Storm 3 User Manual

Content

Welcome!

Please read this information before using your phone. We are not responsible for any damage due to misunderstanding the enclosed information. We reserve the right to revise and change the description of this product, software and the user manual without obligation to notify users of such revisions and changes.

This manual relates to your use of this phone and is not an approval of any accessories. Pictures are for reference only. There may be slight differences between the appearance of the phone, keys and contents of the display used in this manual and those of your phone. Please refer to your phone when using the manual. Some features introduced in this manual are network or subscription-dependent features. Please contact your service provider.

1   Safety Precautions

⚠️   Read this information before using your mobile device otherwise it many result to personal injury or your device not complying with local laws.

1.1 Specific Absorption Rate (SAR) certification information

THIS DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES.

Your mobile is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. The guidelines are developed by an independent scientific organisation (ICNIRP) and include substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines use a unit of measurement known as Specific Absorption Rate, or SAR. The SAR Limit for mobile devices is 2.0W/kg. The highest SAR values under the ICNIRP guideline for this model are (Maximum SAR for this model and conditions under which it was recorded).

Head SAR 1.039/Kg

Body SAR 0.598/Kg

1.2 ROHS Declaration

Declaration of Conformity with the requirements of the e-waste Management Rules, 2011 (adopted by Notification S.O.1035 (E) of Ministry of Environment and Forests).

The Product is in conformity with the requirements of Rule 13 of the e-waste Rules. The content of hazardous

substance with the exemption of the applications listed in SCHEDULE II of the e-waste Rules:

1. Lead (Pb) – not over 0.1% by weight;

2. Cadmium (Cd) – not over 0.01% by weight;

3. Mercury (Hg) – not over 0.1% by weight;

4. Hexavalent chromium (Cr6+) – not over 0.1% by weight;

5. Polybrominated biphenyls (PBBs) – not over 0.1% by weight;

6. Polybrominated diphenyl ethers (PBDEs) – not over 0.1% by weight.

1.3 Correct disposal

(Waste Electrical & Electronic equipment) this marking on the product, accessories or literature indicates that the product and it electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with household waste. This EEE is compliance with RoHS.

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste.

1.4 EU Compliance Statement

Santok Ltd, Unit L Braintree Industrial Estate, Braintree Road, Middlesex, HA4 0EJ, UK. Santok Ltd declares that [all essential radio test suites have been carried out and that the product is in conformity to all the essential requirements the R&TTE Directive 1995/5/EC.

1.5 Using Your Phone Safely

 On The Road

Using a phone while driving is illegal in many countries. Please follow local laws and drive safely at all times.

 Near Sensitive Electronics

Do not use your phone near sensitive electronic equipment – particularly medical devices such as pacemakers – as it could cause them to malfunction. It can also interfere with the operation of fire detectors and other automatic-control equipment.

For more information about how your phone affects pacemakers or other electronic equipment, please contact the manufacturer or your local distributor.

Your phone may cause interference when used near TVs, radios or automated office equipment.

While Flying

Your phone can cause interference with aircraft equipment. Therefore, it is essential you follow airline regulations. In addition, if airline personnel ask you to switch off your phone, or disable its wireless functions, please do as they say.

In Hospital

Your phone may interfere with the normal operation of medical equipment. Follow all hospital regulations and turn it off when you are asked to by posted warnings or medical staff.

At a Petrol Station

Do not use your phone at petrol stations. In fact, it is always best to switch off whenever you are near fuels, chemicals or explosives.

Around Water

Keep your phone away from water (or any other liquid). It is not a waterproof model.

Making Repairs

Never take your phone apart. Please leave that to the professionals. Unauthorised repairs could break the terms of your warranty.

Broken Antenna

Do not use your phone if the antenna is damaged, as it could cause injury.

Around Children

Keep your mobile out of children's reach. It should never be used as a toy and it might not be good for their health.

Original Accessories

Only use the original accessories supplied with your phone or those approved by the manufacturer. Using unapproved accessories may affect performance, make the warranty void, break national regulations on the use of mobile phones, or even cause injury.

Near Explosives

Turn off your phone in or near areas where explosive materials are used. Always obey local laws and turn off your phone when requested.

Emergency Calls

To make an emergency call your phone must be turned on and in an area where there is network coverage. Dial the national emergency number and press 'send'. Explain exactly where you are and do not hang up until help has arrived.
Working Temperature

The working temperature for the phone is between 0 Degree and 40 Degree Celsius. Please do not use the phone outside the range. Using the phone under too high or too low temperature might cause problems.

At very high volume, prolonged listening to a mobile phone can damage your hearing.

STK

2 Overview

2.1 Keypad Operations

Keys	Functions
Home	Press this button to return to the home page from any application or interface. Press it to open recently opened application window.
Menu	Press it to start the menu，which allows you to perform actions in the current interface or options menu.

Up	Press to increase the volume Press to turn the phone to vibration mode from the silent mode.
Down	Press to decrease the volume.

# 3   Installing SIM, Battery and Memory Card

3.1 Installing SIM

A SIM card carries useful information, including your mobile phone number, PIN (Personal Identification Number), PIN2, PUK (PIN Unlocking Key), PUK2 (PIN2 Unlocking Key), IMSI (International Mobile Subscriber Identity), network information, contacts data, and short messages data.

Note*: After powering off your mobile phone, wait for a few seconds before removing or inserting a SIM card.*

Exercise caution when operating a SIM card, as friction or bending will damage the SIM card.

Properly keep the mobile phone and its fittings such as the SIM cards beyond children's reach.

1.   Press and hold the power key to power off the mobile phone.
2.   Insert the SIM Card into the SIM Card slot as seen in the diagram below.
3.   Insert the battery into the battery cavity.

The above diagram shows the locations for Standard SIM card, battery and the Micro SD card

3.2   Charging Battery

Before using the device for the first time, you must charge the battery to full.

1. Connecting the charger improperly may cause serious damage to the device. Any damage caused by misuse is not covered under the warranty.

STK

2. After charging the device, ensure it is disconnected from the charging socket.

3. Make sure the charger remains close to the electric socket and easily accessible while charging.

4. While charging, the battery level grids in the battery icon keep flickering and it does no longer flicker once fully

charged.

The diagram shows the correct way of inserting charger to the device.

3.3 Optimizing battery life

You can extend the battery life by turning off features that you don't need at the moment. You can also monitor how

applications and system resources consume battery power.

- To guarantee If you aren't using Radio, Wi-Fi, Bluetooth, or GPRS, turn them off.

- Turn down screen brightness and set a shorter screen timeout.

- If you don't need them, turn off automatic syncing for Gmail, Calendar, Contacts, and other applications.

For the optimal performance of your battery, please stick to the following rules:

Note: *On the Home screen, press Menu icon and touch Settings > Battery. The Battery Use screen lists the applications*

that have been using the battery, from greatest to least battery use. The top of the screen displays the time since you

were last connected to a charger or, if you're currently connected to one, how long you were running on battery power

before you connected to a charger. Then each application or service that used battery power during that time is

displayed, in order of the amount of power they used. Touch an application in the Battery Use screen to learn details about its power consumption. Different applications offer different kinds of information.

3.4 Using Memory Card as U Disk

Insert the SD card in the correct slot as seen in the diagram above. If you want to send music, pictures or other files to the phone's memory card from the computer，you should initially set memory card as a u disk.

Set memory card as 'U Disk'

1. Connect the phone to the computer with a USB cable. The notification icon will appear in the status box.

2. Open the notification panel.

3. In the notification panel, touch "USB is connected" then touch "Open the USB Storage Device".

Note： *If you connect your phone to the computer then choose open the USB device, the phone cannot read the memory card. You temporarily cannot use some applications, such as camera.*

4   Using Menu and features

4.1 Wi-Fi

Wi-Fi provides as far as 300feet (100M) range of wireless network access. If you use the handset to connect to Wi-Fi, you should connect to the wireless access point or hotspots.

Note： The availability and coverage of Wi-Fi___33 signal depend on the number, infrastructure and other objects penetrated by the signal.

4.1.1   Open Wi-Fi and connect to a wireless network

1. Press ![icon]，then touch settings>wireless&networks.

Clears all data stored on the phone. Please note this function is irreversible and all your saved preferences and data will

be lost

4.19.10 Schedule power on/off

You can set a time to shut down your handset. You may also select to repeat it or a certain day during a

week.

4.19.11 Date & Time

- **Automation**   Use date and time provided by Network.

- **Set Date**   Touch "+" and "-" to set date.

- **Select Time Zone**   Select the Time Zone according to your location.

- **Set Time**   Touch "+" and "-" to set the time.

- **24 Hour Time Format** Enables or disable the 24-hour format.

- **Select Date Format**   There are three kinds of formats you can choose from: Month-Day-Year,

  Day-Month-Year and Year-Month-Day, among which Year-Month-Day is the default setting.

4.19.12 Accounts and Sync

- **Background data**   Applications using the background data for sending and receiving data. Disabling the

  background data extends battery life and reduces data usage. However, some applications will use the

  background data.

- **Automatic sync**   Automatic synchronization your application or data.

4.19.13 About phone

You can check the information on status bar and remaining power.

4.20 Screen Capture

Press Volume (-) and power button at the same time to capture "Screenshot". All captured screenshots will be saved

under gallery

4.21 Play store

You can log in to your Gmail account to view thousands of applications available under Google Market called 'Play

Store' and download them.

Note: To use this app please connect to an internet connection.

4.22 YouTube

You can view, download and upload videos. If you sign in your Google account, access will be more accurate and easy,

based upon your search history.

5   Taking Care of your Device

Your device is a product of superior design and craftsmanship and should be handled with care: The following suggestions will help you protect your phone:

- Use a dry soft cloth to wipe general dirt.

- Do not use a hard cloth, benzene or thinner to wipe the phone, otherwise, the surface of the phone will be scratched or could even result in the fading of color.

- Always keep the small parts of the phone away from children.

- Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will rust electronic circuits. If your device does get wet, remove the battery, and allow the device to dry completely before replacing it.

- Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.

- Do not store the device in high or cold temperature. High temperatures can shorten the life of electronic devices and damage batteries.

- Do not attempt to open the device other than as instructed in this guide.

- Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface of the device.

- Do not paint the device. Paint can clog the moving parts and prevent proper operation.

- Use indoor chargers only.
