## Connection

1. Connect a USB keyboard to an USB interface with a computer of an external device that doesn't conflict with a traditional 104 or 87 keyboard which can be installed on a single computer.
2. The upper right corner indicator lights up, start the game.

## Installation

1. The M key was set in the little finger position of the left hand, the original CAPSLOCK key. This is convenient and fast, there no longer is a need to move the left hand to view the map at any time.
2. B key was enlarged alongside the running key.
3. The unusual V key was moved to the left of the ALT key cancelling Windows menu key to avoid maloperation of the commonly used ALT key.
4. The spacebar area was enlarged in the lower right corner.
5. Updated and added the emoji key.
