Failure resolutions

If the watch can not connect with the server at the first use,,and send the sms command that shows the device is not online.Please check it as below:

- 1). Please check to see if the watch SIM card is GSM net work. For example, this device will not support China Unicom SIM card.
- 2). Please check to see if the watch SIM card is with 2G data network, as this device can only work with 2G network.
- 3). Please check to see if the IP and ID number is correct, you must make sure that the ID number pasted on the watch is the same as the ID number of the device itself. The user can check the ID number of the device itself by sending the message "pw, 123456, ts#" from your cellphone to the watch (The watch must have insert a SIM card and powered on). Please ask the distributor for help if still any problems.
- 4). There are two situations if you can not register on the APP.
 1. The ID number do not exist or have already been registered, please contact the distributor for help.

2. Your register account name have already been registered, please change to another new account name.

QR code for scanning

Scanning this QR code to down lode the APP for Android and IOS users.
