with the included cleaning cloth.

2 Wipe the reverse side of the feeder or the platen cover.

- If you cannot remove the dirt, wet a soft cloth with water and wring it out well, then wipe the reverse side of the feeder or the platen cover with it. Afterwards, wipe the reverse side of the feeder or the platen cover with a soft and dry cloth. Wait until the moisture has completely dried before proceeding to the next step.

NOTE:

If you cannot remove the dirt

- Wet a soft cloth with mild detergent and wring it out well, then wipe the machine with it. Afterwards, wipe the machine with a soft and dry cloth.

4 Gently close the feeder or the platen cover.

5 Insert the power plug into the power outlet, and turn the power ON.

▶ **Turning ON the Machine(P. 110)**

Cleaning the Feeder

19YU-09H

If streaks appear on originals fed through the feeder, or if smudges appear on printouts, or if a paper jam occurs frequently, then perform feeder cleaning.

NOTE

- The feeder is optional for imageRUNNER C3025.

🔴 **Cleaning the Feeder(P. 587)**

🔴 **If Streaks Still Appear On Paper(P. 591)**

Cleaning the Feeder

1 Turn the power OFF, and remove the power plug from the power outlet.

🔴 **Turning OFF the Machine(P. 111)**

IMPORTANT:

- Check the operation status of the machine before turning the power OFF. You can turn the power OFF even if the machine is executing an operation, but this may cause the operation to be interrupted or data to become damaged.

2 Pull the lever, and open the feeder cover.

3 Clean the rollers inside the feeder cover.

- Wet a soft cloth with water and wring it out well, then wipe the rollers with it. Afterwards, wipe the rollers with a soft and dry cloth.

IMPORTANT:

- Spin the rollers while cleaning them.
- If the rollers and surrounding areas are very dirty, clean them out. To do this, wet a cloth with water and wring it out well, then wipe the dirty areas. Afterwards, wipe the areas with a soft and dry cloth.

4 Clean the inside of the inner cover of the feeder.

- 1 Open the inner cover of the feeder.

- 2 Wipe the transparent plastic (a total of two places).
 - Wet a soft cloth with water and wring it out well, then wipe the plastic with it. Afterwards, wipe the plastic with a soft and dry cloth.

- Wait until the moisture has completely dried before proceeding to the next step.

3 Wipe the rollers (a total of three places) inside the inner cover.

- Wet a soft cloth with water and wring it out well, then wipe the rollers with it. Afterwards, wipe the rollers with a soft and dry cloth.

- Wait until the moisture has completely dried before proceeding to the next step.

4 Close the inner cover of the feeder.

5 Open the feeder.

6 Clean the document feed scanning area.

- Wipe the area with the included cleaning cloth. If you cannot remove the dirt, wet a soft cloth with water and wring it out well, then wipe the area with it. Afterwards, wipe the area with a soft and dry cloth.

- Wait until the moisture has completely dried before proceeding to the next step.

7 Clean the white plate.

- Wet a soft cloth with water and wring it out well, then wipe the plate with it. Afterwards, wipe the plate with a soft and dry cloth.

- Wait until the moisture has completely dried before proceeding to the next step.

8 Close the feeder.

9 Gently close the feeder cover.

10 Insert the power plug into the power outlet, and turn the power ON.

▶Turning ON the Machine(P. 110)

If Streaks Still Appear On Paper

If streaks still appear on the paper, load about 10 sheets of A4 size paper in the feeder and perform the following procedure to execute ▶Placing Originals(P. 128) .

1 Select <Menu> in the Home screen. ▶Home Screen(P. 116)

2 Select <Adjustment/Maintenance> ▶ <Maintenance>.

3 Select <Clean Feeder>.

4 Select <Start>.

►► Cleaning starts. When a message appears notifying that cleaning is complete, press  to return to the Home screen.

Cleaning the Interior

19YU-09L

If streaks appear on printed paper or part of the image is missing, execute <Clean Device>.

1 Select <Menu> in the Home screen.  Home Screen(P. 116)

2 Select <Adjustment/Maintenance>  <Maintenance>.

3 Select <Clean Device>.

4 Select <Start>.

⇒ Cleaning starts. When a message appears notifying that cleaning is complete, press  to return to the Home screen.

Performing Special Cleaning

19YU-0FJ

If printed images and text appear faded or bleeding, perform Special Cleaning.

1 Select <Menu> in the Home screen.  Home Screen(P. 116)

2 Select <Adjustment/Maintenance>  <Maintenance>.

3 Select <Special Cleaning>.

4 Select <Start>.

▢ Cleaning starts. When a message appears notifying that cleaning is complete, press  to return to the Home screen.

Cleaning the Dust-Proof Glass

19YU-09R

When white streaks or other print defects occur even after cleaning the platen glass, feeder, and main unit, the dust-proof glass may be dirty. In this case, follow the procedure below to clean the dust-proof glass.

1 Turn the power OFF, and remove the power plug from the power outlet.

▶Turning OFF the Machine(P. 111)

IMPORTANT:

- Check the operation status of the machine before turning the power OFF. You can turn the power OFF even if the machine is executing an operation, but this may cause the operation to be interrupted or data to become damaged.

2 Open the front cover of the main unit.

3 Remove the cleaning stick.

- The cleaning stick is stored in the front cover of the main unit.
- Slide the cleaning stick to the right, and then remove it upward.

4 Insert the cleaning stick into the holes to clean them.

- 1 Insert the cleaning stick into the hole with the pad on its tip facing down.

- 2** Insert the cleaning stick in until it hits the bottom of the hole, and gently move it back and forth.
- Insert the cleaning stick into all four holes to clean them.

5 When cleaning is complete, return the cleaning stick to its original position.

- Return the cleaning stick to the front cover of the main unit with its tip on the left side.

6 Close the front cover of the main unit.

7 Insert the power plug into the power outlet, and turn the power ON.

- ▶ **Turning ON the Machine(P. 110)**

Replacing the Toner Cartridge

19YU-09S

When toner starts running low or has run out, a message is displayed prompting you to prepare a new toner cartridge or perform toner cartridge replacement. Prepare a new toner cartridge or perform toner cartridge replacement according to the displayed message.

- ▶ **When the Message Is Displayed(P. 596)**
- ▶ **When the Instruction Screen Is Displayed(P. 596)**
- ▶ **Procedure for Replacing the Toner Cartridge(P. 597)**

NOTE

- For information on the product numbers for toner cartridges, see ▶ **Replacement Parts(P. 632)** .
- You can check the current amount of toner remaining. ▶ **Checking the Toner Level(P. 611)**

When the Message Is Displayed

When there is only a small amount of toner remaining inside the machine, the message <Toner low. (Rplct. not yet needed.)> is displayed. You do not necessarily need to replace the toner cartridge soon but prepare a new toner cartridge so that you can replace it when needed.

NOTE

When this message is displayed

- When copying or printing, you can continue printing the original.
- If a message is displayed for the black toner cartridge when the machine is receiving a fax or automatic report output is set, received faxes and reports will be stored in memory so that they do not appear faded after they are printed.
- This message may not be displayed depending on your contract.

When the Instruction Screen Is Displayed

The toner in the toner cartridge and the machine has run out, and printing cannot be performed. Follow the instructions on the screen to replace the toner cartridge. ▶ **Procedure for Replacing the Toner Cartridge(P. 597)**

Procedure for Replacing the Toner Cartridge

When replacing the toner cartridge, the procedure is also displayed on the screen. Check the information displayed on the screen in addition to the following procedure.

IMPORTANT

- When replacing multiple toner cartridges at the same time, replace them in the following order: black, yellow, magenta, and cyan.

1 Select <Next>.

2 Open the front cover of the main unit.

3 Pull out the toner cartridge.

- Pull out the toner cartridge of the color displayed in the screen.

IMPORTANT:

- Make sure to avoid applying shocks to the toner cartridge by hitting it against something, etc. Doing so may cause the toner to leak.

4 Remove the new toner cartridge from its box.

5 With the white part of the new toner cartridge facing up, shake the toner cartridge up and down approximately 10 times.

- Shaking the toner cartridge evens out the toner inside.

IMPORTANT:

- Do not have the white part of the toner cartridge face down. Doing so may prevent the toner from being supplied properly.

6 Install the new toner cartridge.

- Before installing the toner cartridge, confirm that the color of the toner cartridge and the color indicated on the slot of the main unit are the same.
- Holding the toner cartridge with the flat surface of its tip facing down, slide the cartridge into the main unit as far as it will go.

7 Close the front cover of the main unit.

- The message <Checking the toner> is displayed. The procedure is complete when this message disappears.

NOTE

- If printing was interrupted because toner ran out, it will automatically resume when you replace the toner cartridge.
- Even if cyan, magenta, or yellow toner runs out, you can continue to print in black-and-white as long as black toner remains, but the printing quality will drop. If you want to continue printing in black-and-white, do not replace the toner cartridge until printing is complete.
- If the color and density of printing differ after replacing the toner cartridge, perform adjustment.
 - ▶ **Adjusting Gradation(P. 614)**
 - ▶ **Correcting Uneven Density(P. 618)**

Replacing the Waste Toner Container

19YU-09U

When the waste toner container is almost full or completely full, a message is displayed prompting you to prepare a new waste toner container or perform waste toner container replacement. Prepare a new waste toner container or perform waste toner container replacement according to the displayed message.

▶ **When a Message Is Displayed(P. 600)**

▶ **Procedure for Replacing the Waste Toner Container(P. 601)**

NOTE

- The waste toner container is a container for collecting unused toner that remains when printing.
- For information on the model number of the waste toner container, see ▶ **Replacement Parts(P. 632)** .
- You can check the current amount of space remaining in the waste toner container.

▶ **Checking the Space Remaining in the Waste Toner Container(P. 611)**

When a Message Is Displayed

■ When <Waste toner contr is nearly full. Rplct not yet needed.> is displayed

The waste toner container is almost full. You can continue printing for a while, but you should have a new one available so that you can make replacement as soon as it is needed. ▶ **Procedure for Replacing the Waste Toner Container(P. 601)**

■ When <Replace the waste toner container.> is displayed

The waste toner container is full, so printing is not possible any longer. Follow the instructions on the screen to replace the waste toner container.

▶ **Procedure for Replacing the Waste Toner Container(P. 601)**

Procedure for Replacing the Waste Toner Container

When replacing the waste toner container, the procedure is also displayed on the screen. Check the information displayed on the screen in addition to the following procedure.

1 Pull out the paper drawer 1, and open the waste toner container cover.

- Pull the tab to open the waste toner container cover.

2 Pull out the waste toner container.

- After pulling out the waste toner container half way, hold the handle on the top and pull it out all the way.

IMPORTANT:

- Do not tilt the waste toner container. Doing so may cause the toner in the container to spill.

3 Remove the new waste toner container from its box.

4 Place the waste toner container you removed into a box.

- Use the bag included in the box for the new waste toner container. Tightly twist the opening of the bag so that the toner does not spill out, and then place the bag in the box.

5 Install the new waste toner container.

- Insert the waste toner container with the Canon logo on top of the container towards the back of the machine, and push it in to load it.

IMPORTANT:

- Push the waste toner container in as far as it will go. If the waste toner container is not installed correctly, the container shutter may stay open when the waste toner container is removed, which may cause toner to scatter.

6 Close the waster toner container cover and push the paper drawer 1 in.

IMPORTANT

- The used waste toner container will be collected by your local authorized Canon dealer.

Replenishing the Staples (Optional)

19YU-09W

When the staples in the inner finisher have run out, a message appears on the Home screen. Follow the instructions on the screen to replenish the staples.

▶ Replenishing the Staples for the Inner Finisher(P. 605)

IMPORTANT

- Copies and prints may be output to optional equipment while you are replenishing the staple. Take care when handling the optional equipment installed to the machine.

NOTE

- For information on the product number for the staples, see ▶ **Replacement Parts(P. 632)** .
- You can check the current amount of staples remaining.
▶ **Checking the Remaining Amount of Staples(P. 611)**

Replenishing the Staples for the Inner Finisher

19YU-09X

1 Open the front cover of the finisher.

2 Replenishing the Staples for the Inner Finisher.

- Pull the green handle to disengage the lock, and lift the case slightly upwards while pulling it straight out.

3 Remove the empty staple case from the staple cartridge.

- Hold the staple case around the position of the arrow mark, and remove it in the direction of the arrow.

4 Take out a new staple case from its box.

5 Load the new staple case in the staple cartridge.

- Insert the plate protruding from the staple case front end into the staple cartridge, and lower the staple case to place it in the staple cartridge.

6 Hold the green knob on the staple cartridge and push in the cartridge as far as it will go.

7 Close the front cover of the finisher.

- Dry stapling may be performed automatically for staple repositioning.

Replacing the Drum Unit

When the drum unit is nearing the end of its lifetime, a message prompting you to replace the drum unit is displayed on the screen.

▶ Procedure for Replacing the Drum Unit(P. 607)

IMPORTANT

- Do not remove the orange-colored protective cover until you are instructed to do so in the following procedure.

NOTE

- For the model number of the drum unit, see ▶ **Replacement Parts(P. 632)** .
- The drum unit replacement message displayed on the screen differs depending on your contract.

Procedure for Replacing the Drum Unit

When you perform the following procedure, the screen also displays the instructions for drum unit replacement, which will be helpful for you to be sure of the procedure.

Select <Status Monitor> ▶ <Error Information/Notification> ▶ <Replace Drum Unit>.

1 Open the front cover of the main unit.

2 Open the cover of the drum unit.

3 Pull out the drum unit.

IMPORTANT:

- Do not tilt the drum unit. Doing so may cause the toner in the drum to spill.

4 Remove the new drum unit from its box.

5 Install the new drum unit.

6 Remove the protective cover.

- First push in the slider on the right side of the orange-colored protective cover toward the back of the main unit until it cannot go any further, and then pull out the protective cover.

7 Close the cover of the drum unit.

8 Close the front cover of the main unit.

IMPORTANT

- After the replacement is complete, put the used drum unit in the bag that contained the new drum unit, and store it until the local authorized Canon dealer comes to collect it.

Checking the Remaining Amount of Consumables

19YU-09Y

Use the procedure below to check the amount remaining in the toner cartridges, waste toner cartridge, and staples.

▶ **Checking the Toner Level(P. 611)**

▶ **Checking the Space Remaining in the Waste Toner Container(P. 611)**

▶ **Checking the Remaining Amount of Staples(P. 611)**

TIPS

- You can check the remaining amount of consumables from the Remote UI. ▶ **Remote UI Screen(P. 428)**

Checking the Toner Level

It is recommended that you check the toner level before performing a large job to determine whether you need to prepare new toner cartridges.

<Status Monitor> ▶ <Device Information> ▶ <Consumables Information> ▶ checking the amount remaining ▶ Press

Checking the Space Remaining in the Waste Toner Container

It is recommended that you check the space remaining in the waste toner container before performing a large job to determine whether or not to prepare a new waste toner container.

<Status Monitor> ▶ <Device Information> ▶ <Consumables Information> ▶ checking the space remaining in the waste toner container ▶ Press

Checking the Remaining Amount of Staples

It is recommended that you check the remaining amount of staples before, especially beginning an operation to make a large number of booklets to determine whether you need to prepare a new staple case.

<Status Monitor> ▶ <Device Information> ▶ <Consumables Information> ▶ check the remaining amount of staples ▶ Press 

LINKS

- ▶ **Replacing the Toner Cartridge(P. 596)**
- ▶ **Replacing the Waste Toner Container(P. 600)**
- ▶ **Replenishing the Staples (Optional)(P. 604)**

Adjusting Print Quality

19YU-0A1

If the printing results are not satisfactory such as low image quality, poor reproducibility, or print color mismatch, try the adjustments below.

■ Auto Adjust Gradation

If the density or brightness of colors in printouts and originals are different, perform <Auto Adjust Gradation> to improve color reproducibility. There are two types of adjustments: <Full Adjust>, <Quick Adjust>. ➤ **Adjusting Gradation(P. 614)**

■ Shading Correction

If the image areas of the printing have uneven density, this correction adjusts the printing so that the density is even. ➤ **Correcting Uneven Density(P. 618)**

■ Correct Print Color Mismatch

If the colors in printouts become blurry, perform <Correct Print Color Mismatch>. This problem may be caused by a color mismatch. ➤ **Correcting "Print Color Mismatch"(P. 622)**

■ Black Text Processing for Color

You can specify which cartridges to use to print black text in color printouts. ➤ **Adjusting Values for Text Color Reproducibility in Color Documents(P. 623)**

■ Toner Amount Reduction

You can prevent excessive toner from being fixed onto paper to reduce print failure such as poor toner fixing or bleed-through. ➤ **Troubleshooting(P. 636)**

■ Unevenness correction of filling

Adjust the unevenness when uneven filling occurs with the original with many filled parts. ➤ **Common Problems(P. 637)**

Adjusting Gradation

19YU-0A2

Gradation refers to the dark to light continuum of shades of a color. The more shades in the gradations of colors that are printed, the more natural printouts seem. If color reproducibility becomes poor and the density and brightness of printouts differs markedly from the originals, perform the appropriate auto adjustment. There are two options of gradation adjustment: "Full Adjust" for accurate adjustment, "Quick Adjust" for simple adjustment.

➤ **Full Adjust(P. 614)**

➤ **Quick Adjust(P. 617)**

NOTE

- Adjustments may not be performed effectively if there is not sufficient toner cartridge remaining. Check the amount of toner remaining in each cartridge. If the amount of toner is low in any of the toner cartridges, it is recommended that you replace the toner cartridge(s). ➤ **Checking the Remaining Amount of Consumables(P. 611)**

Full Adjust

This adjustment optimizes reproducibility for color printing. When the machine performs full adjustment, it obtains information to optimize color reproducibility. The machine maintains this information until the next time you perform full adjustment. To make a full adjustment, repeat the operation, "print out the adjustment image and scan it," multiple times. Note that you cannot perform this adjustment while performing some functions, including, scanning, and printing.

NOTE

If the printed color tones are different from the color tones of the print data

Depending on the paper to use for printing and the print settings, perform correction as follows.

- To print on plain paper, perform correction with <Standard (Plain)>^{*1}.
- To print on heavy paper, first perform correction with <Standard (Plain)>^{*1} and then with <Standard (Heavy)>^{*2}.
- To print on plain paper using the Superfine function, first perform correction with <Standard (Plain)>^{*1} and then with <For Printer 1200 dpi>^{*1}.
- To print on heavy paper using the Superfine function, first perform correction with <Standard (Plain)>^{*1}, then with <Standard (Heavy)>^{*2}, and finally with <For Printer 1200 dpi>^{*2}.

^{*1} Perform correction using plain paper.

^{*2} Perform correction using heavy paper.

1 Select <Menu> in the Home screen. ➤ **Home Screen(P. 116)**

2 Select **<Adjustment/Maintenance>** ► **<Adjust Image Quality>** ► **<Auto Adjust Gradation>**.

3 Select **<Full Adjust>**.

4 Select the paper source.

5 Check that the size and type of paper displayed on the screen is loaded in the machine, and select **<OK>**.

6 Confirm the procedure, and select **<Start>**.

► An adjustment image is printed.

NOTE:

- Print and scan the adjustment image 3 times if **<Standard (Plain)>** or **<Standard (Heavy)>** has been selected in step 4, or 2 times if **<For Printer 1200 dpi>** has been selected.

7 Open the feeder or the platen cover after the screen displayed during printing disappears.

8 Place the adjustment image on the platen glass.

- Place the adjustment image with the print side facing down while checking that the black stripe is placed on the back side of the machine.

9 Gently close the feeder or the platen cover.

10 Select **<Start Scanning>**.

► The placed adjustment image is scanned, and then the third adjustment image is

printed.

11 Open the feeder or the platen cover, remove the first adjustment image, and then place the second adjustment image on the platen glass.

- In the same way as for the first adjustment image, place the adjustment image with the print side facing down while checking that the black stripe is placed on the back side of the machine.

12 Gently close the feeder or the platen cover.

13 Select <Start Scanning>.

➡ The adjustment image is scanned and adjustment starts.

- When <For Printer 1200 dpi> is selected in step 4, the adjustment is executed after it is scanned. Proceed to step 17.

14 Open the feeder or the platen cover, remove the second adjustment image, and then place the third adjustment image on the platen glass.

- In the same way as for the first adjustment image, place the adjustment image with the print side facing down while checking that the black stripe is placed on the back side of the machine.

15 Gently close the feeder or the platen cover.

16 Select <Start Scanning>.

➡ The adjustment image is scanned and adjustment starts.

17 When a message appears notifying that adjustment is complete, open the feeder or the platen cover, and remove the adjustment image.

18 Gently close the feeder or the platen cover.

NOTE

If the <Could not perform correction.> message is displayed

- Did you load the paper displayed in step 5 into the paper source?
- Did you place the adjustment image with the print side face down, with the black stripe toward the back side of the machine?
- Has a paper jam occurred? ➡ **Clearing Paper Jams(P. 678)**
- Is the amount remaining in toner cartridge required for correction sufficient? If the amount remaining in a toner cartridge is low, it is recommended that you replace toner cartridges. ➡ **Checking the Remaining Amount of Consumables(P. 611)**

Quick Adjust

This adjustment maintains the optimized status that was acquired by <Full Adjust>. If the result of this adjustment is not satisfactory, perform <Full Adjust>. This adjustment may be automatically performed after you replace a toner cartridge.

NOTE

- Quick adjustment is not available while scanning or printing is performed.

- 1** Select <Menu> in the Home screen.  Home Screen(P. 116)
- 2** Select <Adjustment/Maintenance>  <Adjust Image Quality>  <Auto Adjust Gradation>.
- 3** Select <Quick Adjust>.
- 4** Select <Start>.

 The adjustment starts.

Correcting Uneven Density

19YU-0A4

If the density is uneven when printing, perform <Correct Shading>. There are three methods for correcting the density; **Correction with a Densitometer(P. 618)** with a commercial densitometer, **Visual Correction(P. 619)** , and **Scanner Correction(P. 620)** .

NOTE

- Adjustments may not be performed effectively if there is not sufficient toner.
Checking the Remaining Amount of Consumables(P. 611)

Correction with a Densitometer

Measure a test page you have output with a commercial densitometer and enter the measured density values to correct the density of halftone areas.

- 1** Select <Menu> in the Home screen. **Home Screen(P. 116)**
- 2** Select <Adjustment/Maintenance> ► <Adjust Image Quality>.
- 3** Select <Correct Shading> ► <Densitometer Correction>.
- 4** Confirm the procedure, and select <Next>.
- 5** Check that the size and type of paper displayed on the screen is loaded in the machine, and select <Start>.
 - A test page is printed.
- 6** Measure the test page with a densitometer.
 - Measure marks 1 to 7 printed on the test page, and make a note of the density values that are detected.
- 7** Press <Fine Adjust> for each color.
- 8** Enter the density values.

- Enter the density values you measured and made a note of in step 6 in 1 to 7 for each color.

9 Press <Apply>.

10 Press <Output Test Page> ► <Start Printing>.

► A test page after correction is output.

11 If there is no problem with the test page, press <Apply>.

- If the density of the test page after correction is uneven, perform the procedure indicated in ► **Visual Correction(P. 619)** .

Visual Correction

Visually measure a test page you have output to perform correction using the density adjustment values you determine. Use this procedure when you do not have a densitometer or when correction is not effective.

1 Select <Menu> in the Home screen. ► Home Screen(P. 116)

2 Select <Adjustment/Maintenance> ► <Adjust Image Quality>.

3 Select <Correct Shading> ► <Visual Correction>.

4 Select <Output Test Page>.

5 Check that the size and type of paper displayed on the screen is loaded in the machine, and select <Start Printing>.

► A test page is printed.

6 Visually check the test page to determine the density adjustment values.

NOTE:

- The range of marks printed for each color may be -6 to +6 or -5 to +5, depending on the paper size used for the test page.

7 Press <Fine Adjust> for each color.

8 Enter the density values.

- Enter the density values according to the results that you visually checked in step 3 from -6 to +6 (or -5 to +5) for each color.

- Enter a plus value to increase the density, or a minus value to decrease the density.

9 Press <Apply>.

10 Press <Output Test Page> ► <Start Printing>.

► A test page after correction is output.

11 If there is no problem with the test page, press <Apply>.

Scanner Correction

You can perform density correction by scanning a test page that you have output. This saves the labor of performing density measurements and entering density values.

1 Select <Menu> in the Home screen. ► Home Screen(P. 116)

2 Select <Adjustment/Maintenance> ► <Adjust Image Quality>.

3 Select <Correct Shading> ► <Scanner Correction>.

4 Confirm the procedure, and select <Next>.

5 Check that the size and type of paper displayed on the screen is loaded in the machine, and select <Start>.

► A test page is printed.

6 Place the test page on the platen glass.

- Place the test page sheet in the machine in a manner that its side on which the four color stripes are printed faces down and the cyan stripe faces toward the back side of the machine.

7 Close the feeder and press <Start Scanning>.

► The test page is scanned and density correction is performed.

NOTE

If the <Could not perform correction.> message is displayed

- Did you load the paper displayed in step 5 into the paper source?
- Did you place the adjustment image with the print side face down, with the black stripe toward the back side of the machine?
- Has a paper jam occurred? ► **Clearing Paper Jams(P. 678)**
- Is the amount remaining in toner cartridge required for correction sufficient? If the amount remaining in a toner cartridge is low, it is recommended that you replace toner cartridges. ► **Checking the Remaining Amount of Consumables(P. 611)**

Correcting "Print Color Mismatch"

19YU-0A3

Print color mismatch refers to a shift in the positions of colors that may occur when printing one image with multiple toner cartridges. Print color mismatch can cause printouts to appear blurry. If print color mismatch occurs, perform the following procedure. This adjustment is sometimes performed automatically, such as when toner cartridges are replaced.

- 1** Select <Menu> in the Home screen.  Home Screen(P. 116)
- 2** Select <Adjustment/Maintenance>  <Adjust Image Quality>.
- 3** Select <Correct Print Color Mismatch>.
- 4** Select <Start>.

 The adjustment starts.

Adjusting Values for Text Color Reproducibility in Color Documents

19YU-0A5

If copy results of black or blackish text are not satisfactory, you can improve the color reproducibility with this adjustment.

NOTE

- The settings are applied to color copies when <Original Type> is set to <Text/Photo/Map> or <Text>.  **Selecting the Type of Original for Copying(P. 203)**

- 1** Select <Menu> in the Home screen.  **Home Screen(P. 116)**
- 2** Select <Adjustment/Maintenance>  <Adjust Image Quality>.
- 3** Select <Black Text Processing for Color>.
- 4** Adjust the evaluation value.

- This adjustment value can be set independently in the feeder and platen glass.

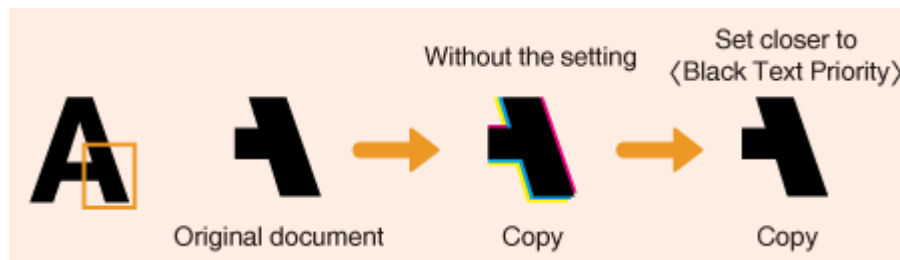

<Color Text Priority>

Makes black or blackish text in a copy match more closely with the original.

<Black Text Priority>

Enhances the clarity of black text.

5 Select <Apply>.

Reducing Toner Used When Color Printing

19YU-0H2

Fixing of excessive toner onto paper may cause color print failures such as generation of afterimages of highly dense characters or lines. Reducing the amount of toner to be fixed may improve this failure.

NOTE

- This function may improve the following failures.
 - Toner scattering around deep color areas of printed images
 - Poor toner fixing in a low-temperature environment
 - Darkening of images printed on transparencies at the time of projection
 - Bleed-through appearing when copying originals from 2-sided printing
- This function is enabled when in the <Copy> or <Print> menu, <Full Color> is selected under <Select Color> or <Auto (Color/B&W)> is selected, that is, when the current print mode is recognized as full color.
- Use of this function may give an adverse effect on color printing quality.

1 Select <Menu> in the Home screen. Home Screen(P. 116)

2 Select <Adjustment/Maintenance> <Adjust Image Quality> <Special Processing>
 <Adj. Toner Vol. for Color Print.>.

3 Select the toner volume level.

- <Off> prints with the standard toner volume.
- <Level 1> prints deep color areas with a bit smaller toner volume than the standard volume.
- <Level 2> generally prints with a reduced toner volume.

Correct Unevenness of Filled Part

19YU-0H3

Adjust the unevenness when uneven filling occurs with the original with many filled parts.

NOTE

- It is corrected when plain paper or recycled paper is used.

- 1** Select **<Menu>** in the Home screen.  **Home Screen(P. 116)**
- 2** Select **<Adjustment/Maintenance>**  **<Adjust Image Quality>**  **<Special Processing>**
 **<Fill Area Image Adj. Mode>**.
- 3** Select the adjust mode.
 - **<Mode 1>** : Adjust when using paper made in Japan.
 - **<Mode 2>** : Adjust when using paper other than made in Japan.
 - **<Mode 3>** : Adjust if you are mainly using North American for paper other than made in Japan.

Viewing the Counter Value

19YU-0A7

You can check separate totals for the number of pages used for color printouts and black and white printouts. These totals include faxes, reports, and lists, in addition to copies and printouts of data from computers.

<112: Total (Black & White/Large)>

Displays the total number of pages for black and white printing.

<113: Total (Black & White/Small)>

Displays the total number of pages for black and white printing (B4 or smaller sizes).

<122: Total (Full Color + Single Color/Large)>

Displays the total number of pages for color printing.

<123: Total (Full Color + Single Color/Small)>

Displays the total number of pages for color printing (B4 or smaller sizes).

<501: Scan (Total 1)>

Displays the total number of pages for scanning.

<301: Print (Total 1)>

Displays the total number of pages for printing.

NOTE

- <Monitoring Service> enables communication with a remote monitoring server. Execution of this item enables information about the machine to be periodically sent to the remote monitoring server connected to the machine.
- <Check Dev. Config.> enables you to check the optional units installed on the machine.

Printing Reports and Lists

You can print reports and lists to check information such as the conditions of each department and machine settings.

- ▶ **Printing Use Condition Reports by Department(P. 628)**
- ▶ **Setting Reports on the Communication Results(P. 628)**
- ▶ **Printing Lists of Settings(P. 630)**
- ▶ **Printing Reports on the Usage Condition of the Machine(P. 631)**

Printing Use Condition Reports by Department

Department ID Management Report

When Department ID Management is enabled, you can check the total volume of printouts for each <Department ID> by printing a Department ID Management Report. By checking the printout totals, you can better manage your paper and toner cartridge supplies.

<Menu> ▶ <Output Report> ▶ <Print List> ▶ <Department ID Management Report> ▶ Check that the size and type of paper displayed on the screen is loaded in the machine, and select <Start> ▶

Setting Reports on the Communication Results

You can print reports on the results of sending/receiving by e-mail, fax, and I-Fax, or saving to shared folders and FTP servers. Some reports can be printed automatically while others are only printed when an error occurs.

NOTE

- If "Result" in a printed list contains "NG," you can check details of the error from a three-digit number prefixed with "#" displayed in the next to the result. ▶ **Countermeasures for Each Error Code(P. 668)**
- Reports printed for e-mail/I-Fax indicate the transmission result between the machine and the mail server, not between the machine and the destination address.

Communication Management Report

You can check the fax and e-mail logs of sent and received documents by printing a Communication Management Report. The report can be printed automatically after every 40 transmissions, or you can print it manually.

<Menu> ▶ <Output Report> ▶ <Report Settings> ▶ <Communication Management Report> ▶ Configure report settings ▶ <Apply> ▶

<Auto Print (40 Transmissions)>

Select <On> to print the report automatically after every 40 transmissions, or <Off> if you do not want to print the report automatically.

<Separate TX/RX>

Select <On> to print sent and received reports separately, or <Off> to print both reports on one sheet.

■ Print the report manually

<Menu> ► <Output Report> ► <Print List> ► <Communication Management Report> ► Check that the size and type of paper displayed on the screen is loaded in the machine and select <Start> ►

Fax TX Result Report

You can check the communication result of sending faxes with a TX Result Report. The report can be printed either every time a transmission is completed or only when a sending error occurs.

<Menu> ► <Output Report> ► <Report Settings> ► <Fax TX Result Report> ► Select <On> or <Only When Error Occurs> ► Select <Off> or <On> ► <Apply> ►

<Include TX Image>

When you select <On>, a part of a sent document can be included in the TX Result Report.

E-Mail/I-Fax/File TX Result Report

You can check the communication results of sending e-mails or I-Faxes and saving documents to the shared folder or FTP server with a TX Result Report. The report can be printed automatically each time a communication is completed. If necessary, you can configure a setting so that the report is printed only when a sending error occurs.

<Menu> ► <Output Report> ► <Report Settings> ► <E-Mail/I-Fax/File TX Result Report> ► Select <On> or <Only When Error Occurs> ►

NOTE

Communication result

- If an error occurs during transmission by e-mail/I-Fax or saving to a shared folder/FTP server, the report does not show the error code. To check the error code, print a Communication Management Report. ► **Communication Management Report(P. 628)**

RX Result Report

You can check the logs of received fax and I-Fax documents by printing an RX Result Report. The report can be printed either every time a transmission is completed or only when a receiving error occurs.

<Menu> ► <Output Report> ► <Report Settings> ► <RX Result Report> ► Select <On> or <Only When Error Occurs> ►

Printing Lists of Settings

You can print information and settings registered in the machine as a list.

Address Book List

You can check the list of destinations registered in the Address Book as <Coded Dial>, <Favorites>, and <Group> by printing an Address Book List.

<Menu> ► <Output Report> ► <Print List> ► <Address Book List> ► Select the setting you want to print out ► Check that the size and type of paper displayed on the screen is loaded in the machine, and select <Start> ►

User Data List/System Manager Data List

You can check the list of the settings (► **Setting Menu List(P. 449)**) as well as the content that has been registered in the machine by printing a User Data List or a System Manager Data List. Both lists include the firmware version, the paper size and type registered in the machine, and the print settings of TX Result Report, Communication Management Report, and RX Result Report.

<Menu> ► <Output Report> ► <Print List> ► <User Data List> or <System Manager Data List> ► Check that the size and type of paper displayed on the screen is loaded in the machine, and select <Start> ►

NOTE

- The User Data List does not include certain settings such as Network Settings and Management Settings. To check all the settings items print the System Manager Data List.

IPSec Policy List

You can check the list of policy names and the IPSec settings registered in the machine by printing an IPSec Policy List.

<Menu> ▶ <Output Report> ▶ <Print List> ▶ <IPSec Policy List> ▶ Check that the size and type of paper displayed on the screen is loaded in the machine, and select <Start> ▶ 

Printing Reports on the Usage Condition of the Machine

You can print the list of fonts available in PCL or PS mode.

PCL Font List

You can check the list of fonts available in PCL mode.

<Menu> ▶ <Output Report> ▶ <Print List> ▶ <PCL Font List> ▶ Check that the size and type of paper displayed on the screen is loaded in the machine, and select <Start> ▶ 

PS Font List

You can check the list of fonts available in PS mode.

<Menu> ▶ <Output Report> ▶ <Print List> ▶ <PS Font List> ▶ Check that the size and type of paper displayed on the screen is loaded in the machine, and select <Start> ▶ 

Replacement Parts

19YU-0AA

This section describes the replacement parts (consumables/consumable parts) used by the machine. Purchase the replacement parts from the authorized Canon dealer that you purchased the machine from. Follow the precautions when handling and storing the replacement parts.

Genuine Consumables

Canon continuously develops technology innovations in Canon manufactured Toner, Cartridge, and Parts, specifically designed for use in Canon Multi-Functional machines. Experience the benefits of optimal print performance, print volume and high quality outputs, achieved through Canon's new advanced technologies. Therefore, the use of Canon genuine consumables is recommended for your Canon Multi-Functional machines.

▶ **Consumables(P. 632)**

▶ **Consumable Parts(P. 633)**

NOTE

- For information on handling and storing the replacement parts, follow the precautions indicated in the Getting Started included with the machine.
- You can check the current amount of replaceable parts remaining.

▶ **Checking the Remaining Amount of Consumables(P. 611)**

Consumables

■ Toner Cartridge for Replacement

Confirm that the code on the front cover of the machine and the one on the package of the genuine toner are the same.

For optimum print quality, using Canon genuine toner is recommended.

Model name	Genuine Canon toner
imageRUNNER C3025i / C3025	<ul style="list-style-type: none"> • Canon C-EXV 54 Toner Black • Canon C-EXV 54 Toner Cyan • Canon C-EXV 54 Toner Magenta • Canon C-EXV 54 Toner Yellow

IMPORTANT

Be careful of counterfeit toners

- Please be aware that there are counterfeit Canon toners in the marketplace. Use of counterfeit toner may result in poor print quality or machine performance. Canon is not responsible for any malfunction, accident or damage caused by the use of counterfeit toner. For more information, see canon.com/counterfeit.

NOTE

- For information on the collection of used toner cartridges, see the Getting Started.

■ Drum Unit

Product Name	Model Number
imageRUNNER C3025i / C3025	• Canon C-EXV 49 Drum Unit

■ Staple Cases for Replacement

Always use the dedicated replacement staple cases for this machine.

Finisher name	Genuine Canon staple cases

Troubleshooting

19YU-0AC

When a problem occurs, check this chapter to find out solutions before contacting Canon.

■ Common Problems

This section describes which action to take if you suspect that the machine is malfunctioning. ▶ **Common Problems(P. 637)**

■ A Message or a Number Starting with "#" (an Error Code) is Displayed

This section describes how to take action when a message or error code (three digits) appears on the display. ▶ **A Message or a Number Starting with "#" (an Error Code) Is Displayed(P. 651)**

■ Clearing Jams

This section describes which action(s) to take when an original or paper is jammed. ▶ **Clearing Paper Jams(P. 678)**

■ Clearing Staple Jams (Optional)

This section describes which action(s) to take when a staple is jammed in optional equipment. ▶ **Clearing Paper Jams(P. 678)**

Common Problems

19YU-0AE

If you encounter problems when using the machine, check the items in this section before contacting us. If the problems persist, contact your local authorized Canon dealer or the Canon help line.

Check the Following

→ Is the machine turned ON? Is the power cord connected?

- If the machine is turned ON but does not respond, turn it OFF, check whether the power cord is connected correctly, and turn it back ON. For information on connecting the power cord, see Getting Started. ▶ **Manuals and Their Contents(P. 757)**

→ Are the phone cord, LAN cable and USB cable connected correctly?

- Check whether these cables are connected correctly. Use care not to mistake the phone cord's port for the other cables' ports.
 - ▶ **Connecting the Telephone Line(P. 81)**
 - ▶ **Parts and Their Functions(P. 96)**

→ Is sleep mode activated?

- If you leave the machine unattended for a specific period of time, it enters sleep mode for power conservation, not allowing you to operate it.
To cancel sleep mode, press .

→ Is any message displayed on the screen?

- If a problem occurs, a message is displayed. ▶ **Countermeasures for Each Message(P. 653)**

If a problem persists even after checking

Click the link that corresponds to the problem.

- ▶ **Settings Problems(P. 638)**
- ▶ **Copying/Printing Problems(P. 642)**
- ▶ **Problems with Printing Results(P. 645)**
- ▶ **Faxing/Telephone Problems(P. 649)**

Settings Problems

19YU-0FH

See [▶Common Problems\(P. 637\)](#) also.

- ▶[Problems with the Wireless/Wired LAN Connection\(P. 638\)](#)
- ▶[Problem with the USB Connection\(P. 641\)](#)
- ▶[Problem with the Print Server\(P. 641\)](#)

Problems with the Wireless/Wired LAN Connection

The wireless LAN and wired LAN cannot be connected at the same time.

- The wireless LAN and wired LAN cannot be connected at the same time. The following can be used at the same time: a USB cable and a wireless LAN, or a USB cable and a wired LAN.

Remote UI is not displayed.

- Are <Use HTTP> and <Use Remote UI> set to <On>?
 - ▶[Disabling HTTP Communication\(P. 422\)](#)
 - ▶[Disabling Remote UI\(P. 423\)](#)
- If the machine is connected to a wireless LAN, check that the Wi-Fi icon is displayed in the Home screen and that the IP address is set correctly, and then start the Remote UI again.
 - ▶[Home Screen\(P. 116\)](#)
 - ▶[Viewing Network Settings\(P. 36\)](#)
- If the machine is connected to a wired LAN, check that the cable is connected firmly and the IP address is set correctly, and then start the Remote UI again.
 - ▶[Connecting to a Wired LAN\(P. 15\)](#)
 - ▶[Viewing Network Settings\(P. 36\)](#)
- Are you using a proxy server? If so, add the machine's IP address to the [Exceptions] list (addresses that do not use the proxy server) in the Web browser's proxy settings dialog.
- Is communication not limited by the firewall on your computer? If IP addresses are or an MAC address is incorrectly entered, the Remote UI cannot be displayed. In that case, you need to use the operation panel to set <IPv4 Address Filter>, <IPv6 Address Filter>, or <MAC Address Filter> to <Off>.
 - ▶[Restricting Communication by Using Firewalls\(P. 378\)](#)
 - ▶[<IPv4 Address Filter> \(P. 472\)](#)
 - ▶[<IPv6 Address Filter> \(P. 473\)](#)
 - ▶[<MAC Address Filter> \(P. 473\)](#)

A connection to a network cannot be established.

- The IP address may not be set correctly. Set the IP address again.
 - ▶[Setting IP Addresses\(P. 29\)](#)
- When you connect the machine to a computer via wireless LAN, check whether the machine is properly installed and ready to connect to the network.
 - ▶[When the Machine Cannot Connect to the Wireless LAN\(P. 639\)](#)

You are unsure of the set IP address. ▶ Viewing Network Settings(P. 36)

The connection method cannot be switched between a wired LAN and a wireless LAN.

- Did you select a wired LAN or a wireless LAN on the operation panel on the machine as well? This selection is required to have the machine switch to your selection.

▶ **Selecting Wired LAN or Wireless LAN(P. 14)**

You are unsure of the SSID or the network key of the wireless router to be connected. The SSID is not displayed on the screen.

- Check whether the SSID can be found on the wireless router or package box.

The SSID of the wireless router to be connected is not displayed in the access point list

- Check whether the SSID is correct.

▶ **Checking the SSID and Network Key(P. 28)**

- If the SSID of the wireless router is hidden (using a stealth mode*), set the SSID to be visible on the wireless router.

* A mode that disables the SSID auto-detection of other devices.

- Check whether the machine is properly installed and ready to connect to the network.

▶ **When the Machine Cannot Connect to the Wireless LAN(P. 639)**

The machine dials up to an unintended connection destination (if a dialup router is connected to a network).

- If a dialup router does not need to pass broadcast packets, set the dialup router so that the broadcast packets will not pass. If the dialup router needs to pass broadcast packets, check whether the settings are correct.
- If a DNS server is located in an external network, set the IP address to be connected, not the host name, even if connecting to the devices that are on the network that is connected to the machine.
- If a DNS server is located on a network that is connected to the machine and the information about the devices that are connected to an external network is registered to the DNS server, check whether the settings are correct.

When the Machine Cannot Connect to the Wireless LAN

Check the status of your computer.

- Have the settings of the computer and the wireless router been completed?
- Are the cables of the wireless router (including the power cord and LAN cable) correctly plugged in?
- Is the wireless router turned on?

If the problem persists even after checking the above:

- Turn off the devices, and then turn them on again.
- Wait for a while, and try again to connect to the network.

Check whether the machine is turned ON.

- If the machine is turned ON, turn it OFF, and then turn it back ON.

Check the installation site of the machine and the wireless router.

- Is the machine too far from the wireless router?
- Are there any obstacles such as walls between the machine and the wireless router?
- Are there any appliances such as microwave ovens or digital cordless phones that emit radio waves near the machine?

Perform one of the following settings again.

- ▶ **Setting Up Connection Using WPS Push Button Mode(P. 18)**
- ▶ **Setting Up Connection Using WPS PIN Code Mode(P. 20)**
- ▶ **Setting Up Connection by Selecting a Wireless Router(P. 22)**
- ▶ **Setting Up Connection by Specifying Detailed Settings(P. 25)**

NOTE

When you need to manually set up the connection

If the wireless router is set as described below, manually enter all the required information for the wireless LAN connection (▶ **Setting Up Connection by Specifying Detailed Settings(P. 25)**).

- ANY connection refusal* is activated.
- The WEP key that was automatically generated (hexadecimal) is selected.
- The stealth mode is activated.

*A function in which the wireless router refuses the connection if the SSID on the device to be connected is set to "ANY" or is blank.

When you need to change the settings of the wireless router

If the wireless router is set as described below, change the settings of the router.

- The MAC address packet filtering is set.
- When only IEEE 802.11n is used for the wireless communication, WEP is selected or the WPA/WPA2 encryption method is set to TKIP.

Problem with the USB Connection

Cannot communicate.

- Change the USB cable. If you are using a long USB cable, replace it with a short one.
- If you are using a USB hub, connect the machine directly to your computer using a USB cable.

Problem with the Print Server

You cannot find the print server to connect to.

- Are the print server and computer connected correctly?
- Is the print server running?
- Do you have user rights to connect to the print server? If you are not sure, contact the server administrator.
- Is [Network discovery] enabled?
 ▶ **Enabling [Network discovery](P. 764)**

You cannot connect to a shared printer.

- On the network, does the machine appear among the printers of the print server? If it is not displayed, contact the network or server administrator.
 ▶ **Displaying Shared Printers in the Print Server(P. 765)**

Copying/Printing Problems

19YU-0AJ

See  **Common Problems(P. 637)** also.

Printing/copy results are not satisfactory. **Problems with Printing Results(P. 645)**

You cannot print.

- Can you print a Windows test page? If you can print a Windows test page, there is no problem with the machine or the printer driver. Check the print settings of your application.

Printing a Test Page in Windows(P. 765)

If you cannot print a test page, check the following according to your environment.

Wireless LAN connection

- Check the connection status (signal strength) of the wireless LAN.

Viewing Network Settings(P. 36)

NOTE:

- If the connection is poor, try the following.
 - Change the channel of your wireless LAN router. If you have more than one router, set the channels to be at least five channels apart.
 - If you can change the radio output power of your wireless LAN router, raise the output power.
- If your computer is connected to a wireless LAN, are the computer and this machine using the same wireless LAN router SSID? If they are different, reset the wireless LAN connection settings of this machine.
 -  **Viewing Network Settings(P. 36)**
 -  **Checking the SSID to Which Your Computer is Connected(P. 770)**
 -  **Connecting to a Wireless LAN(P. 16)**

NOTE:

When you reset wireless LAN connection settings

- As the wireless LAN router, select the one with the SSID to which the computer is connected.
 - Have you selected the correct port? If there is no port to use, create a port.
 -  **Checking the Printer Port(P. 768)**
 - Is communication not limited by the firewall on your computer? If IP addresses are incorrectly entered, you will be not able to access the machine. In that case, you need to use the operation panel to set <IPv4 Address Filter> or <IPv6 Address Filter> to <Off>.
 -  **Restricting Communication by Using Firewalls(P. 378)**
 -  **<IPv4 Address Filter> (P. 472)**
 -  **<IPv6 Address Filter> (P. 473)**
- Disable security software and other resident software.
- Reinstall the printer driver.
 -  **Installing Drivers(P. 76)**
- Can you print from other computers on the network? If you also cannot print from other computers, contact your local authorized Canon dealer or the Canon help line.

■ Wired LAN connection

- Have you selected the correct port? If there is no port to use, create a port.
 - ▶ **Checking the Printer Port(P. 768)**
 - ▶ **Configuring Printer Ports(P. 42)**
- Is communication not limited by the firewall on your computer? If IP addresses are or an MAC address is incorrectly entered, you will be not able to access the machine. In that case, you need to use the operation panel to set <IPv4 Address Filter>, <IPv6 Address Filter>, or <MAC Address Filter> to <Off>.
 - ▶ **Restricting Communication by Using Firewalls(P. 378)**
 - ▶ **<IPv4 Address Filter> (P. 472)**
 - ▶ **<IPv6 Address Filter> (P. 473)**
 - ▶ **<MAC Address Filter> (P. 473)**
- Disable security software and other resident software.
- Reinstall the printer driver.
 - ▶ **Installing Drivers(P. 76)**
- Can you print from other computers on the network? If you also cannot print from other computers, contact your local authorized Canon dealer or the Canon help line.

■ USB connection

- Have you selected the correct port? If there is no port to use or you are not sure, reinstall the printer driver. When you reinstall the printer driver, the correct port is created automatically.
 - ▶ **Checking the Printer Port(P. 768)**
 - ▶ **Installing Drivers(P. 76)**
- Is bidirectional communication enabled? Enable bidirectional communication, and restart the computer.
 - ▶ **Checking Bidirectional Communication(P. 769)**
- Disable security software and other resident software.
- Connect to another USB port on the computer.
- Can you print from a USB connection to another computer? If you also cannot print from other computers, contact your local authorized Canon dealer or the Canon help line.

■ Via print server

- Can you print from the print server? If you can print from the print server, check the connection between the print server and your computer.
 - ▶ **Problem with the Print Server(P. 641)**
- Disable security software and other resident software.
- Reinstall the printer driver.
 - ▶ **Installing Drivers(P. 76)**
- Can you print from other computers via the print server? If you also cannot print from other computers, contact your local authorized Canon dealer or the Canon help line.
- Has an error occurred? Check the job log.
 - ▶ **Checking the Copying Status and Log(P. 200)**
 - ▶ **Checking the Printing Status and Log(P. 265)**

Printing seems to be slow.*

- Disabling Secure Print is recommended if you are not using it.
 - ▶ **Changing the Valid Time Period for Secured Documents(P. 271)**

* When the free space in memory is running low, the processing speed of the machine becomes slow, just as a computer does. There is nothing abnormal.

You cannot print with Google Cloud Print.  Using Google Cloud Print(P. 354)

It takes a long time before printing starts.

- Did you print to narrow width paper? After you print to narrow width paper, the machine may cool itself to maintain the print quality. As a result, it may take some time before the next job is printed. Wait until the machine is ready to print. Printing will resume when the temperature inside the machine has fallen.

Problems with Printing Results

- ▶ The printed image is displaced or skewed.(P. 645)
- ▶ Images are uneven or faint.(P. 645)
- ▶ Black streaks appear.(P. 645)
- ▶ White streaks appear.(P. 645)
- ▶ Bleedthrough occurs.(P. 646)
- ▶ Images are not printed on the intended side of the paper.(P. 646)
- ▶ Images are not printed in the intended size.(P. 646)
- ▶ The orientation does not match on both sides of the paper when using two-sided printing.(P. 647)
- ▶ The printed color tones are different from the color tones of the print data.(P. 648)

The printed image is displaced or skewed.

→ Are the paper guides misaligned?

- Match the paper guides with the paper loaded in the paper source.

Images are uneven or faint.

→ Is the paper damp?

- Replace the paper with paper that is not damp.

→ Are the gradation and density set appropriately?

- Perform gradation adjustment.
 - ▶ **Adjusting Gradation(P. 614)**

Black streaks appear.

→ Is the document feed scanning area dirty?

- Clean the document feed scanning area.
 - ▶ **Cleaning the Feeder(P. 587)**

White streaks appear.

→ The dust-proof glass may be dirty.

- Clean the dust-proof glass.
 - ▶ **Cleaning the Dust-Proof Glass(P. 594)**

→ Is the document feed scanning area dirty?

- Clean the document feed scanning area.

▶ **Cleaning the Feeder(P. 587)**

Bleedthrough occurs.

→ Is the density of backgrounds set appropriately?

- If bleed-through is observed with the print result, adjusting the density of background can improve the problem, giving a fine print.

▶ **Basic Copy Operations(P. 193)**

▶ **Basic Operations for Sending Faxes(P. 221)**

▶ **Adjusting Gradation(P. 614)**

Images are not printed on the intended side of the paper.

→ Is the orientation of the loaded paper correct?

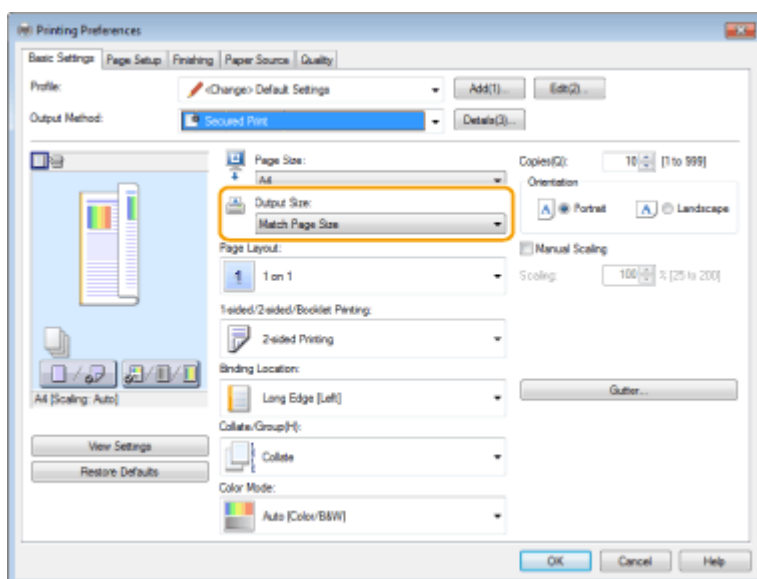

- Check the orientation and side of the paper that is facing up. Load the paper again if it is incorrectly orientated.

▶ **Loading Paper(P. 133)**

Images are not printed in the intended size.

→ Do the original size and size of the paper that is loaded match?

- Replace the paper that is loaded with paper of the size you want to print on.
- Match [Output Size] in the printer driver with the size of paper to print on.

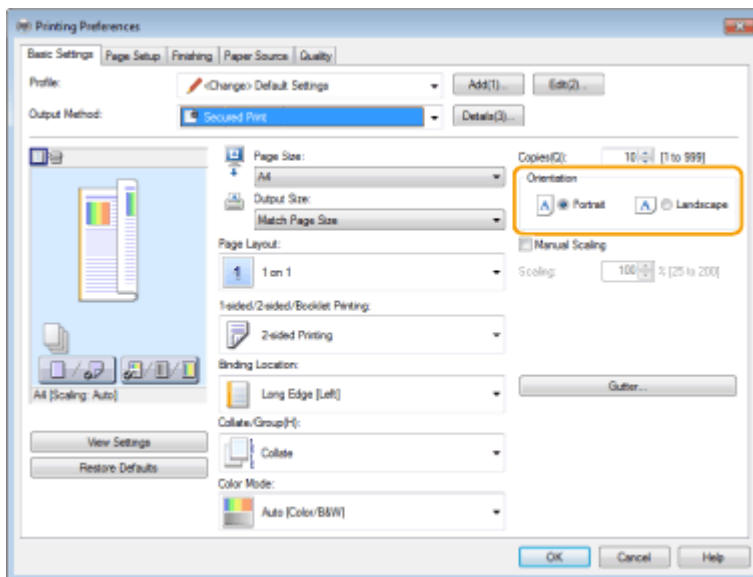

The orientation does not match on both sides of the paper when using two-sided printing.

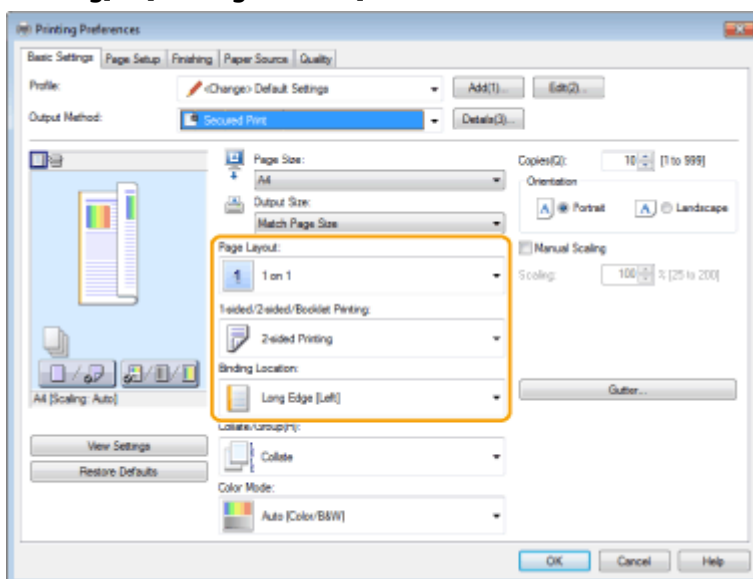

→ Are the settings for two-sided printing correct?

- Follow the procedure below to check the print settings.

- 1** Select the orientation of the original on the print settings screen of the application.
- 2** On the [Basic Settings] screen of the driver, set [Orientation] to the same orientation you set in step 1.

- 3** While checking the print preview, set [Page Layout] ► [Page Order] ► [1-sided/2-sided/Booklet Printing] ► [Binding Location].

NOTE

- [Page Order] is displayed when [Page Layout] is set to [2 on 1] or higher.

The printed color tones are different from the color tones of the print data.

→ **Is the paper damp?**

- Replace the paper with paper that is not damp.

→ **Are the gradation and density set appropriately?**

- Perform gradation adjustment.
▶ **Adjusting Gradation(P. 614)**

Faxing/Telephone Problems

19YU-0AK

See **Common Problems(P. 637)** also.

▶ **Sending Problems(P. 649)**

▶ **Receiving Problems(P. 649)**

Sending Problems

A fax cannot be sent.

- Is an external phone line busy? Wait until the line becomes free.
- Has an error occurred? Print and check a Communication Management Report.
▶ **Communication Management Report(P. 628)**
- Is a telephone line set correctly?
▶ **Connecting the Telephone Line(P. 81)**
- When sending the fax overseas, insert pauses in the fax number.
▶ **Basic Operations for Sending Faxes(P. 221)**

A fax cannot be sent with a destination in the history specified.

- Did you turn OFF the machine? If so, the stored history was deleted.
- Did you set <Restrict New Destinations> to <On>? If so, the history before you set was deleted.
- Did you set <Restrict Resending from Log> to <Off>? If so, the destinations in the history cannot be specified.

A fax cannot be sent on an optical fiber line.

- The machine is compliant with use on analog lines. When using an optical fiber line or IP phone line, the machine may not work correctly depending on the connection environment or connected devices. In such a case, contact the provider of the optical fiber line or IP phone.

The results of a sent fax are not satisfactory.

- Clean the platen glass or feeder. If cleaning does not improve the results, the recipient's fax machine may be a cause.
▶ **Cleaning the Platen Glass(P. 585)**
▶ **Cleaning the Feeder(P. 587)**

Receiving Problems

The results of received fax are not satisfactory.

- ▶ **Problems with Printing Results(P. 645)**

Telephone and fax cannot be switched automatically.

- Check that the receive mode is set to <Fax/Tel (Auto Switch)>, <Answering Machine>, or <Net Switch>.
 - ▶ **Selecting the Receive Mode(P. 80)**
- Free space in memory may be running low. Print or delete data in memory.
 - ▶ **Checking/Forwarding/Deleting Documents in Memory(P. 242)**
 - ▶ **Printing Documents in Memory(P. 241)**

A fax cannot be received automatically.

- Check that the receive mode is set to <Fax/Tel (Auto Switch)>, <Auto>, <Answering Machine>, or <Net Switch>.
 - ▶ **Selecting the Receive Mode(P. 80)**
- Free space in memory may be running low. Print or delete data in memory.
 - ▶ **Checking/Forwarding/Deleting Documents in Memory(P. 242)**
 - ▶ **Printing Documents in Memory(P. 241)**

A fax cannot be received on an optical fiber line.

- The machine is compliant with use on analog lines. When using an optical fiber line or IP phone line, the machine may not work correctly depending on the connection environment or connected devices. In such a case, contact the provider of the optical fiber line or IP phone.

A Message or a Number Starting with "#" (an Error Code) Is Displayed

19YU-0AW

When a message appears on the machine's display, or a number (error code) prefixed with "#" appears, see the following sections to check the solution.

- ▶ **A Message Saying to Contact a Local Authorized Canon Dealer Is Displayed(P. 652)**
- ▶ **Countermeasures for Each Message(P. 653)**
- ▶ **Countermeasures for Each Error Code(P. 668)**

A Message Saying to Contact a Local Authorized Canon Dealer Is Displayed

19YU-0AX

If the machine cannot operate normally due to a problem, contact a local authorized Canon dealer.

1 Restart the machine.

- Press the power switch to turn the power OFF (▶ **Turning OFF the Machine(P. 111)**), wait for longer than 10 seconds after the touch panel display and indicators turn off, and then turn the power ON again (▶ **Turning ON the Machine(P. 110)**).

IMPORTANT:

- Note that data waiting to be processed is erased when you turn the power OFF.

2 If the message is still displayed, prepare the following information.

- Product name (imageRUNNER C3025i / C3025)
- The dealer where you purchased the machine
- The problem (the specific operation you performed and the result and symptom, etc.)
- Error code number displayed on the touch panel display

3 Turn the power of the machine OFF, pull out the power plug, and contact your local authorized Canon dealer.

Countermeasures for Each Message

19YU-0FR

If you cannot send a fax or the memory is full, or you encounter operation problems, a message appears on the display. Find out more information about messages in the following list.

A counterfeit or non-Canon cartridge may be in use. The amount in the cartridge cannot be displayed correctly.

The toner cartridge used may not be a genuine Canon product.

- Only genuine Canon toner cartridges should be used as replacement toner cartridges.  **Consumables(P. 632)**

A malfunction may occur. A non-Canon toner cartridge or a toner cartridge of the wrong color may be inserted. To use this cartridge, press [I Agree].
Source of Error

The color of one of the inserted toner cartridges may be incorrect.

- Make sure to check the status of the inserted container, which is displayed in the area within the frame.

To continue using the toner cartridge, press <I Agree>. If you select this option, the operation of the machine is not guaranteed.

To replace the toner cartridge, press <Cancel>.

If you are not sure about the remedies, contact your local authorized Canon dealer from which you purchased the toner cartridge.

An error occurred during certificate verification.

The certificate has expired, or contains incorrect information.

- Install the correct CA certificate.
 **Registering the Key and Certificate for Network Communication(P. 397)**
- Check the certificate for validity period and domain name.

An invalid paper size/type combination was detected. Drawer: XXXX Check the position of the paper guides in the drawer and [Paper Settings] on the Home screen.

XXXX shows paper sources (1 to 4) of the paper drawer.

The paper settings in the paper drawer differ from the paper that is loaded.

- Check the paper settings on the paper information in <Paper Settings>. If the paper settings are incorrect, match them with the paper size and type of the paper that is loaded. Paper settings can be specified for all the paper sizes and types set in the paper drawers in <Paper Settings>.
- ▶ **Specifying Paper Size and Type in the Paper Drawer(P. 153)**

Black & White copying is restricted. Only Color copying is available.

Black and white copying is disabled in the Department ID Management.

- To copy in black and white, log in using a Department ID for which black and white copying is not restricted. For the Department ID and PIN, contact your Administrator.
- ▶ **Setting the Department ID Management(P. 364)**

Black & White printing is restricted. Only Color printing is available.

Black and white printing is disabled in the Department ID Management.

- To print in black and white, log in using a Department ID for which black and white printing is not restricted. Contact your Administrator for the Department ID and PIN.
- ▶ **Setting the Department ID Management(P. 364)**

Cannot analyze the authentication server certificate.

The authentication server certificate may be invalid, or the certificate may be in a format that the printer does not support.

- Check the authentication server certificate.
- ▶ **Configuring IEEE 802.1X Authentication Settings(P. 406)**

Cannot change the destination type of destinations registered to a group.

A selected destination could not be edited because it was registered to Group Dial.

- To change the type of destination that is registered to Group Dial, first delete the registered destination from Group Dial. Next, change the destination type, and then register the destination to Group Dial again.

Cannot find the access point.

When automatic setting with WPS was attempted, a wireless router could not be detected within a specific period of time.

- Connect again paying attention to the time limit.
 - ▶ **Setting Up Connection Using WPS Push Button Mode(P. 18)**
 - ▶ **Setting Up Connection Using WPS PIN Code Mode(P. 20)**

An SSID or network key of a wireless router was entered manually, but the entry was incorrect.

- Check the SSID and network key, and enter the correct ones again.
 - ▶ **Checking the SSID and Network Key(P. 28)**
 - ▶ **Setting Up Connection by Specifying Detailed Settings(P. 25)**

A wireless router could not be detected due to setting problems of the network to be connected.

- Check whether the machine is properly installed and ready to connect to the network.
 - ▶ **Settings Problems(P. 638)**
- If the problem persists, check the security settings of the wireless router.

Cannot print RX data.

Received documents cannot be printed due to some specific situation.

- Check if there has occurred one of the following situations. If messages including causes and solutions appear on the display, check the contents.
 - A cover is open.
 - There is no paper loaded.
 - The paper is jammed.
 - The toner cartridge is consumed.
 - An error has occurred.

Cannot receive the fax. Make sure the fax was sent correctly by the sender.

The recipient's machine did not respond within 35 seconds.

- Ask the sender to send the fax again. If you hear a beep, select <Start Receiving> to receive the fax.
 - ▶ **Receiving Faxes(P. 230)**

Cannot scan from the feeder when Book->2 Pages is set.

You are using a function that cannot be used when an original is placed in the feeder.

- Place the original on the platen glass.

Cannot send because more than one destination is specified.

Sending a fax to multiple destinations is disabled.

- To specify multiple destinations, you need to set <Restrict Sequential Broadcast> to <Off>. For more information, contact your Administrator.
▶ **Restricting Sequential Broadcasts(P. 417)**

Cannot specify group destinations, or multiple destinations at the same time.

You specified multiple destinations or Group Dial after selecting <Hook>.

- After you select <Hook>, you cannot specify multiple destinations or Group Dial. Specify destinations without selecting <Hook>, and send fax documents.

Cannot specify group destinations when on-hook.

Group Dial was specified as a destination after selecting <Hook>.

- Once you select <Hook>, you cannot specify destinations in Group Dial. Specify destinations to send fax documents without selecting <Hook>.

Cannot use these settings. Sending to the specified destination is restricted.

The machine is set up so that the user currently logged in cannot send to the addresses registered in the selected <Favorite Settings>.

- Change the send restrictions for the logged in user.
▶ **Setting the Department ID Management(P. 364)**

Cartridge Communication Error A counterfeit or non-Canon cartridge may be in use.

A toner cartridge may not be installed correctly or may be faulty.

- Re-install the toner cartridge. If re-installing the toner cartridge fails to clear the error message, the toner cartridge may be faulty. Contact the store where you purchased the toner cartridge or consult the Canon Customer Help Center. ▶ **Procedure for Replacing the Toner Cartridge(P. 597)**

The toner cartridge used may not be a genuine Canon product.

- Only genuine Canon toner cartridges should be used as replacement toner cartridges. ▶ **Consumables(P. 632)**

Change the authentication password.

The password has expired.

- Set a new password.

Check the authentication settings.

The authentication method set on the machine does not match the authentication method set on the RADIUS server.

- Check that the same authentication method is set on this machine and the RADIUS server, and set the correct authentication method.
 ▶ **Configuring IEEE 802.1X Authentication Settings(P. 406)**

Color copying is restricted. Only Black & White copying is available.

Color copying is disabled in the Department ID Management.

- To copy in color, log in using a Department ID for which color copying is not restricted. Contact your Administrator for the Department ID and PIN.
 ▶ **Setting the Department ID Management(P. 364)**

Color printing is restricted. Only Black & White printing is available.

Color printing is disabled in the Department ID Management.

- To print in color, log in using a Department ID for which color printing is not restricted. Contact your Administrator for the Department ID and PIN.
 ▶ **Setting the Department ID Management(P. 364)**

Copying is restricted.

Copying is disabled in the Department ID Management.

- Log in with a Department ID for which copying is not disabled. For the Department ID and PIN, contact your Administrator.
 ▶ **Setting the Department ID Management(P. 364)**

Could not connect.

Connection in Access Point Mode failed due to an error.

- Wait a few moments and try again. If you still cannot connect, try switching the machine off briefly.
 ▶ **Connecting Directly (Access Point Mode)(P. 336)**

Could not connect. Check the PSK settings.

The network key (PSK) of a wireless router to be connected is not set to the machine correctly.

- Check the network key (PSK) of the wireless router, and set it to the machine again.
 - ▶ **Checking the SSID and Network Key(P. 28)**
 - ▶ **Setting Up Connection by Selecting a Wireless Router(P. 22)**
 - ▶ **Setting Up Connection by Specifying Detailed Settings(P. 25)**
- If the problem persists even after checking the network key, check whether the machine is properly installed and ready to connect to the network.
 - ▶ **Settings Problems(P. 638)**

Could not connect using the wireless LAN. Turn the main power OFF and ON, then configure the settings again.

A connection failed due to an error while setting wireless LAN connection.

- Restart the machine and set again.
- If the problem persists even after restarting the machine, check whether the machine is properly installed and ready to connect to the network.
 - ▶ **Settings Problems(P. 638)**
- If the problem persists even after checking the wireless LAN connection, check the security settings of the wireless router.

Could not connect using WPS. Wait a moment, then configure the settings again.

When automatic setting with WPS was attempted, the connection failed due to an error.

- Wait for a while, and set again. If the problem persists, check whether the wireless router supports WPS.

If WPS is supported:

Check whether the machine is properly installed and ready to connect to the network.

▶ **Settings Problems(P. 638)**

If WPS is not supported:

Set using another connecting method.

▶ **Connecting to a Wireless LAN(P. 16)**

Could not connect. The maximum number of devices that can connect to the access point has been reached.

The machine attempted to connect to a wireless LAN router to which the maximum number of devices was already connected.

- Decrease the number of devices (clients) that are connected to the wireless LAN router. For information on the maximum number of devices that can connect, see the instruction manual for the wireless LAN router or contact the manufacturer.

Could not detect any connections from wireless devices.

Mobile device detection was not possible within the predetermined length of time.

- Connect again paying attention to the time limit.
- ▶ **Connecting Directly (Access Point Mode)(P. 336)**

Could not perform cleaning.

Paper jammed during cleaning.

- Remove the jammed paper, set paper correctly, and perform cleaning again.
- ▶ **Clearing Paper Jams(P. 678)**
- ▶ **Cleaning the Feeder(P. 587)**

The amount remaining in toner cartridges required for cleaning the fixing assembly is insufficient.

- Cleaning requires sufficient toner cartridge remaining. Replace the toner cartridge, and perform the cleaning again.
- ▶ **Procedure for Replacing the Toner Cartridge(P. 597)**

Could not perform correction.

Appropriate paper that is required for correction is not loaded in a paper drawer.

- Load plain or recycled A4 or Letter size paper into the paper drawer.
- ▶ **Full Adjust(P. 614)**

An adjustment image that is required for correction is not placed on the platen glass correctly.

- Place the adjustment image on the platen glass with the print side face down and the black stripe toward the back side of the machine.
- ▶ **Full Adjust(P. 614)**

Paper jammed during correction.

- Remove the jammed paper, and perform correction again.
- ▶ **Clearing Paper Jams(P. 678)**

The amount remaining in toner cartridges required for correction is insufficient.

- Corrections require sufficient toner cartridge remaining. Replace the toner cartridge, and perform correction again.
- ▶ **Procedure for Replacing the Toner Cartridge(P. 597)**

Could not perform Open System authentication. Check the WEP settings.

The authentication method of the machine is set to <Open System>, but that of a wireless router is set to "Shared Key."

- Connect again by manually changing the WEP authentication method to <Shared Key>.
- ▶ **Setting Up Connection by Specifying Detailed Settings(P. 25)**

The MAC address of the machine is rejected because the MAC address filter is set at a wireless router.

- Set the wireless router to permit the MAC address of the machine and your computer. For more information about how to set, see the instruction manuals for your networking devices or contact your manufacturer. To check the MAC address of the machine, select <Menu> ► <Preferences> ► <Network> ► <Wireless LAN Settings> ► <Connection Information>.
- ▶ **Viewing the MAC Address for Wired LAN(P. 36)**

Could not perform Shared Key authentication. Check the WEP settings.

The network key (the WEP key) of a wireless router to be connected is not set to the machine correctly.

- Check the network key (the WEP key) of the wireless router, and set it to the machine again.
- ▶ **Checking the SSID and Network Key(P. 28)**
- ▶ **Setting Up Connection by Specifying Detailed Settings(P. 25)**
- Connect again by selecting a wireless router or by manually changing the WEP authentication method to <Open System>.
- ▶ **Setting Up Connection by Selecting a Wireless Router(P. 22)**
- ▶ **Setting Up Connection by Specifying Detailed Settings(P. 25)**

The authentication method of the machine is set to <Shared Key>, but that of the wireless router is set to "Open System."

- Change the WEP authentication method to "Shared Key" at the wireless router, and connect again. For more information about how to change, see the instruction manuals for your networking devices or contact your manufacturer.

Direct Connection terminated.

Connection with the mobile device was interrupted.

- Establish Direct Connection again.
- ▶ **Connecting Directly (Access Point Mode)(P. 336)**

Faxing is restricted.

Faxing is disabled in the Department ID Management.

- Log in with a Department ID for which faxing is not disabled. For the Department ID and PIN, contact your Administrator.
- ▶ **Setting the Department ID Management(P. 364)**

Google Cloud Print Authentication Error

Cloud Print could not perform server authentication, or could not acquire information for registration.

- Check whether the date and time settings are correctly specified.
- ▶ **<Date/Time Settings>(P. 456)**

Google Cloud Print Communication Error

Cloud Print is unavailable due to an error.

- Check whether the machine is correctly connected to a wireless LAN or wired LAN.
 - ▶ **Connecting to a Wireless LAN(P. 16)**
 - ▶ **Connecting to a Wired LAN(P. 15)**
- A port that is used for Cloud Print may be blocked by a firewall or other protection. Check whether the 5222 port is available with your computer.
- If a proxy server is used on the network, check whether the proxy settings on the machine and the server are correct. For details, contact your Network Administrator.
 - ▶ **Setting a Proxy(P. 386)**

Information about the remaining amount of toner cannot be detected properly. A non-Canon toner cartridge or a toner cartridge with the wrong name may be inserted. To use this cartridge, press [I Agree]. Source of Error

A toner cartridge with the wrong model number may be inserted, or the toner cartridge may have been damaged.

- Make sure to check the status of the inserted container, which is displayed in the area within the frame. For instructions on checking the model number of the toner cartridge, see ▶ **Replacement Parts(P. 632)** .

To continue using the toner cartridge, press <I Agree>. If you select this option, the operation of the machine is not guaranteed.

To replace the toner cartridge, press <Cancel>.

If you are not sure about the remedies, contact your local authorized Canon dealer from which you purchased the toner cartridge.

Insert the waste toner container.

The waste toner container is not Installed correctly.

- Install the waste toner container correctly.
 - ▶ **Replacing the Waste Toner Container(P. 600)**

Load paper.

Paper is not loaded in the paper drawer or the manual feed slot.

- Load the paper.
 - ▶ **Loading Paper(P. 133)**

Paper on which reports or lists can be printed is not loaded.

- Reports or lists can be printed on plain/recycled/color paper of A4 or Letter size. Load appropriate paper, and make settings for paper size and paper type.
 - ▶ **Loading Paper(P. 133)**
 - ▶ **Specifying Paper Size and Type(P. 152)**

Paper on which received documents can be printed is not loaded.

- Load appropriate paper for printing the received document, and make settings for paper size and paper type.
 - ▶ **Loading Paper(P. 133)**
 - ▶ **Specifying Paper Size and Type(P. 152)**
 - ▶ **Available Paper(P. 718)**

NOTE:

- If you print received documents on paper other than A4 or Letter size, some portions of the image may be missing or the image may be divided and printed onto several sheets.

Load staples into the stapler unit.

The staple cartridge in the stapler unit (optional) has run out of staples.

- Replace the staple cartridge.
 - ▶ **Replenishing the Staples (Optional)(P. 604)**

Memory Full (Secure Print)

Memory became full of secured documents that were not printed.

- Print the secured documents that are stored in memory.
 - ▶ **Printing via Secure Print(P. 269)**

Memory Full (Skip Error)

The memory became full of print data that could not be printed due to errors.

- Cancel printing of documents to which an error has occurred, or print the documents by selecting <Skip Error> on the screen for checking the printing status.
 - ▶ **Canceling Prints(P. 263)**

Memory Media Print is restricted.

The function that prints files in a USB memory device is disabled.

- Set <Use Print Function> in <Memory Media Settings> to <On>.
 - ▶ **Restricting the USB Print Function(P. 420)**

No reply from the destination.

A network cable may be disconnected, or there may be a problem in a switch.

- Check the status of the network cables and switches.

No response from the host.

The machine is not connected to a network correctly.

- Check the machine and network settings, and connect again.
 **Setting Up the Network Environment(P. 12)**

Paper jammed.

Paper jams.

- Remove the jammed paper, and print again (Printing may resume automatically).
 **Clearing Paper Jams(P. 678)**

Paper Settings and Loaded Size Mismatch

The paper size setting on the operation panel does not match the loaded paper size.

- Match the paper size setting specified in <Paper Settings> and the size of the paper that is actually loaded.

To use the loaded paper

Change the setting of <Paper Settings> to match the loaded paper size.

 **Specifying Paper Size and Type(P. 152)**

NOTE:

- If printing from a computer, check whether the paper size setting in the printer driver matches the loaded paper size.

To load paper without changing the settings

Load the paper with the size that is set to <Paper Settings>.

 **Loading Paper(P. 133)**

- Check that the paper guides in the paper drawer are set in the correct position.
 **Loading Paper(P. 133)**

Printing is restricted.

Printing is disabled in the Department ID Management.

- Log in with a Department ID for which printing is not disabled. For the Department ID and PIN, contact your Administrator.

▶ **Setting the Department ID Management(P. 364)**

Remote scanning is restricted.

Scanning that is operated by using a computer is disabled in the Department ID Management.

- Log in to the Remote UI in System Manager Mode, display the edit screen of Department ID Management, and select the [Allow Scan Jobs with Unknown IDs] check box.
- ▶ **Setting the Department ID Management(P. 364)**

Replace the waste toner container.

Cannot print because the waste toner container is full.

- Replace the waste toner container.
- ▶ **Replacing the Waste Toner Container(P. 600)**

Replace toner cartridge.

Cannot print because the toner has run out.

- Replace the toner cartridge with a new toner cartridge for the machine.
- ▶ **Replacing the Toner Cartridge(P. 596)**

Scanning is restricted.

Scanning is disabled in the Department ID Management.

- Log in with a Department ID for which scanning is not disabled. For the Department ID and PIN, contact your Administrator.
- ▶ **Setting the Department ID Management(P. 364)**

Set the correct authentication information.

The client authentication information (key and certificate, user name and password, or CA certificate) is not set correctly.

- Check the specified authentication method and authentication information (key and certificate, user name and password, and CA certificate).
- ▶ **Configuring IEEE 802.1X Authentication Settings(P. 406)**

Set the information necessary for authentication.

The IEEE 802.1X authentication has not been configured correctly.

- Configure the IEEE 802.1X correctly from the Remote UI.

▶ **Configuring IEEE 802.1X Authentication Settings(P. 406)**

Specifying and registering new destinations is restricted.

Only destinations that are registered in the Address Book can be specified to send a fax or e-mail.

- To enter a new destination with the operation panel, or add or edit it in the Address Book, you need to set <Restrict New Destinations> to <Off>. For more information, contact your Administrator.
- ▶ **Restricting New Destinations that Can Be Specified(P. 415)**

The authentication server certificate has expired.

The server certificate sent from the RADIUS server has expired.

- Check the valid period of the server certificate on the RADIUS server.
- ▶ **Configuring IEEE 802.1X Authentication Settings(P. 406)**

The authentication server certificate is incorrect.

There is no CA certificate registered in the printer that is compatible with the authentication server certificate.

- Check that there is a CA certificate registered in the printer that is compatible with the authentication server certificate.
- ▶ **Configuring IEEE 802.1X Authentication Settings(P. 406)**

The computer is restricted.

Scanning that is operated on the operation panel is disabled in the Department ID Management.

- Log in to the Remote UI in System Manager Mode, display the edit screen of the corresponding Department ID, and select the [Allow Scan Jobs with Unknown IDs] check box.
- ▶ **Setting the Department ID Management(P. 364)**

The memory is full.

A fax could not be sent or received, or an original could not be scanned due to insufficient memory space.

- If a sending or printing job is queued, wait until the job is completed.
- If a received document is stored to memory, print or delete it.
- ▶ **Saving Received Documents into the Machine (Memory Reception)(P. 241)**
- If sending an original with many pages, divide it into multiple sections.
- If sending a fax, reduce the resolution to scan the original.
- ▶ **Basic Operations for Sending Faxes(P. 221)**
- If scanning, change the file format to reduce its file size.
- ▶ **Basic Operations for Scanning Originals(P. 286)**

A scanned original could not be stored to a USB memory device due to insufficient memory space.

- Delete unnecessary data to free space in the USB memory device, or connect a different USB memory device.
- ▶ **Connecting a USB Memory Device(P. 99)**

The memory is full. Enter the original type settings again.

An original could not be scanned because memory became full during copying.

- Set <Original Type> to <Text/Photo/Map (Speed)>, and copy.
- ▶ **Selecting the Type of Original for Copying(P. 203)**

The memory is full. Scanning will be canceled. Do you want to print?

An original could not be scanned due to insufficient memory space.

- Select whether to print the pages that were scanned or cancel the job.
- Copy the original in two or more parts.

Not all of the pages could be scanned during sorting and copying.

- Select whether to print the pages that were scanned or cancel the job.
- If this is a copy job, either copy the original in two or more parts or change the <Original Type> setting to <Text/Photo/Map> and then copy the original.
- ▶ **Selecting the Type of Original for Copying(P. 203)**

The number of entered characters is incorrect or invalid characters are used.

The network key (the WPA/WPA2-PSK or WEP key) of a wireless router is not entered correctly.

- Check the network key (the WPA/WPA2-PSK or WEP key) of the wireless router, and set it to the machine again. For more information about how to check the network key, see the instruction manuals for your networking devices or contact your manufacturer.
- ▶ **Checking the SSID and Network Key(P. 28)**
- ▶ **Setting Up Connection by Selecting a Wireless Router(P. 22)**
- ▶ **Setting Up Connection by Specifying Detailed Settings(P. 25)**

The paper size/type combination is invalid.

The paper settings in the multi-purpose tray differ from the paper that is loaded.

- Check the paper settings on the paper information in <Paper Settings>. If the paper settings are incorrect, match them with the paper size and type of the paper that is loaded. Paper settings can be specified for all the paper sizes and types set in the multi-purpose tray in <Paper Settings>.
- ▶ **Specifying Paper Size and Type in the Multi-Purpose Tray(P. 156)**

The USB memory is restricted.

The function that stores a scanned original to a USB memory device is disabled.

- Set <Use Scan Function> to <On>.
- ▶ **Restricting the Scan to USB Function(P. 420)**

The WEP key is not set correctly. Check the WEP settings.

The network key (the WEP key) of a wireless router to be connected is not set to the machine correctly.

- Check the network key (the WEP key) of the wireless router, and set it to the machine again.
- ▶ **Checking the SSID and Network Key(P. 28)**
- ▶ **Setting Up Connection by Selecting a Wireless Router(P. 22)**
- ▶ **Setting Up Connection by Specifying Detailed Settings(P. 25)**

The authentication method of the machine is set to <Shared Key>, but that of the wireless router is set to "Open System."

- Connect again by selecting a wireless router or by manually changing the WEP authentication method to <Open System>.
- ▶ **Setting Up Connection by Selecting a Wireless Router(P. 22)**
- ▶ **Setting Up Connection by Specifying Detailed Settings(P. 25)**
- Change the WEP authentication method to "Shared Key" at the wireless router, and connect again. For more information about how to change, see the instruction manuals for your networking devices or contact your manufacturer.

Toner low. (Rplct. not yet needed.)

Toner is running out, and the machine will soon not be able to print.

- Prepare a new toner cartridge before the toner runs out.

Use Remote UI to set the information necessary for authentication.

The IEEE 802.1X settings are incorrect.

- Check whether [Login Name] is set correctly.
- Check whether the [Use TLS], [Use TTLS], or [Use PEAP] check box is selected.
- If using TLS, check whether a "key and certificate" is registered.
- If using TTLS or PEAP, check whether a user name and password are set correctly.
- ▶ **Configuring IEEE 802.1X Authentication Settings(P. 406)**

Countermeasures for Each Error Code

19YU-0FS

If an error occurs such as when printing is not successful or when you cannot send or receive a fax or scanned original, the corresponding error code is displayed in a report or in the job log screen as a three-digit number. Check the following to find out causes and solutions for each error code. For how to print an error report and information in the report, see [▶Printing Reports and Lists\(P. 628\)](#) . For details of the job log screen, see [▶<Status Monitor> Screen\(P. 118\)](#) .

#001

An original jams in the feeder.

- Remove the jammed original.
- ▶**Paper Jams in the Feeder(P. 681)**

#003

A fax could not be sent or received due to its large data size.

- When sending a fax: Reduce the resolution, and scan the original.
- ▶**Basic Operations for Sending Faxes(P. 221)**
- When receiving a fax: Ask the sender to divide the original into multiple sections or reduce the resolution before sending.

#005

A fax could not be sent because the recipient's machine did not respond within 35 seconds.

- When the recipient's machine is turned OFF or the line is busy, a fax may not be sent. Ask the recipient to check the machine status. When sending the fax overseas, insert pauses in the fax number.
- ▶**Basic Operations for Sending Faxes(P. 221)**

#012

A fax could not be sent because the recipient's machine ran out of paper.

- Ask the recipient to reload the paper.

#018

A fax could not be sent since the recipient's machine did not respond because the line was busy or for other reasons.

- When the recipient's machine is turned OFF or the line is busy, a fax may not be sent. Ask the recipient to check the machine status. When sending the fax overseas, insert pauses in the fax number.
▶Basic Operations for Sending Faxes(P. 221)

#022

Sending of a fax from a computer is disabled.

- To send a fax from a computer, you need to set <Allow Fax Driver TX> to <On>. For more information, contact your Administrator.
▶Restricting Fax Sending from a Computer(P. 417)

A fax could not be forwarded because the specified destination was deleted from the Address Book.

- Register the forwarding destination again. If the documents that failed to be forwarded remain in memory, you can forward it again.
▶Registering Destinations(P. 180)
▶Printing/Resending/Deleting Documents that Failed to be Forwarded(P. 243)

#037

A fax could not be sent because the memory is full.

- If a job queued, wait until the job is completed.
- If a received document is stored to memory, print or delete it.
▶Saving Received Documents into the Machine (Memory Reception)(P. 241)
- If sending an original with many pages, divide it into multiple sections.
- If sending a fax, reduce the resolution to scan the original.
▶Basic Operations for Sending Faxes(P. 221)

The file is too large to print.

- Optimize the file to reduce the size or divide the file into sections, and then proceed to printing again.
- Try printing from the printer driver. This may work well.

#099

An operation that caused a job to be canceled has been performed.

- When you cancel a job, this error code is displayed, but this is not abnormal. Print, send, or receive documents again as necessary.

#401

A scanned original could not be stored to a USB memory device due to insufficient memory space.

- Delete unnecessary data to free space in the USB memory device, or connect a different USB memory device.
- ▶ **Connecting a USB Memory Device(P. 99)**

#406

A scanned document could not be stored to a USB memory device due to an error.

- Remove the USB memory device, and connect it again.
- ▶ **Connecting a USB Memory Device(P. 99)**
- Reduce the number of originals to scan.

#408

Read failed because the USB memory device was removed while data was being read from it.

- Check that the USB memory device has not been removed and then read the data again.
- ▶ **Connecting a USB Memory Device(P. 99)**
- ▶ **Printing from a USB Memory Device (Memory Media Print)(P. 272)**

The connected USB memory device is using an unsupported format.

- Check that the USB memory device is using a format supported by this machine.
- ▶ **Connecting a USB Memory Device(P. 99)**

#701

Authentication failed because an incorrect Department ID or PIN was entered when the Department ID Management was activated.

- Enter the correct Department ID and PIN.

Continuing operating without entering a Department ID was attempted even though unknown-ID jobs (functions that permit operations without a Department ID and PIN) were disabled in the Department ID Management.

- Enable unknown-ID jobs in System Manager Mode in Remote UI.
- ▶ **Blocking Jobs When Department ID Is Unknown(P. 368)**

#703

Data could not be written because the memory space that was allocated for images was full when sending an e-mail/I-Fax or storing to a shared folder/FTP server.

- If another sending document is queued, wait for a while until it is completed, and send again.

- Divide the document into multiple sections before sending.
- Delete the documents that are stored in memory.
- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON.

#751

**The FTP server has not been started up or a network connection has been cut.
(Failure to connect to the destination is sometimes caused by a disconnection en route.)**

- Check the destination.
- Check the network status.
▶ **Viewing Network Settings(P. 36)**

The IP address was not set correctly.

- Check <TCP/IP Settings>.
▶ **Setting IP Addresses(P. 29)**

#752

E-mail sending or I-Fax sending/receiving was impossible because an incorrect SMTP/POP3 server name was set.

- Check the SMTP/POP3 server name, and correct the setting.
▶ **Specifying E-Mail Settings(P. 319)**
▶ **Configuring E-Mail/I-Fax Communication Settings(P. 85)**

E-mail sending or I-Fax sending/receiving was impossible because an incorrect domain name was set.

- Check the domain name, and correct the setting.
▶ **Configuring DNS(P. 54)**

E-mail sending or I-Fax sending/receiving was impossible because the machine was not connected to a network correctly.

- Check whether the machine is properly installed and correctly connected to the network.
▶ **Settings Problems(P. 638)**

#753

Scanned data could not be sent as e-mail, not sent/received as I-Fax, or not stored in the shared folder/FTP server because the LAN cable is disconnected.

- Check whether the LAN cable is connected correctly.
▶ **Connecting to a Wired LAN(P. 15)**

#755

Scanned data could not be sent as e-mail or I-Fax nor stored in the shared folder or FTP server because TCP/IP was not working correctly.

- Check <TCP/IP Settings>, and set correctly.

▶<Network>(P. 461)

An IP address is not set.

- Set the IP address correctly.
- ▶**Setting IP Addresses(P. 29)**

The machine cannot communicate with devices on a network immediately after the machine starts up because the waiting time for the start of the communication is set.

- The machine cannot start communicating immediately after it is turned ON. Wait until the set time for <Waiting Time for Connection at Startup> passes after turning ON the machine, and send again.
- ▶**Setting a Wait Time for Connecting to a Network(P. 53)**

#766

The certificate has expired.

- Update the certificate or use a certificate that has not expired.
- Check that the <Current Date/Time Settings> are correct.
- ▶**Setting the Date/Time(P. 10)**

#801

When communicating with an SMTP server to send an e-mail/I-Fax, a timeout error occurred from the server.

- Check whether SMTP is running on the network correctly.
- Check whether the machine is properly installed and correctly connected to the network.
- ▶**Settings Problems(P. 638)**

When communicating with the SMTP server, an error returned from the server.

- Check whether the SMTP server is set correctly.

A destination is not set correctly.

- Check whether the destination is set correctly.

When storing a scanned original into the shared folder, an error occurred from the folder.

- Check whether the shared folder and the computer that has the shared folder are running correctly.

The incorrect folder name or password was specified when storing to the shared folder.

- Check the destination settings.

#802

The SMTP/POP3/FTP server name is not set correctly.

- Set the SMTP/POP3/FTP server name correctly.
- ▶**Specifying E-Mail Settings(P. 319)**
- ▶**Configuring E-Mail/I-Fax Communication Settings(P. 85)**
- ▶**Registering Destinations from Remote UI(P. 437)**

#804

No access privileges to access the shared folder/FTP server are granted.

- Assign the privilege for writing data to the storage folder to the sender (user name registered in the destination). For details, contact your Network Administrator.

The incorrect folder name was specified when storing to the shared folder/FTP server.

- Check the destination settings.

#806

When storing data to a shared folder/FTP server, an incorrect user name or password was specified.

- The same user name and password as those registered in a shared folder/FTP server must be registered in the Address Book.

▶ **Registering Destinations from Remote UI(P. 437)**

When sending an e-mail/I-Fax, an incorrect destination was specified.

- Enter the correct e-mail address, and send the message again. If the destination that was registered in the Address Book was used, check whether the e-mail address is correct.

▶ **Registering Destinations(P. 180)**

#808

An error or timeout occurred on the FTP server.

- Check the FTP server settings.
- ▶ **Registering Destinations from Remote UI(P. 437)**

#810

An error has been returned from the POP3 server when sending an e-mail or sending/receiving I-Fax.

- Check whether the POP3 server is set correctly.
- Check whether your mail server and network are running correctly. For more information, contact your Network Administrator.

#813

The login name or the password that is used on the POP3 server is not set correctly.

- Correctly enter the login name or the password that is used on the POP3 server.

#816

The number of print pages has reached the upper limit specified for the department.

- To reset the print page count, click [Clear Count] on the [Department ID Management] page of Remote UI.
 **Registering/Editing Department ID and PIN(P. 364)**

#818

The received data is in a file format that the machine cannot print.

- Contact the other party and ask them to resend the data in a different file format.

#819

The received data is not supported (incorrect MIME information).

- Contact the other party and ask them to check the settings and then resend the data.

#820

The received data is not supported (incorrect BASE64 or uuencode information).

- Contact the other party and ask them to check the settings and then resend the data.

#821

The received data is not supported (a TIFF analysis error occurred).

- Contact the other party and ask them to check the settings and then resend the data.

#822

A file in a USB memory device could not be printed because the format of the file is not supported.

- Check the supported file formats and save the file again.
 **Printer Functions(P. 733)**

#827

The received data is not supported (includes unsupported MIME information).

- Contact the other party and ask them to check the settings and then resend the data.

#829

The received data exceeds the maximum receivable size.

- In fax reception, the machine deletes the data for page 1,000 onwards and either prints the first 999 pages or holds them in memory. Get the sender to resend page 1,000 onwards.
- In I-Fax reception, the machine cannot receive the e-mail if its size exceeds 24 MB. Ask the sender to reduce the size of the e-mail down to under 24 MB and try resending.

#839

A user name and password that are used for SMTP authentication are not set correctly.

- Set the user name and password correctly.
 - ▶ **Specifying E-Mail Settings(P. 319)**
 - ▶ **Configuring E-Mail/I-Fax Communication Settings(P. 85)**

#841

When sending an e-mail/I-Fax, an encryption algorithm that is common to the mail server is not present.

- Clear the [Use TLS for SMTP]/[Use TLS for POP] check box.
 - ▶ **Configuring E-Mail/I-Fax Communication Settings(P. 85)**
- Add the common encryption algorithm to the mail server settings.

A TLS server certificate verification error has occurred during communication with the SMTP server.

- Check that the CA certificate that signed the TLS server certificate on the SMTP server side is registered to the machine by using the Remote UI.
- Check that the TLS server certificate on the SMTP server side is valid.
- Check that the TLS server certificate is not a self-signed one.

#844

TLS encrypted communication to a POP3 server failed when sending an e-mail with POP before SMTP.

- Check the TLS encrypted communication settings in the POP3 server.
- Clear the [Use TLS for POP] check box. If the problem persists, clear the [Use POP Authentication Before Sending] check box, and set the communication setting to a setting other than POP before SMTP.
 - ▶ **Configuring E-Mail/I-Fax Communication Settings(P. 85)**

When verifying a TLS server certificate to communicate to the POP3 server, a verification error occurred.

- Check that the CA certificate that signed the TLS server certificate on the POP3 server side is registered to the machine by using the Remote UI.
- Check that the TLS server certificate on the POP3 server side is valid.
- Check that the TLS server certificate is not a self-signed certificate.

#846

An e-mail or I-Fax could not be sent due to a POP authentication failure.

- Check the setting, and try again.
 ▶ **Configuring E-Mail/I-Fax Communication Settings(P. 85)**

#852

The machine turns OFF for some reason.

- Check whether the power plug is inserted into an outlet firmly.

#853

A document could not be printed because its data size exceeded the machine's upper processing capability.

- The machine may not be able to print documents with many pages. Reduce the number of pages per printing, or print when no print job is queued or no document is being printed. If you are still unable to print, check the document data for any defects.

Printing was canceled from the computer.

- If you cancel an operation when the print data is being sent to the machine from a computer, this error code is displayed, but this is not abnormal. Print again as necessary.

A secured document that was left unprinted was deleted.

- If the secured document is not printed within a specific period of time (30 minutes by default), it is deleted from memory. Send the secured document again, and print it within the period.
 ▶ **Printing via Secure Print(P. 269)**

Printing using Secure Print was attempted when Secure Print was restricted.

- When <Use Secure Print> is set to <Off>, you cannot use Secure Print. Set the setting to <On> and print again.
 ▶ **Printing via Secure Print(P. 269)**
- Print without using Secure Print.
 ▶ **Basic Printing Operations(P. 261)**

You tried to print a file that is either corrupted or not supported.

- Check the file and try again.
 ▶ **Basic Printing Operations(P. 261)**

Password protected PDF files could not be printed.

- Enter the correct password for the PDF file.
 ▶ **Printing from a USB Memory Device (Memory Media Print)(P. 272)**

#861

A document could not be printed because a printer driver that was not intended for this machine was used.

- Print again by using the printer driver for this machine.
 **Basic Printing Operations(P. 261)**

A document could not be printed due to a defect in its data.

- Check the document data for any defects.

#862

Settings are included which are not supported, cannot be combined, or otherwise exceed the limits of the machine.

- Check the job settings.

#863

An error occurred when printing from a computer.

- Turn OFF the machine, wait for at least 10 seconds, and turn it back ON. After the restart is complete, try printing again.

#995

A document waiting to be sent or received was canceled.

- Sent or received the document again as necessary.

Clearing Paper Jams

19YU-0C1

If a paper jam occurs, a message, the location of the paper jam, and the procedure for clearing it are displayed on the screen. If you do not know how to clear the paper jam from viewing the screen, see **Paper Jam Locations(P. 679)** to clear the paper jam. For information on cautions when clearing paper jams, see "Important Safety Instructions" in Getting Started and **Optional Equipment(P. 742)** .

■ Cautions When Clearing Paper Jams

Do not turn the power OFF.

- Data being printed is erased when you turn the power OFF. Take particular care when receiving a fax.

When the paper is torn

- Remove all of the paper to ensure that pieces do not remain.

Do not forcibly remove jammed originals and paper from the machine.

- Forcibly removing them may cause damage to the parts of the machine, etc. If you cannot remove the paper, contact your local authorized Canon dealer.

When all paper jams are cleared

- Immediately remove your hands from the machine and optional equipment so that your clothing and hands do not get caught in the rollers.

Take care when handling optional equipment.

- Copies and prints may be output to optional equipment while you are clearing paper jams. Take care when handling optional equipment that is installed.

■ If Paper Jams Frequently Occur

If paper jams frequently occur even though there are no problems with the machine and its optional equipment, check the following.

Are the paper guides misaligned?

- Match the paper guides with the paper loaded in the paper source.

Do sheets of paper overlap when being fed?

- If paper jams occur due to overlapping of sheets of paper when being fed, reload the paper by changing the orientation.

Is the paper type correct?

- Press <Status Monitor> ► <Device Information> ► <Paper Information> and check the paper type.

- If the paper loaded in a paper source differs from the paper type setting, see **Loading Paper(P. 133)** to set the paper type again.
- If you use heavy paper or coated paper by loading it in the multi-purpose tray, paper jams may occur due to the grain direction. In this case, changing the paper orientation (portrait/landscape) may prevent paper jamming.

Do pieces of paper remain in the machine?

- Pieces of paper may remain in the machine after removing a paper jam. Open the location where the paper was jammed, and remove any pieces of paper (do not forcibly pull the paper when removing it).

Paper Jam Locations

For information on the paper jam locations and the method for clearing paper jams, see the following diagram and references.

- 1** Feeder ▶ **Paper Jams in the Feeder(P. 681)**
- 2** Inside the main unit ▶ **Paper Jams in the Main Unit(P. 684)**
- 3** Paper drawer ▶ **Paper Jams in a Paper Source(P. 689)**
- 4** Inner Finisher ▶ **Paper Jams in the Inner Finisher(P. 694)**

NOTE

- Paper may not actually be jammed in the location you check. Even in this case, follow the instructions on the screen to check all the locations.
- The screen indicating that there is a paper jam is repeatedly displayed until you clear the paper jam.
- If you press <Close> on the screen indicating that there is a paper jam, you may be able to continue to perform operations and specify settings without immediately removing the paper jam.
- Do not remove paper from a location other than that displayed as a paper jam location on the screen. This may cause paper jams in other locations or missing pages in output documents.

Paper Jams in the Feeder

19YU-0C2

Check the paper jam location on the screen, and follow the procedure below to remove the original.

NOTE

- The feeder is optional for imageRUNNER C3025.

1 Remove any originals from the original supply tray.

2 Check whether an original is jammed in the feeder cover.

1 Pull the lever to open the feeder cover.

2 If an original is jammed, gently pull it out in the direction of the arrow.

3 Check whether an original is jammed in the original output tray.

- 1 Turn the green knob counterclockwise.

- 2 If an original is jammed, gently pull it out in the direction of the arrow.

4 Check whether an original is jammed inside the inner cover of the feeder.

- 1 Open the inner cover of the feeder.

- 2 If an original is jammed, gently pull it out in the direction of the arrow.

3 Close the inner cover of the feeder.

5 After removing all jammed originals, close the feeder cover.

6 Lift up the feeder, and check whether there is a jammed original.

1 Lift up the feeder, and check the position indicated by **a**.

2 If an original is jammed, gently pull it out in the direction of the arrow.

7 Return the feeder to its original position.

- Continue following the instructions on the screen to proceed with the interrupted operation or continue clearing paper jams.

Paper Jams in the Main Unit

19YU-0C3

Check the paper jam location on the screen, and follow the procedure below to remove the paper.

NOTE

Confirm before handling

- Before starting the operation to clear paper jams, confirm that the covers and paper drawers of the machine and optional equipment are closed.

1 Open the right cover of the main unit.

2 Check whether paper is jammed in the output tray of the main unit.

- If paper is jammed, gently pull it out in the direction of the arrow.

NOTE:

When the machine is equipped with an inner shift sorter (optional)

- If paper is jammed, gently pull it out in the direction of the arrow. If the location of the paper jam is toward the main unit, do not try to pull out the paper forcibly but make access to the paper from the side of the main unit's right cover.

3 Check whether paper is jammed in the output area or reversing unit.

- If paper is jammed, gently pull it out in the direction of the arrow.

4 Check whether paper is jammed in the fixing assembly.

- 1** Open the upper cover of the fixing assembly.

- 2** If paper is jammed, gently pull it out in the direction of the arrow.

NOTE:

- If you cannot remove the paper via the top side of the fixing assembly, gently pull it out via the bottom side of the assembly.

- 3 Return the upper cover of the fixing assembly back to position.

5 Check whether paper is jammed in the output area on the side of the main unit's right cover.

- If paper is jammed, gently pull it out in the direction of the arrow.

6 Check whether paper is jammed in the duplexing unit.

- 1 Lift the duplex unit.

- 2** If paper is jammed in the upper area of the duplexing unit, gently pull it out in the direction of the arrow.

- 3** Return the duplex unit back into position.

- 4** If paper is jammed in the lower area of the duplexing unit, gently pull it out in the direction of the arrow.

7 Check whether paper is jammed around the paper drawer 1.

- If paper is jammed, gently pull it out in the direction of the arrow.

8 Gently close the right cover of the main unit until they click.

- Continue following the instructions on the screen to proceed with the interrupted operation or continue clearing paper jams.

Paper Jams in a Paper Source

19YU-0C4

Check the paper jam location on the screen, and follow the procedure below to remove the paper.

- ▶ Clearing Paper Jams in Paper Drawers 1 (P. 689)
- ▶ Clearing Paper Jams in Paper Drawers 2 (P. 689)
- ▶ Clearing Paper Jams in Paper Drawers 3 and 4 (Optional) (P. 691)

NOTE

Confirm before handling

- Before starting the operation to clear paper jams, confirm that the covers and paper drawers of the machine and optional equipment are closed.

Clearing Paper Jams in Paper Drawers 1

1 Check whether paper is jammed in the paper drawer 1.

- 1 Open the paper drawer.
- 2 If paper is jammed, gently pull it out in the direction of the arrow.

- 3 Push the paper drawer in until it clicks.

IMPORTANT:

- When closing the paper drawer, be careful not to get your fingers caught, as this may result in personal injury.
- Continue following the instructions on the screen to proceed with the interrupted operation or continue clearing paper jams.

Clearing Paper Jams in Paper Drawers 2

1 Check whether paper is jammed in the upper-right cover of the paper drawer.

- 1 Open the upper-right cover of the paper drawer.

- 2 If paper is jammed, gently pull it out in the direction of the arrow.

- 3 Gently close the upper-right cover of the paper drawer until it clicks.

2 Check whether paper is jammed in the paper drawer.

- 1 Open the paper drawer.

- 2 If paper is jammed, gently pull it out in the direction of the arrow.

- 3 Push the paper drawer in until it clicks.

IMPORTANT:

- When closing the paper drawer, be careful not to get your fingers caught, as this may result in personal injury.
- Continue following the instructions on the screen to proceed with the interrupted operation or continue clearing paper jams.

Clearing Paper Jams in Paper Drawers 3 and 4 (Optional)

1 Check whether paper is jammed in the upper-right cover or lower-right cover of the paper drawer.

- 1 Open the upper-right cover and lower-right cover of the paper drawer.

- 2 If paper is jammed, gently pull it out in the direction of the arrow.

- 3 Gently close the upper-right cover and lower-right cover of the paper drawer until they click.

2 Check whether paper is jammed in the paper drawer.

- 1 Open the paper drawer.

- 2 If paper is jammed, gently pull it out in the direction of the arrow.

- 3 Push the paper drawer in until it clicks.

IMPORTANT:

- When closing the paper drawer, be careful not to get your fingers caught, as this may result in personal injury.
- Continue following the instructions on the screen to proceed with the interrupted operation or continue clearing paper jams.

Paper Jams in a Finisher (Optional)

19YU-0C5

This section describes the method for clearing paper jams in a finisher. Check the paper jam location on the screen, and follow the procedure in the reference indicated below to remove the paper.

🔴 Paper Jams in the Inner Finisher(P. 694)

NOTE

Confirm before handling

- Remove any paper loaded in a tray.
- Before starting the operation to clear paper jams, confirm that the covers and paper drawers of the machine and optional equipment are closed.

Paper Jams in the Inner Finisher

19YU-0C6

1 Open the right cover of the main unit.

2 Check whether paper is jammed in output tray of the finisher.

- If paper is jammed, gently pull it out in the direction of the arrow.

NOTE:

- When you are using the Staple mode, do not remove the current stack of printouts from the output tray before it is stapled. After the paper jam clearing operation is finished, the following printouts will add to the current stack.

3 Check whether paper is jammed in the output area or reversing unit.

- If paper is jammed, gently pull it out in the direction of the arrow.

4 Check whether paper is jammed in the inner finisher entrance.

- 1 Lift up the guide at the entrance.

- 2 If paper is jammed, gently pull it out in the direction of the arrow.

- 3 Return the guide to its original position.

5 Gently close the right cover of the main unit until they click.

- Continue following the instructions on the screen to proceed with the interrupted operation or continue clearing paper jams.

Clearing Staple Jams (Optional)

19YU-0C7

If a staple jam occurs, a message, the location of the staple jam, and the procedure for clearing it are displayed on the screen. Check the staple jam location on the screen, and follow the procedure in the reference indicated below to remove the staple. For information on cautions when clearing staple jams, see "Important Safety Instructions" in Getting Started.

▶ Staple Jams in the Inner Finisher(P. 697)

IMPORTANT

- Copies and prints may be output to optional equipment while you are clearing staple jams. Take care when handling optional equipment that is installed.

NOTE

Confirm before handling

- Before starting the operation to clear staple jams, confirm that the covers and paper drawers of the machine and optional equipment are closed.

Staple Jams in the Inner Finisher

19YU-0C8

1 Check whether paper is jammed in output tray of the finisher.

- If paper is jammed, gently pull it out in the direction of the arrow.

NOTE:

- When you are using the Staple mode, do not remove the current stack of printouts from the output tray before it is stapled. After the paper jam clearing operation is finished, the following printouts will add to the current stack.

2 Open the front cover of the finisher.

3 Pull out the staple cartridge.

- Pull down the green knob on the staple cartridge to disengage the lock, and lift up the cartridge slightly while pulling it straight out.

4 Remove any jammed staples from the staple cartridge.

- 1** Lift up the knob on the staple cartridge.

- 2** Remove all jammed staples and exposed staples.

- 3** Return the knob on the staple cartridge to its original position.

5 Hold the green handle on the staple cartridge and push in the cartridge as far as it will go.

6 Close the front cover of the finisher.

- The finisher may automatically perform dry stapling to perform staple repositioning.

Appendix

19YU-0HK

This chapter contains technical specifications of this machine, instructions on how to use the User's Guide, disclaimers, copyright information, and other important information for customers.

■ Machine Specifications

See the following section(s) when you want to check the specifications of the main unit and optional equipment, network environment, print function, and so on.

▶ Specifications(P. 714)

■ Using Optional Equipment

See the following section(s) when you want to check what options are available to use this machine more conveniently and more effectively.

▶ Options(P. 740)

■ Referencing the Manual of This Machine

See the first of the following sections when you want to be sure of the kinds of the manuals describing the functions of the machine and how to operate the machine. When you want to know how to read and use the User's Guide (this manual), see the second section.

▶ Manuals and Their Contents(P. 757)

▶ Using User's Guide(P. 758)

■ Others

See the following section(s) when you want to get useful information, and check the disclaimers and copyright information.

- ▶ **Third Party Software(P. 704)**
- ▶ **Feature Highlights(P. 705)**
- ▶ **Basic Windows Operations(P. 764)**
- ▶ **Notice(P. 771)**

Third Party Software

19YU-0CA

For information related to third-party software, click the following icon(s).

Feature Highlights

19YU-0FW

This section describes tips for leveraging the features of the machine by category. You can make use of the features according to your intended purposes and operating environment.

- ▶ **Going Green and Saving Money(P. 706)**
- ▶ **Improving Efficiency(P. 708)**
- ▶ **Going Digital(P. 710)**
- ▶ **So Much More(P. 712)**

Going Green and Saving Money

19YU-0H4

There are lots of ways to cut back on paper, toner, power, and expenses.

2-Sided Printing

You can use 2-sided printing for copies, print jobs sent from your computer, and even incoming faxes. Because you'll only be using half the paper you would otherwise, you can cut your paper costs in half. To save even more, combine 2-sided printing with N on 1 printing of multiple pages on one sheet of paper. You can print up to 32 pages on a single sheet, which is both economical and environmentally friendly.

▶ **Basic Copy Operations(P. 193)**

▶ **Printing from a Computer(P. 261)**

▶ **<Receive/Forward>(P. 552)** ▶ **<Fax Settings>** ▶ **<Print on Both Sides>**

▶ **<Receive/Forward>(P. 552)** ▶ **<I-Fax Settings>** ▶ **<Print on Both Sides>**

Print Multiple Pages on a Single Sheet

To really start saving paper, shrink multiple pages onto a single sheet - 2 or 4 pages for copies, and up to 16 pages for print jobs sent from your computer. This is even more effective when used together with 2-sided printing.

▶ **Copying Multiple Documents onto One Sheet (N on 1)(P. 209)**

▶ **Printing from a Computer(P. 261)**

Sleep Mode

Paperless Faxing

For saving energy and money, a sleep mode that powers down a machine when nobody is using it has become an essential feature. This machine will enter sleep mode automatically, and can also be put to sleep whenever you want. Press  once to put the machine to sleep. Press it again to instantly wake the machine back into action.

▶ **Entering Sleep Mode(P. 177)**

Assume you need paper to fax? Those old paper printouts you always make are a thing of the past. Send documents by fax just as they are, created on your computer. It's paperless, so it's fast. And, received documents are first stored in memory, allowing you to print out only those needed and eliminating worry about paper getting used on direct mailings, etc.

▶ **Sending Faxes from Your Computer (PC Fax)(P. 247)**

▶ **Saving Received Documents into the Machine (Memory Reception)(P. 241)**

Improving Efficiency

19YU-0FX

Here are some simple operations that can make complicated tasks more efficient.

Address Book

Entering fax and e-mail addresses in the Address Book saves you the inconvenience of entering them number-by-number, letter-by-letter every time you have something to send. Display the addresses you use most frequently with the <Favorites> feature to quickly and easily send what you need to the people who need it. You can save your Address Book data on your computer and feel secure knowing that your important contact information is backed up.

- ▶ **Registering Destinations(P. 180)**
- ▶ **Registering Destinations from Remote UI(P. 437)**
- ▶ **Basic Operations for Sending Faxes(P. 221)**
- ▶ **Basic Operations for Scanning Originals(P. 286)**
- ▶ **Importing/Exporting the Setting Data(P. 441)**

Frequently used Settings in One Touch

Always making 2-sided copies. Always scanning in the same format and to the same save destination. Frequently used settings like these can be registered to a single shortcut button. This is convenient by allowing you to specify involved operations all in a single touch.

- ▶ **Registering Frequently Used Settings(P. 171)**

Print Images Right Off Your USB Memory Device

Remote Management with Remote UI

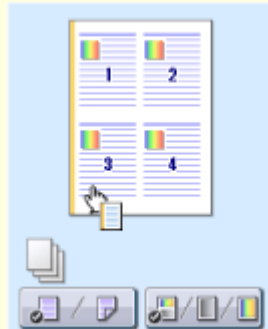

Plug a USB memory device into the machine and you can print images and documents directly, without using a computer. You can even preview JPEG and other images before you print, so there is no wasted paper. You can also scan handwritten memos, etc. and save them directly to a USB memory device. Convenient for carrying about.

▶ **Printing from a USB Memory Device (Memory Media Print)(P. 272)**

▶ **Basic Operations for Scanning Originals(P. 286)**

Remote UI lets you manage a lot from your computer, all without having to go over to the machine. Configure settings and keep an eye on the machine's status with an intuitive, easy-to-understand Web browser interface that you'll master immediately. Save your time and energy for things other than taking care of the machine.

▶ **Managing the Machine from a Computer (Remote UI)(P. 426)**

Make Print Settings Quickly with Intuitive Operation

You can easily specify the page layout as well as binding position, switching between 1-sided and 2-sided printing, etc. intuitively on the preview image in the printer driver. The simple click-operation allows you to conveniently make settings while viewing how settings are applied.

▶ **Printing from a Computer(P. 261)**

Going Digital

19YU-0FY

Digitalizing a document enables editing using a computer as well as reducing cost and time by using e-mail.

Scan and E-Mail

E-mail scanned originals without even turning on your computer. Just convert your scanned original into an e-mail attachment right from the machine. If you're one of those people who'd rather send a fax than mess around with a computer, this feature is for you.

► **Basic Operations for Scanning Originals(P. 286)**

Scan and Share

Say you've got a paper copy of a report for a company-wide meeting. Scan it, convert it, and now everyone can see it. It's saved directly in a shared folder on your network, so there's no need to print out copies and pass them out. Once you start talking about hundreds of pages of documents that everyone needs, there's just no other way to go.

► **Basic Operations for Scanning Originals(P. 286)**

Scan Only What You Need

Searchable PDFs

What if you're scanning a whole page of a newspaper but all you're really interested in is a headline and a photo? Use ScanGear MF. You can select what you want from a preview, and then have the scanner disregard the rest. Otherwise you'll have to use an editing program to crop out everything you don't need.

► **Using ScanGear MF(P. 325)**

IMPORTANT

- Using your product to scan, print or otherwise reproduce certain documents, and the use of such images as scanned, printed or otherwise reproduced by your product, may be prohibited by law and may result in criminal and/or civil liability. If you are uncertain about the legality of using your product to scan, print or otherwise reproduce any particular document, and/or of the use of the images scanned, printed or otherwise reproduced, you should consult in advance with your legal advisor for guidance.

Searching of text in a PDF can be done with a "searchable PDF." By scanning an original with both text and images, text portions are converted by OCR into text data. In addition to being able to search for text information, you can also copy required portions into an Excel spreadsheet or Word document in Microsoft Office. Eliminate the need to type in customer data, addresses, etc. from scratch.

► **Basic Operations for Scanning Originals(P. 286)**

► **Using Your Computer to Scan (Remote Scan) (P. 322)**

Add Images to a Work in Progress

Some applications work with the machine to let you easily import scanned images directly into documents you're working on. This way you can skip the steps of opening a separate application just for receiving the scanned images and then exporting them to the application you're really using.

► **Scanning Documents from an Application(P. 323)**

So Much More

19YU-0H0

There are a variety of features for whatever you need to do - at home, in the office, or even on the road.

Using a smartphone/tablet

At times such as when you want to quickly print out a proposal you completed on a tablet while travelling to a business destination, or scan materials handed out at a meeting using a smartphone, Canon PRINT Business comes in handy. Even in environments without a wireless LAN router, you can connect to the machine with a mobile device wirelessly and directly. PCless, quick, and easy! An even broader range of possibilities for work/play with functionality made for this age of speed.

► **Linking with Mobile Devices(P. 332)**

Easy Printing with Google Cloud Print

Hook up to Google Cloud Print with your laptop or cell phone, send your data, and out come your printed documents. With this machine, Google Cloud Print, and your mobile device, print whenever you want from wherever you want.

► **Using Google Cloud Print(P. 354)**

Keep Your Printouts Private

Go Wireless

Normally, when you print something from your computer, it comes out of the printer right away. However, if you have sensitive documents, this may not be what you want. Just use secure printing and no one will be able to print your documents without entering your password on the machine's operation panel. Don't let your confidential documents lie exposed on the tray for everyone to see.

▶ **Printing a Document Secured by a PIN (Secure Print)(P. 268)**

No cables, easy installation, simple maintenance. If you've got a WPS wireless LAN router, bypass the settings process altogether and be ready to go before you know it. Enjoy the kind of clutter-free and easy to use document system that you can only get from wireless. Compatible with IEEE 802.11b/g/n for stress-free wireless, and also supports WEP and WPA/WPA2-PSK (TKIP/AES-CCMP) for tighter security.

▶ **Connecting to a Wireless LAN(P. 16)**

Get Faxes Wherever You Go

Never worry about missing a fax when you're out of the office. Set a forwarding destination and any fax that comes in on the machine will go right to you. Better yet, make the forwarding destination the e-mail address for your tablet or mobile.

▶ **Forwarding the Received Documents Automatically(P. 243)**

Specifications

19YU-0CK

Specifications are subject to change without notice for product improvement or future release.

■ Machine Specifications

- ▶ Main Unit(P. 715)

Maximum Occupancy Space (W x D)	imageRUNNER C3025i 978 x 1,117 mm imageRUNNER C3025 <ul style="list-style-type: none"> 978 x 1,088 mm 978 x 1,117 mm (when the DADF-AV is attached) * When the paper drawer and the multi-purpose tray is extended.
Inner Tray Capacity	250 sheets (80 g/m ²)*4

*1 Including multi-purpose tray

*2 Activation time may vary, depending on the environment and conditions under which the machine is being used.

*3 The copy speed on A4 size plain paper on one-side printing is measured during continuous copying. Copy speeds vary depending on the output resolution, and the paper type and size. Copy speeds on smaller paper sizes may be slower. Plus, the machine may experience downtime or decrease the copy speed in the middle of a continuous copy run to adjust the temperature inside the machine or maintain the optimal print quality.

*4 When A4 or smaller size paper is used.

Feeder (DADF-AV)

19YU-OCR

Original Feeding Mechanism	Automatic Document Feeder

Postcard	164 to 220 g/m ²	-	-	✓

*1 Not available when the optional Media Adjustment kit-A is attached.

*2 When the machine is equipped with the Inner Finisher-K and not with the 3 Way Unit-D, it does not support paper of 216 mm or greater in width, and the job will be canceled.

*3 You can use 100% recycled paper.

*4 The optional Media Adjustment kit-A is required.

*5 Use only A4 transparencies made especially for this machine.

*6 Use only LTR, LTRR (except for paper drawer 1), or EXEC size paper.

■ Paper Available when Copying

- Use any of the following paper when making 2-sided copies.

Paper size: 305 x 457 mm, A3, B4, A4, A4R, B5, B5R, A5, A5R, 11 x 17, LGL, LTR, LTRR, STMTR, EXEC, 8K, 16K, 16KR, Custom Size*1

Paper weight: 52 to 220 g/m²

*1 1-Sided Coated, 2-Sided Coated, Tracing, Transparency, Labels, Free size paper, and Envelope are not available for 2-sided copying.

- When paper to use for copying is Heavy 7, Custom Size, Transparency, Tracing, Labels, Postcard, or Envelope, finishing modes are not available.

■ Paper Available when Printing

- Depending on paper size and type, 2-sided printing may not be available.

Management Functions

■ Registering Department IDs

Up to 300 Department IDs can be registered.

■ Firewall Settings

- When specifying IP addresses in firewall settings, up to 16 IP addresses (or ranges of IP addresses) can be specified for both IPv4 and IPv6.
- When specifying MAC addresses in firewall settings, up to 32 MAC addresses can be specified.

■ Registration of Certificates (User Signature Certificates, Key, CA Certificates)

- The algorithms and formats of keys and certificates that can be registered are as follows.

RSA signature algorithm:	SHA-1/SHA-256/SHA-384 ^{*1} /SHA-512 ^{*1} /MD2 ^{*3} /MD5 ^{*3}
RSA public-key algorithm (key length):	RSA (512 bits ^{*3} /1024 bits/2048 bits/4096 bits ^{*3})
DSA signature algorithm:	SHA-1
DSA public-key algorithm (key length):	DSA (1024 bits/2048 bits/3072 bits)
ECDSA signature algorithm:	SHA-1/SHA-256/SHA-384/SHA-512
ECDSA public-key algorithm (key length):	ECDSA (P256/P384/P521)
Certificate format:	User Signature Certificates, Key: PKCS#12 ^{*2} CA Certificates: X.509 DER/PEM
File extension:	User Signature Certificates, Key: p12/pfx CA Certificates: cer/pem
Maximum number of registrable certificates:	Key: 5 CA Certificates: 82

^{*1} Available only when the key algorithm is 1024 bits or more.

^{*2} Available only when installed by using the Remote UI.

^{*3} Cannot be used for user signatures.

■ Definition of "Weak Encryption"

When <Prohibit Use of Weak Encrypt.> is set to <On>, the use of the following algorithms are prohibited.

Hash:	MD4, MD5, SHA-1
HMAC:	HMAC-MD5
Common key cryptosystem:	RC2, RC4, DES
Public key cryptosystem:	RSA encryption (512 bits/1024 bits), RSA signature (512 bits/1024 bits), DSA (512 bits/1024 bits), DH (512 bits/1024 bits)

NOTE

- Even when <Prohibit Weak Encrypt. Key/Cert.> is set to <On>, the hash algorithm SHA-1, which is used for signing a root certificate, can be used.

■ Log Management

- The following types of logs can be managed on the machine. Collected logs can be exported in the CSV file format.

Log Type	Number Indicated as "Log Type" in the CSV File	Description
Job Log	128	This log contains information related to the completion of copy/fax/scan/send/print jobs.
Transmission Log	128	The log contains information related to transmissions.

■ Import/Export of the Setting Data

See  **Setting Menu List(P. 449)** .

Options

19YU-0E5

The functionality of the machine can be expanded by installing options to the machine.

■ Available Options

- ▶ Optional Equipment(P. 742)
- ▶ System Options(P. 754)

■ Finding Options According to Your Purposes

To load multiple sheets of original

- ▶ Feeder(P. 103)

Paper drawers that can be installed to the machine

- ▶ FL Cassette(P. 745)

To load heavy coated paper

- ▶ Media Adjustment kit-A(P. 746)

To add paper drawers

- ▶ Cassette Feeding Unit-AP(P. 744)

To use functions such as offset and stapling

- ▶ Inner Finisher-K(P. 747)
- ▶ Inner Shift Sorter-A(P. 751)

To add an output tray

- ▶ Inner 2way Tray-J(P. 750)
- ▶ Copy Tray-J(P. 752)

To use the authentication function to manage users by department

- ▶ Copy Card Reader(P. 755)

To use a support tool when closing the feeder

- ▶ ADF Access Handle-A(P. 753)

To make space for placing originals, etc.

- Utility Tray-B

■ Handling of the Options

CAUTION

- Do not place your hand in the part of the tray where stapling is performed (near the rollers) if a finisher is attached, as this may result in personal injury.
- Do not place your fingers or hands on the finisher when the finisher is in use. Doing so may result in personal injury or damage to the finisher.

IMPORTANT

- Do not place anything other than output paper in the trays of the finisher, as doing so may damage the trays.

Optional Equipment

19YU-0E6

By combining options, you can use functions more efficiently.

■ When the Inner Finisher-K is installed

1 Inner Finisher-K

You can perform offset and stapling (Corner/Double) with this option. In addition, you can manually bind with the stapler or bind without the stapler. [Inner Finisher-K\(P. 747\)](#)

2 Cassette Feeding Unit-AP

Load the type of paper that you frequently use. You can load paper that cannot be loaded in the paper drawer 1, such as A3 and custom size paper.

[Cassette Feeding Unit-AP\(P. 744\)](#)

■ When Other Options are Installed

1 Inner 2way Tray-J

This option enables paper to be output to two locations. ▶ **Inner 2way Tray-J(P. 750)**

2 DADF-AV

Several sheets of original or 2-sided originals can be scanned continuously. ▶ **Feeder(P. 103)**

3 Copy Card Reader

You can implement Department ID Management using the card reader. ▶ **Copy Card Reader(P. 755)**

4 Copy Tray-J

This option enables paper to be output to two locations. ▶ **Copy Tray-J(P. 752)**

5 Inner Shift Sorter-A

Install this to use Offset as finishing mode. ▶ **Inner Shift Sorter-A(P. 751)** ▶ **Inner Shift Sorter-A(P. 751)**

6 Utility Tray-B

This option provides space for placing originals.

NOTE

- For information on the combination of options that can be installed on the machine, contact your local authorized Canon dealer.

Cassette Feeding Unit-AP

19YU-0E7

Enables you to add two paper drawers. Loading different sized paper in the optional paper drawers enables reduced work for switching paper.

1 Paper drawer

Load Paper. ▶ **Loading Paper in the Paper Drawer(P. 135)**

2 Lower-right cover

Open this cover when clearing a paper jam inside the machine. ▶ **Paper Jams in a Paper Source(P. 689)**

NOTE

- When loading paper of a different size into a paper drawer, adjust the guides.
- For information on available paper sizes, see ▶ **Available Paper(P. 718)** .

FL Cassette

19YU-0E8

Two types of paper drawers can be installed to the machine. The installation position and the paper sizes that can be loaded differ according to the type of paper drawer.

FL Cassette-BE

Install it in the position for the paper drawer 1.

FL Cassette-BF

Install it in the position for the paper drawer 2, 3, or 4.

NOTE

- When loading paper of a different size into a paper drawer, adjust the guides. ➤ **Loading Paper in the Paper Drawer(P. 135)**
- For information on available paper sizes, see ➤ **Available Paper(P. 718)** .

Media Adjustment kit-A

19YU-0HA

This kit enables you to load heavy coated paper (300 g/m²) in the multi-purpose tray.

NOTE

- For information on available paper sizes, see [▶ Available Paper \(P. 718\)](#) .

Inner Finisher-K

19YU-0E9

Install "Inner Finisher-K" to use the following finish functions.

Offset

Each printout group is shifted in alternating layers.

Staple + Collate

The printouts are collated into sets arranged in page order and stapled (Corner/Double).

Staple + Group

All printouts of the same original page are grouped together into sets and stapled (Corner/Double).

Staple Free

The printouts are crimped and bound without using a staple. You can easily split the paper by pressing the crimped part with your fingers. This function is useful for saving staples and also binding printouts briefly.

NOTE

- For information on the paper sizes that can be used for Staple Free, see [▶ Specifications\(P. 714\)](#) .
- Depending on the usage environment and paper type, the crimped part may be split easily.

Manual Stapling

You can manually staple printed paper by inserting paper in the slit. As an example of use, you can remove staples bound to the document, copy or scan it, and then staple the document again.

■ External View

1 Auxiliary Tray

Pull out the auxiliary tray if you are outputting large size paper.

2 Output Tray

Paper is output to the output tray.

3 Staple Button

Press this button when you manually staple paper (Manual Stapling). You can also staple paper without pressing the button. You can specify the time period for the paper to be stapled after inserting the paper.
<Adjust Action> ▶ [▶ <Time Until Stapling Starts>\(P. 481\)](#)

4 Slit

Insert paper to manually staple the paper. You can specify the time period for the paper to be stapled after inserting the paper.

5 Front cover

Open to remove jammed paper, clear a staple jam in the stapler unit, or replace the staple cartridge.

Manual Stapling**1** Place the desired bundle of paper into the slit in the inner finisher.

- Insert the corner of the paper bundle where you want it stapled straight into the slit, with the front side of the paper facing down.
- When the paper bundle is sensed, the staple button starts to blink and automatic stapling is performed.

**NOTE:**

- You can set the time in seconds to elapse before stapling is executed. **<Time Until Stapling Starts>(P. 481)**
- You can perform stapling without waiting for the specified stapling start time to come. While holding the paper bundle with one of your hands, use the other hand to press the staple button.

**2** Pull out the paper bundle.

- Wait for the staple button to turn off, and then pull out the paper bundle.

NOTE

- You cannot perform manual stapling while outputting of printed paper continues.

NOTE

- To output paper to the upper tray with "Inner Finisher-K" installed requires "3 Way Unit-D."
- For information on the paper sizes that can be used for Staple, see [▶Specifications\(P. 714\)](#) .
- To replace the staple cartridge of the staples, see [▶Replenishing the Staples \(Optional\)\(P. 604\)](#) .
- For how to clear a paper jam or a staple jam, see [▶Clearing Paper Jams\(P. 678\)](#) and [▶Clearing Staple Jams \(Optional\)\(P. 696\)](#) .
- The maximum number of bindable sheets may not be possible, depending on the paper type. In this case, change the paper type, or reduce the number of sheets to bind.

Collate and group

- If you select <Offset> in combination with the collate or group function, each printout group is shifted.

Staplers

- When you are using the Staple mode, do not remove the stack of paper from the output tray during the job. Remove the stack of paper when the job has been completed.
- If the <Load staples into the stapler unit.> message appears, almost all of the staples have been used. To proceed, replace the staple cartridge.
- Output temporarily stops when the tray reaches the lowest position or when 30 sets have been stapled. Printing resumes when you remove all of the paper that has been output.

Inner 2way Tray-J

19YU-0EA

Attach this to add an additional output destination. This is useful when you want to use separate output trays for different functions, such as copying, printing, and faxing.

1 Inner Tray

Paper is output to the output tray.

IMPORTANT

- To install "Inner 2way Tray-J" requires "3 Way Unit-D."

TIPS

- If you attach "Copy Tray-J" at the same time, you can add an additional output destination..

Inner Shift Sorter-A

19YU-0HL

Attach to use the following finish functions.

Offset

Each printout group is shifted in alternating layers.

1 Inner shift sorter

Printouts are output after collated.

Copy Tray-J

19YU-0EE

Attach this to add an additional output destination. This is convenient when you want to use separate output trays for different functions, such as Copy, Print, and Fax.

1 Output Tray

The prints are output to this tray.

2 Auxiliary tray

Pull out the auxiliary tray if you are printing on large size paper.

IMPORTANT

- To install "Copy Tray-J" requires "3 Way Unit-D."

TIPS

If you attach "Inner 2way Tray-JInner 2way Tray-J" at the same time, you can add an additional output destination.

ADF Access Handle-A

19YU-0EJ

This option helps you to close the feeder.

1 ADF access handle

Hook the edge of the handle to the tip of the feeder to gently close it.

System Options

19YU-0EK

By installing system-related options, you can further enhance the performance of the machine.

■ PS Printer Kit

This option enables you to use the machine as a PS printer.

■ Barcode Printing Kit

This option enables you to print barcodes. For more details, see Bar Code Printing via the online manual site.

■ Super G3 FAX Board

The "Super G3 FAX Board" enables you to send and receive faxes. You can also send documents that are created in applications directly from your computer via the network.

- The fax driver that enables faxing via a computer is included.

■ Send PDF Security Feature Set

You can enhance the security of PDF files with the Send PDF Security Feature Set. This option enables you to add a digital signature to PDF files or to create encrypted PDF files when scanning originals.

■ NFC Kit

This option enables you to easily link the machine with mobile devices. You can also print simply by holding a mobile device over the main unit.

■ Copy Card Reader

This option enables you to perform Department ID Management through authentication with control card. For details, see  **Copy Card Reader(P. 755)** .

Copy Card Reader

19YU-0EH

If you install the "Copy Card Reader" to the machine, you can perform Department ID Management using the control card. Users are required to authenticate themselves before starting an operation such as copying or faxing. **▶Setting the Department ID Management(P. 364)**

1 Card slot

Insert a control card.

2 Control card

Control cards used with the "Copy Card Reader." You can manage up to 1,000 Department IDs.

Inserting a card

- 1 Confirm that the screen to insert a control card is displayed.
- 2 Confirm the direction of the control card and insert it into the card slot.

- 3 Confirm that the Home screen is displayed. **▶Home Screen(P. 116)**

Removing the card

- 1 Remove the control card from the card slot.

- 2 Confirm that the screen to set a control card is displayed.

NOTE

- If the Home screen does not appear when the control card is inserted, check if the control card is inserted in the correct direction and that the control card is not damaged or prohibited from use.

Manuals and Their Contents

19YU-0ER

The manuals listed below are included with the machine. Refer to them as necessary.

Getting Started		<p>Read this manual first. This manual describes basic operations in an easy-to-understand manner.</p> 
User's Guide (This Manual)		<p>This manual describes all the functions of the machine in a manual that is viewed using a Web browser. You can browse information by category or enter a keyword to search for pages on a specific topic. ▶ Using User's Guide(P. 758)</p>

Using User's Guide

19YU-0HC

The User's Guide is a manual that can be viewed on your computer or mobile device and it describes all of the functions of the machine. You can search from your intended use or enter a keyword to quickly find the page you are looking for. The section describes the screen layout of the User's Guide and how to read the Guide. You can specify how the appearance of the User's Guide looks.

■ Screen Layout of User's Guide

This section describes the screens configuring the User's Guide and how to use the on-screen buttons.  **Screen Layout of User's Guide(P. 759)**

■ Viewing User's Guide

This section describes the meaning of the marks used in the User's Guide, how the keys on the operation panel and the buttons on the computer display are represented, and other matters that help you understand the information contained in the User's Guide.  **Viewing User's Guide(P. 762)**

■ Specifying How the Appearance of the User's Guide Looks

You can change the character size used in the User's Guide, and switch the screen layout to fit to the device you use to view the User's Guide.

NOTE

- If you do not have access to Adobe Reader to view the manuals in PDF format, try other programs such as PDF Preview developed by Vivid Document Imaging Technologies.

How to Find the Topic You Are Looking for

Search the contents

- You can find the page you are looking for by selecting the topic from the "Contents" on the left side of the screen.

Search by keyword

- Perform a search by entering a keyword, such as "envelope" or "toner cartridge," and the pages containing the keyword are displayed. You can find the page you are looking for from those results. You can also enter phrases such as "connecting to a network." The keyword search also supports the AND Boolean to search for multiple keywords. For the organization of the search screen and how to operate the search screen, see  **Search(P. 761)** .

Screen Layout of User's Guide

19YU-0HE

The User's Guide is divided into different screens, and the content of each screen varies.

Top Page

Appears when User's Guide is started.

Click to also display all of the sections under the chapters. Click to return to the previous display.

Click to toggle the display between the contents and search. When the table of contents is displayed, each click on switches between hiding and showing the display. When the search display is shown, each click on switches between hiding and showing the display.

Click to set parameters to determine how the User's Guide is displayed, such as character size or layout.

Click to display information on how to view the User's Guide, how to perform a search, and other information.

Click to display the previous or following topic.

Click to view important information you should know when using the machine.

Topic Page

Contains information about how to configure and use the machine.

a Navigation

See what chapter topic you are currently viewing.

Click to jump to the corresponding page. To return to the previous page, click "Back" on your Web browser.

NOTE:

- When you click the icon, the current page may go dark and a pop-up window may appear. To return to the page, click [Close] in the pop-up window.

Click  to display the hidden detailed descriptions. Click  to close the detailed descriptions.

Click to return to the page top.

Search

Click  to display the search window. Contains a text box to perform a search by keyword and find the page you are looking for.

a [Enter keyword(s) here]

Enter a keyword or keywords and click  to display the search results. You can search for pages containing all the keywords by separating the keywords by a space (blank). Also you can only search for pages containing an exact phrase by enclosing the keywords in double quotation marks.

b Search result

Displays the search results of the pages that contain the specified keywords. From the results, locate the page you are looking for and click the topic title of the page.

NOTE:

- The specified keyword(s) are shown in bold in the search results.

Viewing User's Guide

19YU-0HF

This section describes the marks, buttons, screens, and other items used in the User's Guide. The warnings and cautions are also given in the "Important Safety Instructions" in the "Getting Started" included with the machine. See also these instructions.

Marks

Cautions regarding safety, restrictions and cautions regarding the handling of the machine, useful tips, and other information are indicated using the marks below.

Indicates a caution concerning operations that may lead to injury to persons if not performed correctly. To use the machine safely, always pay attention to these cautions.

Indicates an operation that must not be performed. Read these items carefully, and make sure not to perform the described operations.

IMPORTANT

Indicates operational requirements and restrictions. Be sure to read these items carefully to operate the machine correctly, and avoid damage to the machine or property.

NOTE

Indicates a clarification of an operation, or contains additional explanations for a procedure.

TIPS

Indicates useful functions or tips for using the machine.

Keys and Buttons Used in this Manual

Keys on the operation panel and buttons on the computer display appear in the following notation:

Type	Example
Keys on the operation panel	 
Settings displayed on the operation panel	<Timer/Energy Settings> <Paper jammed.>
Buttons and other text interfaces displayed on the computer display	[Preferences]

Computer Screens Used in This Manual

Unless otherwise noted, displays used in the User's Guide are those for the imageRUNNER C3025i. Depending on the model or operating system you are using, the appearance of the displays used in this manual may slightly differ from the actual displays. Also, the appearance of drivers and software may differ depending on their version.

Illustrations Used in This Manual

Illustrations used in the User's Guide are from "imageRUNNER C3025i" with the following options installed unless otherwise specifically noted.

- Cassette Feeding Unit-AP

Basic Windows Operations

19YU-0HH

- ▶ **Displaying the Printer Folder(P. 764)**
- ▶ **Enabling [Network discovery](P. 764)**
- ▶ **Displaying Shared Printers in the Print Server(P. 765)**
- ▶ **Printing a Test Page in Windows(P. 765)**
- ▶ **Checking the Bit Architecture(P. 766)**
- ▶ **Checking the Computer Name(P. 767)**
- ▶ **Checking the Printer Port(P. 768)**
- ▶ **Checking Bidirectional Communication(P. 769)**
- ▶ **Checking the SSID to Which Your Computer is Connected(P. 770)**

■ Displaying the Printer Folder

Windows Vista

[Start] ▶ select [Control Panel] ▶ [Printer].

Windows 7/Server 2008 R2

[Start] ▶ select [Devices and Printers].

Windows 8/Server 2012

Right-click the lower-left corner of the screen ▶ select [Control Panel] ▶ [View devices and printers].

Windows 8.1/Server 2012 R2

Right-click [Start] ▶ select [Control Panel] ▶ [View devices and printers].

Windows 10

Right-click [Start] ▶ select [Control Panel] ▶ [Hardware and Sound] ▶ [Devices and Printers].

Windows Server 2008

[Start] ▶ select [Control Panel] ▶ double-click [Printers].

Windows Server 2016

Right-click [Start] ▶ select [Control Panel] ▶ [Hardware] ▶ [Devices and Printers].

■ Enabling [Network discovery]

Enable [Network discovery] to view the computers on your network.

Windows Vista

[Start] ▶ select [Control Panel] ▶ [View network status and tasks] ▶ select [Turn on network discovery] under [Network discovery].

Windows 7/Server 2008 R2

[Start] ▶ select [Control Panel] ▶ [View network status and tasks] ▶ [Change advanced sharing settings] ▶ select [Turn on network discovery] under [Network discovery].

Windows 8/Server 2012

Right-click the lower-left corner of the screen ▶ select [Control Panel] ▶ [View network status and tasks] ▶ [Change advanced sharing settings] ▶ select [Turn on network discovery] under [Network discovery].

Windows 8.1/Server 2012 R2

Right-click [Start] ▶ select [Control Panel] ▶ [View network status and tasks] ▶ [Change advanced sharing settings] ▶ select [Turn on network discovery] under [Network discovery].

Windows 10/Server 2016

Right-click [Start] ▶ select [Control Panel] ▶ [View network status and tasks] ▶ [Change advanced sharing settings] ▶ select [Turn on network discovery] under [Network discovery].

Windows Server 2008

[Start] ► select [Control Panel] ► double-click [Network and Sharing Center] ► select [Turn on network discovery] under [Network discovery].

■ Displaying Shared Printers in the Print Server

1 Open Windows Explorer.

Windows Vista/7/Server 2008

[Start] ► select [All Programs] or [Programs] ► [Accessories] ► [Windows Explorer].

Windows 8/Server 2012

Right-click the lower-left corner of the screen ► select [File Explorer].

Windows 8.1/Server 2012 R2

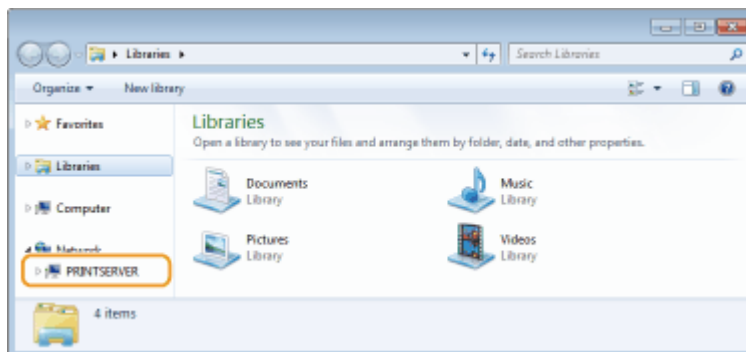

Right-click [Start] ► select [File Explorer].

Windows 10/Server 2016

[

2 Select the printer server in [Network] or [My Network Places].

- To view computers on the network, you may need to turn on network discovery or search the network for computers.

⇒ Shared printers are displayed.

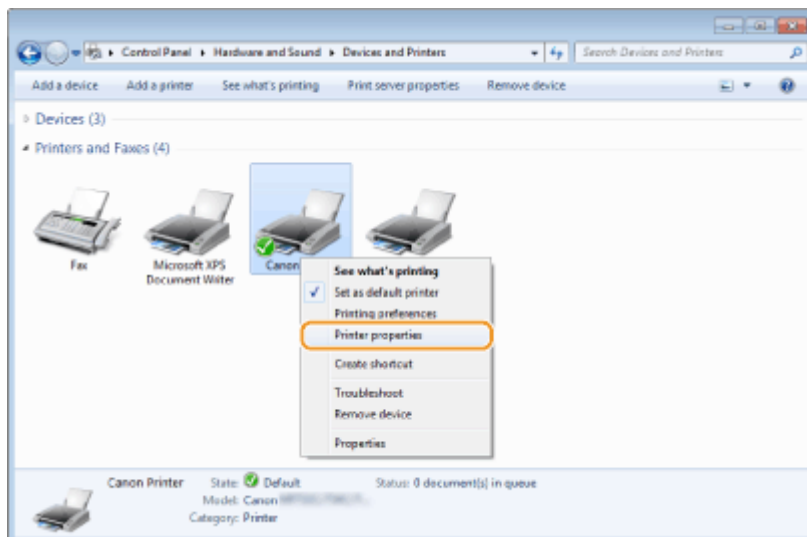

■ Printing a Test Page in Windows

You can check whether the printer driver is operational by printing a test page in Windows.

1 Load A4 size paper in the multi-purpose tray. Loading Paper in the Multi-Purpose Tray(P. 138)

2 Open the printer folder. ► Displaying the Printer Folder(P. 764)

3 Right-click the printer driver icon for this machine, and click [Printer properties] or [Properties].

4 Click [Print Test Page] in [General] tab.

► The test page is printed.

■ Checking the Bit Architecture

If you are not sure whether your computer is running 32-bit or 64-bit Windows follow the procedure below.

1 Display [Control Panel].

Windows Vista/7/Server 2008

[Start] ► select [Control Panel].

Windows 8/Server 2012

Right-click the lower-left corner of the screen ► select [Control Panel].

Windows 8.1/Server 2012 R2

Right-click [Start] ► select [Control Panel].

Windows 10/Server 2016

Proceed to step 2.

2 Display [System].

Windows Vista/7/8/Server 2008 R2/Server 2012

Click [System and Maintenance] or [System and Security] ► [System].

Windows 10/Server 2016

Click [Start] ► [Settings] ► [System] ► select [About].

Windows Server 2008

Double-click [System].

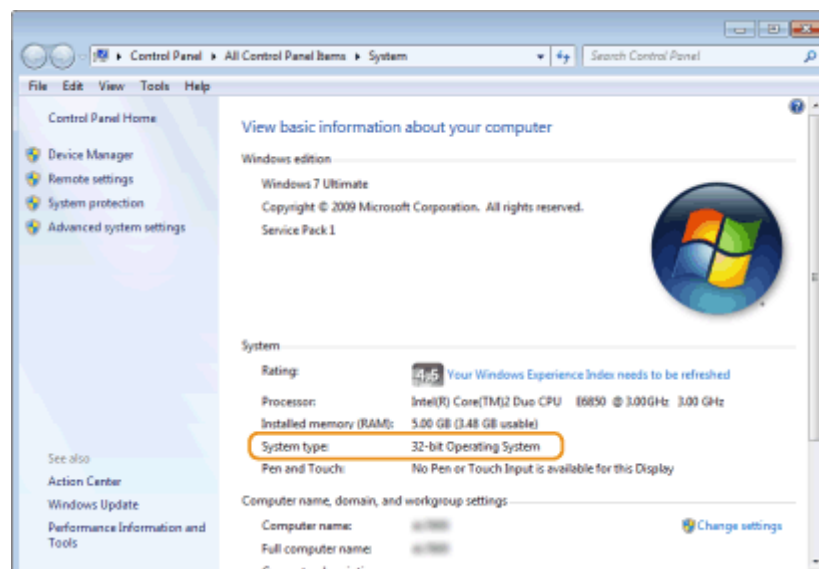

3 Check the bit architecture.

For 32-bit versions

[32-bit Operating System] is displayed.

For 64-bit versions

[64-bit Operating System] is displayed.

■ Checking the Computer Name

1 Display [Control Panel].

Windows Vista/7/Server 2008

[Start] ► select [Control Panel].

Windows 8/Server 2012

Right-click the lower-left corner of the screen ► select [Control Panel].

Windows 8.1/Server 2012 R2

Right-click [Start] ► select [Control Panel].

Windows 10/Server 2016

Right-click [Start] ► select [Control Panel].

2 Display [System].

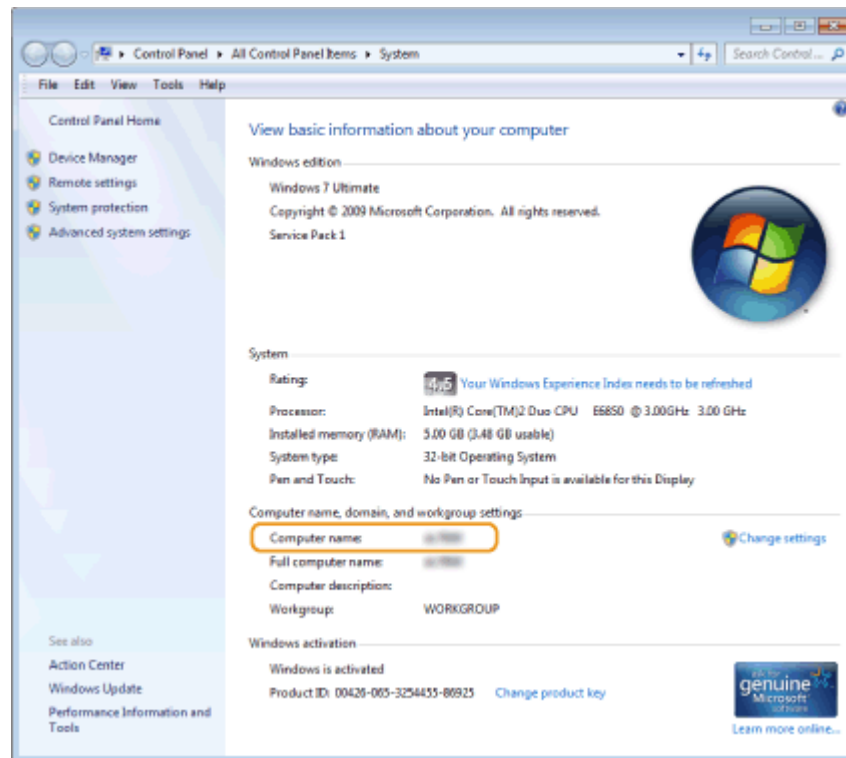

Windows Vista/7/8/10/Server 2008 R2/Server 2012/Server 2016

Click [System and Maintenance] or [System and Security] ► [System].

Windows Server 2008

Double-click [System].

3 Check the computer name.

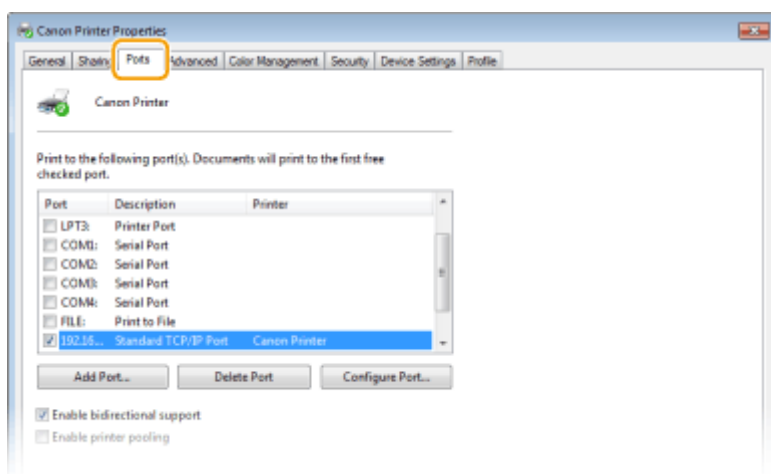

■ Checking the Printer Port

1 Open the printer folder. ► Displaying the Printer Folder(P. 764)

2 Right-click the printer driver icon for this machine, and click [Printer properties] or [Properties].

3 In the [Ports] tab, check that the port is selected correctly.

NOTE

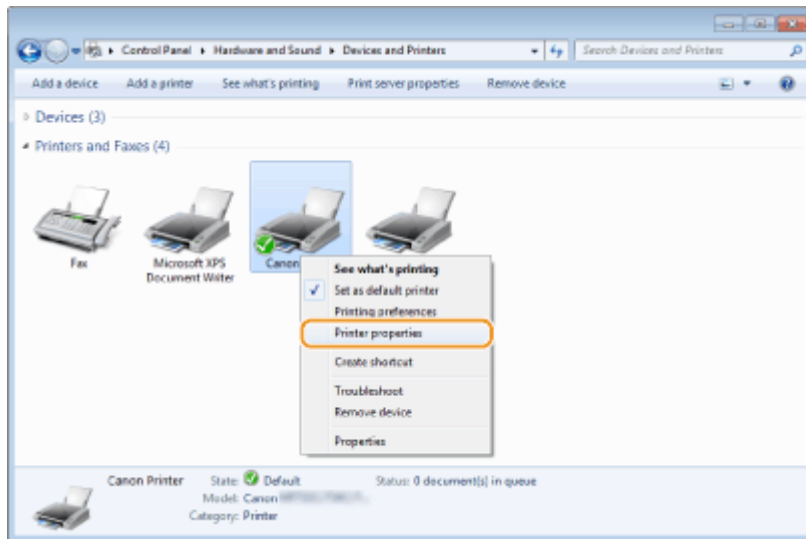

If you are using a network connection and have changed the machine's IP address

- If [Description] for the selected port is [Canon MFNP Port], and the machine and the computer are on the same subnet, then the connection will be maintained. You do not need to add a new port. If it is [Standard TCP/IP Port], you need to add a new port. ➤ **Configuring Printer Ports(P. 42)**

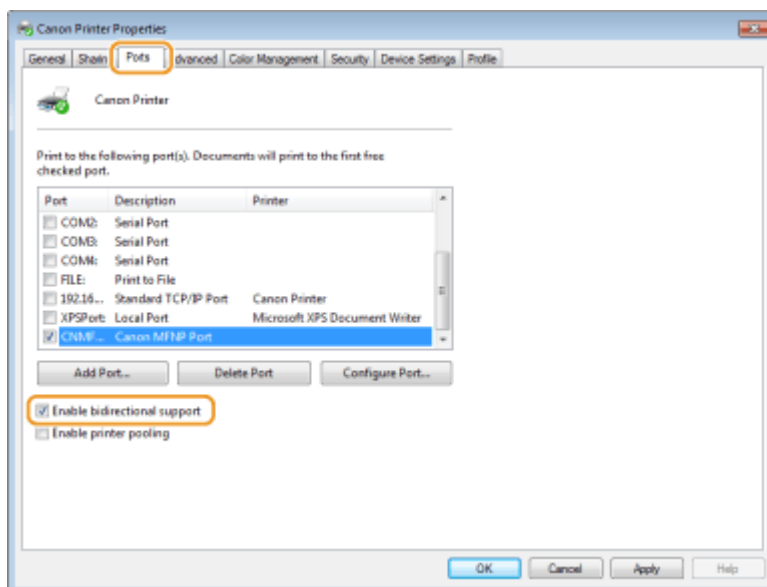

■ Checking Bidirectional Communication

1 Open the printer folder. ➤ **Displaying the Printer Folder(P. 764)**

2 Right-click the printer driver icon for this machine, and click [Printer properties] or [Properties].

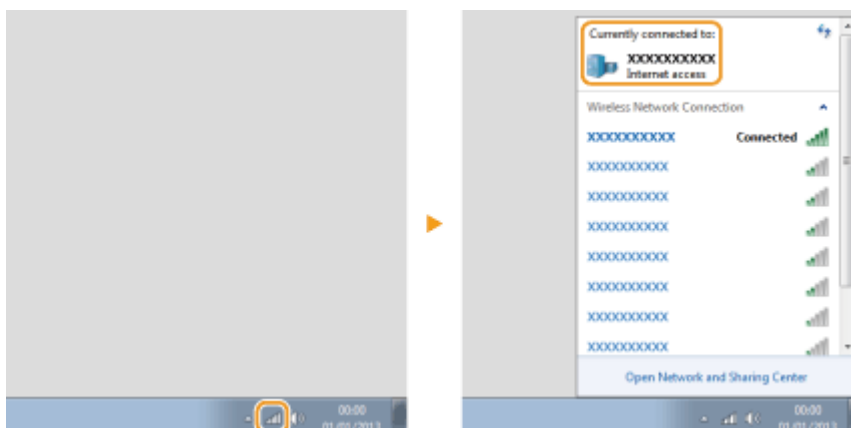

3 In the [Ports] tab, make sure that the [Enable bidirectional support] check box is selected.

■ Checking the SSID to Which Your Computer is Connected

If your computer is connected to a wireless LAN network, click , , or  in the system tray to display the SSID of the connected wireless LAN router.

Notice

19YU-0F0

■ IPv6 Ready Logo

The protocol stack included in this machine has obtained the IPv6 Ready Logo Phase-2 established by the IPv6 Forum.

■ WEEE and Battery Directives

Only for European Union and EEA (Norway, Iceland and Liechtenstein)

These symbols indicate that this product is not to be disposed of with your household waste, according to the WEEE Directive (2012/19/EU), the Battery Directive (2006/66/EC) and/or national legislation implementing those Directives. If a chemical symbol is printed beneath the symbol shown above, in accordance with the Battery Directive, this indicates that a heavy metal (Hg = Mercury, Cd = Cadmium, Pb = Lead) is present in this battery or accumulator at a concentration above an applicable threshold specified in the Battery Directive.

This product should be handed over to a designated collection point, e.g., on an authorized one-for-one basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment (EEE) and batteries and accumulators. Improper handling of this type of waste could have a possible impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. Your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources.

For more information about the recycling of this product, please contact your local city office, waste authority, approved scheme or your household waste disposal service or visit www.canon-europe.com/weee, or www.canon-europe.com/battery.

■ Environmental Information

Reducing your environmental impact while saving money

Power Consumption and Activation Time

The amount of electricity a device consumes depends on the way the device is used. This product is designed and set in a way to allow you to reduce your electricity costs. After the last print it switches to Ready Mode. In this mode it can print again immediately if required. If the product is not used for a time, the device switches to its Power Save Mode. The devices consume less power (Watt) in these modes.

If you wish to set a longer Activation Time or would like to completely deactivate the Power Save Mode, please consider that this device may then only switch to a lower energy level after a longer period of time or not at all. Canon does not recommend extending the Activation Times from the optimum ones set as default.

Energy Star®

The Energy Star® programme is a voluntary scheme to promote the development and purchase of energy efficient models, which help to minimise environmental impact.

Products which meet the stringent requirements of the Energy Star® programme for both environmental benefits and the amount of energy consumption will carry the Energy Star® logo accordingly.

Paper types

This product can be used to print on both recycled and virgin paper (certified to an environmental stewardship scheme), which complies with EN12281 or a similar quality standard. In addition it can support printing on media

down to a weight of 64g/m².

Lighter paper means less resources used and a lower environmental footprint for your printing needs.

Duplex printing (Standard duplex printing products only)

Duplex printing capability enables you to print on both sides automatically, and therefore helps to reduce the use of valuable resources by reducing your paper consumption.

The duplex function has been auto enabled during the set up and driver installation and Canon strongly recommends that you do not disable this function. You should continue to use the duplex function to reduce the environmental impact of your work with this product at all times.

This Font Software is licensed under the SIL Open Font License, Version 1.1.

This license is copied below, and is also available with a FAQ at: <http://scripts.sil.org/OFL>

SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007

PREAMBLE

The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

DEFINITIONS

"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting -- in part or in whole -- any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

PERMISSION & CONDITIONS

Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

- 1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.
- 2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.
- 3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as presented to the users.
- 4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.
- 5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

TERMINATION

This license becomes null and void if any of the above conditions are not met.

DISCLAIMER

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT. IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

Third-Party Services

If you use third-party services through the PRODUCT, use of the services are subjected the conditions below. When you access and/or obtain some third party content (such as text, images, videos, audios, or software) through the SOFTWARE, except as expressly permitted by the content owner or by applicable law, you may not (a) scrape, build databases or otherwise create permanent copies of such content, or keep cached copies longer than permitted by the cache header; (b) copy, translate, modify, create a derivative work of, sell, lease, lend, convey, distribute, publicly display or sublicense to any third party; (c) misrepresent the source or ownership; and (d) remove, obscure, or alter any copyright, trademark or other proprietary rights notices, falsify or delete any author attributions, legal notices or other labels of the origin or source of material.

The Software Subjected to the Other License Conditions

Please refer to Table of Software and respective License terms below, for more detail and corresponding license conditions.
