Procedures

Example: Switching Auto answer on/off

Illustration in the user guide:

Step	Follow this procedure
 	When in idle status press the centre of the control key. The main menu opens.
	Navigate to the 🔅 icon using the control key 💽.
▶ OK	Select OK to confirm. The submenu Settings opens.
► Telephony	Select the Telephony entry using the control key
▶ OK	Select OK to confirm. The submenu Telephony opens.
Auto Answer	The function to switch Auto answer on/off appears as the first menu item.
▶ Change	Select Change to activate or deactivate. Function is activated // deactivated

Safety precautions

Read the safety precautions and the user guide before use.

Explain their content and the potential hazards associated with using the device to your children.

The device cannot be used in the event of a power failure. In case of a power failure it is also **not** possible to make **emergency calls**.

Emergency numbers cannot be dialled if the keypad/display lock is activated!

Do not use the devices in environments with a potential explosion hazard (e.g. paint shops).

The devices are not splashproof. For this reason do not install them in a damp environment such as bathrooms or shower rooms.

Use only the power adapter indicated on the device.

Use only rechargeable batteries that correspond to the specification (see "Specifications"). Never use a conventional (non-rechargeable) battery or other battery types as this could result in significant health risks and personal injury. Rechargeable batteries, which are noticeably damaged, must be replaced.

If you give your Gigaset to a third party, make sure you also give them the user guide.

Remove faulty devices from use or have them repaired by our Service team, as these could interfere with other wireless services.

Do not use the device if the display is cracked or broken. Broken glass or plastic can cause injury to hands and face. Send the device to our Service department to be repaired.

Do not hold the rear of the handset to your ear when it is ringing or when speaker mode is activated. Otherwise you risk serious and permanent damage to your hearing.

Your Gigaset is compatible with the majority of digital hearing aids on the market. However, perfect function with all hearing aids cannot be guaranteed.

The phone may cause interference in analogue hearing aids (humming or whistling) or cause them to overload. If you require assistance, please contact the hearing aid supplier.

Using your telephone may affect nearby medical equipment. Be aware of the technical conditions in your particular environment, e.g. doctor's surgery. If you use a medical device (e.g. a pacemaker), please contact the device manufacturer. They will be able to advise you regarding the susceptibility of the device to external sources of high frequency energy (for the specifications of your Gigaset product see "Specifications").

To prevent loss of hearing, avoid listening at high volume over long periods of time.

Getting started

Contents of the package

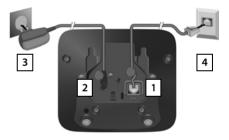

- · One base station,
- One power adapter for the base station,
- · One phone cable,
- One handset,
- · One battery cover,
- Two batteries,
- One belt clip.
- One user guide

Models with multiple handsets, per handset:

- One handset.
- One charging cradle incl. power adapter,
- Two batteries, one battery cover and one belt clip

Connecting the base station

- Insert the phone cable into the connection socket 1 at the rear of the base station and feed under the cable protection.
- Insert the power cable for the power adapter into the connection socket 2 at the rear of the base station and rotate the right-angle plug under the cable protection.
- ▶ First connect the power adapter 3.
- ▶ Then connect the phone jack 4.

The network cable must **always be connected** in order to function, as the phone will not operate without a power supply.

Only use the **supplied** network cable and phone cable. The pin connections on phone cables may vary (

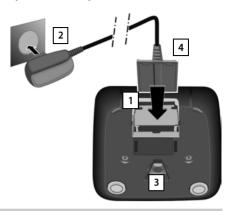

Pin connections on the telephone jack in the appendix).

Connecting the charging cradle (if included)

- ▶ Connect the flat plug of the power adapter 1.
- ▶ Plug the power adapter into the power socket 2.

To remove the plug from the charging cradle again:

- Disconnect the power adapter from the mains power supply.
- ▶ Press the release button 3.
- Pull out the plug 4.

Setting up the handset for use

The display is protected by a plastic film. Please remove the protective film!

Inserting the batteries

Only use rechargeable batteries, as this could otherwise result in significant health risks and personal injury. For example, the outer casing of the batteries could be destroyed or the batteries could explode. The device could also malfunction or be damaged as a result of using batteries that are not of the recommended type.

 Insert the batteries (for correct +/- direction, see diagram).

- Fit the battery cover from the top.
- Press the cover until it clicks into place.

To re-open the battery cover:

 Insert a fingernail behind the notch at the top of the cover and slide it downwards.

Charging the batteries

Charge the batteries fully prior to first use in the base station/charging cradle or using a standard USB mains adapter (→ p. 9).

The batteries are fully charged when the power icon disappears from the display.

The handset may only be placed in the designated base station or charging cradle.

The battery may heat up during charging. This is not dangerous.

After a time, the charge capacity of the battery will decrease for technical reasons. Handsets contained in the package have already been registered to the base station. In the event that a handset is not registered however, (indicated by **Please register handset**), register the handset manually (\rightarrow p. 49).

Attaching the belt clip

The handset has notches on each side for attaching the belt clip.

- Attaching the belt clip: Press the belt clip onto the back of the handset so that the tabs on the belt clip click into place in the notches.
- Removing the belt clip: Press the centre of the belt clip firmly with your right thumb. Push the nail of your left thumb up between the clip and the casing. Slide the clip upwards to remove.

Setting up the telephone for use

Changing the display language

You can change the display language, if the telephone has been set to an incomprehensible language.

- Press middle of the control key
- Press the keys 9 and 5 slowly and successively ... the language settings display appears, the set language (e. g. English) is highlighted = selected).

▶ To revert to idle status: ▶ Press and hold the End call key 👩

Time

Setting the date and time

Set the date/time so that the correct date and time can be assigned to incoming calls, and to enable the alarm to be used.

▶ Press the display key Time

or, if the date and time have already been set:

► Lose to select Settings ► OK ► Date/

The active cursor position flashes \(\) ... change cursor position with \(\) \(\) ... switch between cursor positions with \(\) Enter date:

... enter the day, month and year in 8-digit format with e.g. 1 □ 5 0 □ 8 2 0 □ 1 □ 4 for 15/08/2014.

Enter time:

... enter hours and minutes in 4-digit format with e.g. 0 [7 [1] [5] for 07:15.

To save settings:

 Press the display key Save. . . . the message Saved is shown in the display and you hear a confirmation tone

Returning to idle status:

Press and hold the End call key

The telephone is now ready for use.

Date/Time Date: 15/08/2014 Time: 00:00 Back Save

Calls

Connecting the headset

 Connect the headset with 2.5 mm jack to the left side of the handset 1.

For information on recommended headsets, see the relevant product page at www.gigaset.com/s850.

The headset volume corresponds with the setting for the receiver volume (→ p. 57).

Connecting the USB data cable

For data exchange between the handset and PC:

 Connect the USB data cable with micro-USB plug into the USB socket at the bottom of the handset 1.

Connect the handset **directly** to the PC, **not** via a USB hub.

Using the telephone

Getting to know your telephone

Switching the handset on/off

Switch on: ▶ Press and **hold** the End call key 🕝 on the handset when switched off

▶ When the telephone is in idle status, press and **hold** the End call key

Locking/unlocking the keypad

The keypad lock prevents any accidental use of the telephone.

Lock/unlock the keypad: ▶ #- Press and hold

Switch off:

If a call is indicated on the handset, the keypad automatically unlocks and you can accept the call. It then locks again when the call is finished.

It is not possible to call emergency numbers either when keypad lock is activated.

Control key

The control key enables you to navigate the menus and input fields, and also to call up certain functions depending on the situation.

In the description below, the side of the control key (up, down, right, left) that you have to press in the different operating situations is marked in black, e.g. For "press right on the control key" or for "press the centre of the control key".

In idle status

Open the directory	Press briefly
Open the main menu	or 🕞
Open the list of handsets	
In submenus, selection and entry fields	
Confirm a function	
During a conversation	
Open the directory	
Mute the microphone	
Initiate an internal consultation call	
Adjust the loudspeaker volume for receiver and handsfree	<u> </u>

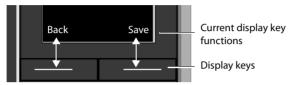

mode

Volume keys

Set volume for receiver/headset, ringtone, handsfree mode and indicating appointments: Press the volume keys + / - on the right side of the handset

Display keys

The display keys perform a range of functions depending on the operating situation.

Display key icons → p. 71.

The display keys have a function preset by default in idle status. Changing the assignment: \rightarrow p. 60

Menu guidance

The functions of your telephone are displayed on a menu that consists of several levels. Menu overview \rightarrow p. 73

Select/confirm functions

Confirm selection using

OK or press the centre of the control key

Back

Change to idle display using

Switch function on/off using

Activate/deactivate option using

OK or press the centre of the control key

Back

Press and hold

Change on // off

Select activated // not activated

Main menu

The main menu functions are shown in the display as icons. The icon for the selected function is highlighted in colour and the name of the associated function appears in the display header.

Example

Getting to know your telephone

Submenus

The functions in the submenus are displayed as lists.

To access a function: ▶ ... use the control key to select a function ▶ OK

Return to the previous menu level:

Press the display key Back

or

Briefly press the End call key

Date/Time Audio Settings Display & Keypad Language Registration Back OK

Example

Returning to idle status

▶ Press and **hold** the End call key 🕝

If no key is pressed, the display will **automatically** change to idle status after around 2 minutes.

Entering text

Input position

- Use to select an entry field. A field is activated when the cursor is blinking inside it.
- Use to move the position of the cursor.

Correcting incorrect entries

- Delete characters to the left of the cursor: Press briefly
- Delete words to the left of the cursor: Press and hold

Entering letters/characters

Multiple letters and numbers are assigned to each key between and 9 and the 0 key. As soon as a key is pressed, the possible characters are displayed at the bottom of the display. The selected character is highlighted.

- Selecting letters/digits: ▶ Press the key **briefly** several times in succession
- Switch between lowercase, uppercase and number entry mode: ▶ Press the hash (#→ key When editing a directory entry, the first letter and each letter following a space is automatically in upper case.
- Entering special characters: ▶ Press the star key ★ ... use to navigate to the desired character ▶ Insert

The availability of special characters depends on the character set of the handset, → Character charts p. 70.

Making calls

... use
 to enter a number ▶ Briefly press the Talk key
 or

Cancel dialling: ▶ Press the End call key

Information for Calling Line Identification: -> p. 18

When the display backlight is off the display backlight is activated the first time that any key is pressed. **Digit keys** that are pressed appear in the display for pre-dialling, **other keys** have no further function.

Dialling from the directory

... use
 _ to open the directory
 ... use
 _ to select an entry
 press the Talk key
 _

If multiple numbers are entered:

... use to select a number press the Talk key ... the number is dialled

For fast access (quick dial): Assign numbers from the directory to the digit or display keys.

Dialling from the redial list

The redial list contains the 20 numbers last dialled with the handset.

▶ Briefly press the Talk key ... the redial list is opened ▶ ... use to select an entry ▶ press the Talk key

If a name is displayed:

View . . . the number is displayed ▶ . . . use to browse numbers if necessary ▶ . . . when the desired number is reached press the Talk key

Managing entries in the redial list

▶ Briefly press the Talk key ... the redial list is opened ▶ ... use to select an entry ▶ Options ... possible options:

Copy an entry to the directory: ▶ Copy to Directory ▶ OK Copy the number to the display:

Display number ▶ OK ▶ ... use < C to amend or add numbers if necessary ... use → to save as a new entry in the directory

Delete the selected entry: ▶ ☐ Delete entry ▶ OK

Delete all entries: ▶ 🔁 Delete all ▶ OK

Set automatic line seizure:

Making calls

▶ **Automatic Redial** . . . the dialled number is automatically dialled at fixed intervals (at least every 20 secs). The handsfree key flashes, "open listening" is activated.

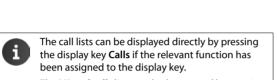

The participant answers: Press the Talk key ... the function is terminated

The participant does not answer: The call is interrupted after around 30 secs. The function is terminated after pressing any key or after ten unsuccessful attempts.

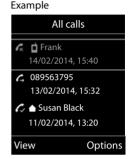

Dialling from the call list

The call lists (p. 24) contain the most recent accepted, outgoing and missed calls.

The **Missed calls** list can also be opened by pressing the Message key

One touch call

A saved number is dialled by pressing **any** key. This allows children who are not yet able to enter a number to call a certain number, for example.

Activate one touch call mode:

Make a one touch call: ▶ Press any key ... the saved number is dialled

Incoming calls

An incoming call is indicated by ringing, by a display on the screen and by the flashing Talk key ... Accept a call:

- Press the Talk key or ▶ Accept
- If Auto Answer is activated: Nemove the handset from the charging cradle
- · Accept a call on the Bluetooth headset
- Accept a call with the Gigaset L410 handsfree clip: ▶ Press the Talk key

The Gigaset L410 is registered to the base station → Gigaset L410 user guide

Switch off ringtone: ▶ Silence ... the call can be accepted for as long as it is shown on the display

Information about the caller

The caller's phone number is displayed. If the caller's number is saved in the directory, the name is displayed.

The caller's number will be transferred ($\rightarrow p. 18$).

Accepting/rejecting call waiting

A call waiting tone indicates a call during an external call. The number or the name of the caller is displayed if the phone number is transferred.

- Reject a call: ▶ Options ▶ Reject waiting call ▶ OK
- Accept a call: Accept ... speak to the new caller. The previous call is placed on hold.
- End the call, resume the on-hold call: Press the End call key

Making internal calls

▶ Press briefly ... the handset list is opened, this handset is indicated by < ▶ ... use to select handset or Call all (group call) ▶ Press the Talk key</p>

Multiple handsets have been registered to the base station (→ p. 49).

Fast access for group call:

▶ Press briefly ▶ ★ or ▶ press and hold

Internal calls to other handsets registered to the same base station are free of charge. You hear the busy tone if:

- there is already an internal connection,
- · the handset being called is not available (deactivated, outside of range),
- the internal call is not accepted within 3 minutes.

Internal consultation call/internal transfer

Call an **external** participant and transfer the call to an **internal** participant or hold a consultation call with him or her.

▶ ... the list of handsets is opened ▶ ... use to select a handset or Call all ▶ OK ... the internal participant(s) are called ... possible options:

Hold a consultation call:

Speak to the internal participant

Return to the external call:

▶ Options **▶** The End active call **▶** OK

Transfer the external call when the internal participant has answered:

▶ Announce an external call ▶ Press the End call key

Transfer the external call before the internal participant answers:

Press the End call key ... the external call is forwarded immediately. If the
internal participant does not answer or the line is busy, the external call will
automatically return to you.

End the internal call if the internal participant does **not** answer or the line is busy:

▶ End . . . You return to the external call

Accepting/rejecting call waiting

An external call arriving during an internal call is indicated with a call waiting tone. If the number is transferred, you will see the number or the name of the caller on the display.

- Rejecting a call: Reject
 - The call waiting tone is turned off. The call continues to be indicated on the other registered handsets.
- Accepting a call: ▶ Accept... Speak to the new caller, the previous call is placed on hold.

Internal call waiting during an external call

If an internal participant attempts to call you while you are involved in an external or internal call, this call is shown on the display (**Call Waiting**). However, you can neither accept nor reject this call.

- End display: Press any key
- Accept the internal call: ▶ End your current call
 The internal call is indicated in the usual way. You can accept the call.

Listening in to an external call

You are conducting an external call. An internal participant can listen in to this call and take part in the conversation (conference).

The **Listening In** function must be activated.

Activating/deactivating internal listening in

Internal listening in

The line is engaged with an external call. Your screen will display information to that effect. You can listen in to the external call.

Press and hold . . . all participants will hear a signal tone

Ending listening in

▶ Press 🕝 ... all participants will hear a signal tone

During a conversation

Handsfree mode

Activating/deactivating handsfree mode during a call and when establishing a connection:

▶ Press the handsfree key **I**

Placing the handset in the charging cradle during a call:

Press and hold down the handsfree key ... Place the handset in the charging cradle ... hold for a further 2 seconds

Call volume

Applies to the current mode (handsfree, receiver or headset):

The setting is automatically saved after around 3 seconds, even if ${\bf Save}$ is not pressed.

Muting the microphone

When the microphone is switched off, callers will no longer hear you.

Switch the microphone on/off during a call: ▶ Press ____.

Provider-specific functions (network services)

Network services depend on the network provider (service provider) and must be requested from that provider.

Network services fall into two distinct groups:

- Network services that are activated when in idle status for the following call or all subsequent
 calls (for example, "calling anonymously"). These are activated/deactivated via the
 Select Services menu.
- Network services that are activated during an external call, (for example,"consultation call",
 "swapping between two callers" and "setting up conference calls"). These are made available
 during an external call either as an option or by using a display key (e.g. Ext. Call,
 Conference).

You will find a description of the features on your network provider's website or at one of their store branches.

If you require assistance, please contact your network provider.

To activate/deactivate the features, a code is sent to the telephone network.

After a confirmation tone from the telephone network, press ...

It is not possible to reprogram the network services.

Calling Line Identification

During a call, the caller's number is transferred (CLI = Calling Line Identification) and may be displayed on the recipient's display (CLIP = CLI presentation). If the caller's number is withheld, it will not be displayed to the recipient. The call is made anonymously (CLIR = CLI Restriction).

Caller display for incoming calls

Calling Line Identification

The caller's phone number is displayed. If the caller's number is saved in the directory, the name is displayed.

No Calling Line Identification

Instead of name and number, the following is displayed:

- External: No number has been transferred.
- Withheld: Caller has withheld Calling Line Identification.
- Unavailable: Caller has not authorised Calling Line Identification.

Call waiting during an external call

During an **external** call, a call waiting tone indicates another external caller. If the number is being transferred, you will see the number or the name of the caller on the display.

Reject waiting caller:

▶ Options ▶ Reject waiting call ▶ OK ... the waiting caller hears the busy tone

Accept the waiting call:

Accept

Once you have accepted the waiting call, you can switch between the two callers or speak to both simultaneously ("Conference" p. 20).

Activating/deactivating call waiting

▶ ... use to select Select Services OK Call Waiting OK ... then
 Switch on/off: Status: ... use to select On or Off
 Activate: Send

Call waiting is activated or deactivated for all registered handsets.

Call divert

When diverting a call, the call is forwarded to another connection.

▶ ... use to select Services OK Call Divert OK ... then Switch on/off: Status: ... use to select On or Off Enter the number for call diverting:

► To Phone Number ► ... use to enter the number

Set the time for call divert:

▶ When ▶ ... use to select the time for call divert
All Calls: Calls are diverted immediately

No Answer: Calls are diverted if no one accepts the call within several rings.

When Busy: Calls are diverted if the line is busy.

Activate: > Send

Diverting calls may incur additional costs. Please consult your network provider.

Calls with three participants

Consultation calls

Make another external call during an external call. The first call is placed on hold.

▶ Ext. Call ▶ ... use to enter the number of the second participant ... the active call is placed on hold and the second participant is called

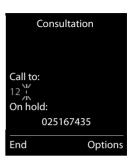

If the second participant does not answer: **End**

Ending a consultation call

▶ Options ▶ ☐ End active call ▶ OK ... the connection to the first caller is reactivated

OI

Press the End call key ... a recall to the first participant is initiated

Conference

Speaking to both participants at the same time.

 During an external call, dial the number of a second participant (consultation call) or accept a waiting caller ... then

Initiate conference call:

- ▶ Conference . . . all callers can hear one another and hold a conversation with one another Return to call swapping:
- ▶ End Conf.

End call with both participants:

Press the End call key

Each of the participants can end their participation in the conference call by pressing the End call key or hanging up.

Network mailbox

The network mailbox has been requested from the network provider.

entering a number

► ... use to select Answer Machine OK Network Mailbox OK ... use to enter or amend the network mailbox number Save

The network mailbox cannot be activated/deactivated using the handset. Please contact the network provider if you require any further information.

Playing back messages

▶ Press and hold 1 ∞

or

▶ Press the Message key Mailbox: ▶ OK

or

Listen to announcement out loud: ▶ Press the handsfree key •

Message lists

Notifications about missed calls, messages on the network mailbox, received SMS messages and missed alarms are saved in the messages list.

As soon as a **new message** arrives, an advisory tone will sound. The Message key also flashes (if activated → p. 23). Icons for message types and the number of new messages are shown on the idle display.

Notification for the following message types is available:

- on the network mailbox
- in the missed calls list
- in the SMS message list
- in the missed alarms list

The icon for the network mailbox is always displayed, provided the number is stored in the telephone. The other lists are only displayed if they contain messages.

Display messages:

- Press the Message key ... Messages lists that contain messages are displayed, Mailbox: is always displayed An entry is marked in bold: new messages are available. The number of new messages is shown in brackets. An entry is not marked in bold: no new messages. The number
- ... use to select a list OK ... the calls or messages are listed

of old messages is shown in brackets.

Network mailbox: The network mailbox number is dialled (p. 21).

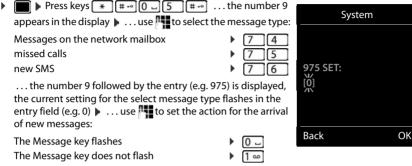

Example

Activating/deactivating Message key flashing

Receipt of new messages is displayed by a flashing message key on the handset. This type of alert can be activated/deactivated for each message type.

In idle status:

... confirm selected setting with OK

or

▶ return to idle display without making changes: ▶ Back

Call lists

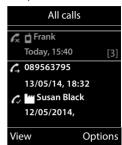

The telephone saves different types of calls (missed, accepted and outgoing calls) in lists.

List entry

The following information is displayed in the list entries:

- · The list type (in the header)
- Icon for the type of entry:
 - Missed calls,
 - Accepted calls,
 - Outgoing calls
- Caller's number. If the number is stored in the directory, the name and number type (Phone (Home), Phone (Office), Phone (Mobile)) are shown instead. In the event of missed calls, the number of missed calls from this number is also shown in square brackets.
- · Date and time of call (if set)

Example

Opening the call list

Via the Message key (missed calls):

▶ Press the Message key Missed Calls: ▶ OK

Calling back a caller from the call list

Additional options

b ... use to select entry Options Copy to Directory
 Delete an entry: Options Delete entry Options Delete entry OK

Delete list: ▶ Options ▶ 🔁 Delete List ▶ OK ▶ Yes

Directory

The local directory is unique to the handset. However, it is possible to send entries to other handsets (p. 27).

Opening the directory

▶ Briefly press in idle status

or

... use to select Directory OK

Directory entries

Number of entries: up to 500

Information: First name and surname, up to three telephone numbers, e-mail

address, anniversary with alert, VIP ringtone with VIP icon, CLIP-picture

Length of the entries: Numbers: max. 32 digits

> First name, surname: max. 16 characters E-mail address: max. 64 characters

Creating an entry

▶ 🗐 New Entry> ▶ OK ▶ ... use 🜓 to switch between the entry fields and enter data for an entry:

Names/numbers:

... use to enter first names and/or surnames, at least one number (personal, office, or mobile) and an e-mail address, if applicable

Anniversary:

... use to activate/deactivate Anniversary ... use to enter date and time 🕨 ... use 🕟 to select type of alert (Visual only or a ringtone)

Caller Melody (VIP):

... use to select the ringtone that will indicate a call from the participant ... if a Caller Melody (VIP) has been assigned, the entry will appear in the directory with the VIP icon.

Caller Picture:

... use F to select a picture that is to be displayed during a call from the participant (→ Resource Directory.

Save entry: > Save

The entry is only valid if it contains at least one number.

Example

For **Caller Melody (VIP)** and **Caller Picture:** the telephone number of the caller must be supplied.

Searching for/selecting a directory entry
▶ use to browse searched names
or
use to enter initial letters (max. 8 letters) the display jumps to the first name starting with these initial letters use to continue browsing to the desired entry, if needed
Scroll through directory: • 📦 • Press and hold
Displaying/changing an entry
▶ use to select entry ▶ View ▶ use to select the field to be
changed ▶ Edit
or
▶ use to select an entry ▶ Options ▶ Edit entry ▶ OK
Deleting entries
Delete the selected entry: use to select an entry Options Delete entry OK
Delete all entries: ▶ 🕡 ▶ Options ▶ 🜓 Delete all ▶ OK ▶ Yes
Setting the order of the directory entries
Directory entries can be sorted by first name or surname.
▶ Options ▶ Sort by Surname / Sort by First Name
If no name was entered, the default telephone number is shown in the surname field. These entries appear at the beginning of the list, regardless of how the entries are sorted.
The sort order is as follows:
Space Digits (0-9) Letters (alphabetically) Other characters.
Displaying the number of entries available in the directory ▶ □ ▶ Options ▶ □ Available Memory ▶ OK

Copying number to the directory

Copy numbers to the directory:

- · From a list e.g. the call list or the redial list
- · From the text of an SMS
- When dialling a number

The number is displayed or highlighted.

- ▶ Press the display key → or Options ▶ Copy to Directory ▶ OK ... possible options: Create a new entry:
 - ► <New Entry> ► OK ► ... use to select number type ► OK ► complete entry ► Save Add number to an existing entry:
 - ... use to select an entry ▶ OK ▶ ... use to select number type ▶ OK ... the number is entered or a prompt to overwrite an existing number is displayed ▶ ... if required, answer the prompt with Yes/No ▶ Save

Copying an entry/directory

The sending and receiving handset must both be registered to the same base station. The other handset and the base station are able send and receive directory entries.

An external call interrupts the transfer.

Caller pictures and sounds are not transferred. Only the date is transferred for an anniversary.

Both handsets support vCards:

- No entry with the name is available: a new entry is created.
- An entry with the name is already available: The entry is expanded to include the new numbers. If the entry contains more numbers than allowed by the recipient handset, a second entry is created with the same name.

The recipient handset does not support vCards:

A separate entry is created and sent for each number.

The sending handset does not support vCards:

A new entry is created on the receiving handset and the transferred number is added to the **Phone (Home)** field. If an entry with this number already exists, the copied number is discarded.

Copying individual entries

Copy the next entry after successful transfer: ▶ Press Yes or No

Use vCard via SMS to send a directory entry in vCard format by SMS.

Copying the entire directory

▶ Options ▶ Copy All ▶ OK ▶ to Internal ▶ OK ▶ ... use to select the receiving handset ▶ OK ... the entries are copied one after the other

Copying a vCard using Bluetooth

Copy directory entries in vCard format, e.g. to exchange entries with a mobile phone.

Bluetooth mode is activated

The other handset/mobile phone supports Bluetooth.

▶ ... use to select an entry if needed ▶ Options ▶ Copy Entry / Copy All ▶ vCard via Bluetooth ... the Known Devices list is displayed ▶ ... use to select device ▶ OK

Receiving a vCard using Bluetooth

If a device in the **Known Devices** list sends a vCard to your handset, a directory entry is automatically created and a message is shown in the display.

If the sending device is not in the list: \blacktriangleright ... use to enter the PIN of the **sending** Bluetooth device \blacktriangleright **OK** ... the copied vCard is available as a directory entry

Additional functions

Sound profiles

The telephone has 3 sound profiles for adapting the handset to the environmental conditions: **Profile Silent, Profile Personal, Profile Loud**

 Use to switch between the profiles ... the profile is changed straight away without a prompt

The profiles are set as follows by default:

Default setting		Profile Loud	Profile Silent	Profile Personal
Ringtone		On	Off	On
Ringtone volume	Internal	5	Off	5
	External	5	Off	5
Handset volume	Receiver	5	3	3
	Handsfree	5	3	3
Advisory tones	Key click	Yes	No	Yes
	Confirmation tone	Yes	No	Yes
	Battery tone	Yes	Yes	Yes

Activate alert tone for an incoming call for **Profile Silent**: **\(\)** after switching to **Profile Silent** press the display key **Beep** ... the icon appears in the status bar

Changes to the settings listed in the table:

- apply in the Loud and Silent profiles as long as the profile is not changed.
- are permanently saved in Profile Personal for this profile.

The set profile remains set when switching the phone off and back on.

Calendar

You can remind yourself of up to 30 appointments.

In the calendar, the current day is outlined in white; on days with appointments, the numbers are displayed in colour. When a day is selected, it will be outlined in colour.

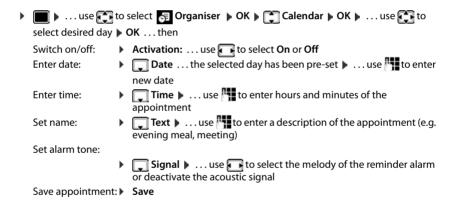

```
Mo Tue We Th Fri Sat Su
01 02 03 04 05 06
07 08 09 10 11 12 13
14 15 16 17 18 19 20
21 22 23 24 25 26 27
28 29 30 31

Back OK
```

Saving appointments to the calendar

Date and time have been set.

If an appointment has already been entered: \blacktriangleright \bigcirc <New Entry> \blacktriangleright OK \blacktriangleright ... Then enter information for the appointment.

Notification of appointments/anniversaries

Anniversaries are transferred from the directory and displayed as an appointment. An appointment/anniversary is displayed in idle status and the selected ringtone plays for 60 seconds as a notification.

- Acknowledge and stop the reminder: Press the display key OFF
- Respond with SMS: ▶ Press the display key SMS . . . the SMS menu is displayed

During a call, a reminder is indicated on the handset **once** with an advisory tone on the handset.

Displaying missed appointments/anniversaries

The following appointments and anniversaries are saved in the Missed Alarms list:

- The appointment/anniversary call was not acknowledged.
- The appointment/anniversary was notified during a phone call.
- The handset was switched off at the time of the appointment/anniversary.

The last 10 entries are stored. The [2] icon and the number of new entries are shown in the display. The most recent entry appears at the top of the list.

Opening the list

Press the Message key Missed Alarms: ► OK ► ... use to browse through the list of any appointments

or

Each entry is displayed with the number or name, date and time. The most recent entry appears at the top of the list.

- Delete an appointment/anniversary: Delete
- Compose an SMS: ▶ SMS (only if the list has been opened via the menu) . . . the SMS menu is opened

Displaying/changing/deleting stored appointments

Alarm clock

Date and time have been set.

Activating/deactivating the alarm clock and setting the wake-up time

Note to select or organiser of to select organiser of to select organiser of to select organiser or

save settings.

When the alarm clock is activated, the icon and the wake-up time are displayed in idle display.

Alarm

An alarm is shown on the display and indicated by the selected ringtone melody. The alarm sounds for 60 seconds. If no key is pressed, the alarm is repeated after 5 minutes. After the second repetition, the alarm call is deactivated for 24 hours.

During a call, the alarm is only indicated by a short tone.

Switching off /repeating the alarm after an interval (snooze mode)

Deactivate the alarm: **OFF**

Repeat the alarm (snooze mode): ▶ Press **Snooze** or any key ... the alarm is switched off and repeated after 5 minutes.

Baby monitor

When the baby monitor is switched on, the stored (internal or external) destination number is called as soon as a defined noise level is exceeded in the vicinity of the handset. The alarm to an external number is cancelled after approximately 90 seconds.

You can answer the alarm using the **Two Way Talk** function. This function is used to switch the loudspeaker of the handset located in the baby's room on or off.

In baby monitor mode, incoming calls are only indicated on the display (without ringtone). The display backlight is reduced to 50%. Advisory tones are deactivated. All keys are locked, with the exception of the display keys and the ability to press the centre of the control key.

If you accept an incoming call, the baby monitor mode is suspended for the duration of the call, but the function **remains** activated. The baby monitor mode is not deactivated by switching the handset off and on again.

The handset should be positioned 1 to 2 metres away from the baby. The microphone must point towards the baby.

Activating the function reduces the operating time of your handset. For that reason, place the handset in the charging cradle if necessary.

The baby monitor is activated 20 seconds after switching on.

The answer machine for the destination number must be switched off.

After switching on:

▶ Test sensitivity.

Activate/deactivate two-way talk:

Set microphone sensitivity:

Save settings: > Save

▶ Test the connection, if the alarm is being forwarded to an external number.

Activating and setting the baby monitor

▶	Baby M	onitor activated

External: • Number • use to select number	В	aby Monitor
or select a number from the directory: >		0891234567
Internal: ▶	OFF	Options

The destination number is displayed in idle display when the baby monitor is activated.

Two Way Talk 🕨 ... use 🕟 to select On or Off

▶ Sensitivity ▶ ... use to select High or Low

Switching off/interrupting the alarm

Switch off the alarm: In idle status press the display key OFF

Interrupt the alarm: Press the End call key alarm

Deactivating the alarm remotely

The alarm is forwarded to an external destination number.

The receiving phone supports tone dialling.

Accept alarm call ▶ Press keys (1) # ... the call is ended The alarm is deactivated and the handset is in idle status. The baby monitor settings on the handset (e.g. no ringtone) will remain activated until you press the display key OFF.

Reactivate baby monitor with the same number: ▶ ... Reactivate (→ p. 33) ▶ Save

The device range is set to maximum as default. This guarantees the best connection between the handset and the base station. In idle status, the handset will not function (as it is not transmitting). Only the base station will maintain contact with the handset via a low wireless signal. During a call, the transmission power automatically adapts to the distance between the base station and handset. The smaller the distance to the base, the lower the radiation.

To reduce the radiation further:

Reducing radiation by up to 80%

► ... use to select Settings ► OK ► ECO DECT ► OK ► Maximum

Range ► Change (= off)

The range is also reduced with this setting.

It is not possible to use a repeater to increase the range.

Deactivating radiation in idle status

► ... use to select Settings ► OK ► ECO DECT ► OK ► No Radiation ► Change (= on)

To benefit from the advantages of the setting **No Radiation**, all registered handsets must support this feature.

If the setting **No Radiation** is activated and a handset is registered to the base that does not support this feature, **No Radiation** is automatically deactivated. As soon as this handset is de-registered, **No Radiation** will automatically be re-activated.

The wireless connection will only be established for an incoming or outgoing call and the connection will be delayed by about 2 seconds.

In order that a handset can establish a wireless connection with the base station more quickly for an incoming call, it must "listen" to the base station more often, i.e. scan the environment. This increases power consumption and reduces the standby and talktime of the handset.

When **No Radiation** is activated, there will be no range display/range alarm on the handset. Contactability can be tested by attempting to establish a connection.

Press and hold the Talk key ... the ringing tone will sound.

Further information can be found at www.gigaset.com.

Protection against unwanted calls

Time control for external calls

Date and time have been set.

Enter a time period during which the handset should suspend ringing to indicate external calls e.g. during the night.

Enter time:

use to select On or Off

use to switch between Suspend ring. from and Suspend ring. until ▶ ... use to enter start and end in 4-digit format

Save: **Save**

The time control only applies to the handset for which the setting is configured. The telephone will continue to ring for numbers that have been assigned to a VIP group in the directory.

Protection from anonymous callers

The handset will not ring if callers' numbers are not revealed. This setting can be applied to only one or to all registered handsets.

For one handset

▶ ... use to select Settings ▶ OK ▶ Audio Settings ▶ OK ▶
Ringtones (Handset) ▶ OK ▶ Anon. Calls Silent ▶ Edit (= on) ... the call is only signalled on the display

For all handsets

No Protection Anonymous calls are indicated in the same way as identified numbers

Silent Call The telephone will not ring and the incoming call will only appear in the display.

Block Call The telephone will not ring and the incoming call will not appear in the display. The caller will hear the busy tone.

Save settings: > Save

Black list

When the black list function is activated, calls from black list numbers are not indicated or are only indicated in the display. These settings apply to all registered handsets.

Transferring a number from a call list to the black list

▶ ... use to select Call Lists OK ... use to select Accepted calls/

Silent Call The telephone will not ring and the incoming call will only appear in the

Block Call The telephone will not ring and the incoming call will not appear in the

display. The caller will hear the busy tone.

Save settings: > Save

Switch off ringtone when in charging cradle

The handset will not ring when placed in the charging cradle. The call is only indicated on the display.

▶ ... use to select Settings ▶ OK ▶ Audio Settings ▶ OK ▶
Ringtones (Handset) ▶ OK ▶ Silent Charging ▶ Change (= ringtone is switched off when in charging cradle)

SMS (text messages)

Calling Line Identification is enabled (p. 18).

The network provider supports the SMS service.

The call number of at least one SMS service centre has been entered (p. 41).

If no SMS service centre is entered, the submenu ${\bf SMS}$ only consists of the entry ${\bf Settings}.$

Writing and sending SMS messages

An SMS may be up to 612 characters in length. If the number of characters exceeds 160, the SMS is sent as **linked** SMS messages (up to four individual SMS messages).

The remaining number of characters is shown in the top right corner of the display, followed by an indication in brackets of which part of a linked SMS is currently being written. Example: 405(2).

Write an SMS: ▶ New SMS ▶ OK ▶ ... use to enter SMS text

Send an SMS: Press the End call key

or ▶ Options ▶ 📑 Send ▶ OK

Enter number (Send SMS to):

From the directory: ▶ 📦 ... use 👣 to select number ▶ **OK**

or ightharpoonup . . . use ightharpoonup to enter number directly

If sending SMS messages to an SMS mailbox: add the mailbox ID to the **end** of the number.

Send: **Send**

The number must include the local area code (even if you are in that area).

If an external call comes in, or if you interrupt writing for more than 2 minutes, the text is automatically saved in the draft message list.

Sending SMS messages may incur **additional costs**. Please consult your network provider.

Sending SMS messages to an e-mail address

The network provider supports this feature.

▶ ... use select SMS ▶ OK ▶ New SMS ▶ OK ... then
Enter address:
▶ ... use to enter the e-mail address at the start of the SMS message
or
▶ Options ▶ Insert eMail address ▶ ... use to select a

▶ Options ▶ Send ▶ OK ▶ ... use to enter the number of the e-mail service (if not entered) ▶ Send ... the SMS is sent to the e-mail service of the SMS send service centre

▶ Options ▶ Edit ▶ OK ▶ ... use to edit text ▶ Options ▶
Forward ▶ OK

Forward SMS to recipient of your choice:

▶ Options ▶ Forward ▶ OK

Display text in a different character set:

▶ Options ▶ Character Set ▶ OK ▶ ... use to select character set ▶ Select (= selected)

Saving numbers from SMS text to the directory

If a telephone number in the SMS text is recognised, it is automatically highlighted.

- Save the number in the directory: p. 25)
 If the number is to also be used to send an SMS, save the number including the local area code (dialling code).
- Dial a number: Press the Talk key

• Select the next number, if an SMS contains multiple numbers: ▶ ... use to scroll down until the first number has disappeared from the display.

The +-icon is not copied for international area codes.

You should then enter "00" at the start of the number.

SMS with vCard

The vCard is an electronic business card. It is indicated by the figure icon in the SMS text. A vCard can contain a name, home number, work number, mobile number and a birthday. Individual entries in a vCard can be saved to the directory one after the other.

When reading an SMS containing the vCard: View Save

The directory is opened automatically. The number and name are copied. If a birthday is entered on the vCard, the date is copied to the directory as an anniversary. If necessary, edit the entry in the directory and save it. You will return to the vCard automatically.

SMS notification

Receive notifications of missed calls and/or new messages on the answer machine.

Do not enter your own fixed line network number for notification of missed calls. This can create an endless loop that will incur charges.

SMS notification may incur additional costs.

SMS service centres

The number for at least one SMS service centre must be saved in the device to be able to send SMS messages. The SMS service centre number can be obtained from the service provider.

SMS messages are received from **every** entered SMS service centre as long as they are registered with their service provider.

Your SMS messages are sent via the SMS service centre that is entered as the active send centre. However, you can activate any other SMS service centre as the active send service centre to send a current message.

Entering/changing the SMS service centre, setting the send service centre

▶ ... use t select SMS OK Settings OK Service Centres OK ... use to select SMS service centre (= current send service centre) Edit ... then

Activate send service centre:

Active Send: . . . use to select Yes or No (Yes = SMS messages are sent via the SMS service centre)

For the SMS service centres 2 to 4, the setting only applies to the next SMS.

Enter the number of the SMS service:

▶ GMS Service Centre Number ▶ ... use to enter the number Save settings: **▶ Save**

If you have agreed a flat fixed line network rate, the chargeable numbers with dialling code 0900 are often blocked. If, in this case, a 0900 number is entered for the SMS service centre, you will not be able to send text messages from your phone. If the attempt to send fails, the SMS is saved in the incoming messages list and indicated as failed.

SMS to PABXs

- The Call Line Identification must be forwarded to the extension of the PABX (CLIP).
- If necessary, the access code/outside line code must be prefixed to the number of the SMS service centre (depending on your PABX). To test: Send an SMS to your own number, once with the access code and once without.
- If the SMS is sent without the extension number, it will not be possible for the recipient to answer directly.

Activating/deactivating first ring muting

Every incoming SMS is indicated by a single ring. If such a "call" is answered, the SMS is lost. To prevent this, mute the first ring for all external calls. In idle status:

► ★ # □ 0 □ 5 # □ 1 □ 9 ... the current setting flashes in the input field (e.g. 1) ... then

Do not mute the first ringtone:

▶ 0 🔲 ▶ OK

Mute the first ringtone (default setting):

▶ 1 º DK

SMS troubleshooting

- E0 Calling Line Identification permanently withheld (CLIR) or Calling Line Identification not activated.
- FE Error occurred while sending SMS.
- FD Connection to SMS service centre failed, see self-help.

Self-help with errors

You cannot send messages

- You have not requested the CLIP service (Calling Line Identification Presentation).
 - Ask your network provider to enable the feature.
- SMS sending was interrupted (e.g. by a call).
 - Re-send the SMS.
- The network provider does not support this feature.
- No number or an incorrect one has been entered for the send service centre.
 - ▶ Enter the number (→ p. 41).

SMS text is incomplete

- The phone's memory is full.
 - Delete old SMS messages.
- The network provider has not yet sent the rest of the SMS.

You have stopped receiving SMS messages

Call divert has been activated for All calls.

▶ Change call divert (→ p. 19).

The SMS is played back

- The "display call number" service is not activated.
 - Ask the network provider to enable this feature (subject to a fee).
- Your mobile phone operator and SMS service provider are not working in partnership.
 - ▶ Obtain information from your SMS service provider.
- The phone is not registered with the SMS service provider.
 - Send an SMS to register the phone for receiving SMS.

Resource Directory

Sounds for ringtones and images that can be used as caller pictures (CLIP pictures) or as a screensaver are saved in the handset's resource directory. A range of monophonic and polyphonic sounds and pictures have been pre-set but further images and sounds can be downloaded using a PC (Gigaset QuickSync).

Media types:

Туре		Format
Sound	Ringtones Monophonic Polyphonic Imported sounds	Internal Internal Internal WMA, MP3, WAV
Picture	CLIP-picture Screensaver	BMP, JPG, GIF 128 x 86 pixels 128 x 160 pixels

If insufficient memory is available, you must delete one or more pictures or sounds before others can be saved.

Bluetooth

The handset is able to use Bluetooth™ to communicate wirelessly with other devices that also use this technology e.g. for exchanging directory entries.

Bluetooth is activated and the devices have been registered to the handset.

The following devices can be connected:

A Bluetooth headset

The headset features the **Headset** or **Handsfree Profile**. If both profiles are available, the handsfree profile is used to communicate.

It may take 5 seconds to establish a connection, whether a call is accepted using the headset or transferred to the headset, or a call is made from the headset.

 Up to 5 data devices (PCs, PDAs or mobile telephones) for the transmission of address book entries as a vCard or for the exchange of data with the computer.

In order for telephone numbers to be used further, the area code (international and local area code) must be saved to the telephone.

Operating Bluetooth devices \rightarrow device user guides

Activating/deactivating Bluetooth mode

► Lose to select Bluetooth ► OK ► Activation ► Change (= activated)

If the local area code is still not saved: ... use to enter local area code ... OK

When in idle status, the activated Bluetooth mode is indicated on the handset by the * icon.

Registering Bluetooth devices

The distance between the handset in Bluetooth mode and the active Bluetooth device (headset or data device) should not exceed 10 m.

The registration of a headset overwrites a previously registered headset.

If a headset is to be registered that is already registered with a different device, this connection must be deactivated before registering.

Edit name: ▶ Options ▶ Edit Name ▶ OK ▶ . . . use ☐ to edit name ▶ Save

If an active Bluetooth device is de-registered, it may try to re-connect as a "non-registered device".

Rejecting/accepting a non-registered Bluetooth device

If a Bluetooth device that is not registered in the list of known devices tries to connect to the handset, a prompt will appear asking you to enter the PIN of the Bluetooth device (Bonding).

Reject:

▶ Briefly press the End call key 🕝.

Accept:

... use to enter the PIN of the Bluetooth device to be accepted OK
 ... Wait for PIN confirmation ... then

Add the device to the list of known devices: **Yes**

Use the device temporarily: \blacktriangleright No ... the Bluetooth connection can be used, as long as the device is located within transmission range or until it is switched off

Changing the Bluetooth name of the handset

The handset is shown by this name on another Bluetooth device.

▶ ... use to select Bluetooth OK Own Device OK ... the name and the device address are shown Change ... use to change the name Save

Additional functions using the PC interface

The **Gigaset QuickSync** program has been installed on the computer.

Free to download at → www.gigaset.com/guicksync

QuickSync functions:

- Svnc the handset's directory with Outlook
- Upload CLIP-pictures (.bmp) from the computer to the handset
- Upload pictures (.bmp) as screensavers from the computer to the handset
- Upload sounds (ringtone melodies) from the computer to the handset
- Update firmware
- Connecting the handset to the computer via Bluetooth or via a USB data cable.

Connect the handset directly to the PC, not via a USB hub.

Transferring data

Data transfer using Bluetooth:

- The computer has Bluetooth capability.
- A USB data cable is not plugged in. If a USB data cable is plugged in during an
 existing Bluetooth connection, the Bluetooth connection is interrupted.
- Launch the Gigaset QuickSync program on the computer.

The message **Data transfer in progress** is shown on the display during data transfer between the handset and PC. During this time, it is not possible to enter any data using the keypad and incoming calls are ignored.

Carrying out a firmware update

- Connect the telephone and the PC using a USB data cable (→ p. 9)
 Launch Gigaset
 QuickSync
 Establish connection to the handset
- Start firmware update in Gigaset QuickSync ... Information about this can be found in Gigaset QuickSync help feature

The update process may take up to 10 minutes (not including download time).

Do not interrupt the process and do not remove the USB data cable.

The data are first downloaded from the online update server. The time required for this depends on Internet connection speed.

The display on your telephone is switched off and the Message key and the Talk key rwill flash.

Once the update is complete, your telephone will automatically restart.

Procedure in the event of an error

If the update procedure fails or the telephone no longer functions properly after the update, repeat the update procedure:

- ► End the **Gigaset QuickSync** program on the PC ► Remove the USB data cable from the telephone ► Remove the battery (→ p. 7) ► Replace the battery
- ▶ Carry out the firmware update again as described above

If the update procedure fails more than once or it is no longer possible to connect to the PC, carry out the **Emergency Update**:

- End the Gigaset QuickSync program on the PC ►
 Remove the USB data cable from the telephone ►
 Remove the battery (→ p. 7)
- Press and hold keys 4 and 6 at the same time with the forefinger and middle finger ▶ Replace the battery
- Release keys 4 and 6 ... the Message key and the Talk key 7 will flash alternately
- Carry out the firmware update as described above

Always save pictures and sounds uploaded onto the handset on the PC, as they are deleted during an $\bf Emergency\, Update.$

Expanding the functionality of the telephone

Multiple handsets

Up to six handsets can be registered to the base station.

Each registered device is assigned an internal number (1 - 6) and an internal name (INT 1 – INT 6). The number or name assigned can be changed.

If all internal numbers have already been assigned at the base station: • de-register a handset that is no longer needed

Registering the handset

A handset can be registered on up to four base stations.

Registration must be initiated on the base station **and** on the handset. Both must be carried out **within 60 secs**.

On the base station

▶ Press and hold the Registration/Paging key on the base station (→ p. 2) (approx. 3 secs).

On the handset

▶ ... use to select Settings Not Registration Not Register Handset Not Not ... use to select the base station (if the handset has already been registered to four base stations) Not ... an available base station is sought Not ... Enter system PIN (default setting: 0000) Not Not ...

Once registration is complete, the handset returns to idle status. The internal number of the handset appears in the display, e.g. INT 1. If not, repeat the procedure.

Maximum possible number of handsets registered to the base station (all internal numbers assigned): The handset with the highest internal number is replaced by the new one. If this is not possible, because a conversation is being held on this handset, for example, the message **No available internal number** is given. De-register a handset that is no longer required and repeat the registration procedure

Registering a handset to multiple base stations

Your handset can be registered to up to four base stations. The active base station is the base station to which the handset was last registered. The other base stations remain saved in the list of available base stations.

▶ ... use to select Settings ▶ OK ▶ Registration ▶ OK ▶ Select Base ▶ OK ... possible options:

Change active base station:

... use or Best Base to select base station Select= select

Best Base: The handset chooses the base station with the best reception as soon as it loses connection to the current base station.

Change name of a base station:

▶ ... use to select a base station Select (= selected) Name change name Save

De-registering the handset

▶ ... use to select Settings Nok Nok Registration Nok Nok Not De-register Handset Nok ... the handset being used is selected Nok ... use to select a different handset if desired Nok ... enter system PIN if desired Nok Nok ... Confirm de-registration with Yes

If the handset is still registered to other bases, it switches to the base with the best reception (Best Base).

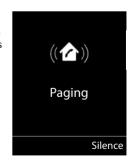

Locating a handset (Paging)

▶ Briefly press the Registration/paging key on the base station.

All handsets will ring at the same time ("paging"), even if ringtones are switched off. **Exception:** handsets on which the baby monitor is activated.

Ending the search

- ▶ **Briefly** press the registration/paging key on the base station
- or Press the End call key on the handset
- or Press the display key Silence on the handset
- or No action. After approx. 30 seconds, the paging call will end automatically.

Changing the handset name and internal number

When registering multiple handsets, they will automatically be assigned the names "INT 1", "INT 2" etc. Each handset will automatically be assigned the lowest unassigned internal number. The internal number is shown as the name of the handset on the display e.g. INT 2. You can change the names and the numbers of handsets. The name must not exceed 10 characters in length.

•	• the list of	fh	andsets is opened, the current handset is highlighted with $< brace \dots $ u

Repeater

A repeater increases the receiving range between the Gigaset handset and the base station.

The registration procedure for a repeater depends on the version of the repeater being used.

- Repeater without encryption, e.g. Gigaset repeater prior to Version 2.0
- Repeater with encryption, e.g. Gigaset repeater later than Version 2.0

Further information about the Gigaset repeater can be found in the repeater user guide and at www.gigaset.com/gigasetrepeater.

Repeater without encryption

Activate Maximum Range/deactivate No Radiation

```
► Lose to select Settings ► OK ► ECO DECT ► OK ► Maximum

Range ► Change (= on) ► No Radiation ► Change (= off)
```

Deactivate encryption

```
▶ use to select Settings ► OK ► System ► OK ► Encryption ► Change ( = deactivated)
```

Registering a repeater

▶ Connect the repeater to the mains power supply ▶ Press and hold the Registration/paging key on the telephone base station (min. 3 secs) ... the repeater is automatically registered It is possible to register more than one Gigaset repeater.

Repeater with encryption

Encryption is activated (default setting).

Registering a repeater

▶ Connect the repeater to the mains power supply ▶ Press and hold the Registration/paging key on the telephone base station (min. 3 secs) . . . the repeater is automatically registered

Up to 2 repeaters may be registered.

The ECO DECT function **Maximum Range** is activated and the **No Radiation** function is deactivated. The settings cannot be changed whilst the repeater is registered.

As soon as a repeater is registered, it will appear in the repeater list under

Settings ▶ System ▶ Repeater

De-registering a repeater

Operation with a router

When operating on the analogue connection of a router, any **echoes** that may occur can be reduced by activating **XES mode 1** (XES = **eX**tended **E**cho **S**uppression).

If the XES mode 1 does not sufficiently suppress the occurring echoes: activate XES mode 2.

- ★ # □ 0 □ 5 # □ 7 0 □ ► ... press one of the following keys
 0 □ ► OK Normal mode
 1 □ ► OK XES mode 1
 - 2 NOK XES mode 2

If there are no problems with echoes, the normal mode (factory settings) should be activated.

Operation with a PABX

To find out which settings are required for a PABX, please refer to the PABX user guide.

You cannot send or receive SMS messages on PABXs that do not support Calling Line Identification.

Setting Tone or Pulse dialling mode

Setting the flash time

Saving an access code (outside line code)

Setting the access code (e.g. "0") for dialling using the fixed line network.

Fixed line Access external line with: . . . use to enter or change access code, max. 3 digits

► For ► ... use to select when the access code should be dialled Call Lists: The access code will only prefix numbers from a list (list of answered calls, list of missed calls, SMS list).

All calls: The access code prefixes all numbers dialled.

Off: The access code is deactivated and does not prefix any telephone number.

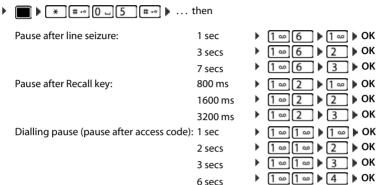

Save: **Save**

Rule:

The access code never prefixes any SMS service centre numbers.

Setting pauses

To enter dialling pause when dialling:

Press and hold the Recall key R ... a P appears in the display.

Switching temporarily to tone dialling (Tone)

After dialling the external number or after establishing the connection:

▶ Press the Star key ★ briefly.

After the call ends, pulse dialling is automatically reactivated.

Adjusting the telephone settings

Handset

Changing the language

▶ ... use to select Settings ▶ OK ▶ Language ▶ OK ▶ ... use to select language ▶ Select (= selected)

If the handset has been set to an incomprehensible language:

▶ Press the keys 9 5 slowly one after the other ▶ ... use to select the correct language ▶ press the right display key

Display and keypad

Screensaver

A digital or analogue clock, Info Services and a range of pictures can be selected to be displayed as a screensaver when in idle status.

Select screensaver:

► Selection ► ... use to select a screensaver (Digital Clock / Analog Clock / <Pictures> / Slideshow)

The screensaver is activated approx. 10 seconds after the display has changed to idle status.

All pictures from the **Screensaver** folder of the **Resource Directory** are available to select.

End screensaver

▶ **Briefly** press the End call key 🕝 ... the idle display appears

Large font

Show text and icons in call lists and in the directory in a larger size in order to improve legibility. Only one entry is shown in the display and names are abbreviated if necessary.

Colour scheme

The display may appear in a range of colour combinations.

▶ ... use to select Settings OK Display & Keypad OK Settings OK Display & Keypad OK Select the desired colour scheme Select = selected

Display backlight

The display backlight always illuminates when the handset is taken out of the base station/charging cradle or when a key is pressed. Any **digit keys** that are pressed appear on the display for pre-dialling.

Switch the display backlight on/off when in idle status:

The handset's standby time may be significantly reduced if the display backlight is activated.

Switching the keypad illumination on/off

▶ ... use to select Settings ▶ OK ▶ Display & Keypad ▶ OK ▶ Key Illumination ▶ Change (= on)

Activating/deactivating automatic keypad lock

Automatically lock the keypad when the handset has been in idle status for around 15 seconds.

▶ ... use to select Settings OK Display & Keypad OK Auto Keypadlock Change (= on)

Activating/deactivating Auto Answer

When set to Auto Answer, the handset accepts an incoming call as soon as it is removed from the charging cradle.

▶ ... use to select Settings OK Telephony OK Auto Answer Change (= on)

Regardless of the **Auto Answer** setting, the connection ends as soon as you place the handset back in the charging cradle. Exception: Press and hold the handsfree key for a further 2 seconds while placing the handset in the charging cradle.

Changing the earpiece and speaker volume

You can set the volume of the earpiece and speaker at 5 levels independently of each other.

During a conversation

▶ Press the volume keys 🛨 / 🖃 on the right side of the handset or

The setting is automatically saved after around 3 seconds without saving.

In idle status

▶ ... use to select Settings NK Audio Settings NK Handset Volume OK ... then

Changes are only saved permanently in Profile Personal.

Earpiece and handsfree profile

Select **earpiece** and **handsfree** profiles to adapt the telephone as much as possible to the surroundings. Check which is the most comfortable for you and the other party.

► ... use to select Settings OK Addio Settings OK Acoustic Profiles Trofiles Farpiece Profiles / Handsfree Profiles OK ... use to select profile Select (= selected) Earpiece Profiles

Earpiece Profiles: High or Low (default setting)

Handsfree Profiles: Profile 1 (default setting) ... Profile 4

Ringtones

Ringtone volume

▶ ... use to select Settings ▶ OK ▶ Audio Settings ▶ OK ▶ Ringtones (Handset) ▶ OK ▶ Volume ▶ OK ▶ ... use to select For internal calls and alarms or External Calls ▶ ... use to set volume in 5 increments or in crescendo mode (increasing volume) ▶ Save

When the telephone rings, you can permanently change the ringtone volume using the volume keys [+] (louder) or [-] (quieter).

Changes are only saved in Profile Personal.

Ringtone melody

Set a variety of ringtones for internal and external calls.

▶ ... use to select Settings ▶ OK ▶ Audio Settings ▶ OK ▶
Ringtones (Handset) ▶ OK ▶ Melodies ▶ OK ▶ ... use to select he connection ▶ ... use to select the ringtone/melody in each case ▶ Save

Activating/deactivating the ringtone

Deactivating the ringtone permanently

▶ Use the ▲ key to set **Profile Silent** . . . the 🍇 icon appears in the status bar

Activating the ringtone permanently

Use the key to set Profile Loud or Profile Personal

Deactivating the ringtone for the current call

Press Silence or the End call key 6

Activating/deactivating advisory tones

The handset notifies acoustically about different activities and statuses. These advisory tones can be activated/deactivated independently of each other.

•	► use to select Settings OK Addio Settings OK Advisory
	Tones ▶ OKthen
	Tone when keys are
	Confirmation/error tone after making entries, advisory tone when a new message has been received:
	Confirmation use to select On or Off
	Warning tone when there are fewer than 10 minutes of talktime remaining (every 60 seconds):
	▶ □ Battery ▶ use to select On or Off
	Warning tone when the handset is moved out of range of the base station:
	Out of Range: use to select On or Off
	Save settings: Save

There is no battery warning when the baby monitor is activated.

Fast access to numbers and functions

Number keys: It is possible to assign a number from the directory to the keys 0 _ and 2 to 9.

Display keys: The left and right display keys have a **function** preset by default, but the keys can be re-assigned.

You can then dial the number or start the function by simply pressing a key.

Assigning a number to digit keys (quick dial)

You must assign a number to the digit key.

Press and hold the digit key

۸r

▶ Briefly press the digit key ▶ Press the display key Quick Dial

The directory opens.

... use
 to select an entry
 OK
 ... use
 to select a number if necessary
 OK ...
 the entry is saved to the digit key

If you delete or edit the entry in the directory at a later date, this will not affect the assignment to the number key.

Dialling a number

Press and hold the digit key ... the number is dialled immediately

Handset

or

▶ Briefly press the digit key ... the number/name (possibly in abbreviated form) is shown on the left display key ▶ ... press the display key ... the number is dialled

Changing the digit key assignment

▶ **Briefly** press the digit key ▶ **Change** ... the directory is opened ... possible options:

Change the assignment: ▶ ... use 🚺 to select an entry ▶ OK ▶ ... select a number if

required NOK

Assigning display keys, changing assignments

Press and hold the left or right display key in idle status . . . the list of possible key assignments is opened
 . . . use
 to select function
 OK . . . possible options:

Quick Dial Assign a number from the directory to the display key

Baby Monitor Set and activate/deactivate baby monitor

Starting a function

With the telephone in idle status: > Briefly press ... the assigned function is executed

Resetting the handset to the default settings

Reset any individual settings and changes that you have made.

▶ ... use to select Settings OK System OK Handset
Reset NK Yes ... the handset's settings are reset

The following settings are **not** affected by a reset

- Registration of the handset to the base station
- · Date and time
- Directory entries and call lists
- SMS lists

System

Date and time

To ensure you have the correct time for incoming calls and to use the alarm clock and calendar, for example, the date and time must be set.

If the date and time have not yet been set on the handset, the display key Time appears.

Press the display key Time

or

Own area code

Your area code (international and local area code) must be saved on the phone before you can transfer phone numbers (e.g. in vCards).

Some of these numbers are already preset.

Edit the number:

Example

Activating/deactivating music on hold

```
▶ ... use to select Settings ▶ OK ▶ Audio Settings ▶ OK ▶ Music on hold ▶ Change ( = on )
```

Changing the system PIN

Secure the telephone's system settings with a system PIN. You have to enter the system PIN when you register or de-register a handset, change local network settings, perform a firmware update or reset the phone to default settings.

Change the telephone's 4-digit system PIN (default setting: 0000):

Resetting system PIN

Resetting the base station to the original PIN 0000:

▶ Unplug the network cable from the base station ▶ Press and hold the Registration/Paging key on the base station ▶ At the same time reconnect the network cable to the base station ▶ Press and hold the key for at least 5 secs . . . the base station is reset and the system PIN is set to 0000

All handsets are de-registered and must be re-registered. All settings are returned to default settings.

Restoring the phone to default settings

When the settings are reset

- · the date and time are retained,
- handsets are still registered,
- · the system PIN is retained,
- Maximum Range is activated and No Radiation is deactivated.
- ▶ ... use to select Settings ▶ OK ▶ System ▶ OK ▶ Base Reset ▶ OK ▶ ... use to enter system PIN ▶ OK ▶ Yes ... the base station is restarted. The restart takes around 10 seconds.

Appendix

Customer Service & Assistance

Do you have any questions? As a Gigaset customer, you can find help quickly in this User Manual and in the service section of our Gigaset online portal www.gigaset.com/service.

Please register your phone online right after purchase.

This enables us to provide you with even better service regarding questions or a warranty claim. In order to contact our customer service via email, please use the email contact form from our Gigaset online portal after selecting your home country.

Our representatives are also available on the telephone hotlines for consultation.

Australia	numero, in quanto si tratta di un numero urbano nazionale). Jordan

Customer Service & Assistance

Please have your record of purchase ready when calling.

Replacement or repair services are not offered in countries where our product is not sold by authorised dealers.

Questions and answers

Possible solutions are available online at → www.gigaset.com/service ▶ FAQ

Troubleshooting

The display is blank.

- The handset is not activated. Press and hold
- The battery is empty. ▶ Charge the battery or replace it (→ p. 7)

"No Base" flashes on the display.

- The handset is outside the range of the base station. Move the handset closer to the base station
- The base is not activated. Check the base station power adapter
- The base station's range is reduced because Maximum Range is deactivated.
 - Activate Maximum Range (→ p. 35) or reduce the distance between the handset and base station

"Please register handset" flashes on the display.

Your settings are not accepted.

 The wrong profile has been set. ▶Set Profile Personal ... then make changes to the device settings (→ p. 57).

The handset does not ring.

- The ringtone is deactivated. Activate ringtone (p. 58)
- Call forwarding is set. ▶ Deactivate call forwarding (→ p. 19)
- The phone does not ring if the caller has withheld his number.
 - ▶ Activate the ringtone for anonymous calls (→ p. 36).
- The phone does not ring during a specific period or for certain numbers.
 - ► Check the time control for external calls (→ p. 36)

No ringtone/dial tone from the fixed line network.

Incorrect phone cable. Please always use the phone cable supplied or ensure that the pin
connections are correct when purchasing from a retailer (pp. 69).

The connection always terminates after approx. 30 seconds.

A repeater (earlier than Version 2.0) has been activated or deactivated (→ p. 52).
 Switch the handset off and back on again (→ p. 10).

Error tone sounds after system PIN prompt.

You have entered the wrong system PIN. ▶ Repeat the process, reset the system PIN to 0000 if required (→ p. 62)

Forgotten system PIN.

▶ Reset the system PIN to 000 (→ p. 62)

The other party cannot hear you.

• The handset is "muted". ▶ Activate the microphone again (→ p. 17)

Some of the network services do not work as specified.

• Features are not enabled. • Contact the network provider for details.

The caller's number is not displayed.

- Calling Line Identification (CLI) is not enabled for the caller. The caller should ask the network provider to enable Calling Line Identification (CLI).
- Calling Line Identification Presentation (CLIP) is not supported or enabled by the network provider.
 Ask the network provider to enable Caller Line Identification Presentation (CLIP).
- The telephone is connected via a PABX or a router with an integrated PABX (gateway) that
 does not transmit all information.
 - Reset the system: Briefly pull out the power plug. Reinsert the plug and wait until the device restarts.
 - Check the settings on the PABX and activate phone number display, if necessary. To do this, search for terms such as CLIP, calling line identification, telephone number identification, caller ID, ... in the system user guide or ask the system manufacturer.

You hear an error tone when keying in (descending tone sequence).

 Action has failed/invalid input. Repeat the process. Read the display and refer to the user quide if necessary.

You cannot listen to messages on the network mailbox.

Your PABX is set to pulse dialling. Set your PABX to tone dialling.

No time is specified for a message in the call list.

Date/time are not set. > Set the date/time.

Registration or connection problems with a Bluetooth headset.

- Reset the Bluetooth headset (see headset user guide).
- ▶ Delete the registration data on the handset by de-registering the device (→ p. 45).
- ▶ Repeat the registration procedure (→ p. 45).

Exclusion of liability

Your handset's display consists of pixels. Each pixel consists of three sub-pixels (red, green, blue). It may be the case that a sub-pixel is missing or has a colour deviation.

A warranty claim is only valid if the maximum number of permitted pixel errors is exceeded.

Description	Maximum number of permitted pixel errors
Colour illuminated sub-pixels	1
Dark sub-pixels	1
Total number of coloured and dark sub-pixels	1

Signs of wear on the display and casing are excluded from the warranty.

Manufacturer's advice

Authorisation

This device is intended for analogue phone lines in your network.

Country-specific requirements have been taken into consideration.

We, Gigaset Communications GmbH, declare that this device meets the essential requirements and other relevant regulations laid down in Directive 1999/5/EC.

The EC declaration of your country according to 1999/5/EC can be found at: www.gigaset.com/docs.

This declaration could also be available in the "International Declarations of Conformity" or "European Declarations of Conformity" files.

Therefore please check all of these files.

Environment

Our environmental statement

We at Gigaset Communications GmbH are aware of our social responsibility. That is why we actively take steps to create a better world. In all areas of our business – from product planning and production to sales and waste of disposal – following our environmental conscience in everything we do is of utmost importance to us.

Learn more about our earth-friendly products and processes online at www.gigaset.com.

Environmental management system

Gigaset Communications GmbH is certified pursuant to the international standards ISO 14001 and ISO 9001.

ISO 14001 (Environment): Certified since September 2007 by TÜV SÜD Management Service GmbH.

ISO 9001 (Quality): Certified since 17/02/1994 by TÜV SÜD Management Service GmbH.

Disposal

Batteries should not be disposed of in general household waste. Observe the local waste disposal regulations, details of which can be obtained from your local authority.

All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.

This crossed-out wheeled bin symbol on the product means the product is covered by the European Directive 2002/96/EC.

The correct disposal and separate collection of your old appliance will help prevent potential negative consequences for the environment and human health. It is a precondition for reuse and recycling of used electrical and electronic equipment.

For more detailed information about disposal of your old appliance, please contact your local council refuse centre or the original supplier of the product.

Care

Wipe the device with a **damp** cloth or an antistatic cloth. Do not use solvents or microfibre cloths

Never use a dry cloth; this can cause static.

In rare cases, contact with chemical substances can cause changes to the device's exterior. Due to the wide variety of chemical products available on the market, it was not possible to test all substances.

Impairments in high-gloss finishes can be carefully removed using display polishes for mobile phones.

Contact with liquid

If the device comes into contact with liquid:

- 1 Disconnect the power supply.
- 2 Remove the batteries and leave the battery compartment open.
- 3 Allow the liquid to drain from the device.
- 4 Pat all parts dry.
- 5 Place the device in a dry, warm place **for at least 72 hours** (**not** in a microwave, oven etc.) with the battery compartment open and the keypad facing down (if applicable).
- 6 Do not switch on the device again until it is completely dry.

When it has fully dried out, you will normally be able to use it again.

Technical data

Batteries

Technology: 2 x AAA NiMH

Voltage: 1.2 V

Capacity: 750 mAh

Handset operating times/charging times

The operating time of your Gigaset depends on the capacity of the battery, its age and the way it is used. (All times are maximum possible times.)

Standby time (hours) *	300/180
Talktime (hours)	12
Operating time with 1.5 hours of calls per day (hours) *	120/90
Charging time in base station (hours)	5
Charging time in charging cradle (hours)	7

^{*} No Radiation on/off, without display backlight in idle status (Setting the display backlight p. 56)

The operating times of the phone will increase if a more efficient battery is used.

Base station power consumption

Standby: Handset in charging cradle approx. 1.2 W

Handset away from charging cradle approx. 0.55 W

During a call: approx. 0.65 W

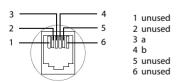

General specifications

DECT standard	Supported
GAP standard	Supported
No. of channels	60 duplex channels
Radio frequency range	1880-1900 MHz
Duplex mode	Time division multiplexing, 10 ms frame length
Repetition frequency of the transmission pulse	100 Hz
Duration of the transmission pulse	370 μs
Channel grid	1728 kHz
Bit rate	1152 kbit/s
Modulation	GFSK
Language code	32 kbit/s
Transmission power	10 mW average power per channel, 250 mW pulse power
Range	Up to 50 m indoors, up to 300 m outdoors
Base station power supply	230 V ~/50 Hz
Environmental conditions for operation	+5 °C to +45 °C; 20% to 75% relative humidity
Dialling mode	DTMF (tone dialling)/PD (pulse dialling)
