

VENTION®

HDMI Bi-Direction Switcher / Splitter

User's guide | VWS-B54

Product Description

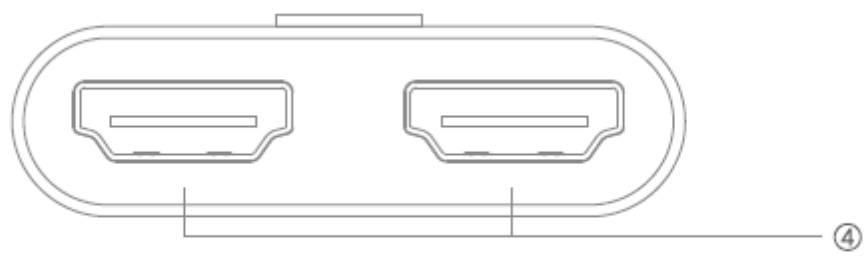

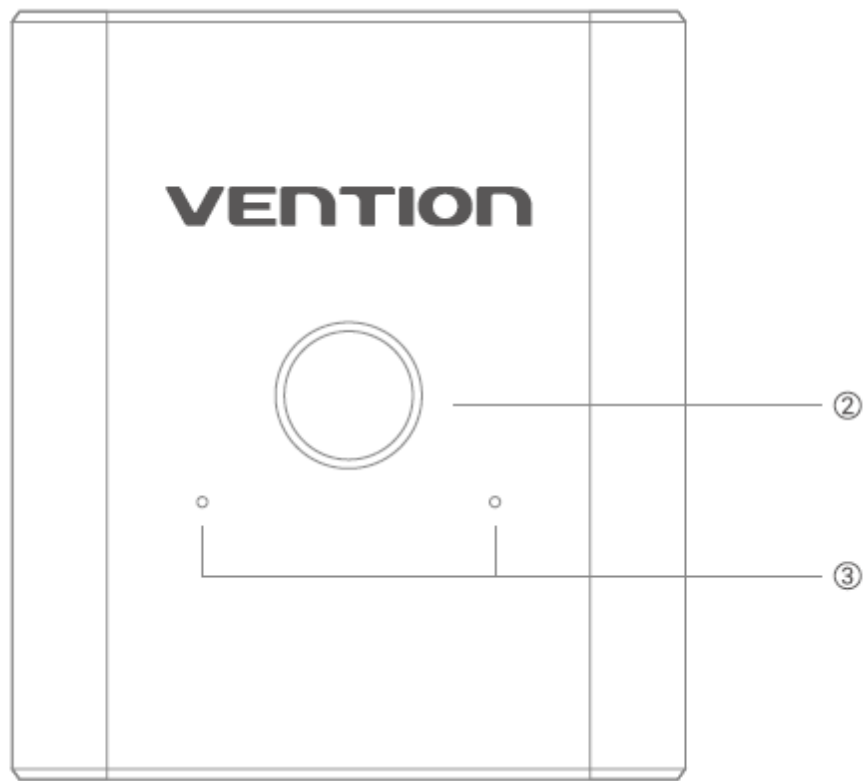

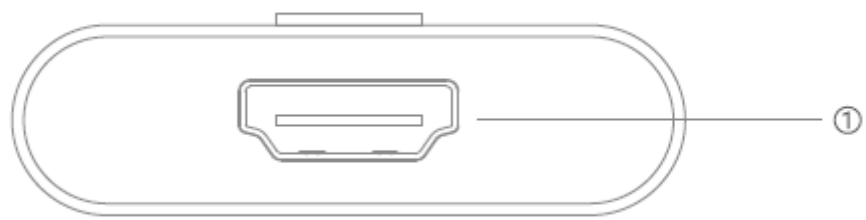

Vention HDMI Bi-Direction Switcher combines HDMI 2 in 1 out and 1 in 2 out. This product connects two HDMI signal sources (such as computer, set-top box, etc.) to output on one HDMI display device (such as TV, projector, monitor, etc.). It realizes the result of two channels of the signal source to share one channel display device at the same time. One HDMI signal source can be connected to the output of two HDMI display devices to realize one channel source sharing a two-way display device. This product is small in size and is widely used on many occasions such as home video, conference demonstrations, and multimedia teaching.
