Function principle of the air humidifier:

High-frequency vibrations release tiny drops from the surface of the water. The fan air flow transports the humidified air out into the room. If you wish, the device can be used with aromas.

Funktionsweise des Luftbefeuchters:

Hochfrequente Schwingungen lösen kleinste Tröpfchen von der Wasseroberfläche. Der Luftstrom des Ventilators bringt die befeuchtete Luft nach außen. Auf Wunsch kann das Gerät mit Aromen angewendet werden.
